A Trip to Europe
Pay Off That Debt

A HUNDRED PRIZES

Totaling \$1,930⁰⁰

\$1,000⁰⁰ First Prize

\$300⁰⁰ Second Prize

And the Smallest Prize -- \$3.00

READ THE RULES ON THE NEXT PAGE

Finish This Sentence in 100 Words or Less--Win \$1,000⁰⁰

"I Think We Should Plant More Trees Because---"

DO NOT MISS THIS OPPORTUNITY—*Read these Rules*

Follow them—for if you do not your entry would naturally be disqualified, and the rules are so simple and the returns so great if you are among the winners, that you cannot afford to overlook them.

1. Finish this sentence in 100 additional words, or less, "I think we should plant more trees because". Write your entry on one side of a sheet of paper, signing your name and address. In case of a tie another incomplete sentence will be presented to the tied contestants concerning the common knowledge of trees.

2. In preparing your entry in this contest, all of the rules hereinafter given must be closely followed. A copy of the rules set forth herein is posted in the office of the Treasurer of The House of Gurney, Inc., at Yankton, South Dakota, a copy of which rules may be obtained by contestants upon written request, and contestants agree to be bound to such rules so posted.

3. If your entry is accompanied by an order for one or more of the special collections of merchandise listed in this contest circular amounting to \$2.00 or more, you will be eligible to compete for the following prizes:

First Prize - - -	ONE THOUSAND DOLLARS
Second Prize - - - - -	\$300.00
Third Prize - - - - -	150.00
Fourth Prize - - - - -	75.00
Fifth Prize - - - - -	50.00
Sixth Prize - - - - -	25.00
Seventh to Tenth Prize Inclusive -	\$10.00 each
Eleventh to Twentieth Inclusive -	5.00 each
Twenty-first to Hundredth Inclusive	3.00 each
CASH TOTAL - - - - -	\$1930.00

Prizes to Contestants who do not make Purchases. An entry with no order or purchase as described above will be recognized and winners will receive in cash 1-20th of the cash awards if their entry or entries are entitled to prizes.

4. No person has authority to alter, modify, or change these rules.

5. Your entry must be written in the English language.

6. Your entry may be made with pencil, pen and ink, or a typewriter, but the writing and entire entry must be plainly legible, neat and readable. Contest is limited to the United States and subject to Federal, State and Local regulations.

7. Judges shall be appointed by D. B. Gurney or an officer of The House of Gurney, Inc., and contestants agree with The House of Gurney, Inc., that the Judge's decisions on all matters (including awarding of prizes and method of examining and judging the entries) shall be final, and The House of Gurney, Inc., is accepting your entry on that condition which is mutually agreed to.

8. The above judges will judge the entries submitted on the following points: A. The manner in which the entry complies with the posted rules. B. The best reasons in the opinion of the judges given for planting trees.

9. The House of Gurney, Inc., or the judges appointed, in their discretion, reserve the right to disqualify in this contest any employee of The House of Gurney, Inc., or their relatives, professional contestants, or to disqualify any person whose entry or compliance with the rules of the contest, they may decide is not in good faith, or for any reason whatsoever. (The judges may use such methods to determine these and all questions as they may deem proper and their method and determination shall be final.)

10. This contest starts at 8:00 o'clock Central Standard time, January 15, 1938, and ends at 12:00 o'clock midnight Central Standard Time, March 1, 1938. Entries may be mailed and postmarked any time after the start of the contest, providing they are mailed no later than midnight of March 1, 1938, but they must be received by The House of Gurney, Inc., at Yankton, South Dakota, by 12:00 noon Central Standard Time, March 4, 1938.

11. The prize winners will be announced over Radio Station WNAX between 12:40 and 1:40 p. m. Central Standard Time on the 12th day of March, 1938. In case two or more contestants tie for any prize, sufficient time shall be allowed for tying contestants to complete the second uncompleted sentence.

YOUR ENTRY—WITH AN ORDER FOR ONE OR MORE OF THE CONTEST COLLECTIONS—IS ELIGIBLE TO COMPETE FOR THE BIG PRIZES. THE COLLECTIONS ARE ON THE NEXT PAGES -- Turn the sheet and take your pick

ORDER ONE OR MORE OF THESE \$2.00 COLLECTIONS

and qualify your entry for the Big Cash Prizes.

ALL FOR ONLY \$2.00 POSTPAID

\$2.00 MAY BE WORTH \$326.10 PLUS THE PRIZE

THIS IS DON GURNEY SPEAKING, FOLKS: "D. B. and I sat down the other day to figure out how much a person who purchased and planted D. B. Gurney's Famous Garden Seed Collection could expect during a normal growing season.

After estimating very conservatively the amount of produce that these seeds are capable of producing during a normal year, we computed the value of the crop, and the results were very surprising indeed—pleasantly surprising for they totaled up to \$326.10, not counting fresh beans and peas, lettuce and radishes, parsley and spinach that could be used by the grower on his own table."

NURSERY COLLECTIONS

D. B. GURNEY SAYS:—

"I have watched the Nurseries here at The House of Gurney, off and on for over sixty years, and I have never seen finer trees, shrubs, and flowers. In fact, I do not hesitate to say, Our Nursery Stock this year is the BEST YOU WILL FIND ANYWHERE."

PLUM COLLECTION—All 4 to 5 ft., 1 year. These Plum Trees are Extra Fine. The Waneta is Professor Hansen's Masterpiece—a large, red Plum and a heavy producer. The Fiebing Prize is a Minnesota Plum—large and excellent quality. The Black Sapa will usually produce a heavy crop of quality fruit the first year after planting. Wyant is a good American Plum and it pollinizes the others for better crops.

Six, 4 to 5 ft. Plum Trees—\$2.00—POSTPAID

2 Waneta 1 Fiebing Prize 2 Sapa 1 Wyant

NEW PRODUCTIONS

from Gurney's Trial Grounds

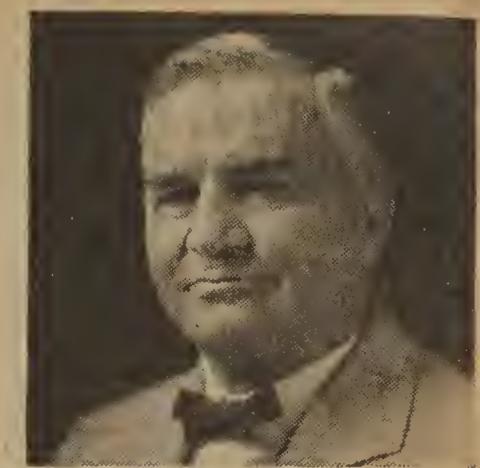

"Hello Folks:— - - - This is 'D. B.' at WNAX"

Almost from the beginning, I have been closely associated with agriculture in the Prairie States. I have seen it develop from its simplest form, through various stages of expansion. I have seen the Corn Belt pushed three hundred miles north by the introduction of NEW short season varieties, and fruits have grown and flourished where no fruits had ever grown before.

I am glad to have had some part in this expansion by trying out NEW plants and then growing and selling them throughout the Middle West.

Each year we have offered SOMETHING NEW that has proved its value in our Trial Grounds and this year--1938--we have some things that are as good as The Hansen Hybrid Plums were twenty-five years ago.

THE SUPPLY IS LIMITED, so it will have to be "first come, first served." This is a BANNER YEAR for New Varieties.

NEW VARIETIES FROM GURNEY'S

THE NEW HANSEN APRICOTS

For many years our South Dakota Plant Wizard, Prof. N. E. Hansen, has been working on the production of apricots. We have twelve of his best. They are of very good size and quality, are excellent canned and, are hardy. We have the trees for the first time this year. PRICES: Each 85c; 6 for \$4.50. One Ea. of 12 for \$7.80. (See page 57 for descriptions.)

A NEW PEACH

WAGONER—This is from a Seedling growing here in Yankton. Large in size. Excellent in quality and its yellow base almost entirely covered with red. The Wagoner has proved of unusual hardiness and surely is a leader in quality. Only a few available. While they last—75c each. (See page 51.)

NEW FLARE RHUBARB

A NEW RHUBARB

FLARE—Well named for its bright red stalks. A vigorous grower, erect, compact and stems red from base to tip. Flare Rhubarb is tender, juicy, and Crisp. Its flavor is better; and quality, best. Price: Ten for \$1.10. (See page 60.)

PETER PIPER PEAR

What became of the Pickling Pears that Peter Piper Picked? That's easy . . . "D. B." has them in his cellar all pickled . . . And they are mighty good. We think a lot of these PETER PIPER PICKLING PEARS—Hardy, Blight Resistant, and Annual Producers.

The number available is not great. First Come, First Served! Order yours NOW. Price: 65c Ea.; 3 for \$1.75; 5 for \$2.50. (See page 51.)

HYBRID CORN

We are satisfied that HYBRID CORN has come to stay. Farmers of the Corn Belt have tried it out. It has produced better and more profitable crops. The returns have much more than covered the little extra cost per acre.

Money spent for good Hybrid seed corn is an investment that will repay you many times the cost of the seed. We handle only good Hybrid corn.

Good Hybrid Corn is drought resistant. It has shown its greatest superiority over other corn in dry, unfavorable seasons. Hybrid Corn would have increased the 1937 South Dakota corn yield many million bushels. For complete description see page 40.

PRICE

IOWA HYBRID 931

1 lb., 30c; 5 lbs., \$1.00; 14 lbs., \$2.20; 28 lbs., \$4.00; 1 bu., \$7.75; 2 bushels or more at \$7.50 per bushel.

EARLY KALO

EARLY KALO THE BEST GRAIN SORGHUM

The 1937 corn crop in western Nebraska and the Dakotas was generally very poor—in many places a total failure. Grain sorghums, planted next to these dried up, barren corn fields, were green and thrifty, producing an abundance of grain and fodder.

Early Kalo is the best grain sorghum for the North. It is an immense producer of grain. Yields of 75 bushels per acre have been reported. Matures a seed crop in about 90 days, and in a normal season will ripen in any part of South Dakota.

This is one of the new better grain sorghums. The supply is limited. Order early before our stock is exhausted.

100 lbs. \$5.90

100 lbs. will plant 20 acres

MASTER REMEDIES ARE GUARANTEED

DON'T TAKE CHANCES

Live Stock Prices Are High . . . Protect Your Stock Against Disease with Master Remedies

MAKE YOUR 1938 GARDEN A GURNEY GARDEN

TRANSPORTATION—Parcel post rates are usually lower than express or freight on orders weighing less than 50 lbs. If you wish your order to come by parcel post, be sure and inclose money for postage on any articles not postpaid by us.

Garden seeds from The House of Gurney are the best quality money can buy. They are either grown by us or are grown for us under contract from our own stock seed.

In our trial grounds each year we test over 5000 different kinds of flowers and vegetables, discarding the poor ones and listing only those which we would be satisfied with for our own planting.

We Pay Transportation Charges on All Vegetable and Flower Seeds in Pkts., Ounces, $\frac{1}{3}$ -Pints, One-Pound and 5-Pound Lots. Something Special Will Be Packed FREE with Each Order.

NON-WARRANTY—The House of Gurney, Inc., does not give any warranty, expressed or implied, as to description, quality, productiveness, or any other matter of seeds, bulbs or plants which it sends out, and will not be in any way held responsible for the crop.

GARDEN SEED PRICES

Are Lower at Gurney's

Most of you have raised gardens from Gurney's seed and are satisfied with Gurney quality.

Now, compare Gurney's prices with others, and I am sure you will make a substantial saving by making your 1938 garden a Gurney garden.

TREATED GARDEN SEED

To Destroy Seed Borne Diseases

Certain diseases of vegetables are carried on the seed and may cause the loss of your entire crop. Gurney's have insured you against losses caused in this manner.

All garden seed sold by us is treated here at Yankton before it is sent to you. This treatment absolutely kills all seed borne diseases and, also, increases the germination and vigor of the seed. This is rather costly both in labor and material, but is a service you have a right to expect from your seed merchant.

We are pleased that we are the first seedsmen in the Northwest to give this service.

ASPARAGUS

• MARY WASHINGTON

Asparagus is one of the best vegetables we have and is very easy to raise. Once established, an Asparagus bed will last for many years. Sow early in the spring in drills two inches deep. Mulch heavily in the fall and you will have an Asparagus bed that will last a lifetime. We list only the Mary Washington variety, which is earlier and larger than any other besides being absolutely rust-resistant.

The large straight stalks are dark green in color. The tips are tight and do not start to branch until they are nearly a foot high. This is the finest Asparagus both for the home garden and for market. Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 25c; 1 lb., 75c.

SUMMER ASPARAGUS SQUASH

Known as "Cut and Come Again." This most delicious vegetable is worth a place in all gardens. The plant makes a strong growth, like summer crook-neck squash. The fruit should be cut at four to six inches long and should not be allowed to mature, as it stops the formation of new fruit. Cook it just the same as asparagus. Yields wonderfully. Pkt., 5c; 1 oz., 15c; $\frac{1}{4}$ lb., 40c.

GROUND ALMOND

Is a very interesting novelty as one hill will produce as many as 125 to 150 nuts. They should be sown in good mellow ground, they have a very fine almond flavor. The nuts are about three-quarters of an inch in length, having a thin brown skin and snow white meat that becomes sweeter after the nuts have been harvested and dried for a time. The nuts will mature in the fall after the first frost. Pkt., 7c; $\frac{1}{4}$ lb., 20c; 1 lb., 45c.

Gurney's Money-Saving Garden Collection

The varieties for this garden were selected by Donald Gurney. Everything will please you and make a garden you can be proud of. Order our money saving garden collection and get \$1.36 worth of the best garden seed for only \$1.00.

BROCCOLI—Winter Cauliflower

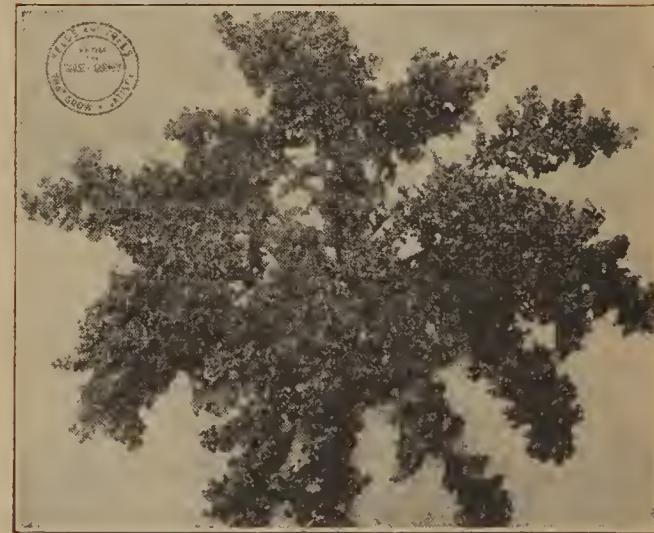

• ST. VALENTINE

This is the standard variety of Broccoli grown extensively in the Northwest for shipping to the eastern markets. St. Valentine is a large-headed variety of good appearance and excellent quality. Pkt., 5c; $\frac{1}{2}$ oz., 20c; 1 oz., 35c; $\frac{1}{4}$ lb., \$1.15.

• ITALIAN GREEN—Sprouting

We have a fine strain of this choice Italian vegetable which has only recently become a favorite in American markets. Plants do not make solid heads but produce an abundance of light green, tender sprouts with loose flowerheads at the end. It is cooked like Spinach. Sow in May, harvest in August. Very delicious and tasty. Pkt., 5c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c; $\frac{1}{4}$ lb., 75c.

KALE OR BORECOLE

Dwarf Green Curled Kale

Sow the seed from early spring until the middle of August. The flavor of the plants improves after they have been touched by frost. One ounce sows 500 feet of drill.

• DWARF GREEN CURLED

Hardier than Cabbage. Leaves curly as Parsley, tender and very fine flavor. Immense quantities produced in South find ready sales in the North. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 65c.

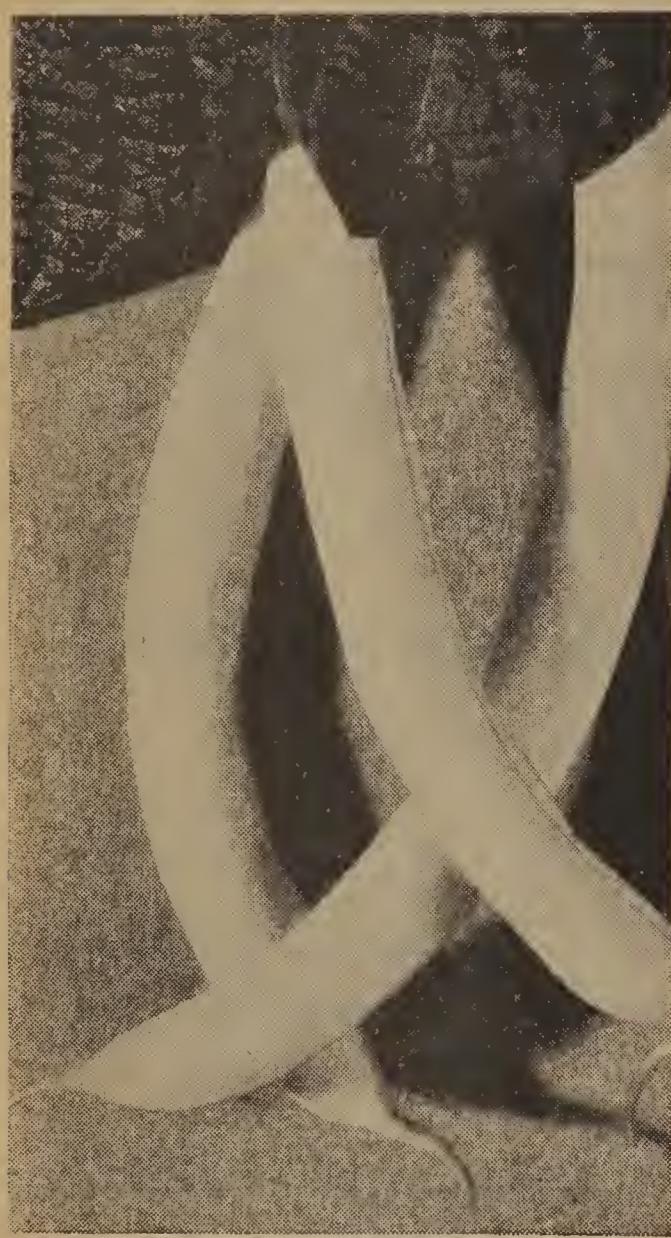

• TALL SCOTCH CURLED

One of the very best plants for greens, well known and much planted by German-Americans. It is much hardier than cabbage. The leaves are very curly. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 65c.

BRUSSELS SPROUTS

Grown for the small solid heads that grow in great numbers on the main stem. When these heads begin to form, remove the lower leaves of the plant so that all the nourishment will go into the sprouts. Brussels Sprouts are more tender and finer flavored than cabbage. Plant in hotbed, then transplant to open ground. They are quite hardy and will form their best heads after frost. Pkt., 6c; $\frac{1}{2}$ oz., 15c; oz., 25c; $\frac{1}{4}$ lb., 60c; 1 lb., \$1.75.

GURNEY'S BEANS—STRINGLESS, BRITTLE AND TENDER

Pencil Pod Black Wax

WAX POD BEANS

● PENCIL POD BLACK WAX

(55 days to maturity.) A most delicious rich dark yellow snap bean, being so tender and brittle that by taking it at either end and bending it, it will fly into several pieces. Abundant bearer. Practically rust-proof and even in the dry season just past, made a good crop of delicious beans. Seed black when ripe. $\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.20; Postpaid. Not Prepaid: 10 lbs., \$1.70; 30 lbs., \$4.65; 60 lbs., \$8.90.

● GURNEY'S EARLIEST BRITTLE WAX

(55 days to maturity.) This remarkable early black eyed white bean, delicious in quality, stringless in all stages of its growth, combined with its extreme earliness, makes it one of the most desirable for the garden, and it is of that degree of brittleness that makes it extra desirable for cooking purposes in its golden waxy stage. $\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.20; Postpaid. Not Prepaid: 10 lbs., \$1.70; 30 lbs., \$4.65; 60 lbs., \$8.90.

● GURNEY'S EVERBEARING WAX RUST-PROOF BUSH BEAN

(70 days to maturity.) The great campaign carried on by the government for the canning of vegetables applied especially to fresh beans, the wax and green podded beans in the pod. This created a very heavy demand for beans suitable for canning purposes, and you will find this not only the very best for canning, but the best for using fresh as string or snap beans. Seed is red with buff stripes. $\frac{1}{3}$ pt., 15c; 1 lb., 30c; 5 lbs., \$1.25; Postpaid. Not Prepaid: 10 lbs., \$1.90; 30 lbs., \$5.10; 60 lbs., \$9.50.

Health Value of Beans

Calcium	.046%	Iron .0011%

CULTURE: planting should be delayed until danger of frosts is past. Plant in rows about 2 feet apart 5 or 6 inches apart in the rows. Cover seed about 2 inches. Keep well cultivated but do not cultivate when the plants are wet.

For a succession of this delicious vegetable plant every two weeks until the middle of August. 1 lb. for 100 feet of row. 60 lbs. per acre.

● GOLDEN WAX

(50 days to maturity.) The Golden Wax is probably the earliest, and we believe the most generally planted and satisfactory of any of the old varieties. Pods are a bright, waxy yellow, good length, entirely stringless, and of a fine buttery flavor. An excellent sort for canning or pickling. A very heavy bearer. The seed is white, mottled, red and purple. $\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.20; Postpaid. Not Prepaid: 10 lbs., \$1.70; 30 lbs., \$4.65; 60 lbs., \$8.90.

POLE OR CLIMBING BEANS

● KENTUCKY WONDER OR OLD HOMESTEAD

(65 days to maturity.) This climbing variety is very vigorous and productive and bears its pods in large clusters. The pods are green, very long, often being nine or ten inches, nearly round, stringless and very crisp when young, and so fleshy that they are greater in width than breadth. $\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.20; Postpd. Not Prepaid: 10 lbs., \$1.70; 30 lbs., \$4.65; 60 lbs., \$8.75.

● CHINESE YARD LONG ASPARAGUS

Pods are nearly up to name, reaching a length of 30 to 36 inches, usually 18 to 42 inches. Your friends will wonder at and admire your plants and they are of excellent table quality, with a rich asparagus flavor. Do not be without this valuable curiosity. It is a pole bean of quick growth, with neat foliage, not attacked by insects. 1 oz., 10c; $\frac{1}{3}$ pt., 15c; 1 lb., 50c.

LIMA BEANS

● FORDHOOK BUSH LIMA

(75 days to maturity.) The very best large seeded variety. The pods, which are produced in large clusters, are about 5 inches long, each containing four to five large beans of exceptionally fine quality. $\frac{1}{3}$ pt., 15c; 1 lb., 30c; 5 lbs., \$1.45; Postpaid. Not Prepaid: 10 lbs., \$2.30; 30 lbs., \$6.20; 60 lbs., \$11.75.

● IMPROVED HENDERSON BUSH LIMA

(65 days to maturity.) This is the very early Sieva or Butter Bean of the South. The pods are ready for use a week earlier than those of other Bush Limas and the plants are immensely productive. $\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.20; Postpaid. Not Prepaid: 10 lbs., \$1.70; 30 lbs., \$4.65; 60 lbs., \$8.90.

NAVY BEANS

A great many people grow what they suppose is the Navy Bean, but is generally a mixed, uneven bean that cooks uneven and lacks quality. Our Navy Beans are absolutely pure and hand picked. 1 lb., 20c; 5 lbs., 85c; Postpaid. Not Prepaid: 10 lbs., \$1.05; 30 lbs., \$2.55; 60 lbs., \$4.75; 100 lbs., \$7.90.

A Box of New Tendergreen Beans

GREEN POD BEANS

● NEW TENDERGREEN

An entirely new green podded bush bean, enormously prolific, entirely stringless, and bearing a profusion of finely flavored beans that are more tender than those of any other variety. The pods of Tendergreen are long and round, a lovely dark green in color, absolutely free from strings and fibre, and are of the finest eating qualities. Plants are of strong upright dwarf growth. Tendergreen is a bean of real merit, combining productiveness and hardiness with the highest quality, and we urge a generous planting. Splendid for canning. Matures in 55 days. $\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.20; Postpd. Not Prepaid: 10 lbs., \$1.70; 30 lbs., \$4.65; 60 lbs., \$8.90.

● BURPEE'S STRINGLESS GREEN POD

(50 days)—A very desirable dwarf green podded snap sort for the home garden and largely grown for the market. The plants are large, spreading and productive. The pods are medium green, five to six inches long, cylindrical, larger than those of Red Valentine but are quite as fleshy, of equally high quality, and remain crisp and tender longer. Seed of medium size and length, dark brown. $\frac{1}{3}$ pt., 10c; 1 lb., 25c; 5 lbs., \$1.15; Postpd. Not Prepaid: 10 lbs., \$1.60; 30 lbs., \$4.50; 60 lbs., \$8.40.

SHELL BEANS

● Dwarf Horticultural or Cranberry (55 days)—One of the best dwarf sorts for green shell beans and can be used early as a green podded snap bean. The plants are very productive. The mature pods are about five to five and one-half inches in length, broad and thick. $\frac{1}{3}$ pt., 15c; 1 lb., 27c; 5 lbs., \$1.25; Postpaid. Not Prepaid: 10 lbs., \$1.80; 30 lbs., \$4.90; 60 lbs., \$9.25.

House of Gurney Gentlemen:

We have been using Gurney's Garden Seeds here in Alaska for 4 years and they are very good.

I think every seed came up 100 per cent.
Yours very truly,
Mrs. Harold W. Moore, Palmer, Alaska

GURNEY'S AMERICAN GROWN BEETS AND MANGELS

BEETS AND MANGELS FOR WINTER FEED WILL MAKE BIG EGG AND CREAM CHECKS

CULTURE: The best soil for beets is a deep sandy loam, although they are easily grown and will do well in most any soil. For early beets plant as early in the spring as the ground can be worked, sowing a little later for the main crop. Winter beets should be planted about the 1st of June. Plant the seed about 1 inch deep and in rows 18 inches apart. Thin the plants to 3 inches in the row. One ounce of seed will plant 50 feet; 6 pounds to the acre.

Gurney's Early Model Globe

TABLE BEETS

● GURNEY'S EARLY MODEL GLOBE

The Model Globe Beet is medium early, always even in size, color and shape. A number of newer varieties have been offered since we offered the Model Globe, but they have never equalled this beet in the trial grounds or in the field. One of the most satisfactory uses of the Model Globe Beet is for pickling purposes, using them when they are about 1 1/2 inches through. They retain their color and are of excellent quality. Pkt., 6c; oz., 12c; 1/4 lb., 20c; 1/2 lb., 35c; 1 lb., 65c; 5 lbs., \$3.00 Postpaid.

● IMPROVED EARLY EGYPTIAN

We consider this the best first early beet of all the standard varieties. Best for forcing, best for first out door planting, roots very dark red, rounded on top, flat underneath. Small tops, which allow close planting. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1/2 lb., 35c; 1 lb., 50c.

● CROSBY'S EGYPTIAN

The tops are small. The roots are globe shaped and very smooth. The flesh of our strain is bright vermillion-red, zoned with a lighter shade, very sweet, tender and of excellent quality. This is one of the best for early planting outdoors and is much used for bunching. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1/2 lb., 35c; 1 lb., 55c. 5 lbs. \$2.50 Postpaid.

CHIVES (SCHNITTLAUCH)

Every vegetable grower should become acquainted with this plant. It is extremely hardy, being a perennial; will grow for years. The green leaves are highly prized for seasoning soups, salads and stews.

The provident housewife always has a few clumps in the garden. The flavor resembles very much that of an onion.

Pkt., 7c; 1/2 oz., 20c; oz., 35c.

The House of Gurney, Dear Sirs:

Have been using your seeds along with others for the past three years. Last year your onion seed and Mammoth Long Red Mangel seed brought me the largest yield and best quality I have ever raised. A Satisfied Customer.

GURNEY'S DAKOTA WONDER

[See Colored Picture on Inside Front Cover]

A beautiful smooth, globe shaped beet with small neck and tap root. A pedigreed stock—the result of many years of pure line breeding. The flesh is an intense dark red. You may pull a dozen or a hundred beets and there will be no variation in shape. Cut them and every one will be the same glowing dark red color. They are very early and very good both for bunching and winter use. Pkt., 7c; oz., 15c; 1/4 lb., 30c; 1/2 lb., 45c; 1 lb., 80c; 5 lbs., \$3.50. Postpaid.

● DETROIT DARK RED

A grand beet for bunching for market; tops are exceedingly small and uniformly upright; roots are perfect turnip shape, with small tap roots. The principal fault with most Turnip Beets is the occasional appearance of white rings, and this will be found has been overcome by careful selection of the deepest red beets. Quality is the very best; sweet and tender. Gardeners can safely plant it largely. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1/2 lb., 35c; 1 lb., 60c; 5 lbs. \$2.75 Postpaid.

● SWISS CHARD FOR GREENS

Swiss Chard is grown for its leaves only, as it does not make a bulb like other beets. The leaves are gathered while young and used for greens, or later the mid ribs may be cooked and served the same as Asparagus. Swiss Chard will make more and better greens than any other vegetable. Plant and cultivate the same as beets. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1/2 lb., 35c; 1 lb., 60c.

SUGAR BEETS AND MANGELS

For Winter Feed

The food value in root crops is high and everyone should plant a sufficient acreage so that the hogs and chickens can have a supply every day. It is not unusual to produce 25 ton of mangels to the acre. Plant a sufficient quantity so that the milch cows can get their share and you will increase the flow 25%.

SUGAR BEETS

● WHITE KLEIN WANZLEBEN

This variety has proved to be a very valuable sort, in Colorado and other sections of this country, where it has been thoroughly tested. It has a rather long, slender root, very rich in sugar, and grows deeply sunk in the ground and will yield under average conditions about sixteen tons to the acre, containing 12 to 13 percent of sugar. 1 oz., 7c; 1/2 lb., 25c; 1 lb., 40c; 5 lbs., \$1.75 Postpaid.

Dick Kenaston of Yankton with a Mammoth Long Red Mangel

MANGELS

● MAMMOTH LONG RED

The roots are very large, uniformly straight and well formed. They are easily harvested as about one half the mangel grows above ground. The flesh is white tinged with rose. This strain under careful culture is enormously productive. Our stock will produce the largest and finest roots which can be grown for feeding stock. 1 oz., 7c; 1/2 lb., 25c; 1 lb., 40c; 5 lbs., \$1.75 Postpaid.

● DANISH SLUDSTRUP

This most wonderful Mangel has been awarded a first class certificate several times by the Danish Government, which is the highest honor attained in Agricultural circles in Denmark.

Sludstrup is a long reddish yellow root, but not so long as the Mammoth long red. It grows more above the ground and is very easily harvested. Under favorable conditions they frequently attain a weight of fifteen lbs. each. 1 oz., 7c; 1/2 lb., 25c; 1 lb., 40c; 5 lbs., \$1.75 Postpaid.

● GIANT HALF SUGAR ROSE

As its name implies, this is a half sugar beet. Roots of much greater nutritive value than mangels. Yield nearly as large as the best of the mangels. Roots grow about one-half out of the ground, and are conveniently harvested. 1 oz., 7c; 1/2 lb., 25c; 1 lb., 40c; 5 lbs., \$1.75 Postpaid.

COTTON

Do you know you can raise cotton in the North? I don't mean you should go into it on a commercial scale and compete with the Southern cotton grower. He has trouble enough without that—but why not raise a few plants for a novelty and to show your friends and neighbors? This plant is not only interesting but ornamental. Early maturing Cotton. Pkt., 7c; 1 oz. 15c.

CRESS

Curled or Pepper Grass—The leaves of this small salad plant are much frilled or curled, and are used for garnishing. It is also desirable with lettuce, to the flavor of which its warm, pungent taste makes a most agreeable addition. The plant is of rapid growth, about one foot high. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 65c.

True Water Cress—This is a distinct variety of cress with small, oval leaves. It thrives best when its roots and stems are submerged in water. A fair growth may be obtained in soil which is kept wet but does best when grown along moist banks or in tubs in water-covered soil. It is one of the most delicious of small salads and should be planted wherever a suitable place can be found. Pkt., 7c; 1/2 oz., 20c; 1 oz., 35c; 1/4 lb., \$1.00.

GURNEY'S SWEET AND TENDER CARROTS

CARROTS— A Health Food Good for the Kiddies

● GURNEY'S PIE CARROT

We do not suppose you have ever made or eaten a carrot pie; very few people know that carrots are good for pie purposes and probably none of you have known that any particular variety or kind of carrot would make a better pie than another. Carrots for pie purposes are at least equal to pumpkins, and the pie resembles in flavor the pumpkin pie. It is much more delicious and on account of your being able to use them long before the pumpkins are ripe you have almost a continuous season of carrot pie, commencing with the carrots when they are about one inch through, and using them until the old carrots are gone in the spring. Make the carrot pie just as you would pumpkin pie, and you will be surprised at the deliciousness of it. This particular carrot is better than any other variety for that purpose. Pkt., 6c; oz., 12c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 50c; 1 lb., 90c.

Gurney's Coreless Carrot

GURNEY'S CORELESS CARROT

Just how true the slogan "eat carrots for your complexion" is I don't know; however, I do know that Gurney's New Coreless Carrot is a favorite with all those who have grown this wonderful new carrot.

This is bound to become one of the most popular of the table carrots. In quality it is unsurpassed. Color is a pure orange scarlet and the core undefined. Most varieties of carrots have a well defined and tough core. The size is about 6½ to 7 inches long and 1½ inches thick; same size from top to bottom. The top is very small and has a slightly yellow crown. You will find this, I believe, the most desirable of the table carrots. Pkt., 7c; oz., 15c; $\frac{1}{4}$ lb., 25c; 1 lb., 75c; 5 lbs., \$3.30 Postpaid.

● DANVERS HALF LONG

RED CORED

Through years of selection and breeding, this new strain of Danvers carrot has been improved in every way. The core has been reduced in size, and the color and shape have been improved. It is of medium length, wide shouldered, and of a rich orange color. Danvers is one of the finest bunching carrots. A good winter keeper, and is large enough to outyield almost any other carrot. Fifteen to twenty tons of Danvers carrots per acre is not unusual.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; 1 lb., 70c; 5 lbs., \$3.00 Postpaid.

● OXHEART

Guerande, or Oxheart. Tops small for the size of the roots which are comparatively short, but often reach a diameter of five inches, terminating abruptly in a small tap root. Flesh bright orange, fine grained and sweet. This variety is especially desirable for soil so hard and stiff that longer rooted sorts would not thrive in it. When young, excellent for table use, and when mature equally good for stock.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; 1 lb., 70c; 5 lbs., \$3.00 Postpaid.

The House of Gurney,
Yankton, S. Dak.
Gentlemen:

We ordered seeds from you last year and they were the best we ever had. Your Coreless Carrots are grand!

Yours truly,
Samuel A. Kucera,
Hopkins, Minn.

CULTURE: Sow the seed in drills anytime from early Spring to July. Cover seeds $\frac{1}{2}$ to 1 in. deep, and press soil about seeds. Thin plants so they will be 2 to 6 in. apart. Make the rows 12 to 30 in. apart. Use 1 oz. to 200 ft.; 3 lbs. to the acre. Ready for use in 45 to 75 days.

An Acre of Carrots Fed to Poultry Means a Winter Income

● GURNEY'S GOLD LUMP

These extra early carrots should be pulled when they are about two inches through. They are nearly round and a bunch of carrots, each about the size and shape of a small apple, are very attractive.

This new carrot is of French origin, is the brightest golden color, and matures earlier than any other carrot grown. Market gardeners can safely discard all other extra earlies and plant largely of this. It is very uniform in size and color, consequently, a money-saver, as there are no culls to throw out. Pkt., 7c; oz., 15c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 50c; 1 lb., 90c.

● RED CORED EARLY CHANTENAY

We have discarded the ordinary early Chantenay and list only the red cored. This is a better carrot in every way, much smaller cored, and the bright orange flesh is fine grained, tender, and sweet.

It is medium early, maturing in about 60 days. This sort is very productive and easy to harvest. The root is smooth, deep orange-red, uniformly stumped but slightly tapered, and about 5½ inches long. This carrot is considered by the market gardeners as one of the very best for early use. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; 1 lb., 70c; 5 lbs., \$3.00 Postpaid.

● STOCK CARROTS

Mastodon—Giant white, best and largest stock carrot grown, nearly one-half its length will be above ground when mature, which makes it easy to harvest. Will produce as many tons of feed per acre as mangels or turnips. Your live-stock and poultry will leave any other feed for a meal of carrots. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; 1 lb., 65c; 5 lbs., \$2.95 Postpaid.

SWEET CORN — Delicious Roasting Ears for Two Months

1 Pound for 300 Hills, 10 Pounds per Acre—Sweet Corn Should Not Be Planted More Than 1½ Inches Deep

MOST of us make a single planting of sweet corn; consequently, we have those delicious ears for just a few days a year. You can spread this season over two months by planting different varieties at the same time maturing at different seasons; or by planting same varieties if you have a choice, a week or ten days between each planting. In the little

town garden, a short row or maybe two or three dozen hills planted as early in May as possible, then two weeks later another row between potato rows and continue this for several plantings. You will be surprised at the increased value of this little garden. On the farm, plant a good acreage, enough to supply the house every day and a sufficient quantity for canning and drying.

Golden Sunshine

HYBRID SWEET CORN

Hybrid Sweet Corns are produced by crossing inbred strains, and should yield 50% more marketable ears than ordinary sweet corn. The ears are more uniform in size, larger, and most stalks produce two good ears. The stalks themselves are sturdier, less susceptible to lodging, corn diseases, and damage by drought than open pollinated corn.

PURGOLD HYBRID

A Pure Golden Bantam Cross

When this wonderful Hybrid Sweet Corn was produced, we had five points in view.

First—A large, deep kerneled ear.

Second—Sweet and tender golden kernels.

Third—A large, vigorous stalk that would stand drought and wind.

Fourth—A sweet corn that would not make too many suckers.

Fifth—A corn that would produce at least two good ears per stalk.

In Purgold we have a Hybrid Sweet Corn that is better not only for the home gardener but one that will make wonderful returns to the gardener who raises corn for market.

A MESSAGE TO THE MARKET GARDENER

When you plant Purgold Hybrid, you have solved one of the biggest problems facing the market gardener; that is, disposing of your crop at a profit.

The ears are so uniform in size and shape, the quality is so fine, the kernels are so deep and tender that once you have sold a customer some of this corn, they will refuse to buy common corn where there is always a large percentage of inferior ears.

It will cost you about \$1.25 more per acre to plant Purgold Hybrid than common sweet corn, but this will be returned to you many times in the increased value of your crop. Purgold Hybrid is about three days later than Golden Bantam.

PURGOLD HYBRID PRICES

$\frac{1}{3}$ Pt., 15c; $\frac{1}{2}$ lb., 25c; 1 lb., 40c; 5 lbs., \$1.65 Postpaid. Not Prepaid 10 lbs., \$3.00; 25 lbs., \$7.00; 50 lbs., \$13.50; 100 lbs., \$26.00.

● GOLDEN SUNSHINE SWEET CORN

An outstanding new variety of yellow corn, of exceptional merit. It was originated at the North Dakota Agricultural College. The ears are bigger than those of Golden Bantam, are 16 rowed, and of deliciously rich flavor, light yellow in color. Sunshine is ready for use 6 to 10 days earlier than Bantam. The stalks are quite dwarf, with the ears set only 2½ to 3 feet from the ground, usually 2 ears to the stalk. Those who have tried it are highly enthusiastic, and say it is real sweet corn.

It is the sweetest and the nicest corn I know of; good yielder, an exceptionally good corn for the market gardener. Prices: $\frac{1}{3}$ pt., 10c; 1 lb., 22c; 5 lbs., \$1.00 Postpaid. Not Prepaid 10 lbs., \$1.50; 25 lbs., \$3.25; 50 lbs., \$6.00; 100 lbs., \$11.20.

● GOLDEN BANTAM

Fifty per cent of the sweet corn planted in the United States is of the Golden Bantam variety. On account of the hardiness of this variety it allows early planting consequently it reaches the roasting ear stage very early. You can sow this as early as any variety of field corn. The stalks grow only about 4 to 5 feet high and bear generally two good ears to the stalk. When ready for use the kernels are rich golden yellow color—a mighty satisfying sweet corn. Prices: $\frac{1}{3}$ pt., 10c; 1 lb., 22c; 5 lbs., \$1.00 Postpaid. Not Prepaid 10 lbs., \$1.50; 25 lbs., \$3.25; 50 lbs., \$6.00; 100 lbs., \$11.20.

● GOLDEN GEM SWEET CORN

After having produced Golden Sunshine Corn, a remarkable early yellow sweet corn, Prof. A. F. Yeager, Horticulturist at the North Dakota Agricultural College Experiment Station, has bred Golden Gem Sweet Corn, which is days earlier than that famous variety.

The ears are of good size, averaging 7 to 8 inches in length, and are borne close to the ground on stalks about 3½ feet high. From one to three ears are produced on each stalk. Golden Gem is eight rowed; kernels are quite deep, broad, meaty, rich golden yellow, very tender and of the sweetest and most sugary flavor imaginable. The greatest feature, however, is its extreme earliness! With Golden Gem, market gardeners may secure even better prices and home gardeners may have absolutely the very earliest yellow sweet corn! Prices: $\frac{1}{3}$ pt., 15c; 1 lb., 27c; 5 lbs., \$1.15 Postpaid. Not Prepaid 10 lbs., \$1.80; 25 lbs., \$4.00; 50 lbs., \$7.50; 100 lbs., \$13.90.

● GOLDEN COLONEL OR GOLDEN COUNTRY GENTLEMAN

See Colored Picture on inside Front Cover

This corn won the All American Award of Merit in 1936. A cross of Golden Bantam and Country Gentleman—it combines the delicious flavor of Golden Bantam with the large ears, deep kernels, tenderness, and heavy yield of the Country Gentleman. The stalks grow about 7 feet tall and usually produce two large ears. The color is a beautiful golden yellow, and the kernels are arranged on the ear without row formation.

Our many customers who have purchased Golden Cream Sweet Corn in the past will find this corn is a greatly improved Golden Cream. This is not an early corn, being nearly as late as Country Gentleman, but for any one who wants absolute top quality in sweet corn, plant Golden Colonel. $\frac{1}{3}$ Pt. 15c; 1 lb., 30c; 5 lbs., \$1.30; Postpaid. Not Prepaid 10 lbs., \$1.90; 25 lbs., \$4.25; 50 lbs., \$7.90; 100 lbs., \$15.50.

● COUNTRY GENTLEMAN

This variety has a small, white cob, densely covered with irregular rows of very long slender, white grains of excellent quality. The ears are seven to nine inches long. The stalks are from six and one-half to seven feet high. It is well adapted for canning as well as the home garden and market, and many consider it as the best of the late varieties. Prices: $\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.15 Postpaid. Not Prepaid 10 lbs., \$1.75; 25 lbs., \$3.75; 50 lbs., \$6.75; 100 lbs., \$12.50.

● STOWELL'S EVERGREEN

Standard late variety, very valuable for canning and much grown for market. Plants 7 to 8 feet tall. Ears 8 to 10 inches long; 2½ to 3 inches thick; 14 to 20 rowed. Kernels very deep, white, sweet, and tender; remain in table condition a long time. Prices: $\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.15 Postpaid. Not Prepaid 10 lbs., \$1.75; 25 lbs., \$3.75; 50 lbs., \$6.75; 100 lbs., \$12.50.

● 60-DAY WHITE

Among the many extra early sweet corns recently introduced, this stands out because of its extreme earliness, large ear and good quality. With our market gardeners who have tried it, "60-Day White" has been highly profitable. Height 5 feet, ears 10 to 12-rowed, 6 to 7 inches in length. Prices: $\frac{1}{3}$ pt., 13c; 1 lb., 27c; 5 lbs., \$1.15 Postpaid. Not Prepaid 10 lbs., \$1.80; 25 lbs., \$4.00; 50 lbs., \$7.50; 100 lbs., \$13.90.

GURNEY'S AMERICAN GROWN CABBAGE SEED

EARLY CABBAGE

• EARLIEST OF ALL

This is a strictly new variety of Danish production, maturing medium sized, extra solid round heads and a larger percentage per hundred plants than any other variety, which makes it the most valuable for market gardeners and home consumption. Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$1.75. Postpaid.

• COPENHAGEN MARKET

The best Early round-headed sort on the market. The heads are very solid averaging about 8 pounds. It is short stemmed, the heads growing very close to the ground. Matures with Charleston Wakefield and gives a heavier crop per acre. Our stock of this is very fine. Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 55c; $\frac{1}{2}$ lb., 85c; 1 lb., \$1.60; 5 lbs., \$6.90 Postpaid.

• EARLY JERSEY WAKEFIELD

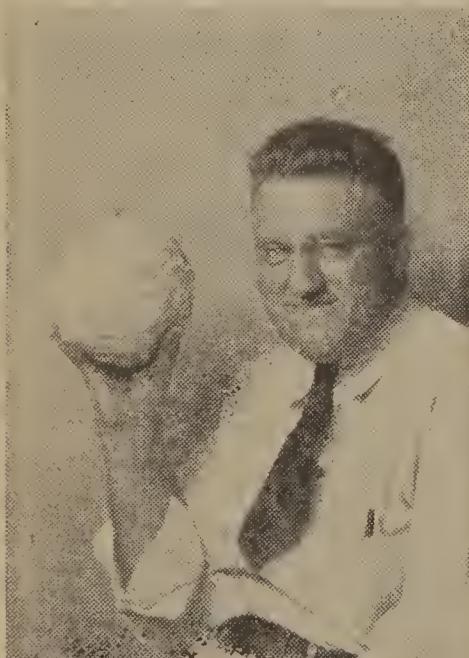

The best of the pointed headed cabbages. Very early and makes medium sized, very solid heads fine flavored and tender. Has few outside leaves. Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 55c; 1 lb., \$1.55; 5 lbs., \$6.55 Postpaid.

• GURNEY'S GOLDEN ACRE

This is a new, early, round-headed cabbage which closely resembles Copenhagen Market in type. As its name implies it is a money-maker. It is 8 to 10 days earlier than Copenhagen Market, but is smaller and can be planted closer. Because of earliness and fine quality it commands a higher price than any round-headed cabbage. Pkt., 7c; oz., 25c; $\frac{1}{4}$ lb., 65c; 1 lb., \$1.85.

• GURNEY'S EARLY BALLHEAD CABBAGE

In offering this new early summer Ballhead cabbage we know that we are presenting the cabbage-growing public with a winner and a money-maker. The heads are perfectly round, good size and mature as early as Wakefield. We recommend this sort especially to market gardeners and for the home garden for both early and late. We feel sure it will take the place of nearly all of the summer varieties, producing a greater per cent of solid heads than any of them, and on account of the small amount of foliage and the compact form in which it grows, can be planted much closer than other varieties. Pkt., 7c; oz., 25c; $\frac{1}{4}$ lb., 65c; 1 lb., \$1.85; 5 lbs., \$7.90 Postpaid.

George Bosenan of Gurney's Tire Department. George says, "Gurney Early Ballhead Cabbage can't be beat."

A few years ago the best cabbage seed came from Denmark and Holland, where it had been raised for many years, but in the last few years the American cabbage seed growers in the Pacific North West, by improved methods, careful selection, breeding and extensive trials have made American cabbage seed famous the world over, supplying many of the markets formerly served by Denmark and Holland.

Roy Devine of Gurney's Seed Department with two perfect specimens of Danish Ballhead Cabbage

LATE CABBAGE

• DANISH BALLHEAD

SHORT STEMMED

This is undoubtedly the best late cabbage—desirable for kraut, for storage, and for shipping. The plants are large and sturdy with short stems. The solid round heads weigh from 7 to 10 pounds each. The flavor is very good and the leaves are very crisp and tender. This is the ideal cabbage for high quality kraut.

Many years of selection and breeding by Danish Gardeners and seedsmen has produced a cabbage so good that more of this one variety is raised than all other varieties of late cabbage combined. Danish Ballhead Cabbage will stand hot, dry weather—does not rot easily in wet seasons, and the heads very seldom burst. Yields of 15 tons per acre are not unusual.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 55c; 1 lb., \$1.65; 5 lbs., \$6.90 Postpaid.

• PREMIUM LATE FLAT DUTCH

As a variety for winter market it has no superior. Heads large, bluish green, round, solid, broad and flat on top, they open white and crisp, are tender and well flavored. It is a fall and winter variety, and one of the very best to keep.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; 1 lb., \$1.55; 5 lbs., \$6.60 Postpaid.

• MAMMOTH ROCK RED

This is by far the best, largest and surest heading red cabbage ever introduced. The plant is large, with numerous spreading leaves. The head is large, round, very solid and deep red color. Pkt., 6c; oz., 25c; $\frac{1}{4}$ lb., 70c; 1 lb., \$2.10.

CULTURE: For early heads, sow seeds in hotbed or cold frame. Transplant in April or early May into rows where you want them. Use only strong plants, two feet apart to the row. For late or winter cabbage, sow in the open ground as late as July 1st,—18 inches to two feet apart in the row, according to varieties. One ounce for 3000 plants $\frac{1}{2}$ -pound of seed per acre.

DISEASE RESISTANT CABBAGE SEED

In many sections of the United States entire fields of Cabbage fail to mature or produce heads on account of the yellows or yellow rot. If, by any chance, your field or fields in your vicinity are affected with this disease, you should plant Disease Resistant Cabbage Seed. The University of Wisconsin, by selection and breeding, has made it possible for us to offer you this Disease Resistant Seed.

• DANISH BALLHEAD YELLOWS RESISTANT

This strain of Danish Ballhead is larger than the regular strain, about one week later and with slightly longer stems. The best late yellows resistant cabbage, and one of the best winter keepers. Pkt., 7c; $\frac{1}{2}$ oz., 15c; oz., 25c; $\frac{1}{4}$ lb., 70c; $\frac{1}{2}$ lb., \$1.30; 1 lb., \$2.40; 5 lbs., \$11.00 Postpaid.

• ALL SEASONS YELLOWS RESISTANT

We are offering the All Seasons in Disease Resistant Seed only, and, as its name implies, it is a cabbage that can be used early or kept for the winter supply. A fine heavy yielding mid-season variety. All

Seasons Cabbage is a favorite with makers of kraut, as the solid heads weigh from 8 to 10 pounds each. Pkt., 7c; $\frac{1}{2}$ oz., 15c; oz., 25c; $\frac{1}{4}$ lb., 85c; 1 lb., \$2.50.

CHINESE CELERY CABBAGE

• IMPROVED PEKIN

Resembles both celery and cos lettuce. The heads are tall and cylindrical, usually being 18 inches in height, but often reaching two feet. It is a sure heading type, and the flavor is fine.

Chinese Cabbage is one of the very best salad plants. Many people prefer it to the best head lettuce. It will outyield almost any other crop as the upright plants can be set very close together. The heads are from 12 to 18 inches tall, 3 or 4 inches thick, and weigh up to 10 lbs. Seed should be sown very early in hot-beds and transplanted or planted in the open about the first of July, as they will not form heads in the extremely hot weather. Pkt., 5c; 1 oz., 20c; $\frac{1}{4}$ lb., 50c; 1 lb., \$1.40.

Chinese Celery Cabbage for salads and greens

GURNEY'S CUCUMBERS - CRISP AND COOL

1 Ounce for 50 Hills; 2 Pounds per Acre in Hills

I HAVE learned to like cucumbers in about every way they can be prepared; the early ones sliced and then the delicious pickles made in various ways. I have only succeeded in my desire to like them in the last two or three years and I do not know of a more beautiful sight than a large field of cucumber vines covering the ground with their thousands of yellow flowers and then the picking of the little ones 2 to 2½ inches long for pickling; then the larger, rapid growing ones, cool and crisp, for slicing; then the large yellow ones for the sweet pickles; then in the seed fields the literally millions of full grown fruit and the same size, yellow-bronze in color and when you look at them you know that anyone can grow a cucumber and—like myself—learn to like them.

Plant cucumber seed 10 or 15 to the hill after danger of frost is past. Thin out later when danger of bugs is past. For the big crop of pickles, plant from June 1st to the middle of July.

Gurney's New Longfellow

● GURNEY'S NEW LONGFELLOW

This is truly a magnificent cucumber. The best of the large varieties. Its dark green color, perfect shape, and firm white flesh place it in a class by itself.

This new cucumber grows to a length of 15 inches and retains its dark green color until nearly ripe. Vines are vigorous and very prolific, bearing fruit over a longer period than any variety we are acquainted with. The home or market gardener cannot go wrong by planting as his main crop for slicing or for large pickles, Gurney's New Longfellow Cucumber. Pkt., 7c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.10; 5 lbs., \$5.00. Postpaid.

● NEW NATIONAL PICKLE

This is a strictly tailor-made cucumber. The National Pickle Packers Association told the seedsmen just what they wanted in an early pickling cucumber, and the New National Pickle is the result—the answer to a pickle packers prayer.

It is very early and very productive. A beautiful dark green color. The small pickles are rather short and thick while the larger sizes are smooth and cylindrical with rounded ends. The flesh is very thick with no split centers or hollow sides. When you go into a grocery store and see an attractive jar of small cucumber pickles, it is very probable they are of the New National Pickle variety. For quantity and quality, plant the New National Pickle. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 75c; 5 lbs., \$3.50 Postpaid.

● GURNEY'S NEW EVERBEARING

Very early, enormously productive, literally covering the ground with its fruit the entire season until killed by frost, making it the most prolific variety in existence. Fruit is medium size and rich, dark green in color, shape long, excellent for pickling or slicing. Pkt., 5c; oz. 10c; 1/4 lb., 25c; 1 lb., 70c; 5 lbs., \$3.25 Postpaid.

● EARLIEST OF ALL

This is a white spine sort, very dark green 6 to 7 inches long, has pale green stripes about 1/3 length from blossom end, straight square ended, firm, and makes a fine pickler. This is a great favorite among gardeners and others desiring a good, prolific cucumber. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 70c; 5 lbs., \$3.25 Postpaid.

● CHINA LONG

Makes nearly straight fruit which average about twenty inches in length.

A most remarkable feature of China Long is the fact that it retains the beautiful deep green color of the skin until it is fully ripe. China Long is practically all flesh, containing but very few seeds. It is crisp, juicy, and of the most delicious flavor, and essentially a quality cucumber which is absolutely unequalled for home use. The vigorous vines bear continuously. Pkt., 8c; oz., 15c; 1/4 lb., 50c; 1 lb. \$1.55. Postpaid.

"See what I raised" Black Diamond Cucumbers

House of Gurney,

Dear Sirs:

From two packets of cucumber seed, I sold \$10.00 worth, canned 50 quarts, and gave away 12 pecks to neighbors.

Mrs. Fred G. Carlson,
Spencer, Iowa

CAULIFLOWER

One of the Most Profitable Crops for Market Gardeners

Gurney's Earliest Market

Cauliflower culture is practically the same as that of cabbage. One ounce of seed will produce about 4,000 plants. Our pedigree cauliflower seed is the best you can buy anywhere.

● GURNEY'S EARLIEST MARKET

Cauliflower may be grown anywhere, and Gurney's Early Market Cauliflower is the easiest to grow. This wonderful new large-headed, heavy-leaved Cauliflower was offered by us in 1910 for the first time, and we wish to say to all lovers of this delicious vegetable that you can grow these as easily as you can grow cabbage. It is desirable for market gardeners on account of earliness and clear white color. Pkt., 12c; $\frac{1}{4}$ oz., 35c; $\frac{1}{2}$ oz., 65c; 1 oz., \$1.10; $\frac{1}{4}$ lb., \$4.00.

● EARLY SNOWBALL

This is a popular extra early strain of dwarf, compact growth. Under favorable circumstances nearly every plant will make a fine solid head of good size. It is valuable for both early and late.

Pkt., 10c; $\frac{1}{2}$ oz., 60c; oz., \$1.00; $\frac{1}{4}$ lb., \$3.50; 1 lb., \$11.75.

● GURNEY'S EARLY FAVORITE

The best sort for inexperienced growers, as it will head when conditions are unfavorable. It may be used either for an early or a late crop and is ready in about 110 days. It forms large, firm, fine-grained heads, very white in color.

Pkt., 7c; $\frac{1}{2}$ oz., 40c; 1 oz., 75c; $\frac{1}{4}$ lb., \$2.35.

HERBS ARE EASY TO GROW

No garden is complete without a few herbs for culinary or medicinal purposes. Harvest them carefully on a dry day, before they come into full bloom.

Anise—Cultivated principally for garnishing. Pkt., 5c; oz., 15c.

Caraway—Cultivated for the seed which is used in confectionery and medicine. Pkt., 5c; oz., 15c.

Catnip—Pkt., 10c; $\frac{1}{2}$ oz., 25c.

Dill—The leaves are used in soups, and in pickles. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; 1 lb., 65c.

Lavender—A popular aromatic herb. Pkt., 10c; $\frac{1}{2}$ oz., 30c.

Marjoram Sweet—For seasoning. Pkt., 5c; $\frac{1}{2}$ oz., 15c.

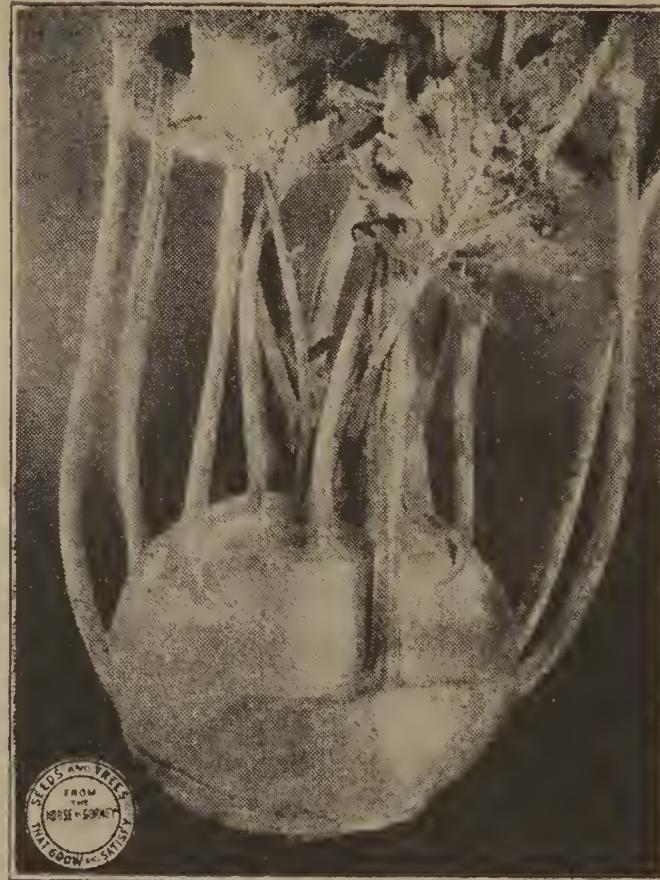

Sage—The leaves and tender tops are used in stuffing and sauces. Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c.

Savory, Summer—Used for seasoning. Pkt., 5c; oz., 15c.

Thyme, Broad-Leaved—For seasoning, etc. Pkt., 8c; $\frac{1}{2}$ oz., 20c.

Wormwood—It is beneficial to poultry and should be planted in poultry grounds. Pkt., 5c; $\frac{1}{2}$ oz., 15c.

KOHL-RABI

1 Ounce for 200 Feet of Row

● EARLY WHITE VIENNA

Our strain of Early White Vienna Kohl-Rabi is the finest I have ever seen. The firm, glossy white bulbs are crisp and tender. The leaves are few and small. Kohl-Rabi should be used when about 2 inches through. All varieties are tough and stringy when full grown. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; 1 lb., \$1.35.

GARLIC BULBS

Garlic is always rather high in price and often you are unable to buy it when needed. Why not raise your own and supply your neighbors. Two or three pounds of garlic bulbs divided and planted in the spring should make a bushel of garlic in the fall. Price: 1 lb., 30c; 2 lbs., 55c; Postpaid. Not Prepaid 5 lbs., \$1.20; 10 lbs., \$2.25.

EGG PLANT

1 Ounce for 1000 Plants

Sow in hotbeds very early in the spring and transplant to 2 or 3 feet apart, in very rich, warm ground. Hoe often and hill up gradually until they blossom.

New Improved New York Purple—The best variety in cultivation, being early, a sure cropper and of fine quality. The fruit is large, oval, very deep purple. Pkt., 7c; $\frac{1}{2}$ oz., 20c; oz., 35c; $\frac{1}{4}$ lb., 90c; 1 lb., \$2.85.

CELERY

1 ounce of seed will produce 5000 Plants

Golden Plume Celery

For a vegetable that is so easily grown, celery seems to be an unknown commodity in most gardens. This is especially true in the northwest where the highest quality celery is produced. Northwestern celery does not look so nice as the Michigan or California grown but the plants are so crisp and have such a delicious nut-like flavor, that you are missing really the best part of the garden if you leave out this vegetable.

Sow very early in April, transplant the plants when 2 or 3 inches high to about 6 or 8 inches apart in the row. Feed them well with plenty of well-rotted manure.

● GOLDEN PLUME

Is the last word in Self-Blanching Celery. It is a week earlier, blanches more easily, and is far more resistant to blight and crown-rot than Golden Self-Blanching. It has a beautiful golden color, is crisp, free from strings and has that rich nutty flavor so much desired by lovers of fine celery. Pkt., 7c; $\frac{1}{2}$ oz., 20c; 1 oz., 30c; $\frac{1}{4}$ lb., 90c; 1 lb., \$2.75.

● GIANT PASCAL

Grows about two feet high, the stalks are very broad, thick and crisp, and entirely stringless; the width and thickness of the stalks are distinctive features of this variety. It bleaches with but slight "earthing up," and very quickly, usually in five or six days. Fkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c; $\frac{1}{4}$ lb., 65c; lb., \$1.90.

● WHITE PLUME

Out in the State of California they produce and ship thousands of carloads of White Plume celery each year. We have received letters from some of the largest of the California celery growers, telling of the wonderful results from our White Plume Seed. Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c; $\frac{1}{4}$ lb., 65c; lb., \$1.90.

Our celery bulletin giving full planting and handling instructions written by one of the most successful celery growers in the northwest, will be sent free on request.

CELERIAC

A variety of celery having turnip-shaped roots, which, when cooked and sliced in vinegar, make a most excellent salad, also used for flavoring soups.

Large Smooth Prague—Is the largest and best variety grown. Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c.

GURNEY'S CHOICE WATERMELONS

DELICIOUS WATERMELONS

BY AUGUST 1st

Early Red Heart
Earliest and Sweetest
Minnesota Sweet
Fordhook Early
Sugar Swika

CULTURE: The hills should be 8 ft. apart each way. Plant the seed about one inch deep as soon as the weather is warm. An ounce will plant about 30 hills; 3 or 4 pounds of seed to the acre. Allow two or three plants to remain in each hill. Ready to use in 70 to 100 days.

WATERMELONS
ON EVERY FARM
IN 1938

Red Seeded Hutchinson
Gurney's Mastodon Radio

Don and Chan Gurney eating a 40-lb. Mastodon Radio Watermelon

In a three thousand mile trip in September, I saw only one first-class Watermelon universally grown and sold at fancy prices—the Red Seeded Hutchinson.

—D. B. Gurney

Happy Jack and George German, popular WNAX entertainers—entertaining themselves with a 50-lb. Red Seeded Hutchinson

GURNEY'S MASTODON RADIO WATERMELON

Watermelons are liked by everyone, and the kids especially like to go out and crawl into someone's corn field hoping that they will find a watermelon patch. Gurney's Mastodon Radio Watermelon will produce more melons than any other variety; it also produces the largest melons; the flavor cannot be beat, and you will never find the hard core as in so many of the melons. It is not unusual to produce melons of this variety weighing ninety pounds. They have been known to exceed one hundred pounds. Its bright red flesh is of delicious flavor and the quality that calls for more.

The glossy dark green skin and tough rind makes this one of the most attractive shipping melons on the market.

Pkt., 7c; oz., 12c; 1/4 lb., 25c; 1 lb., 70c; 5 lbs., \$3.00; Postpaid.

● WINTER WATERMELON

Yankton, S. D., has the best equipped State Hospital, takes better care of its patients, and cures more than any other in the United States. It is equipped with theatre, dance hall, ball ground, tennis court. You wonder what this has to do with winter watermelons. I am just coming to that. I have been on the grounds of the Hospital for the Insane at Yankton a number of times, and it was not unusual to see hundreds of the patients on these beautiful grounds, each patient, if they wanted it, eating watermelon. Their garden covers about thirty acres, and they had thousands of the winter watermelons. It is not only good at time of maturity but can be harvested and kept well up to Christmas time. It is medium-sized, almost clear white rind, the brightest red flesh and small black seeds, very firm and very tough rind.

These should be harvested when ripe, not overripe, placed in a cool dry cellar; or place them in the open in straw, seeing that the melons do not touch each other and covering all of them with sufficient straw to keep from freezing. Take them out as wanted.

Pkt., 5c; oz., 12c; 1/4 lb., 30c; 1 lb., 85c; 5 lbs., \$3.50 Postpaid.

A summer girl with a Winter Watermelon

● EARLY RED HEART

SIX REASONS WHY THIS HIGH QUALITY WATERMELON DESERVES A PLACE IN EVERY GARDEN IN THE NORTHWEST.

1. EARLINESS—As early as any melon grown. In ordinary seasons melons will ripen clear to the Canadian line.
2. QUALITY—The sweetest melon we have ever tasted; firm flesh, big hearted. A strictly high quality melon.
3. SIZE—Weight from 8 to 12 pounds—just right for the average family.
4. APPEARANCE—Perfectly round, medium green with darker stripes. A load of these melons make a very attractive sight. When cut the bright scarlet flesh and small jet black seeds make a picture to stir the heart of a melon eater.
5. YIELD—While the melons are not large, they set so many melons to the vine that Early Red Heart will outyield most of the larger melons.
6. PROFIT—The early melons bring high prices. Red Heart is early. High quality melons bring repeat orders. Red Heart is a delicious melon. An acre of Early Red Heart should produce from 3000 to 5000 salable melons. Pkt., 7c; oz., 12c; 1/4 lb., 30c; 1 lb., 85c; 5 lbs., \$3.50 Postpaid.

GURNEY'S WATERMELONS

SUGAR SWIKA WATERMELON

• This new melon from Japan is earlier than any of our American melons, and we recommend this for planting as far north as melons have ever been grown. Weighs from 10 to 15 pounds. Light green skin. The vivid scarlet flesh is very firm, and it will stand shipping considerable distances. One of the best quality melons we have ever raised at Yankton. We had ripe melons in 73 days from the time the seed was planted.

A half acre of Sugar Swika for the early market should be the most profitable melons you can grow.

Red Fleshed—Pkt., 6c; 1 oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25.

FORDHOOK EARLY

Without a rival. This is the earliest large-fruited melon in cultivation. These fruits are of good size, rather short and blocky in form, with large diameter; skin dark green, occasionally with faint stripes of lighter green; flesh bright red, crisp, sweet, and of splendid quality; rind quite thin, but skin tough; makes a fair shipping variety. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1 lb., 60c; 5 lbs., \$2.75. Postpaid.

KLECKLEY SWEET

Vines are strong-growing, producing uniformly large-sized melons. The fruits are oblong. The skin is dark green. Flesh is bright scarlet and ripens to within one-half inch of the rind. The quality is very rich and sweet, hence its name. For the home market or family garden it is decidedly one of the best.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1 lb., 60c; 5 lbs., \$2.75 Postpaid.

GOLDEN HONEY SWEET

The most desirable yellow meated melon, and for home use the best of all melons. Very thin rind, golden yellow flesh, so remarkably sweet and tender that they will be chosen above all other melons for home, not shipping purposes.

Pkt., 7c; oz., 12c; 1/4 lb., 30c; 1/2 lb., 50c; 1 lb., 85c.

Health Value of Muskmelon

Calories per lb. 185; Vitamins A, B, C; Proteins .6%; Carbohydrates 9.3%; Iron .00039%.

\$300.00 PER ACRE

Seems like a lot of money but an acre of melons may pay even more than that.

MINNESOTA SWEET

A recent introduction from Minnesota, which is proving very popular where the growing season is limited.

This fine quality melon has moved the melon growing district many miles north. People in the North who did not think they could raise watermelons can plant Minnesota Sweet and be reasonably sure of ripening a crop of delicious melons clear to the Canadian line.

The melons are of fair size, weighing from 10 to 15 pounds each, dark green in color, with bright red flesh. Minnesota Sweet was one of the sweetest melons in our trial grounds last year. Pkt., 6c; oz., 12c; 1/4 lb., 30c; 1/2 lb., 50c; 1 lb., 90c; 5 lbs., \$3.75 Postpaid.

EARLIEST AND SWEETEST

The average weight of this melon would probably be from 12 to 15 lbs., flesh scarlet, very fine grained, and the flavor is delicious. The seeds are white. Vines producing wonderful crops, often producing eight to twelve melons to the vine. We wish to say to our Northern customers that this Earliest and Sweetest melon is the one they should plant. There is but little use in planting the large late varieties in your locality. They are only a disappointment, nearly ripe when the frost comes. You will always get under the wire with the Earliest and the Sweetest. Pkt., 6c; 1 oz., 12c; 1/4 lb., 30c; 1 lb., 80c; 5 lbs., \$3.25. Postpaid.

CITRON GREEN SEEDED

Used exclusively for preserving or pickling. The rind is dark green, distinctly striped with light green. Will keep in good condition for some time after picking. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 65c.

Little Isla Jean Gray-Edison, Nebr.
on a big Scarlet Wonder Watermelon

GURNEY'S SCARLET WONDER

Did you ever see a scarlet watermelon, not just red, but a bright flaming scarlet. Gurney's new scarlet wonder is what melon growers have long wanted but have never been able to find.

The black seeds and dark green rind contrasting sharply with the bright scarlet flesh make sales for this melon when other varieties are a drug on the market. Appearance sells the first melons. The high quality takes care of re-sales as there is no better quality melon grown. Medium size, early, thin, tough rind—a good shipping melon as well as a melon for the home garden.

Pkt., 5c; oz., 12c; 1/4 lb., 25c; 1 lb., 80c; 5 lbs., \$3.25 Postpaid.

GURNEY'S MUSKMELONS

HALE'S BEST NO. 36

Thousands of acres of this variety are grown in the Imperial Valley, for shipment to the large Eastern cities. The best Eastern Hotels and restaurants demand Hale's Best. These round, heavily netted melons weigh about 3 pounds each—just the right size for serving halved. The salmon flesh is very thick and the seed cavity is small. If you want an early melon, plant Hale's Best. If you want quality, plant Hale's Best. A money maker for market gardeners. This firm fleshed, tough rinded melon can be trucked for long distances and arrive at market in perfect condition. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1/2 lb., 45c; 1 lb., 85c; 5 lbs., \$3.50 Postpaid.

Keene, No. Dak.
July 10th, 1937

The House of Gurney, Inc.
Yankton, South Dakota.

Dear Mr. Gurney:

I am sending you a snap-shot of one of the five pick-up loads of melons that I raised here in 1936 one of the driest seasons in many years.

Gurney's seeds and plants sure do grow and produce even in the driest years.

The strawberry plants I bought from you last spring all lived and are doing extra fine.

Yours very truly,
Millard Rice

Dick Richards of the W.N.A.X. Photo Studio is very much pleased with a Hale's Best Muskmelon

BENDERS SURPRISE

Folks here's a real melon, one that I feel like recommending to everyone. A special strain of selected seed will be used for every order. It's a melon that is excellent for shipping and a dandy for the local market—but best of all it's one that you will like better than any other because of its excellent flavor. Melons are round to oval in shape, ribbed and covered with coarse netting. Their flesh is exceptionally thick, and the melons rarely crack. The ripe melons have a golden tint giving the fruit a very attractive appearance. They are quite large, many weighing over ten pounds. Because the flesh is so thick and firm they remain in good condition much longer than other melons of this class, and remember that this is very important if you are going to ship. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1/2 lb., 40c; 1 lb., 70c; 5 lbs., \$3.25. Postpaid.

GURNEY'S FARTHEST NORTH

This melon originated in the Imperial Valley in California and is one of the best long-distance shipping melons we have, but on account of its extreme earliness—maturing in 68 days from the planting of the seed—it can be grown farther north than any other muskmelon. Salmon, flesh of exceptional thickness about 8x4 1/2 inches with heavy netting fairly prominent ribs. Its chief values are its extreme earliness, its ability to stand long distance shipping and its good quality. Pkt., 7c; oz., 15c; 1/4 lb., 35c; 1/2 lb., 55c; 1 lb., 95c; 5 lbs., \$3.95. Postpaid.

GURNEY'S GOLDEN ICE CREAM

[See Colored Picture on
Inside Front Cover]

● This is the third year we have listed this wonderful new golden fleshed muskmelon. We named it Ice Cream because the seed cavity is so small an ordinary dipper of ice cream completely fills it. An early melon—it ripens in from 80 to 85 days. Fruits are 6 to 7 inches in diameter and almost round. Heavily netted, a good shipper, cream color when ripe. The Golden Ice Cream will outsell any melon on the market because of its fine appearance, thick yellow flesh, and delicious flavor.

Pkt., 7c; oz., 15c; 1/4 lb., 30c; 1/2 lb., 55c; 1 lb., 95c; 5 lbs., \$4.25. Postpaid.

● SUGAR ROCK OR HONEY ROCK

This is a new and unusually fine melon. Sweet as sugar and solid as a rock. It has four main points of superiority: quality, productiveness, ability to stand shipping and appearance. Its flavor and quality are the finest we have ever seen, the flesh being a very deep salmon color right out to the very rind. Under good growing conditions it is a very heavy yielder, often producing five to seven perfect melons on one vine. Its rind is unusually hard, making it a good shipper. This wonderful, new melon is as early as the Rocky Ford and one-third larger—making it suitable for either home or market gardening.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1/2 lb., 40c; 1 lb., 70c; 5 lbs., \$3.25. Postpaid.

1 Ounce for 50 Hills, 2 1/2 Pounds Per Acre

Did you have all the muskmelon you wanted to eat last summer and fall? They are easy to raise, not bothered much by insects, and they surely are good. Don't let another year pass without planting a patch of melons.

In our trial ground at Yankton we have tested every new kind of muskmelon introduced, discarding the poor ones and listing only those we know will please you.

● GOLDEN CHAMPLAIN

This melon is so early that it can be grown much farther north than any other variety yet introduced. The nature of this Melon is that it throws laterals and blossoms before the main stems are six inches long. You will find from eight to fifteen large melons in a bunch right around the hill where the seeds were planted, making easy and inexpensive handling when ripening. The first setting of melons on account of starting at the same time, mature at the same time, giving a larger crop and the early money getter. The vines are exceptionally strong and hardy. Quality of fruit excellent, flesh golden yellow. Outside skin green, netted, and firm. Size from 2 1/2 to 3 1/2 lbs. Three years out of four we have picked ripe melons fifty-seven days after planting seeds.

Pkt., 6c; oz., 12c; 1/4 lb., 25c; 1/2 lb., 40c; 1 lb., 75c; 5 lbs., \$3.25. Postpaid.

CULTURE
Muskmelons like a warm, rich soil. Plant in the open ground as soon as the weather is warm. Plant seed in hills 4 to 6 feet apart each way. After the danger of insects is over thin to 3 plants to a hill.

MUSKMELO NEW IMPERIAL CANTALOUE

● An All-American Winner

Sometimes called Weavers Special. The grower who has the New Imperial Cantaloupe can let his fruit get ripe on the vine, ship it long distances, have it arrive at the market in perfect condition, and the quality will be better than any other melon. This is a heavily netted, round melon; small seed cavity; bright yellow flesh. The light green netted rind makes this one of the most attractive melons ever put on the market. Imperial is of the Honey Dew family, but is early enough to ripen in all but the very far North.

Pkt., 6c; 1 oz., 12c; 1/4 lb., 30c; 1/2 lb., 50c; 1 lb., 90c; 5 lbs., \$4.00. Postpaid.

● ROCKY FORD

This variety is an improvement on the Netted Gem, and is largely grown in Colorado and shipped by the carload to the eastern cities. It is much sought after by hotel and restaurant keepers on account of its size and exceptionally fine flavor. Flesh is greenish white in color, very juicy and rich and good clear to the rind. It is medium in size, nearly round and a most excellent shipper. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1 lb., 70c; 5 lbs., \$3.25. Postpaid.

Three of the Office Girls at Gurney's Taking Time Out for Some
Hearts of Gold Muskmelon

● HEARTS OF GOLD MUSKMELO

Hearts of Gold is the finest quality of any melon I have ever tasted. The rich golden flesh is sweet and tasty clear to the rind. In Hearts of Gold we have gotten entirely away from the soft, mushy meat found in so many muskmelons. Even when dead ripe, the flesh is firm and solid. Hearts of Gold is a medium early, heavily netted melon. The shape is slightly oblong with indistinct ribs.

The tough rind, heavy netting and firm flesh make this one of the best shipping melons on the market. It does not change color when ripe. For melon profits and satisfaction, plant Hearts of Gold.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1/2 lb., 40c; 1 lb., 75c; 5 lbs., \$3.25. Postpaid.

The Expert Watch Repairmen at Gurney's are also expert Milwaukee
Market eaters

● MILWAUKEE MARKET

Brother Don planted about an acre of Milwaukee Market one year. Not because he wanted to; but on account of the dry weather he lost a big field of Strawberries and had to fill in with something else.

It was a fortunate proposition, as Milwaukee Market proved to be the earliest, good sized, high quality, thick yellow meated Muskmelon that appeared on the market, and he realized a good price from them, selling the immense crop at from 15c to 25c per melon.

The ribs are fairly prominent, and the netting heavy. A light green or cream color. I believe it will produce as many melons to the acre as any melon you can plant, and when it comes to quality—Oh Boy!

Not a shipping melon but one of the largest and best for the home market.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1 lb., 70c; 5 lbs., \$3.25. Postpaid.

GURNEY'S CRISP AND TENDER LETTUCE

Lettuce from your own garden should be and can be served at least once a day during the summer months. Do not make just one planting but plant every three weeks so as to have a continuous supply of this delicious salad plant.

Eat more lettuce, it is rich in all the vitamins and contains iron.

HEAD LETTUCE

● GURNEY'S CRISP AS ICE

Very large, extremely crisp, hard-heading, and extra long standing.

Is of more pleasing appearance and retains its crispness and mild flavor to a greater degree during the hot summer months than any other crisp-head variety. While especially adapted for midsummer, it is most desirable also for spring and fall.

The plants are of quick, strong growth, attaining a diameter of twelve inches with good cultivation. The leaves are of a soft bright green, growing closely around the head. The heads are tightly folded, six to eight inches in diameter, bleached to a silvery white and nearly as crisp and brittle as celery.

Pkt., 6c; oz., 12c; 1/4 lb., 30c; 1 lb., 95c.

● NEW YORK WONDERFUL

This is the head lettuce grown in thousands of acres around Los Angeles, Calif., in Idaho and other places, and shipped in carload lots all over the world. It is the standard head lettuce and best of any except Gurney's Stonehead Riviera.

Pkt., 5c; oz., 15c; 1/4 lb., 35c; 1 lb., \$1.05; 5 lbs., \$4.50. Postpaid.

● GURNEY'S TOM THUMB

This variety is exceptionally good for the home garden. Seed may be planted in the hot bed and transplanted to the open just as early as possible in the spring, and on account of its extremely hard, crisp heads and small size of the plant, it may be planted about ten inches apart in the row. Plant this so it will mature before extremely hot weather. This is a great find for the home gardener who loves a good head of lettuce.

Pkt., 5c; 1 oz., 10c; 1/4 lb., 25c; 1 lb., 75c; 5 lbs., \$3.50. Postpaid.

● IMPROVED HANSON

A very fine heading variety of large size. The heads are very solid, sweet, tender and crisp throughout and entirely free from any bitter taste. A standard Summer Head Lettuce, very slow to run to seed.

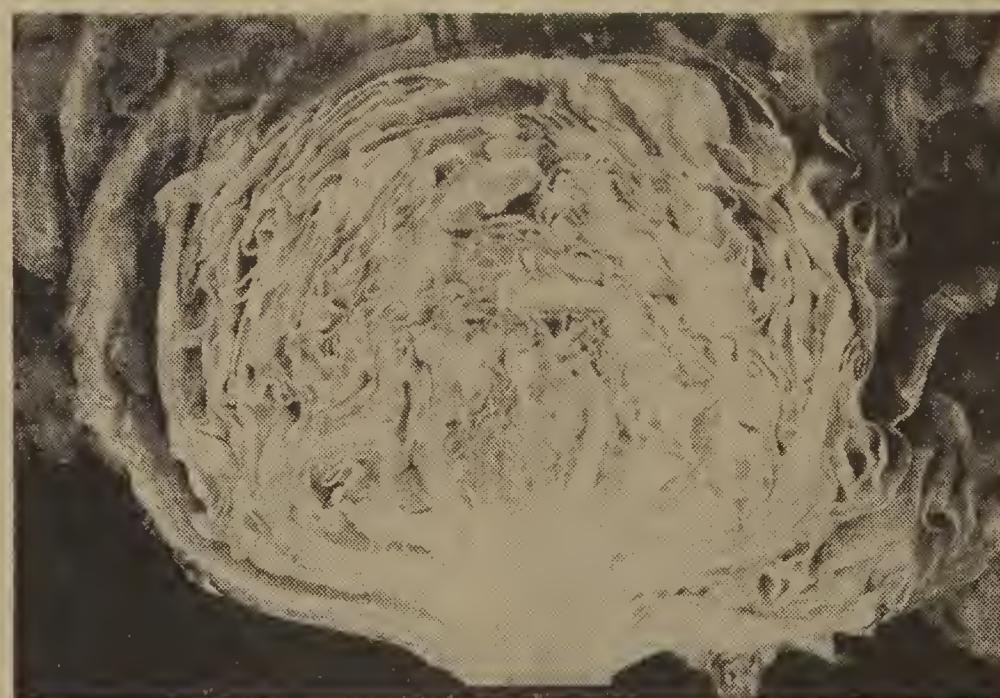

Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 70c; 5 lbs., \$3.25. Postpaid.

CULTURE: Head lettuce seed should be planted very early so it will make heads before the extremely hot weather. Thin out to at least ten inches apart in the row. To be good, lettuce must grow fast, and if it is planted too thick growth is checked and the lettuce is tough and bitter. 1 ounce of lettuce seed for 3000 plants; 3 lbs. for 1 acre.

● GRAND RAPIDS— THE BEST LEAF LETTUCE

This is beyond question the most popular of all forcing lettuce. On account of its upright habit of growth it can be grown much closer than the other sorts, and it is less liable to rot; the leaves are light yellowish green, excellent for shipping and keeps a long time without wilting. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 70c; 5 lbs., \$3.25. Postpaid.

● GURNEY'S STONEHEAD RIVIERA—

The Best Head Lettuce

All of us like head lettuce, and our idea of a good head lettuce is the one that has the hardest head, one that is compact; one that will stand the hot dry weather that we have during the summer. Gurney's Stonehead Riviera Lettuce is without doubt the best variety of head lettuce that can be grown in this northwest territory.

Hardest head, longest fit for use, heads solid, interior leaves blanching to a cream white. No equal for late planting or places that are hot and dry. Packet, 10c; oz., 20c; 1/4 lb., 40c; 1 lb., \$1.10; 5 lbs., \$5.00. Postpaid.

LEAF LETTUCE

● BLACK SEEDED SIMPSON

A favorite forcing variety; it does not head, but forms a compact mass of leaves, lighter colored than any other leaf lettuce; stands the summer heat well, and is very large, making immense plants over a foot across. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 70c; 5 lbs., \$3.25. Postpaid.

● CHICKEN LETTUCE

Your poultry needs "green" food and this variety of lettuce is just the thing you will want to grow for this purpose. It is a genuine lettuce which will yield as much or more chicken or rabbit feed than any plant you may have used for "greens." When once cut it starts to grow again and makes a successive crop.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 70c.

ENDIVE

Sow in August in shallow drills twelve to fifteen inches apart, and thin to one foot in drills. When fully grown tie over the outer leaves of a few plants every week or ten days to blanch. Leaves curled, dark green.

Pkt., 5c; oz., 15c; 1/4 lb., 35c; 1 lb., 90c.

MUSTARD SPINACH OR TENDERGREEN

The new vegetable is all its name implies, a very mild Mustard with a creamy Spinach flavor. In 1930, in New York City, plantings were made every two weeks throughout the entire summer, including the dry hot months of July and August. Not a single planting failed.

Mustard Spinach may be harvested when the plants are four to five inches high; packed in handy retail bundles, and with a proper introduction will sell well in any market.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1 lb., 60c. 5 lbs. \$2.25 Postpaid.

MUSTARD OSTRICH PLUME

The plants are of vigorous growth and have beautiful dark green leaves which curve outward like fine ostrich plumes. It is a handsome variety, of strong growth, yielding a large quantity of greens. The plants stand a long time before bolting to seed. The flavor is mild and the leaves are excellent for garnishing and salads. Does well even during hot weather.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1/2 lb., 40c; 1 lb., 65c.

GURNEY'S DELICIOUS DRY LAND PEAS

All our peas are raised in the dry areas of the United States without irrigation. They will yield better than seed grown under irrigation.

2 Pounds Will Plant 100 Feet of Row—120 Pounds Will Plant One Acre

CULTURE: Sow the seed of the smooth-seeded varieties as early in the spring as possible. Wrinkled-seeded varieties are most susceptible to cold weather and the seed should not be planted until all danger of frost has

passed. To insure a continuous supply of fresh, sweet peas, make succession sowings every 10 days until June 1. Sow again late in August for a fall crop. Place the rows $2\frac{1}{2}$ to 4 ft. apart and cover the seed 1 to $1\frac{1}{2}$ in. deep.

EARLY PEAS

● BIG DAKOTA

See picture on
Inside Front Cover

This fine new variety of early peas is going to supplant a good many older types. The vines are dwarf, 15 to 18 in. high, and the deep green pods are often $4\frac{1}{2}$ in. long and are tightly packed with 8 to 10 luscious peas. By actual count, they contain one more pea to the pod and more pods to the vine than any other. Our tests show it to be the earliest dwarf, large podded pea. The peas are of a delicious, melting quality sweet and tender. $\frac{1}{3}$ pt., 14c; 1 lb., 27c; 5 lbs., \$1.20 postpaid. Not prepaid, 10 lbs., \$1.75; 25 lbs., \$3.90; 50 lbs., \$7.50; 100 lbs., \$14.50.

American Wonder

● AMERICAN WONDER

More work has been done in improving American Wonder than on any other Pea. Our improved strain has larger pods, more of them, and will produce a crop of Peas in the hottest and driest years. One of the earliest Wrinkled Peas in cultivation. Very compact and dwarf growth, seldom exceeding 10 inches in height. $\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.15 postpaid. Not prepaid, 10 lbs., \$1.65; 25 lbs., \$3.65; 50 lbs., \$6.85; 100 lbs., \$13.25.

● ALASKA

Or Earliest of All—(52 days to maturity)—A greater acreage of Alaska is planted by canners and market gardeners than any other. It is of unequalled evenness of growth of vine and maturity of pods, which are filled with medium sized bright green peas of excellent quality. Vines medium height, about two to three feet. Pods good size, $2\frac{1}{2}$ to $3\frac{1}{2}$ in. long. Invariably matures its crop at one time which makes it exceptionally valuable for market gardeners and canners. $\frac{1}{3}$ pt., 10c; 1 lb., 22c; 5 lbs., \$1.00 postpaid. Not prepaid, 10 lbs., \$1.40; 25 lbs., \$3.00; 50 lbs., \$5.50; 100 lbs., \$10.75.

● McLEAN'S LITTLE GEM

Or Premium Gem—(55 days to maturity)—A dwarf, prolific, green, wrinkled marrow; habit similar to the Tom Thumb. It has all the sugary flavor of the late wrinkled pea. The height is 1 foot. $\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.15 postpaid. Not prepaid, 10 lbs., \$1.65; 25 lbs., \$3.65; 50 lbs., \$6.85; 100 lbs., \$13.25.

● EARLY JUNE

A NEW EARLY WRINKLED PEA

For many years we have been trying to develop a wrinkled pea as early as the Alaska. This year we are introducing Early June.

This new wrinkled pea is as early and as good a bearer as Alaska, yet retains all the sweetness and tenderness of the finest wrinkled peas. The vigorous, dark green vines grow about 20 inches tall and are literally loaded with pods from $2\frac{1}{2}$ inches to 3 inches long.

The Northwest needs a pea that will mature before the hot weather of July. In Early June we have a pea that is earlier than any other, will outyield all but the very large late varieties, and besides these good points, you will find these the sweetest and tenderest green peas you have ever tasted. $\frac{1}{3}$ pt., 14c; 1 lb., 27c; 5 lbs., \$1.20 Postpaid. Not Prepaid 10 lbs., \$1.75; 25 lbs., \$3.90; 50 lbs., \$7.50; 100 lbs., \$14.50.

● LAXTONIAN

The Top Notch Early Pea—This is a pea that just suits me, and I eat some peas during the season. I like them any way they can be served, and the Laxtonian seems to be willing to be served any way, always yielding a bountiful supply. This splendid new pea is of Stratagem type, dark green pod, borne in pairs, larger, longer and more even in size than Thomas Laxton, and contains fine deep green peas of excellent flavor. It can be picked ten days earlier than Thomas Laxton. It is in the dwarf class in habit of growth. The vines run about one and one-half feet in height. $\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.15; postpaid. Not prepaid, 10 lbs., \$1.65; 25 lbs., \$3.65; 50 lbs., \$6.85; 100 lbs., \$13.25.

Gurney's Peas are Bred to Resist Fusarium Wilt

Play Safe . . . Plant Wilt Resistant Strains

Peas From Gurney's Will Please

Try Yankton Main Crop For Canning

● EDIBLE PODDED PEAS

Dwarf Gray Sugar—(57 days to maturity)—Vines grow to be about 20 inches in height, with purplish blossoms. These peas are not to be shelled, but cook pods and all like string beans. This vegetable should be grown by all and will never be left out of the garden after one trial. $\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.15 postpaid. Not prepaid, 10 lbs., \$1.65; 25 lbs., \$3.65; 50 lbs., \$6.85; 100 lbs., \$13.25.

SECOND EARLY VARIETIES

● GURNEY'S YANKTON MAIN CROP—65 Days to Maturity

The Yankton Main Crop is one of the most luxuriant of the semi-dwarf peas, attaining a height of about two feet, not tall enough to make it necessary to stake or brush them.

This has become one of the standard medium early peas all over the Northwest. It is the one variety that can be planted and almost insures you all of the green peas you can use during their season. They produce very large pods, six to nine peas, excellent quality, and yield heavily.

As one of our lady customers wrote us, "I have never been able to grow peas enough for the family before, but this year with your Yankton Main Crop, we have had a great many more than we could use." $\frac{1}{3}$ pt., 14c; 1 lb., 27c; 5 lbs., \$1.20 postpaid. Not prepaid, 10 lbs., \$1.75; 25 lbs., \$3.90; 50 lbs., \$7.50; 100 lbs., \$14.50.

● BLISS EVERBEARING

70 Days to Maturity

Height of the vine 24 to 30 inches, vigorous and branching in habit. Many stalks grown from a single root, pods will average 3 inches in length, broad, blunt, light green in color.

$\frac{1}{3}$ pt., 12c; 1 lb., 25c; 5 lbs., \$1.15 postpaid. Not prepaid, 10 lbs., \$1.65; 25 lbs., \$3.65; 50 lbs., \$6.85; 100 lbs., \$13.25.

GURNEY'S ONIONS for Profit

1 Ounce for 200 Feet of Row; 4 Pounds Seed per Acre
ONION SEED PRICES ARE LOWER AT GURNEY'S

CULTURE: Plant onion seed just as early as you can work the ground in the spring. Make a good firm seed bed and plant the seed $\frac{3}{4}$ inch deep, the rows about 16 inches apart. Cultivate shallow and often. Get the weeds while they are small.

You cannot plant a crop on your farm that will produce more dollars per acre than an acre of onions. Yields will run from 300 to 1000 bushels per acre depending on the season and care. Onions sell from 50c to \$1.50 per bushel. Figure the cost of production as high as you please and still you could not come within a mile of the gross profit with any other crop.

YELLOW ONIONS

• RIVERSIDE SWEET SPANISH

This is absolutely the largest and mildest onion that can be grown from seed in the north. Single onions have been grown that weighed over four pounds. These enormous onions are a beautiful golden yellow, perfect globe shape and the very sweetest and mildest onions you have ever tasted. Yields from 500 to 1000 bushels per acre are not uncommon.

At the meeting of the South Dakota Horticultural Society, the Yellow Sweet Spanish Onion was highly recommended, outyielding all other onions.

The mild flavor and fine appearance make them salable at the highest market price.

Pkt., 6c; oz., 20c; $\frac{1}{4}$ lb., 65c; 1 lb., \$1.65; 4 lbs., \$6.00 Postpaid.

• PRIZETAKER

(110 days to maturity)—This is the largest of the American onions, the most handsome; and mildest in flavor. Our seed stock of this onion is pure American grown and produces the largest and handsomest onion we have ever seen, many of the bulbs weighing as high as 3 lbs. each. Skin rich golden color, and so mild and sweet it can be eaten raw like an apple. This onion is a reasonably good keeper, but should be disposed of by January 1st. We strongly urge the planting of a reasonable acreage of this variety, as it will certainly prove profitable.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; 1 lb., \$1.60; 4 lbs., \$5.75 Postpaid.

• SOUTHPORT YELLOW GLOBE

(110 days to maturity)—The true Southport Yellow Globe is particularly valuable for winter market. It is a more perfect globe than the Yellow Globe Danvers and a better keeper. The onions are similar in size and form to the Southport Red Globe, but have a pale straw yellow skin, mild flavor and a heavy cropper. Owing to its handsome appearance and delightful flavor it sells readily on all markets.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 65c; 1 lb., \$1.65; 4 lbs., \$6.00 Postpaid.

RED ONIONS

• SOUTHPORT RED GLOBE

(110 days to maturity)—We consider this the most profitable of the onions for planting in the north. Brings the best price on the market of any of the red onions. Its large size, dark, glossy red color and the fact that it is one of the best keepers makes it very desirable. We would advise that you make the bulk of your planting Southport Red Globes. This variety has given as high as 900 bushels per acre, and is the leading market onion in the north. Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; 1 lb., \$1.60; 4 lbs., \$5.75 Postpaid.

The Sunshine Grocer at W.N.A.X. with a basket of Dakota Red Globe

• GURNEY'S DAKOTA RED GLOBE

The parentage of this onion is strictly Southport Red Globe, but has been grown in Dakota for a number of years, and by careful selection of the bulbs we have produced an onion that is very uniform in size, very dark red in color, a perfect globe, and quite a bit earlier than any other globe onion. We consider this one of the most profitable onions for the people of the Northwest to plant. The seed will cost you a little more money than the others, but a few cents per acre are more than made up by the results in the fall. Pkt., 7c; oz., 25c; $\frac{1}{4}$ lb., 75c; $\frac{1}{2}$ lb., \$1.25; 1 lb., \$2.25; 4 lbs., \$8.00 Postpaid.

• LARGE RED WETHERSFIELD

(100 days to maturity.) One of the old standard varieties and a favorite onion especially in the West, where immense crops are grown for shipment. Large size, skin deep purplish red, form round, somewhat flat, flesh purplish white, moderately fine grained, and stronger in flavor than most other kinds. Very productive, best keeper, it is the best of any variety on poor or dry soil. Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; 1 lb., \$1.65; 4 lbs., \$6.00 Postpaid.

An Onion Bulletin With Each $\frac{1}{4}$ -Lb. Order

So that you may grow as successfully as expert growers, we will enclose with each order of $\frac{1}{4}$ lb. and up, our Onion Bulletin, giving complete instructions for preparing the seed bed, planting, growing, harvesting and marketing.

WHITE ONIONS

• SOUTHPORT LARGE WHITE GLOBE

(110 days to maturity)—This is the best all-purpose white onion in cultivation; it is large, a perfect globe, silvery white and the very best keeper, and excellent quality. In growing onions we advise that you put in a part of your acreage of this large White Globe, as there is always a demand for a reasonable amount of them at a better price than you could get for other onions. On account of their mild flavor they are particularly valuable for green onions for bunches. Pkt., 5c; oz., 25c; $\frac{1}{4}$ lb., 70c; 1 lb., \$2.00; 4 lbs., \$7.00 Postpaid.

• HE-SHI-KO

New Japanese Bunching Onion.—This is the very best of the bunching onions. The long thick, pure white stalks keep their sweetness and mild flavor even if left in the ground until fall. They are tender and crisp at all times. A bed of these will supply you with delicious green onions seven months of the year. Pkt., 8c; oz., 25c; $\frac{1}{4}$ lb., 75c; 1 lb., \$2.35.

• WHITE WELCH BUNCHING ONION

(90 days to maturity)—For early green onions, the seed of this onion may be treated as any onion seed, making one-third the expense and trouble of planting top sets and producing more green onions. The flavor is the sweetest of all onions. The plant is perennial and may be left in the ground for years with but slight protection. Maximum results, however, are obtained by treating as an annual; sow in the spring or fall. Pkt., 5c; oz., 25c; $\frac{1}{4}$ lb., 75c; 1 lb., \$2.10.

LEEK

September Giant—This wonderful new Leek is the largest and best of the Leek family. The giant white stalks are often 12 inches long and from 2 to 3 inches in diameter.

This splendid quality, giant white Leek is very mild and tender, and is better than onions in salads and for flavoring soups. Pkt., 5c; oz., 25c; $\frac{1}{4}$ lb., 70c; 1 lb., \$2.25.

Plant as many onions as you can take care of. Your profits will take care of you.

The House of Gurney, Dear Sirs:

This spring I joined your big contest by buying \$2.00 worth of garden seeds. I won the \$2.00 back, so my seeds cost me nothing.

These seeds grew fine and produced the best garden we ever had. For my project in 4-H Club work, I took gardening, and I won first premium on my complete exhibit at our County Fair.

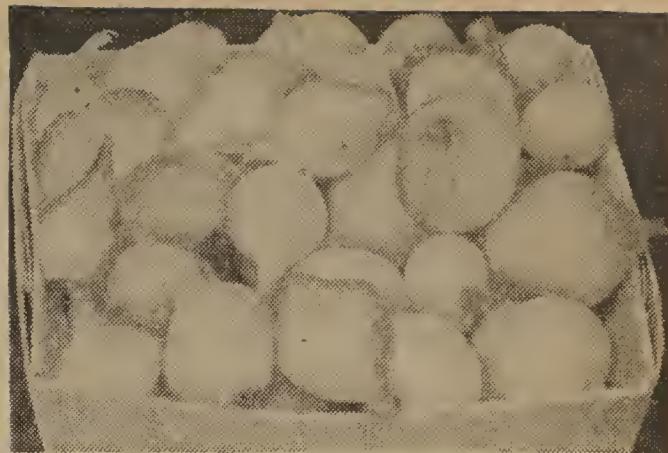

This I owe to the fine quality of Gurney's seeds, and I thank The House of Gurney for their wonderful seed offer. Yours very truly,

Dick Fitzsimons, Argyle, Minn.

ONIONS FROM PLANTS AND SETS

You must plant sets or plants for early green onions. They are both easy to raise and very profitable, either pulled and sold as green onions or left to mature and sold late in the summer.

It takes about 40,000 Bermuda Onion Plants or seven bushels of onion sets to plant an acre, with rows 16 inches apart.

ONION SETS

These may be planted early in the spring to be used for green onions, or can be allowed to grow, producing large onions very early. They are planted largely by market gardeners and allowed to grow full size on account of coming into the market when other onions are scarce; in this way, they realize the best price.

Prices:—Red-Yellow or White Bottom Sets, 1 lb., 20c; 2½ lbs., 50c; 5 lbs., 90c Postpaid.

Not Prepaid:—½ bu. (16 lbs.), \$1.35; 1 bu. (32 lbs.), \$2.55; 2 bu. (64 lbs.), \$4.95.

Multiplier Sets:—1 lb., 25c; 2½ lbs., 60c; 5 lbs., \$1.15. Postpaid.

GURNEY'S PUMPKINS

FOR PIES AND STOCK FEED

1 Ounce for 25 Hills; .4 Pounds Per Acre

Pumpkins are easily grown and profitable for stock feeding. At time of corn planting scatter seeds in every fourth or fifth hill, or for a large crop sow in May in good warm soil, in hills eight to ten feet each way; four plants to a hill.

● JAPANESE PIE

A very valuable new pumpkin of Japanese origin. The flesh is very thick, of a rich salmon color, fine grained, dry and sweet. Of medium size, early; very productive and highly desirable for pies or cooking. A Crook-neck variety with curiously marked seeds. Matures in 95 days. Pkt., 5c; oz., 10c; ¼ lb., 25c; 1 lb., 65c; 5 lbs., \$2.50 Postpaid.

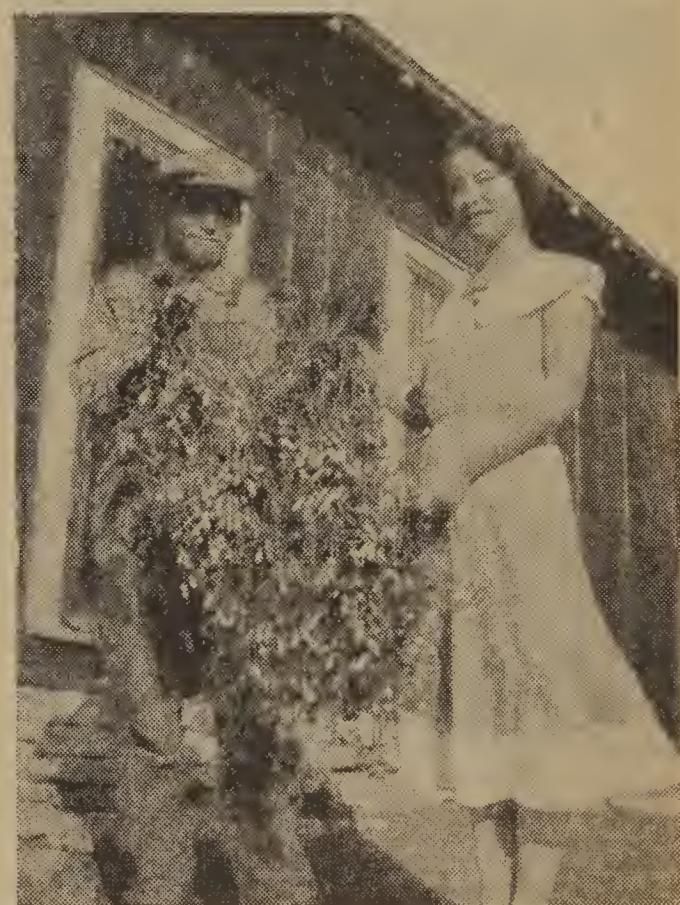

● CONNECTICUT FIELD

A large yellow variety; hard shell; an excellent variety for field culture. Pkt., 5c; oz., 10c; ¼ lb., 20c; 1 lb., 50c; 5 lbs., \$2.00 Postpaid.

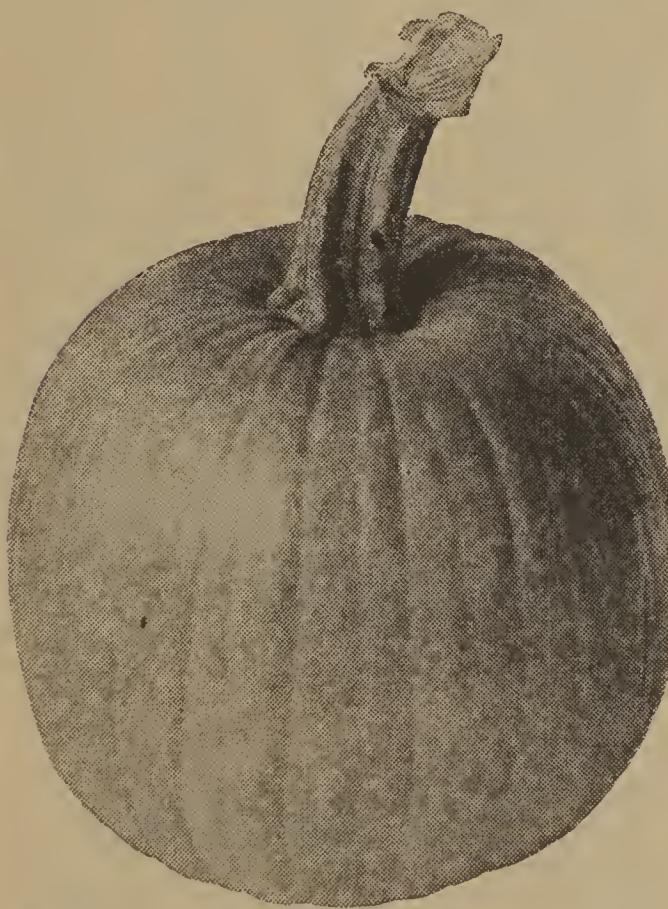

● MAMMOTH KING

The largest variety ever introduced. 100 lb. pumpkins are not unusual and single vines often produce 4 or 5 large pumpkins.

An enormous yielder, having produced over 100 tons per acre. The flesh is very thick, bright orange color and of fine quality, and in flavor equals squash. Pkt., 5c; oz., 10c; ¼ lb., 25c; 1 lb., 65c; 5 lbs., \$2.65 Postpaid.

Victor & Agnes Vopat—White River, S. Dak.
holding one plant of Gurney's Peanuts

PEANUTS

● SOUTH DAKOTA GROWN

A few years ago we offered a quantity of South Dakota grown peanuts. It sounded almost wonderful to think that South Dakota was growing them and we find that peanuts are just as easy to grow as potatoes, sometimes a little more so. Down south they let the hogs harvest the peanuts because it is easier to do that than it is to harvest them in any other way. Up here peanuts are grown profitably, and a handful of them set in the oven and baked and eaten during these long winter evenings is certainly worth while. The variety which we are offering is early enough to grow in any of the northern states, produces an immense yield of excellent nuts. We have enough of the South Dakota grown nuts to supply our customers this season, and believe it to be a profitable crop to grow. A peanut at its best should be planted in a light sandy soil. You can grow peanuts in other soil profitably, but the light sandy soil produces the greatest crop. With each order for peanuts we will inclose the peanut bulletin that will give you full instructions for planting and care. Per lb., 25c; 5 lbs., \$1.15 Postpaid; Not Prepaid 10 lbs., \$1.70; 25 lbs., \$3.75.

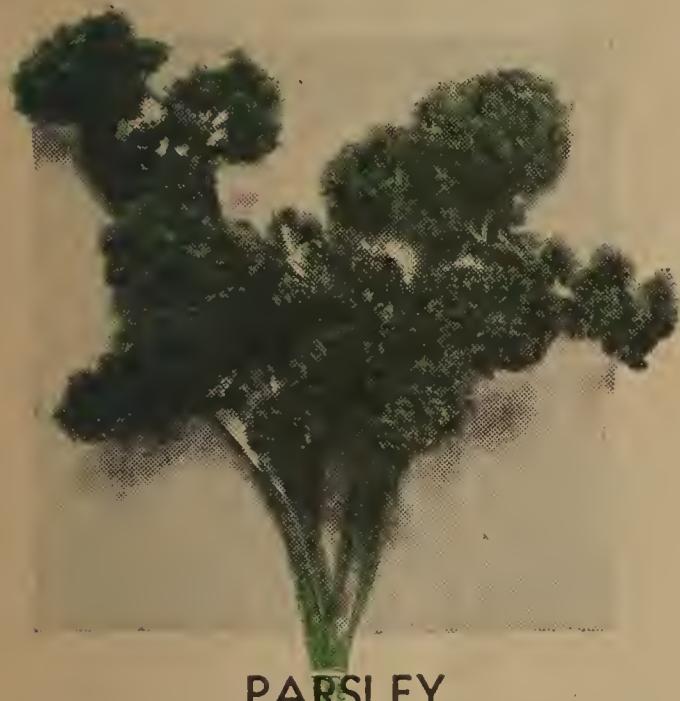

● SMALL SUGAR

This variety is smaller than the Large Field, but of finer grain, sweeter and very prolific. We recommend small sugar as one of the best for pumpkin pies. Pkt., 5c; oz., 10c; ¼ lb., 20c; 1 lb., 55c; 5 lbs., \$2.25 Postpaid.

BERMUDA ONION PLANTS

Our Plants are open field grown. Large size. Strong, Healthy and Sturdy. Shipped fresh the day they are pulled. Onion Plants produce large onions, which are Sweet and Tender. They grow faster, mature quicker, sell at the highest market price, because they are of much superior quality.

Grown from Imported Seed, produce the genuine Bermuda Onion. Thin skin, white meat Sweet and Tender. They are hardy, easy to grow, and easy to harvest. They will produce perfectly in any State. Frost or light freeze will not injure them. 1000 plants will produce from 7 to 10 bushels of onions. 500 plants, 85c; 1000 plants \$1.45 Postpaid. Crate of 6000 plants Not Prepaid, \$5.25.

PARSLEY

Parsley thrives best in a rich soil. The seeds germinate very slowly, three or four weeks generally elapsing before it makes its appearance. Sow early in spring half an inch deep, previously soaking the seeds for a few hours in tepid water. One oz. to 150 feet of drill.

Champion Moss Curled—A beautiful crimped and curled variety. Pkt., 5c; 1 oz., 10c; ¼ lb., 25c; 1 lb., 65c.

Turnip-Rooted Parsley—This vegetable has the same flavor as the regular parsley, but it produces small turnip-shaped roots underground that are used for flavoring soups, etc. Pkt., 7c; 1 oz., 15c; ¼ lb., 40c.

ROSELLE

or Annual Currant Jelly Plant

Make delicious jelly from the leaves and branches of this wonderful new Australian plant, using only half the amount of sugar required with fruit juices. Roselle makes a bright red jelly, that both looks and tastes like currant and would take an expert to tell the difference.

Roselle Seed should be sown in April in the field where the plants are to remain in rows six feet apart and thinned to two feet in the row. The plants grow rapidly and thrive anywhere in the United States. Cooking directions on every package. Pkt., 10c; ½ oz., 25c; oz., 45c; ¼ lb., \$1.45.

The House of Gurney, Inc.

Dear Sirs:

Last year I got one pound of your Peanut seed and we raised one and one-half bushel of nuts—the only thing we did raise in the garden as the rest all dried up, so I am trying a few more this year as we surely enjoyed them. Yours truly,

Mrs. Henry Lautenschlager, Palmer, Neb.

PARSNIPS

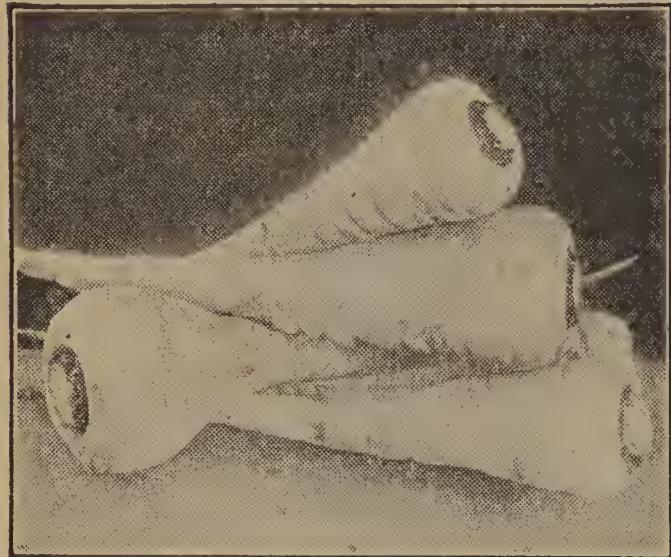

1 Oz. for 150 Feet of Row; 4 Lbs. per Acre

CULTURE—Plant as early in the spring as the weather will permit and continue planting till the middle of June. Plant $\frac{1}{2}$ inch deep in a rich, deeply worked, sandy loam, in rows 18 inches apart, and when 2 inches high thin out to 4 to 6 inches apart. Parsnips germinate slowly, especially in dry weather; Parsnips are improved by frost, so they can be dug as wanted, or stored for winter use.

• GUERNSEY IMPROVED HALF-LONG

The roots do not grow so long as the Hollow Crown, but are of greater diameter and more easily gathered. The roots are very smooth; the flesh is fine grained and of most excellent quality.

Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 20c; 1 lb., 60c; 5 lbs., \$2.50 Postpaid.

• SHORT THICK PARSNIP

It is a stump rooted variety and hence easily harvested. Roots reach a length of about 8 inches, with a thick broad shoulder, skin is smooth and white, and the flesh is fine-grained, sweet, sugary, and tender. Very early, maturing it is ready for use in about 100 days. It is a most prolific yielder, it contains more saccharine, is sweeter and more nutritious than other sorts. Pkt., 7c; oz., 12c; $\frac{1}{4}$ lb., 25c; 1 lb., 70c.

OKRA OR GUMBO

Extra Early Dwarf Green: Okra is one of the easiest and most satisfactory vegetables you can grow. No Southern garden is complete without a patch of Okra, but you seldom see it growing north of the Mason and Dixon line. Okra is used for stews, for flavoring soups, and in salads. Pods are best when from $1\frac{1}{2}$ to 2 inches long. When they get longer they are tough and woody. We list only the Extra Early Dwarf Green, which is one of the earliest and most dwarf growing sorts. The plants are from $2\frac{1}{2}$ to 3 feet in height, producing pods very close to the ground and very thick on the stalk. It is common to find thirty to forty pods on a stalk 3 feet high. The pods are deep green in color, short, corrugated and fluted.

Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 20c; 1 lb., 55c; 5 lbs., \$2.40 Postpaid.

RHUBARB or PIEPLANT

How many farmers and city people are supplied with this delicious fruit? It is easily grown and produces abundantly. It comes the first of anything in the spring, just when you want it. It will grow any old place and will thrive there for years, but the better place, care and cultivation given it the better returns. It is as easily grown from seed as from the roots; and you get a nice cutting the second season. Try at least a package of these seeds. Early, large and tender. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; 1 lb., \$1.25.

GIANT SWEET PEPPERS

1 Ounce for 1000 Plants

CULTURE: Peppers like a light, rich, warm soil for best results. They require about same treatment as tomatoes. Sow seed in hotbed early in April and transplant to open ground when weather is settled—or start seed outside after all danger of frost is past.

• CALIFORNIA WONDER

Thickness of flesh alone, which is often $\frac{3}{8}$ of an inch, places this sweet pepper above all others. It is crisp and juicy, too, without a trace of pungency. Vigorous growing plants bear a heavy yield of blocky fruits that become as much as 5 inches long and 4 inches wide. They are unusually good for serving whole. It is a splendid new variety, which has proved valuable to both market growers and home gardeners. Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c; $\frac{1}{4}$ lb., 90c; $\frac{1}{2}$ lb., \$1.50; 1 lb., \$2.50.

• PIMENTO

The sweetest Pepper grown, as it does not contain the slightest trace of fieriness. The plants are productive and Peppers medium size and of a shape which is desirable for filling, and when prepared in this manner they are delicious. They may also be used in preparing salads and for flavoring. When fully ripe the Peppers are a brilliant red color and very attractive, being heart-shaped. Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c; $\frac{1}{4}$ lb., 75c; 1 lb., \$2.25.

• HARRIS EARLY GIANT

One of the largest sweet peppers that can be grown in the North. Older varieties of peppers are satisfactory only in the South. Harris Early Giant is not only very large, but the plants produce enormous yields, and mature earlier than most other varieties. Plants of strong, vigorous growth, often 18 inches tall and covered from top to bottom with enormous peppers, seldom taking more than 45 to 50 to fill a bushel crate. Color dark green, turning to a bright red. Pkt., 6c; $\frac{1}{2}$ oz., 20c; oz., 30c; $\frac{1}{4}$ lb., \$1.00; 1 lb., \$3.25.

• NEAPOLITAN

Earliest and Best for the North—This is the earliest of the large, mild red Peppers and very productive. The plant grows about two feet high and is completely laden with fine Peppers about four inches long. Flesh is very thick and exceedingly mild. Color of fruit dark green turning a brilliant red when ripe. Ripe in 125 days. Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c; $\frac{1}{4}$ lb., 90c; 1 lb., \$2.70.

• LONG RED CAYENNE

The true Cayenne, hot and pungent. Pkt., 5c; $\frac{1}{2}$ oz., 20c; oz., 35c; $\frac{1}{4}$ lb., 90c.

HYBRIDIZED POTATO SEED

From the Seed-Balls—Millions never saw a Potato Seed Ball. Thousands have tried in vain to get the seed. Now is your opportunity. This unrivaled seed will produce an endless variety of new kinds. Your fortune may be in one of them. They are as easy to grow as tomatoes.

Growing new and distinct Seedling Potatoes from the Seed-Ball Seed is intensely interesting. This seed will positively produce innumerable new kinds, colors, shapes, sizes, and qualities. Some may be of immense value and bring you a golden harvest. Every farmer, gardener, and bright boy should plant a few packets. Full directions on every pkt. Pkt., 10c; 3 for 25c.

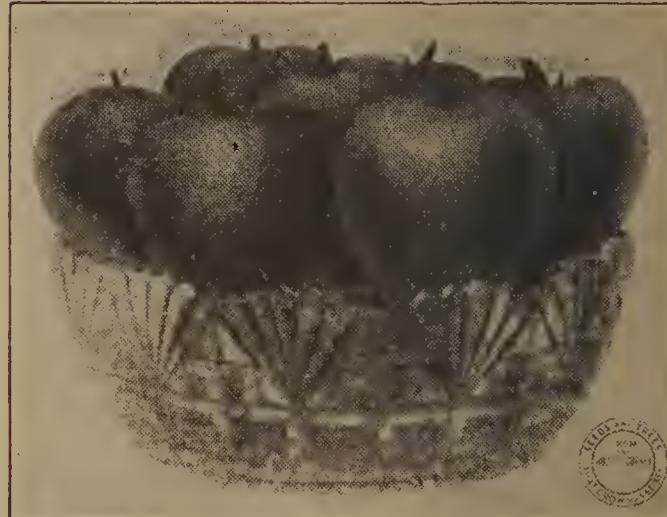

Photo of Potato Seed Balls—One-Half Natural Size

 It is from these that ALL valuable new varieties of Potatoes are produced.

EVERGREEN AND TREE SEEDS

• MOTHER GURNEY MULBERRY

The first little tree was planted many years ago in the lawn at the rear of Father and Mother Gurney's home, overlooking the Missouri River. The tree grew, thrived, and bore an abundance of fruit. It is now sixteen inches through, thirty feet high, and spreads almost as much. Each year it has produced from 200 to 300 quarts of extra fine quality fruit—many of the berries being an inch long, very firm and fine for eating fresh or for canning. By using 9 parts Mulberries and 1 part sour cherries, this sauce can not be told from Black Raspberries, except that it is better. Professor Hansen says seed from this tree will produce trees identically the same as the parent tree. In addition to the fruit, Russian Mulberries are drought resistant, make good windbreaks, and fine, long-lived fence posts. Easily grown. Planting directions on every package. Pkt., 20c; $\frac{1}{4}$ oz., 35c; $\frac{1}{2}$ oz., 60c; 1 oz., \$1.00.

• CARAGANA, or Siberian Pea Tree

A very hardy hedge or low growing tree from Siberia. Foliage dark green, while the bark is light green making a very ornamental hedge plant. Oz., 20c; $\frac{1}{4}$ lb., 65c; 1 lb., \$1.95.

• HONEY LOCUST THORNLESS

A native American tree of large size and rapid growth. Valuable for timber and posts. Oz., 15c; $\frac{1}{4}$ lb., 45c; 1 lb., \$1.10.

• BLACK HILLS SPRUCE

One of the best ornamental Evergreens grown; This variety only seeds once in several years, consequently seed is very scarce and high priced. Pkt., 10c; $\frac{1}{2}$ oz., 40c; oz., 75c.

• COLORADO BLUE SPRUCE

A rare, elegant tree, with foliage of a rich blue. One of the most distinct and striking of all the Spruce family. Pkt., 10c; $\frac{1}{2}$ oz., 30c; oz., 55c; $\frac{1}{4}$ lb., \$2.00.

• BULL PINE

(Ponderosa)—This is the most easily grown from seed of any Evergreen. One of the most rapid growing, hardy and best trees for wind-break. Pkt., 7c; oz., 25c; $\frac{1}{4}$ lb., 70c; 1 lb., \$2.00.

GURNEY'S RADISHES ARE BETTER

1 Ounce for 150 Feet of Row; 4 Pounds Seed per Acre

For a successive supply sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hotbed in February, care being taken to give plenty of ventilation, otherwise they will run to leaves.

Early Scarlet Globe

• EARLY SCARLET GLOBE

In offering this Scarlet Globe Radish to the public we know we are offering the very best radish on the market. It is earlier than any other market variety, and the quality is so crisp and sweet that it always creates a demand for more. It is especially valuable for early planting in hotbeds or out doors. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; 1 lb., 50c; 5 lbs., \$2.00. Postpaid.

• FRENCH BREAKFAST

Excellent home and market garden sort; also suitable for forcing. Tops small. Roots oblong, blunt, with slender well defined tap root; about $1\frac{1}{2}$ inches long and $\frac{5}{8}$ inch through; rich scarlet with white bottom; flesh white, crisp, and of splendid quality. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; 1 lb., 50c; 5 lbs. \$2.00. Postpaid.

• CRIMSON GIANT

A remarkable feature of this Radish is that it will grow double the size of other red forcing radishes and will remain solid, not showing the least sign of becoming hollow. It will grow six and seven inches in circumference, weighing about ten ounces. Shape is round to oval and very attractive. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; 1 lb., 50c; 5 lbs., \$2.00. Postpaid.

• GURNEY'S ALL-SEASONS RADISH

This new radish is a great acquisition to the list of radishes. It can be planted very early and can be used as soon as it is large enough, but will continue to grow if left in the ground until it is as large as an ordinary turnip and does not become pithy or strong. It is one of the best money makers for the market gardeners on account of its long season and its immense size. Can be sliced and eaten with vinegar. Color is bright scarlet, globe in shape, an exceptionally fine radish in bunches. Pkt., 7c; oz., 15c; $\frac{1}{4}$ lb., 25c; 1 lb., 80c; 5 lbs., \$3.10. Postpaid.

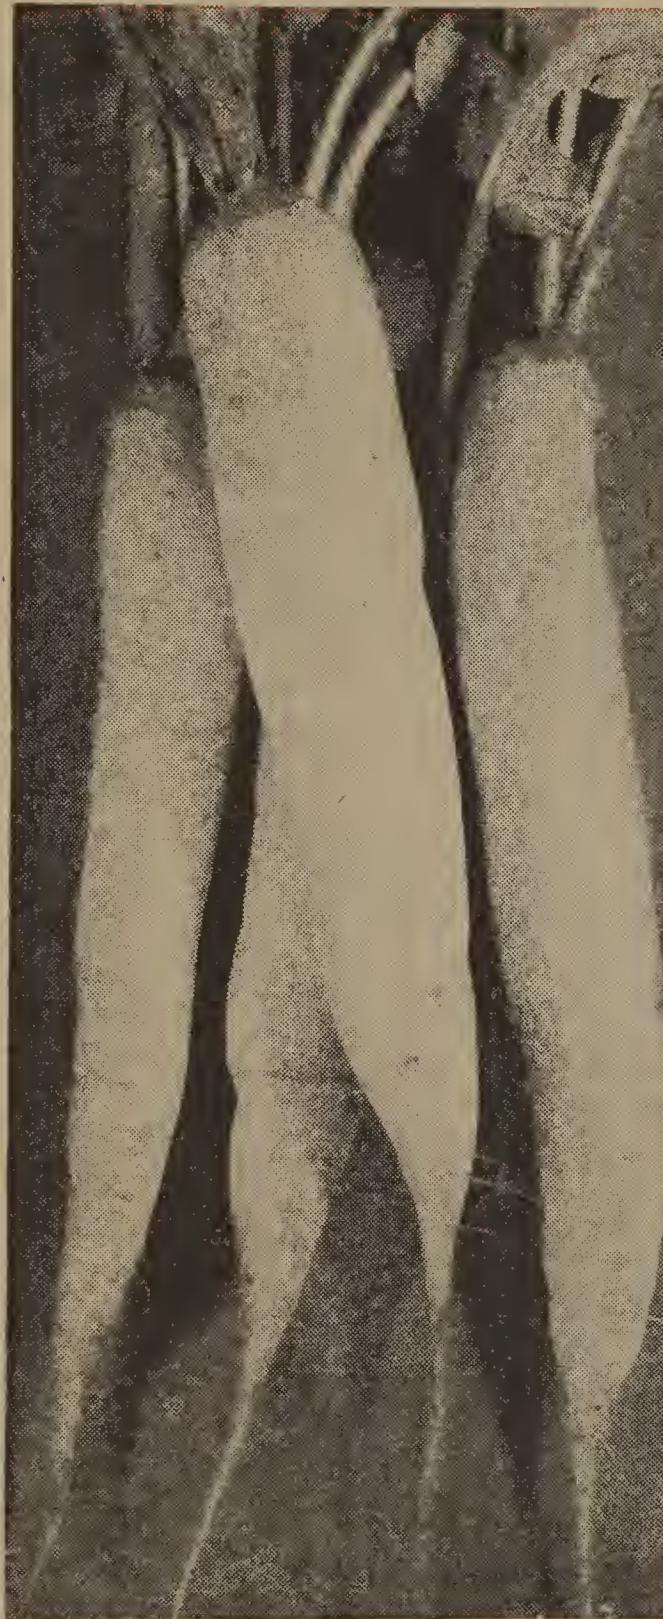

The House of Gurney, Inc.

Dear Sirs:

I sent for a package of your All-Seasons Radish last year and was certainly pleased with them—they were the only good radishes we had, and got so large in spite of the dryness.

Mrs. Guy Hendricks,
Tenstrike, Minn.

Our Radish seed are all raised from transplanted roots, the bad shaped and off-color radishes being discarded. We could raise radish seed for one-half our present cost but they would not be Gurney quality.

White Icicle

• WHITE ICICLE

Our seed of this long white radish is as near perfect as it is possible to produce it. Out of 100 White Icicle Radishes pulled in our trial ground 98 were even in size, good shape, perfect color clear to the top—sweet, tender, and mild. The other two were good radishes but slightly imperfect in shape. Market Gardeners should plant Gurney's White Icicle for a good cash crop. Ready to use in 25 days. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; 1 lb., 50c; 5 lbs., \$2.00. Postpaid.

When ordering radish seed get enough to make several plantings. They may be sown as late as Sept. 1st.

Early Scarlet Turnip White Tip

• SCARLET TURNIP—WHITE TIPPED

We consider this one of the most desirable radishes to grow. Color: deep scarlet with a distinct white tip covering at least one-third of the lower diameter of the root. It matures under favorable conditions in about twenty days and will hold longer than the other turnip or globe shaped radishes before becoming pithy. The maximum size before becoming over-ripe is about one and one-fourth inches in diameter. Its shape is nearly round, being only slightly flattened on the under side. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; 1 lb., 50c; 5 lbs., \$2.00. Postpaid.

WINTER RADISHES

Winter Radishes should be planted in July or early August. An ounce of seed will produce several bushels of delicious radishes.

Take them up in the fall and store in your house, or cellar, same as other vegetables, and you will have fresh crisp radishes all winter.

- Chinese Rose, or Scarlet China—Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; 1 lb., 60c.
- Long Black Spanish Winter—Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; 1 lb., 60c.

• MAMMOTH JAPANESE WINTER RADISHES

These monstrous Japanese winter radishes were considered a novelty some time ago, but they are becoming just as staple a winter vegetable as potatoes, carrots or beets. Some of them will measure as much as four or five feet long. Some of the other varieties are globe shaped and grow as large as the largest turnip. We have grown these in the trial ground for regular winter use for a number of years, and we have never found any of them but what were crisp and juicy. They will keep perfectly until spring.

Tokinashi—Giant Long. Pkt., 7c; oz., 15c; $\frac{1}{4}$ lb., 40c.

Health Value of Fresh Radishes

Calories per lb. 133	Vitamins A, B, C
Proteins 1.3%	Carbohydrates 5.8%
Fats .1%	Calcium .021%
	Iron .00083%

Health Value of Fresh Squash	
Calories per lb. 209	Fats .5%
Vitamin A	Calcium .018%
Proteins 1.4%	Iron .00035%
Carbohydrates 9.0%	

Plant 1 Oz. for 20 Hills; 3 1/4 Lbs. per Acre

Unfortunately this vegetable is greatly neglected by the majority of farmers, as it adds greatly to the winter vegetables. It is easily grown, yields abundantly and is a most satisfactory vegetable. Many stock growers plant an acre or more of the summer Squash. It yields immensely and makes an excellent summer and fall feed for milch cows.

Culture—Sow at Corn planting time, in well-manured hills, the bush varieties 4 feet apart each way, the winter sorts 10 to 12 feet each way, and thin out to 2 to 4 plants to hill. To repel the Squash vine borer, throw a handful of tobacco dust close around plants. The large, strong-smelling black Squash bug can be kept in check by hand picking.

● GOLDEN DELICIOUS

See Colored Picture on
Inside Front Cover

We take much pride in offering this remarkable squash, and we believe it is destined to become very popular for canneries, market gardeners and home gardens. We have never grown a squash with such high quality as this and it has a very attractive appearance. It is the result of a cross between Boston Marrow and Delicious and retains the high quality of the Delicious and the beautiful color of Boston Marrow. The skin is a bright reddish-orange, and the flesh is rich golden orange. The flesh is 2 to 3 inches thick and there is no green zone near the rind. Many of our friends say "it is better than a sweet potato." It is a fine keeper for winter use and on account of its high quality and attractive color it has created a sensation with canners. Besides all its other fine qualities, it is the finest squash for pies. It grows very vigorous and produces heavy crops.

Pkt., 6c; oz., 12c; 1/4 lb., 30c; 1 lb., 85c; 5 lbs., \$3.50 Postpaid.

● BANANA

Thick fleshed, fine grained and sweet. This is the heaviest yielding of all squashes, producing 8 to 10 squash on a vine, which often grow 3 feet long and 6 to 8 inches in diameter. It has a tough shell which is grayish green in color. The beautiful, orange-yellow flesh is firm and solid, always free from fiber and stringiness.

It cooks smooth and has a delicious sweet flavor. The fruits are shaped like bananas.

This is one of the best keepers of all the winter squash. It will keep until spring if properly handled. It is less liable to damage by insects and diseases than any other squash. One of the best—both for table use or stock feed.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 75c; 5 lbs., \$3.25 Postpaid.

Buttercup Squash are almost solid meat. Notice the small seed cavity.

● BUTTERCUP

A cross between Essex Hybrid and Quality developed by Professor A. F. Yeager of the North Dakota Experiment Station. The squashes weigh between 3 and 5 pounds with thin, tough green skin. There is no fibrous section and the deep, rich orange flesh is untinged with green. It is a good keeper with less waste and shrinkage in cooking than any other squash we have tried. The flavor is pleasant and very like that of a sweet potato, very sweet; the texture smooth and comparatively dry. This is the best squash we have ever tasted. Pkt., 7c; oz., 20c; 1/4 lb., 55c; 1 lb., \$1.60. 5 lbs., \$7.25 Postpaid.

● GIANT BUSH SUMMER CROOKNECK

Largest of the Golden Crooknecks. 55 days. One of the best of the summer squashes. It is of dwarf, bushy habit and very productive, maturing in 55 days. The skin is yellow. Flesh deep golden yellow, tender, dry and of agreeable flavor. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 65c; 5 lbs., \$2.95 Postpaid.

Plant Giant Bush Summer Crookneck Squash for early summer stock feed. Ready to use 55 days from Planting

The House of Gurney, Gentlemen:

We have been ordering our garden seeds from you for the past thirteen years and have had good luck with them. We think the Gurney Table Queen Squash the best there is. Raised four bushels of Gurney's Table Queen Squash from 8 vines, which is extra good for this country. Yours truly,

Fred Haussler, Holbrook, Neb.

NEW TOBACCO,
TOM SUTTON

Grow Them—Smokes for yourself on your own farm.

Not being an expert on tobacco myself, I will have to give you the originator's description, and the experience of the boys around here who use tobacco. This tobacco originated in Minnesota, is extremely early, yields wonderfully, and if I am to believe the fellows who use it, it is of remarkably fine quality. The originator says of it: "I feel that I have perfected as nearly a perfect tobacco for the northwest as it is possible to grow. It is unequaled as a pipe and cigar tobacco. My crop was all right to cut before frost this year. Stock four to six feet high, with as many as 24 large leaves on a stalk. Pkt., 6c; 1/2 oz., 25c; 1 oz., 40c; 1/4 lb., \$1.00.

● GURNEY'S TABLE QUEEN

For many years it was quite an event to have squash on the table, and I wonder if you really know the reason why. Not because it was hard to prepare but because it was hard to get enough people at one table to eat one squash. Gurney's Table Queen Squash is an individual squash, equally as good quality as any other, and just enough for one person. I have seen as high as 100 squash on one vine; they are dark green in color, and are more or less pear shaped approximately 5 inches in diameter and 7 or 8 inches long. The flesh is of golden yellow, and the squash is an excellent keeper. A few vines of this Table Queen Squash will furnish enough squash for the entire family for the whole winter.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 75c; 5 lbs., \$3.25 Postpaid.

● WARTED HUBBARD

This is the well known winter squash of which a larger acreage is produced than any other variety, and the best known of all squash. Fruit large, olive shaped, with skin very dark green. Skin more or less warty, and very hard. Flesh, rich yellow. A good shipper and keeper.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 80c; 5 lbs., \$3.25 Postpaid.

GURNEY'S NORTHERN GROWN TOMATOES

Plant Earlibell and
Bison and Have
TOMATOES
10 DAYS EARLIER

Break O'Day—The Heaviest Producer
of the Extra Early Tomatoes

● BREAK O'DAY

This early, scarlet, globe shaped tomato was developed by F. J. Pritchard of the Dept. of Agriculture. It is a cross of the Marglobe and Marvana. It retains all of the good qualities of Marglobe, being a smooth, solid, bright red, globe shaped tomato. It is nearly as early as Earliana or Earlibell. Does not crack and the seed cavities are small. The Break O'Day is the heaviest producer of the early tomatoes. Pkt., 7c; $\frac{1}{2}$ oz., 20c; 1 oz., 35c; $\frac{1}{4}$ lb., \$1.15; $\frac{1}{2}$ lb., \$2.10; 1 lb., \$3.90.

● EARLIANA

The earliest, large, smooth red tomato. This tomato is not only remarkable for its earliness, but for its very large size, handsome shape and bright red color. Its solidity and fine quality are quite equal to the best medium, and late sorts. Enormously prolific. The very finest for the northern market and home garden. Pkt., 5c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c; $\frac{1}{4}$ lb., 80c; 1 lb., \$2.25; 5 lbs., \$9.25 Postpaid.

● BISON, THE TOMATO FOR NORTHERN GARDENS

The best early tomato yet developed by Professor A. F. Yeager. In place of wasting its vitality in continuous branching, as do practically all other tomatoes, Bison grows a compact plant and puts all its energies into producing and ripening a heavy and extra early crop of smooth, solid, meaty, medium sized red tomatoes. In 1930 Professor Yeager had a plant in his plot that produced 40 pounds of ripe fruit. Do not prune Bison plants. We believe this is the best thing that Professor Yeager has developed to date and that is saying a lot.

Pkt., 8c; $\frac{1}{2}$ oz., 25c; 1 oz., 45c; $\frac{1}{4}$ lb., \$1.25; 1 lb., \$4.25.

One pkt. to 100 feet of row— $\frac{1}{2}$ pound to the acre. It is not how cheap we can furnish you Tomato Seed, but how good. In buying Tomato Seed from us you are getting the Gurney Quality, which means the very best product.

There are no better strains of any of the varieties that we are offering, and the constantly increasing demand for Gurney Tomato Seed proves that we are furnishing seed that produces the best quality, smoothest and best shipping tomatoes.

● EARLIBELL TOMATO SELECTION

See Colored Picture on
Inside Front Cover

We are still waiting for someone to prove to us that they have or can produce an earlier tomato than the Earlibell. I received a letter from one of our Texas customers one day, ordering six pounds of this Earlibell seed. He told me that he can get 25 per cent more fruit to the acre and ten days earlier than any other tomato grown in the market garden section of Texas. This ten days means sometimes several cents per pound additional for their big crop. In the North it means ten days more of tomato season, freedom from frosts, etc. It means that we can produce tomatoes further north and at higher altitudes than ever before. We grow in the Trial Ground, practically every variety of claimed early tomatoes. The method adopted is as follows:

On the first day of June we plant in the open ground the seed of all of the varieties and as they grow make records of the growth, the time of blooming and the first ripe tomatoes. The Earlibell is always just five days ahead of the next earliest, and running about as much as twenty days earlier than a number of varieties that are claimed to be extra early. The Earlibell is not only earlier, but it produces greater quantities of fruit with enough foliage to keep them free from sunburn, seldom rots, generally good-sized, smooth and of a bright red color that makes it very desirable for market as well as for the home table. Try it.

Pkt., 10c; $\frac{1}{2}$ oz., 25c; 1 oz., 40c; $\frac{1}{4}$ lb., 90c; 1 lb., \$2.85; 5 lbs., \$12.50 Postpaid.

● JOHN BAER

Extra early red. Not quite so early as Earliana, though there is only a few days' difference, John Baer yields a much heavier crop of larger, more uniform and more attractive fruits. Most profitable extra early sort.

Pkt., 5c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c; $\frac{1}{4}$ lb., 80c; 1 lb., \$2.25.

WE ARE
PROUD OF OUR
NORTHERN GROWN
TOMATO SEED

● SCARLET TOPPER OR PRITCHARD

A medium-early, large, smooth, and extremely solid Tomato of an intense scarlet color. Most productive and very attractive. Of a solidity that is truly remarkable, with very small seed pockets and no core. Its productiveness, particularly on rich soil, is amazing and individual plants will bear 70 to 80 fruits each. It will yield 15 tons and more per acre. Pkt., 5c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c; $\frac{1}{4}$ lb., 70c; 1 lb., \$1.85; 5 lbs., \$7.50 Postpaid.

● NEW STONE

The tomato for a main crop. We call this the king of the Livingstone kinds, which are the best types of large, smooth, solid "beefy" tomatoes. If asked to select one main crop, market sort, we advise this. Color, fine scarlet; stem set high, core small and shallow, so that but little is lost when it is taken out of the fruit before slicing. If in doubt, buy the New Stone. Pkt., 5c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c; $\frac{1}{4}$ lb., 70c; 1 lb., \$1.85; 5 lbs., \$7.50 Postpaid.

● JUICY (For Tomato Juice)

The new tomato developed especially to produce a fine flavored, highly colored tomato juice.

The fruits are medium to large in size, with thick outer and inner walls, and a small seed cavity. The flesh is firm and very bright red. Juicy ripens about the same time as Pritchard—will outyield any main crop tomato we have ever grown. A bushel basket of large, rich scarlet "Juicy" tomatoes will out-sell any other tomato on the market; and whether canned, used for tomato juice, or as fresh sliced tomatoes "Juicy" will prove superior to any other variety.

Pkt., 7c; $\frac{1}{2}$ oz., 20c; 1 oz., 35c; $\frac{1}{4}$ lb., 85c; 1 lb., \$2.25.

GURNEY'S TOMATOES

Plant yellow husk
or ground cherry
for pies and pre-
serves.

The House of Gurney,
Gentlemen:

Your seeds do wonderful here and are much cheaper than other seedhouses. Last year from two short rows of my Bison and Earlibell tomatoes, I canned 100 quarts, sold 30 bushels, and gave away more than that amount of the delicious, bright red Tomatoes.

Yours very truly,
Mrs. Rose Hawley,
Thurlow, Mont.

Ponderosa Tomatoes from Gurney's seed

● MARGLOBE TOMATO

Marglobe is a second-early, red-fruited variety equally suitable for trucking or canning. It produces large, smooth, meaty, globular, red fruits, which ripen uniformly and are relatively free from cracks. The Marglobe fruits are very meaty and though early, ripen slowly, and therefore ship and keep well. Owing to their shape, solidity, color, and uniform ripening qualities, they make a splendid canned product and first-class pulp. Large yields of excellent fruit have been reported from nearly every region where this variety has been tried.

Pkt., 5c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c; $\frac{1}{4}$ lb., 70c;
1 lb., \$1.75; 5 lbs., \$7.50 Postpaid.

● RED RIVER SPECIAL

Claimed by some to be as early as the Earlibell. Our tests show them to mature at approximately the same time. Anyway, it is one of the earliest tomatoes and has proven one of the hardiest, very solid and meaty. The Canadian experiment station at Morden, Manitoba, proved it to be the heaviest yielder out of 49 varieties. It is a cross between one of the older varieties and one of Professor Yeager's newer varieties. Fruit is small medium size, bright scarlet color meat, and slightly flat.

Package, 5c; $\frac{1}{2}$ oz., 20c; 1 oz., 35c; $\frac{1}{4}$ lb., \$1.00; 1 lb., \$3.45.

● GOLDEN QUEEN

"Queen of All the Yellows."—It is very prolific, ripens early, and is solid, always smooth, entirely free from ridges, large in size and delicious in flavor. It is fine for slicing. Price: Pkt., 5c; $\frac{1}{2}$ oz., 20c; 1 oz., 35c; $\frac{1}{4}$ lb., \$1.05.

● PONDEROSA

(Or Beefsteak)—This is the largest of the tomatoes. Often producing fruit weighing two pounds or more. Very bright red, generally smooth, fine vigorous growers, producing large crops of this immense fruit. Flesh is solid and contains very few seeds. For this reason it is considered one of the best for slicing and canning. Season about the same as Marglobe and Pritchard.

Pkt., 5c; $\frac{1}{2}$ oz., 20c; 1 oz., 35c; $\frac{1}{4}$ lb., 95c;
1 lb., \$3.45.

● YELLOW PEAR

Fruit bright yellow, distinctly pear-shaped; of rich flavor and used largely for preserving. The stock we offer is the true pear-shaped, not the large yellow plum often sold for it. Pkt., 5c; $\frac{1}{2}$ oz., 20c; 1 oz., 35c; $\frac{1}{4}$ lb., \$1.10.

● RED PEAR

A bright red fruit identical in shape with the Yellow Pear shaped tomato; however, it has a distinct flavor and a rich red color and is a special favorite for preserves and to make what is known as Tomato Figs. Pkt., 7c; $\frac{1}{2}$ oz., 20c; 1 oz., 35c; $\frac{1}{4}$ lb., \$1.20.

● YELLOW HUSK OR GROUND CHERRY

This is of the dwarf growing type, earlier and more suitable to the northern states than the tall spreading variety. Fruit about the size of the common cherry, bright yellow, enclosed in a loose husk. Bears abundantly and is most excellent for sauce and preserves. Pkt., 5c; $\frac{1}{2}$ oz., 20c; 1 oz., 35c; $\frac{1}{4}$ lb., \$1.20.

● GARDEN HUCKLEBERRY

A wonderfully productive plant, producing literally ropes of jet black fruit along its branches from the ground to its tips, plants grow about four feet tall, fruit matures about with ordinary tomatoes, size about that of the cranberry and are delicious for preserves or pies. Pkt., 6c; $\frac{1}{2}$ oz., 25c; 1 oz., 45c.

POPCORN

● SOUTH AMERICAN MAMMOTH

This new big yellow popcorn has taken the country by storm, and when it is better known, will be the main popcorn for popcorn stands and home use. The kernels pop out about three times the size of ordinary popcorn. $\frac{1}{3}$ pt., 12c; 1 lb., 20c; 5 lbs., 80c Postpaid. Not Prepaid 10 lbs., 95c; 25 lbs., \$1.85; 50 lbs., \$3.30; 100 lbs., \$5.75.

● JAPANESE HULL-LESS

It is the smallest and best of all popcorn. The stalks grow four to five feet high and each stalk produces three to six well developed ears. The corn when popped is snowy white and the kernels are free from hard centers, as found in all other varieties. Popcorn dealers pay more for this corn than any other variety. $\frac{1}{3}$ pt., 12c; 1 lb., 20c; 5 lbs., 80c Postpaid. Not Prepaid 10 lbs., 95c; 25 lbs., \$1.85; 50 lbs., \$3.30; 100 lbs., \$5.75.

PLANT MORE POPCORN

GURNEY'S DELICIOUS POPCORN CAN'T BE BEAT FOR POPPING

Our Japanese Hull-less Popcorn
is all northern grown

SALSIFY OR OYSTER PLANT

Sow early in the spring in drills 14 inches apart. Cultivate same as Carrots or Parsnips. Gather what may be wanted for the winter and let the balance stand in the ground for next spring.

Mammoth Sandwich Island—A new and large variety.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c;
 $\frac{1}{2}$ lb., 70c; 1 lb., \$1.25.

Five Pounds of Popcorn Will Plant One Acre

EAT GURNEY'S SPINACH AND BE HEALTHY

To stay young and healthy, eat plenty of greens. Spinach, lettuce, parsley and beet greens contain minerals and vitamins your body needs. They are found in no other food.

This is one of the most important of our market garden crops, and one that requires very little care. For summer use sow at intervals of two or three weeks from April to August, and for early spring crop sow in September, covering it in exposed places with straw to protect it from severe frost.

● KING OF DENMARK

This new spinach will surely replace all other varieties for spring planting. Produces but little seed, slow to commence seeding, continues to grow and hold its fine quality long after other varieties have seeded and become useless. It withstands the hot sun and extreme dry weather better than any other variety. A fine strain for canning. Forms low, large, compact tufts, leaves broad and round slightly crumpled. A glossy, dark green color, ready to use earlier than any other spinach. Matures in 45 days.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1/2 lb., 35c; 1 lb., 50c; 5 lbs., \$2.00 Postpaid.

● LONG STANDING BLOOMSDALE SAVOY

This is the heaviest yielder of any Spinach. The thick fleshy leaves are curled and crumpled. This Spinach stands a long time without going to seed. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1 lb., 45c; 5 lbs., \$1.85 Postpaid.

● NEW ZEALAND

The stems and leaves are soft, thick, and fleshy. Start this variety early in the spring and have spinach all summer. It is not damaged by hot, dry weather, but will continue to produce from early spring until fall. The large prickly seed are slow to germinate and should be soaked in warm water 24 hours before planting. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1/2 lb., 35c; 1 lb., 60c.

The House of Gurney,
Yankton, S. Dak.

Dear Sirs:

I am sending you an order for Gurney Seeds as I want to have a good garden this year. My neighbor planted Gurney's seeds last year, and she had the best and earliest garden around here, so I know they are good.

Yours truly,
Mrs. Win. Ebding,
Charles City, Iowa

SUN FLOWER

Mammoth Russian—The plant produces very large heads which measure 12 to 20 inches in diameter, and contain an immense quantity of large striped seeds, which are highly valued as an excellent and cheap food for fowls. They eat it greedily, thrive well, and lay the greater number of eggs.

Increased importance of the growing of sunflower seed is foreshadowed in the increased growth of the plant for forage purposes. Sunflowers as a silage crop are said to have been found to be of higher food value than corn.

Pkt., 5c; oz., 10c; 1 lb., 20c; 5 lbs., 90c;
Postpaid. Not Prepaid; 10 lbs., \$1.20; 25 lbs., \$2.75; 50 lbs., \$4.50; 100 lbs., \$8.25.

VEGETABLE SPAGHETTI

This remarkable vegetable grows and sets fruits freely.

The smooth creamy white skinned fruits measure about 8 in. long and 4 in. in diameter.

You pick the fruit when well matured and cook it in boiling water for about 20 minutes, take it out and cut and you will find a quantity of stringy Spaghetti-like contents which is quite tasty when seasoned with vinegar, sauce, or cooked in other ways.

The fruits can be stored until late spring.

The following three points are important:
1. Do not pick too young. Leave until fully matured. 2. Do not skin or cut the fruits. They must be cooked whole. 3. Do not cook too long as this will soften the stringy texture of the contents.

Pkt., 7c; 1/2 oz., 15c; 1 oz., 25c; 1/4 lb., 75c.

GARDEN LEMON—VINE PEACH OR MANGO MELON

The vine on which this fruit is borne is similar to the muskmelon and requires the same cultivation; fruit about the size of a large peach, oval shaped, somewhat russeted and the color of a bright orange when ready for use. For sweet pickles, pies and preserves, they are excellent.

Pkt., 5c; oz., 15c; 1/4 lb. 40c.

TURNIPS AND RUTABAGA—SWEET AND TASTY

1 Ounce for 150 Feet of row; 1 Pound per Acre

I am going to make this little personal appeal to the fellows in the extreme North. All of that strip of territory across the northern part of the United States where root crops, such as rutabagas, turnips, carrots, etc., grow to perfection, where you can produce a greater yield than in any other section of the United States, where they will out-yield the potato crop, and bring

equally as much money if you grow them in quantities as your best acre of potatoes.

For feeding stock in Fall or Winter there is nothing superior to Turnips or Rutabagas, as they are much liked by all kinds of stock and serve to keep them in good condition.

TURNIPS

● PURPLE OR RED TOP STRAP LEAF

Flat; fine flavor and one of the most popular varieties grown. When sown late it is one of our best varieties, an excellent keeper. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1 lb., 45c; 5 lbs. \$1.75 Postpaid.

● EXTRA EARLY WHITE MILAN

Extra early turnip, in which the extreme earliness, small top and tap root of the Purple Top Milan are united with the clear, white skin and flesh. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 55c; 5 lbs., \$2.25 Postpaid.

● GURNEY'S PURPLE TOP WHITE GLOBE TURNIP

This is an all-season Turnip; is sweet from the time it is large enough to use until the following spring; size above medium.

This new English Turnip was recommended to us by one of the largest turnip specialists as the best ever originated. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1 lb., 45c; 5 lbs., \$2.00 Postpaid.

Rutabagas are easy to raise and good to eat

RUTABAGAS

● KRASNOSELSKI RUSSIAN

On our trial grounds for past three seasons this gave the best satisfaction and produced the largest yield of any of the rutabagas. This made an extra large percentage of good-sized rutabagas, bright in color and of excellent quality for table use. This will take the place of older varieties on account of the increased yield and quality of the fruit. Pkt., 7c; oz., 12c; 1/4 lb., 25c; 1 lb., 60c; 5 lbs., \$2.25 Postpaid.

● PURPLE TOP YELLOW RUTABAGA

Best variety of Swedish turnip in cultivation. Hardy and productive; flesh yellow, of solid texture, sweet and well flavored; shape slightly oblong; terminates abruptly with no side or bottom roots; color deep purple above, and bright yellow under the ground; leaves small, light green, with little or no neck; the most perfect in form, the richest in flavor, and the best in every respect. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1 lb., 45c; 5 lbs., \$1.75 Postpaid.

ANNUAL FLOWERS FROM GURNEY'S

Whether you have acres of ground or just a little dooryard, you want the best flowers you can buy. On the following pages we offer a carefully selected list of choice varieties, that are easily grown by amateurs. By planting assorted kinds a profusion of flowers may be had from early summer until killing frosts in the fall. In this list you will find flowers for all pur-

poses—for edging and borders, for garden display and cut flowers, and for winter bouquets. You need not be without flowers any time during the growing season. Cultural directions are on each packet and the prices given are prepaid. Sow perennial seeds at the same time as the annuals: the earlier in the season they are started, the better next year's plants will be.

Try Some of the New All American Flowers . . . THEY ARE BETTER

ASTERS

● GIANT OF CALIFORNIA

We have had this strain under observation and it now fully meets with our ideas as to quality. It is a splendid mid-season flowering strain, the result of years of painstaking selection by one of California's leading hybridizers. They grow 3½ feet high with long strong stems 18 to 24 inches in length, bearing beautifully formed, curled and interlaced flowers 3 inches and over across. Finest Double Mixed. Containing all colors. Pkt., 10c; ¼ oz., 25c; 1 oz., 80c.

● HEART OF FRANCE—Wilt Resistant

The best pure red aster ever produced. Opens red as the purest ruby, deepens with age and retains its remarkable beauty to the very end. The flowers are large and full. The plants are of branching type and very robust habit. Stems are long and strong. The plants begin to bloom quite early in the season. Pkt., 7c; ¼ oz. 15c.

● CREGO'S GIANT ASTER

Wilt Resistant

With their long twisted curved petals they resemble the choicest of Japanese Chrysanthemums; flowers measuring five inches in diameter; borne on long, strong stems, making them suitable for cut flower purposes.

Crego's Giant Mixed. Pkt., 5c; ¼ oz. 20c, 1 oz., 70c.

● DAKOTA SUNSHINE

We offer this wonderful new aster as the best aster novelty ever introduced.

The color in these new asters is startlingly beautiful. A full ring of tubular petals surround the center, creating an airy, lace-like effect which is altogether charming. In color the flowers may be described as varying shades of Enchantress-pink, Apple-blossom, Deep-rose, Blue and Lavender.

We feel confident this glorious new strain will be acclaimed a distinct acquisition to modern floriculture. Pkt., 7c; ¼ oz., 15c.

● QUEEN OF THE MARKET

The earliest of all except Hohenzollern. Grows about nine inches high; very branching; fine double flowers are produced on long stems, making it valuable for cutting. This comes in a wonderful assortment of colors. Pkt., 5c; ¼ oz., 15c; 1 oz., 50c.

IF YOU should have any trouble raising Asters—TRY OUR WILT-RESISTANT STRAINS. Perhaps your soil is infested with aster wilt.

● EXTRA EARLY HOHENZOLLERN

The earliest grown, earlier than Queen of the Market. Height about twelve inches, branching and free flowering. Flowers measure about two and one-half inches. Mixed Colors. Pkt., 5c; ¼ oz., 15c; 1 oz., 25c.

● EARLY AMERICAN BEAUTY ASTER—Wilt Resistant

This new strain of American Beauty Aster is at least 4 weeks earlier than the regular strain and is the only American Beauty that should be planted in the North. Immense, brilliantly colored flowers borne on long stems make this one of the best cut flowers; mixed colors. Pkt., 7c; ¼ oz., 25c.

Erma Haley with a vase of Antirrhinum. Miss Haley is in charge of the Flower Seed Department at Gurney's

ANTIRRHINUM, SNAP-DRAGON

● Giant Flowered Mixed

University of California De Luxe Mixture,
Rust Proof Strains

Certificate of Honor 1935 All American Selections

Antirrhinums are one of our finest and most easily grown flowers, enduring hot sun, dry weather and lack of care. Unfortunately, in many parts of the United States, it has been impossible to raise these beautiful flowers on account of the Antirrhinum rust which would destroy a bed of flowers in a single week. By planting this rust-proof strain, you escape this danger and are sure to raise the largest and most beautifully colored Antirrhinums you have ever grown. Pkt., 5c; ¼ oz., 20c; ½ oz., 35c.

● Giant Flowered Purple King—This is the forerunner of a race of new and distinct Snap-Dragons. Flowers more than twice the size of the ordinary Antirrhinum. Do not fail to include it in your order. Pkt., 10c; 3 for 25c.

● Dwarf Mixed—The flowers are as large and beautiful as the giant type, but the plants form well rounded bushes only one foot tall. Excellent for beds or borders. Pkt., 7c; ¼ oz., 20c.

Carpet of Snow

ALYSSUM

● Carpet of Snow—New, very dwarf, blooming profusely. A solid mass of white all Summer. Splendid for edging. Try it this year and you will always plant Little Gem. Plants 3 to 4 inches high. Pkt., 5c; ½ oz., 15c; 1 oz., 25c.

AGERATUM

As an addition to the flower garden's blue, the Ageratum is a valuable flower. The dwarf sort being particularly desirable for borders, edgings, etc., being very compact and erect.

● Little Blue Star—A variety of exceedingly dwarf and even growth; the tiny bushes, not over 4 to 5 inches high, are densely covered with bright blue flowers, a fine variety for edging. Pkt., 5c; ¼ oz., 20c; ½ oz., 35c.

BROWALLIA

● Amethyst Blue—A beautiful large-flowering variety of the most brilliant ultramarine blue, a rare color; does finely outside in the border, or in hanging-baskets or vases, but is especially valuable as a pot plant for winter and early spring flowering. Pkt., 5c; ½ oz., 15c.

BALSAM OR LADY SLIPPER

● **Camelia Flowered**—The largest flowered of any of the Balsams and perfectly doubled. The individual flowers frequently measure 2½ inches across, the plants forming symmetrical, well branched erect bushes, the branches being almost covered with the magnificent double flowers. In color they vary from the brightest scarlet to pure white, including spotted violet, royal purple and many others. Pkt., 5c; oz., 25c.

ANNUAL CHRYSANTHEMUM

The annual Chrysanthemums are distinct from the autumn flowering, blooming all summer and making a gorgeous display.

● **Coronarium, Double Mixed**. Lovely button-shaped blooms, 1½ in. across. Always fully double. Includes yellow and white. Grows 18 in. tall and blooms freely. Price: Pkt., 5c; ½ oz., 15c; oz., 25c.

● **The Sultan**—This beautiful single Chrysanthemum is sure to please. The large, coppery scarlet flowers with yellow centers completely cover the plants. Height, 20 inches. Pkt., 5c; ½ oz., 15c.

CLARKIA

This pretty and easily grown annual has been much improved in recent years. They do well either in sun or shade, growing 18 inches tall, with leafy racemes of double flowers, which all open in water when cut.

Elegans Double Mixed—A fine mixture containing all the colors. Pkt., 5c; ¼ oz., 15c; ½ oz., 25c.

CANNAS

Extra Choice Mixed—Seed saved from 20 varieties of only the very best of the large or Gladiolus flowered type. Blooms in about ten weeks after planting. Pkt., 7c; ½ oz., 20c.

CHINESE WOOLFLOWER

The name Woolflower, has been given to the plant because the flower-heads resemble a large loose ball of wool. Borne on long stems and practically cover the plant during the blooming season, which lasts from mid-summer until frost. Even a short row of them will yield a continuous supply of blooms for cutting.

● **Chinese Woolflower, Mixed**—This wonderful mixture includes every shade of red, yellow, pink and orange. A very choice mixture that we know will please you. Pkg., 5c; ¼ oz., 15c.

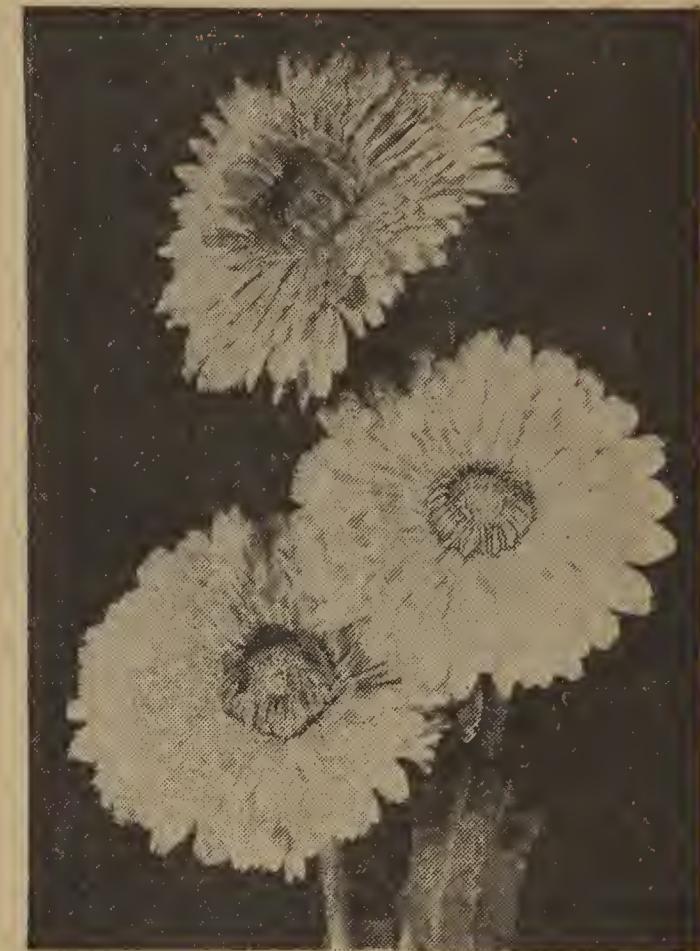

● **Chinese Woolflower, Crimson**—A magnificent variety with large flower-heads borne from mid-summer until frost. The color is a rich and intense shade of bright crimson, height 3 ft. Pkt., 7c; ½ oz., 15c.

CELOSIA OR COCKSCOMB

● **Giant Crimson Empress Maxima**—Dwarf plants bearing mammoth bright cockscombs. The bronze foliage, makes it one of the most attractive of all the Cockscombs. Pkt., 10c; 2 for 15c.

● **Ostrich Feather (Celosia Plumosa)**—A beautiful feathered Celosia, producing large bright crimson and orange plumes. Mixed. Pkt., 5c; ½ oz., 15c.; 1 oz. 25c.

Gurney's Selected CALENDULAS

● CALENDULA CHRYSANTHA ALL AMERICAN SELECTIONS 1934

Chrysanthra is distinct in type, a new break in Calendulas which is outstanding among all varieties known up to the present time. The large double flowers are an exquisite shade of clear buttercup yellow, with long loosely arranged petals which droop somewhat to give the rounded appearance of a Chrysanthemum. Besides adding a bright golden splash of color to the garden, Chrysanthra is remarkable for its long stiff stems, making it ideal for cutting. The fact that it won one of the coveted Gold Medals in the All American Selections competitions this year indicates the high esteem in which it is held by the horticulturists of the country. Pkt., 6c; ½ oz., 15c; 1 oz., 25c.

● **Orange King**—Double, dark orange red, dark center; a very select strain. The plants in the open ground under ordinary field cultivation attain a height of eighteen inches and produce blossoms three and a half inches in diameter. Pkt., 5c; ½ oz., 15c; oz., 25c.

CALENDULA ORANGE SHAGGY

Gold Medal Winner 1935 All America Selections

● Calendulas in recent years have enjoyed a decided revival of interest. Many new colors have been introduced in the ordinary double form, and several new and interesting flower types have been developed. One of the most interesting, and certainly the most distinct of these new types is the new laciniated petaled type, Orange Shaggy. It is destined to become one of our most popular garden flowers. Deep orange in color, exceedingly graceful and informal in appearance, it is a striking contrast to the formal Calendulas in general use. Excellent for use both in the garden and for cutting. Pkt., 7c; ½ oz., 20c; 1 oz., 35c

COLEUS, Large Leaved

These are the ornamental "foliage" plants so well adapted for growing in the house in winter. They can also be transplanted outdoors when the weather is warm, and for borders or window boxes in partial shade they are unexcelled. The large rich velvety leaves are of many shades and combinations of green, red, and yellow. Finest Mixed. Pkt., 15c; 2 for 25c.

Mrs. Julius Uitermarkt and grand-children of Leighton, Iowa with a giant Zanzibarensis Castor Bean nearly 14 feet tall

CASTOR BEAN

The Ricinus has very ornamental foliage and beautiful showy-fruit. Fine for the center of a bed, as it gives a magnificent semi-tropical appearance; or planted thick, it makes a fine screen or hedge. Plant seed in open, very rich, deep-spaded ground, in a dry situation as soon as safe in spring.

● **Zanzibarensis**—The tallest growing Castor Oil Bean, reaching an average height of 12 ft. The large palmate leaves often measure 2 ft. or more across. A stately plant for a background. Each plant makes a perfect pyramid of green and bronze foliage. The House of Gurney will give \$5.00 for the photograph of the tallest Castor Bean raised from this seed. Take the picture with some member of the family standing by the plant, measure it carefully and send it in to be judged before October 1st. If your Castor Bean is the tallest, you will receive \$5.00 in cash. Let's raise a 16-ft. bean. Pkt., 7c; oz., 20c; 1/4 lb., 50c.

● **Cambodgensis**—The finest dark-foliaged Ricinus. Leaves maroon; stem nearly black, fruit bronzy purple. Five feet. Pkt., 5c; oz., 15c, 1/4 lb., 45c.

CANDYTUFT

All the varieties look best in beds or masses. Seed sown in autumn produces flowers in early spring. When sown in April, flowers from July till frost. Hardy annual, height 8 in.

● **Giant Flowering Mixed**—Flowers profusely throughout the whole season. The flowers of our strain are nearly double the size of the old varieties and fairly cover the plants, which are useful in beds, pots or borders. Pkt., 5c; 1 oz., 20c.

ANNUAL DAISIES

● GOLDEN ORANGE DAISY

African—This flower is from South Africa and is the easiest grown of any of the showy border plants. It grows to a height of about fifteen inches and blooms profusely all summer. In our trial ground it was the most attractive flower of any shown there; the flowers are about two and one-half inches across and the most beautiful golden orange color. We recommend this specially for borders. Pkt., 5c; 1/8 oz., 15c.

● SWAN RIVER DAISY

Brachycome—This free flowering dwarf-growing annual is covered during the summer with a profusion of pretty blue and white flowers. Is especially suitable as edging for small beds and massing before the taller growing daisies. Height, 9 inches. Pkt., 5c; 1/4 oz., 15c.

DOUBLE PINKS DIANTHUS

Double Mixed—For brilliancy of coloring and markings, as well as beautiful forms of flowers, this family cannot be surpassed. The colors range through white, pink and crimson to the very deepest maroon; many varieties are finely fringed. They bloom early from seed sown in the spring. Fancy mixed. Pkt., 5c; 1/4 oz., 15c; 1/2 oz., 25c; 1 oz., 40c.

DAHLIA

Double finest mixed—For specimen plants and for rich autumn display these flowers can not be surpassed. The blossoms are wonderfully perfect and symmetrical with long stems, making them especially valuable for bouquets. While usually grown from tubers, robust plants and excellent blooms may be produced the first year from seed started early in boxes and planted out after danger of frost is past. Pkt., 10c.

ESCHOLTZIA (California Poppy)

● **Golden West**—The State flower of California. A bright free-flowering plant of low spreading growth with finely cut silvery foliage. The poppy-like flowers are produced from early spring until frost. The flowers are a glowing golden orange borne on long stems. Height 1 foot. Pkt., 5c; 1/2 oz., 15c; 1 oz., 25c.

● **Gurney's Special Single Mixture**—This mixture includes all the varieties of single sorts and is the most complete mixture of these charming annuals in existence. Pkt., 5c; 1/2 oz., 15c; 1 oz., 25c.

FORGET-ME-NOT

● **Victoria Blue**—This charming little blue flower succeeds best in damp, shady situations, but will thrive in almost any soil. Victoria Blue which we offer is the largest flowering, and blooms longest of any. Pkt., 5c; 1/8 oz., 15c.

● CHINESE FORGET-ME-NOT

An annual recently introduced from China; of the easiest culture, forming strong plants 18 to 24 inches high and producing through the summer months sprays of intense blue Forget-me-not like flowers, delicately sweet scented. A splendid addition to the comparatively short list of real blue flowers. Pkt., 5c; 1 oz., 20c.

FOUR O'CLOCK, MARVEL OF PERU

● **Gurney's Giant Scarlet**—A mass of red flowers blooming over a long period. A row of these in the flower garden produces almost a startling effect during the late afternoon and evening. Pkt. 6c; 1 oz., 20c.

● **Gurney's Giant Mixed**—Well known hardy annual succeeding anywhere. Handsome plants. 2 feet high, covered all summer with hundreds of bright colored, showy, sweet scented flowers. They make a wonderfully attractive hedge. Pkt., 5c; 1 oz., 15c; 1/4 lb., 45c.

EVERLASTING OR STRAW FLOWER HELICHRYSUM

Mixed—These are of the most beautiful colors: pink, white, red, yellow, lavender. They bloom on good, strong stocks, standing 3 to 4 feet high and are as beautiful as any of the annuals you can have. Cutting these just as the buds commence to open, they retain their delicate colors perfectly and remain beautiful for several years. These are the genuine everlasting flowers. Plant liberally of these. Cut large quantities of the just opening buds and retain them for the holidays and for special occasions. Pkt., 5c; 1/4 oz., 15c; oz., 35c.

EVERLASTING GLOBE AMARANTH

Gomphrena—A first-rate bedding plant; the flowers resemble clover heads and can be dried and used in winter bouquets. Mixed colors. Pkt., 5c; 1/2 oz., 15c; 1 oz., 25c.

GAILLARDIA

New Double (Annual)—Large bright-colored double flowers, useful for cutting. The colors embrace Sulfur, Golden Yellow, Orange, Amaranth, and Claret. Pkt., 5c; 1/2 oz., 15c; 1 oz., 25c.

GYPSOPHILA

Annual Baby's Breath—The flowers are small, star-like and borne on feathery sprays, which are highly esteemed for cut flowers, as they lend a most graceful effect when combined with other flowers in bouquets. Pkt., 5c; oz., 15c.

GERANIUM

Double and Single Mixed—The brilliant colors of the flowers and the exquisite zone or horseshoe markings of the leaves of some of the varieties, render the Geranium very desirable for pot culture as well as for bedding out of doors and for growing in window boxes.

Sow in a pot or box in the house in rather light soil, preferably containing a little leaf mold and sand. Keep as near 65° F. as possible. Water moderately, and as soon as the third leaf appears, pot in two-inch pots. The seed we offer will produce a large percentage of double flowers in many beautiful shades. Pkt., 15c; 2 pkts., 25c.

HELIOTROPE

Highly valued for the fragrance of their flowers and duration of bloom. Height one foot. Easily grown from seed. Seed sown in early spring will bloom by August 1st.

Lemoine's Giant Hybrid—Choice mixed. Pkt., 8c; 2 pkts., 15c.

ICE PLANT

Handsome plant for baskets, rock work, vases and edgings. Leaves and stems appear as though covered with ice crystals; easily grown. Height 3 inches. Pkt., 5c; 1/4 oz., 15c.

STATELY LARKSPUR

The annual varieties are very free bloomers and produce large spikes of flowers, white, pink, rose, light blue, dark blue and violet. In some varieties the flowers are double, in others single. The beautiful plume-like foliage is very ornamental.

Giant Imperial Mixed

● GIANT IMPERIAL MIXED

Great advancement has been made in this new and valuable type of Larkspur in the past few seasons. Especially fine for cutting, as it produces flower-stems 3 to 4 feet long, branching from the base of the plant. Pkt., 5c; $\frac{1}{4}$ oz., 15c; $\frac{1}{2}$ oz., 25c.

● DWARF DOUBLE HYACINTH FLOWERED

These early flowering Larkspur grow about 12 to 18 inches high and come in a great variety of colors. Fine for border or rock gardens. Pkt., 5c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c.

LARKSPUR ROSAMOND

Gold Medal Winner All America Selections

● The New Annual Larkspur Rosamond has been acclaimed the most distinct Larkspur to be introduced in many years. It is two weeks earlier than other Stock Flowered varieties. The plants bear numerous good spikes heavily covered with fully double flowers. The color is new and distinct, a pure deep rose self, holding well out of bloom. Height, 3 to 4 ft. Pkt., 10c; 3 for 25c.

1 Pkt. each of the three stately larkspurs for only 15c.

LOBELIA

Crystal Palace—One of the finest bedding plants. Our strain of Dwarf Lobelia only grows 4 inches high, making a compact plant, covered the entire summer with deep blue flowers. Pkt., 10c; 3 for 25c.

LUPINUS

Deep Blue Texas Lupin—Loveliest spikes of deepest sea blue flowers, delicate fragrance, easily grown and very satisfactory. Height 1 foot. Pkt., 5c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c.

SWEET MIGNONETTE

Seeds sown early in the garden will give flowers through the summer. Very few cultivate the sweet Mignonette compared with the many that might show their love for this sweet little flower. Height 10 inches. Pkt., 5c; $\frac{1}{2}$ oz., 15c.

ROYAL MARIGOLDS

● AFRICAN ORANGE All Double

Any strain of African Marigold that will come fifty per cent double is considered good—sixty is excellent. We are pleased to announce, however, that we have developed a strain of African Orange Marigold which has come one hundred per cent double for the past two years. We are pleased to be able to offer this to the trade under the name of "All double." Pkt., 5c; $\frac{1}{4}$ oz., 15c.

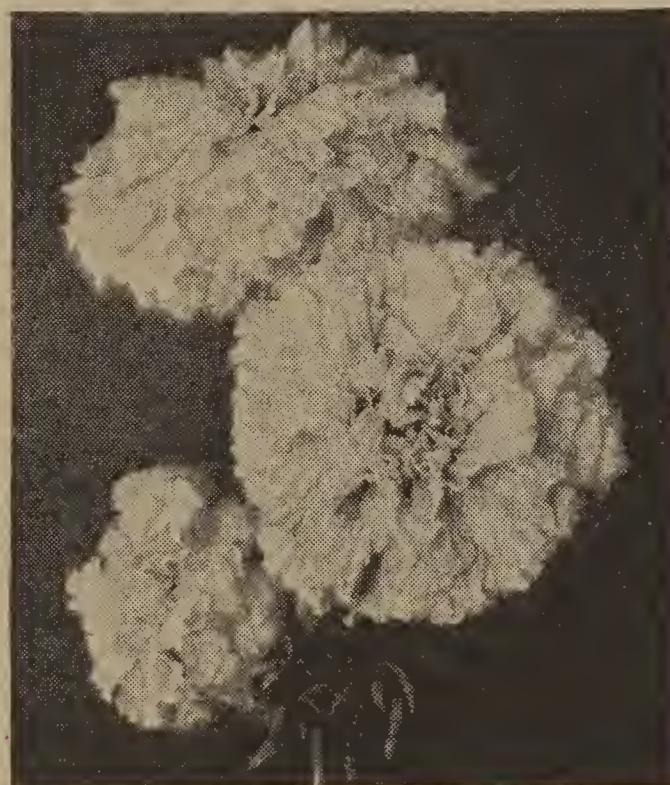

● AFRICAN TALL

Double Mixed—The African Marigolds are valuable for their flowers in autumn, and can be grown to advantage in the little clumps with other plants in the front of shrubbery or in the garden border. The African varieties are the taller in growth. They succeed best in a light soil, with full exposure to the sun. Pkt., 5c; $\frac{1}{2}$ oz., 15c.

● FRENCH MARIGOLD

ROBERT BEIST—DEEP RED

This is the finest of the new French Marigolds, growing about one foot high. One of the best border plants, and covered from mid-summer until frost with a solid mass of deep velvety maroon-red flowers. Pkt., 5c; $\frac{1}{4}$ oz., 15c.

Yellow Supreme

● MARIGOLD YELLOW SUPREME

Gold Medal Winner 1935
All America Selections

Heralded as a companion to the popular Guinea Gold, Yellow Supreme does in many respects resemble it. It is very free flowering, compact and somewhat pyramidal in habit, two to two and a half feet tall, bearing loosely ruffled, carnation flowered blossoms. The color is a creamy lemon yellow, and the flowers are somewhat larger than Guinea Gold. Pkt., 7c; $\frac{1}{4}$ oz., 15c.

● GUINEA GOLD

The golden orange flowers are not shaped like ordinary African Marigolds; they are more like Carnations, with their petals loosely placed and waved.

Bushy, blossom covered plants are ideal for borders, and many florists have already pronounced Guinea Gold the best Marigold for cutting. Pkt., 6c; $\frac{1}{4}$ oz., 15c.

PORTULACA OR MOSS ROSE

Double Portulaca

There is scarcely any flower in cultivation that makes such a dazzling display of beauty as a bed of many-hued, brilliant-colored Portulacas. They thrive best in a rather rich light loam or sandy soil, and an exposed sunny situation.

Moss Roses grow from 3 to 5 inches high and bloom continuously from early summer to late fall.

● Double Finest Mixed—Flowers perfectly double of the most brilliant scarlet, crimson, rose, white, yellow, etc. Pkt., 10c; $\frac{1}{4}$ oz., 35c; 1 oz., \$1.10.

● Single Mixed—All colors. Pkt., 5c; $\frac{1}{4}$ oz., 15c; $\frac{1}{2}$ oz., 25c; 1 oz., 40c.

MIXED FLOWER SEED

Mixed Wild and Tame Flower Garden

This is a combination of all the very best annuals. We recommend this for sowing in beds where you want a quick showing of bright colors that will last until frost comes.

At our extremely low prices you can plant liberally of these and change some of the unsightly places in your yard to a spot of beauty. Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c.

JAPANESE FLOWER GARDEN

We have secured from Japan a wonderful mixture of Japanese Flower Seed, many of them entirely new to this country. These new and unusual flowers will keep the children interested all summer. Pkt., 5c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c.

CUT FLOWER MIXTURE

Our mixture of annual flowers for cutting is carefully selected from the finest varieties. We have taken special pains in picking varieties with long stems that will make a great show of colors and will last for many days after cutting. Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c.

LINUM OR SCARLET FLAX

One of the most showy annuals for flower beds and masses. Brilliant crimson-scarlet flowers, 1 inch across, borne in wonderful profusion. Height 1 foot. Pkt., 5c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c.

MOURNING BRIDE (PIN CUSHION FLOWER)

This is one of the old-fashioned flowers which has been improved so much that now it is one of the most desirable and beautiful annuals, with flowers over two inches across, borne on eighteen-inch stems. Its great abundance of richly colored, fragrant blossoms on long stems make it one of the most decorative plants of the garden. Desirable for cutting as well as for beds and borders. About two feet high. Mixed: Pkt., 5c; $\frac{1}{2}$ oz., 20c.

GURNEY'S GLORIOUS NASTURTIUMS

● DWARF OR TOM THUMB

These are dwarf, compact plants, and like all Tom Thumbs, succeed on light, well-drained soil. The Tom Thumb Nasturtiums are much freer bloomers than any of the other varieties and are excellent for border plants.

Tom Thumb Mixed—This mixture is composed of all of the best Tom Thumbs and is remarkable both for brilliancy of color and perfection of individual flowers. The low price at which we are offering this seed brings it within the reach of everyone, and it should be planted liberally. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 65c.

● TALL OR TRAILING

These are all of strong, vigorous growth and can be trained upon strings or wires, or for covering fences or trellises. Our mixture of these Nasturtiums includes all of the brightest colors and is made up of the best of the named varieties. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 65c.

NASTURTIUM

● DOUBLE GOLDEN GLEAM

This plant forms a large vigorous bush which throws out short runners. In full bloom entire plant, including the runners, is a blaze of color. The large, golden yellow semi-double flowers average $2\frac{1}{2}$ to 3 inches across. They are borne on erect, stiff stems 6 inches in length. A bouquet of double sweet scented Nasturtiums will fill a room with a delicate musk like fragrance. Pkt., 6c; $\frac{1}{2}$ oz., 10c; 1 oz., 15c; $\frac{1}{4}$ lb., 50c.

● DOUBLE SCARLET GLEAM

Gold Medal Winner 1935 All America Selections

The same type as the Glorious Gleam Hybrids Scarlet Gleam is an intense dazzling scarlet. It has been likened to a huge, fiery carpet spread over the ground. Pkt., 10c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c.

● GLORIOUS GLEAM DOUBLE FINEST MIXED

Glorious Gleam Hybrids are the result of years of scientific breeding and selection for the development of this sensational new double, sweet scented Nasturtium. Grown in a bed or border in the garden their effect is startlingly beautiful. The color range includes an evenly balanced blend of brilliant shades: salmon, golden yellow, orange scarlet, cerise, cream yellow, orange, maroon, crimson, and many spotted varieties. Pkt., 5c; $\frac{1}{2}$ oz., 10c; 1 oz., 15c; $\frac{1}{4}$ lb., 45c.

GURNEY'S PETUNIAS ARE DROUGHT AND HEAT PROOF

Balcony Petunias at the South Dakota State Hospital

BALCONY PETUNIAS

● BALCONY QUEEN MIXED

Balcony Petunias are larger and flowers are much brighter in color than the common Petunias. Although one of the best for general outdoor culture, it is used extensively for balconies and window boxes. This strain begins blooming early in the spring and continues long after the first frost. There seems to be no limit to its ability to flower. **Mixed.** Pkt., 10c; $\frac{1}{8}$ oz., 35c.

● BALCONY STAR of CALIFORNIA

A magnificent new Petunia bred with extra long branches for window boxes and hanging baskets. The flowers are velvety violet with a touch of crimson, starred with five pure white blotches. The flowers are very large. Pkt., 15c; 2 pkts., 25c.

● Balcony Blue—The large velvety blue blossoms completely cover the plant. A bed of Balcony Blue Petunias will always attract attention. Pkt., 15c; 2 for 25c.

● Gurney's Balcony Crimson—Produces rich, velvety crimson flowers, that can only be appreciated when you see them. Pkt., 15c; 2 for 25c.

Balcony Petunia Collection—1 package each of the four Balcony Petunias—40c.

DWARF PETUNIAS

● NEW PETUNIA

Gurney's Special Dwarf Globe Mixed—A new strain of Dwarf Compact Petunias. Each plant in this mixture forms a perfect ball effect from eight to ten inches high and about twelve inches in diameter.

To get the full beauty of this new flower, be sure to give them plenty of room, at least one foot between plants. They come in a complete range of colors from pure white to the deep blues and crimson. Pkt., 8c; $\frac{1}{8}$ oz., 20c.

● GURNEY'S VIOLET BLUE

Dwarf growing, almost continuously covered with velvety indigo blossoms. Pkt., 10c.

● ROSY MORN

This is of the new dwarf growing type, producing flowers of a most beautiful shade of pink, continuous blooming from early in summer until freezing weather. Pkt., 7c; $\frac{1}{8}$ oz., 20c.

Dwarf Petunia Collection—1 package each of the 3 lovely Dwarf Petunias—20c.

GIANT PANSIES

● TRIMARDEAU GIANT MIXED

A bed of Pansies in bloom always has something new for you in variety of color and marking, every time you visit it. Are in bloom continuously from spring until late fall. The seed may be sown in the hot bed, in boxes in the house or in the open ground. Very fine mixed. Pkt., 5c; $\frac{1}{4}$ oz., 25c; $\frac{1}{2}$ oz., 40c; 1 oz., 75c.

● GIANT MASTERPIECE MIXED

These Pansies are very large and the petals are frilled and ruffled to a greater extent than other kinds. The colors are excellent and the plants of great vigor, holding the immense flowers well up on long strong stems. The petals are often so large and fluted that the flowers appear to be double. Pkt., 12c; 2 for 20c.

● ORCHID FLOWERED MIXED

This distinct and beautiful strain will appeal to those who prefer delicate shades and soft tints of coloring. Includes orchid shades of chamois, pink, lilac, rose, orange and lavender. Pkt., 10c; 2 pkts., 15c.

Pansy—Gurney's Special Blend

● GURNEY'S SPECIAL BLEND OF FANCY GIANT PANSIES

The increasing popular demand for the highest class of Pansies leads us to offer you this blend of varieties that cannot be excelled, containing as it does the largest and most beautiful of all of the blotched, frilled and the smooth, well formed and monstrous Pansies with a range of color, covering all of Pansydom.

The texture of these flowers is heavy and velvety. The flowers are borne on large, stiff stems which make them of exceptional value for cut flowers, lasting as they do for many days.

The seed of this Special Gurney Blend is necessarily higher priced than the common, but is worth many times the difference. Pkt., 15c; $\frac{1}{8}$ oz., 35c; $\frac{1}{4}$ oz., 60c; $\frac{1}{2}$ oz., \$1.00.

Pansy Collection—1 package each of the four magnificent Pansies—35c.

● QUEEN ANNE LACE FLOWER

"In ye olden days" the Queen Anne lace was the most delicate and beautiful and Nature has done its best to reproduce the delicate figures and beautiful patterns in this flower. The color is a charming, dainty baby blue.

Borne on long stiff stems, making this one of the best cut flowers. Pkt., 5c; $\frac{1}{4}$ oz., 20c.

ANNUAL PHLOX

For a splendid mass of colors and a constant display that is not excelled by any other annual, commencing to bloom quite early and continuing until severe freezing. The Phlox colors range from purest white to blood-red or crimson. The seed may be planted in the open ground May 1st or in hot-bed or house earlier, and afterwards transplanted to where wanted. Give good, rich ground and set plants 8 to 10 inches each way. Hardy annuals; 1 foot.

A perfect row of bright scarlet phlox in our trial ground.

● GURNEY'S BRIGHT SCARLET

This wonderful Phlox is of such a bright glowing scarlet that it dazzles your eye when seen in the full sunlight. A bed of these will attract more attention than any annual flower you can plant. Pkt., 8c; 1/4 oz., 25c.

● DRUMMONDI GRANDIFLORA

Mixed—Large flowered. These are decided improvements over the old class, with much larger flowers, a better range of colors and of more compact growth. Choice mixed, all colors. Pkt., 5c; 1/4 oz., 20c.

● STAR-SHAPED PHLOX

The most interesting of the Phlox family, bearing pretty star-shaped and fringed flowers, rich in colors, varying from violet blue to deep rose and blood-red, margined with white. Starred; fringed; choice mixed. Pkt., 6c; 1/4 oz., 20c.

● NANA COMPACTA DWARF

Mixed—8 in.—These are much superior to the other Phloxes for bedding or borders. The plants grow very symmetrical in neat, little bushes, covered with flowers during the whole summer and fall. Pkt., 8c; 1/4 oz., 30c.

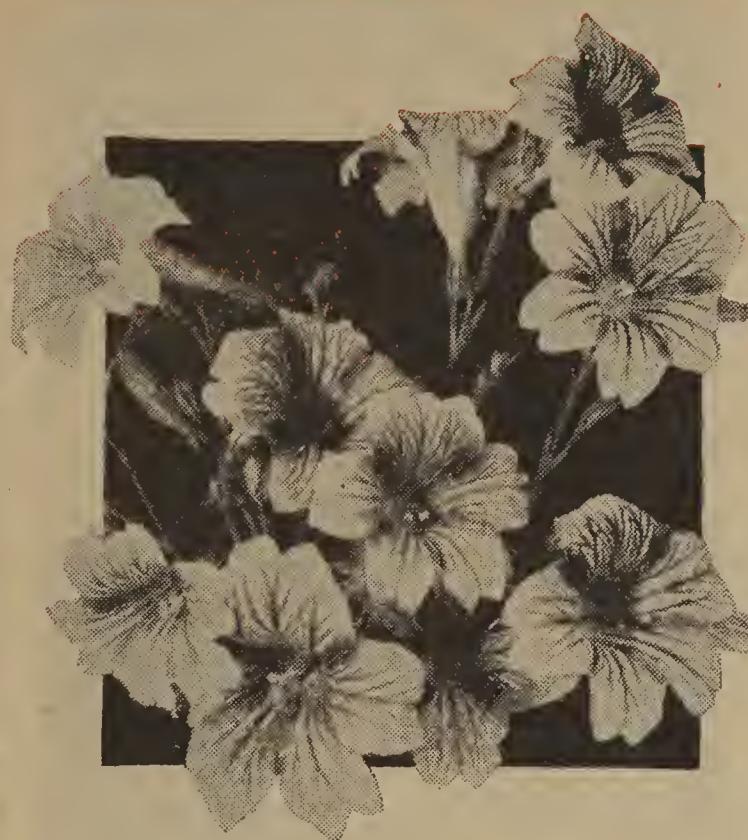

Phlox collection—1 package each of the above four Phlox—20c.

STOCKS

The Ten Weeks Stocks bloom in 10 weeks after being sown; they grow from 12 to 18 inches high, each plant forming a perfect bouquet of delightful fragrance.

Our strain of Double Giant Perfection Stocks is the finest we have ever seen. Pkt., 10c; 3 for 25c.

SALPIGLOSSIS

SALPIGLOSSIS (EMPEROR MIXED)

This has long been one of our Favorite Flowers but has never attained the popularity to which it is entitled. It is a splendid annual, with flowers of a peculiar richness, very delicate. Unsurpassed for cutting. Grows about three and one-half feet high, producing flowers nearly as large and about the shape of the Morning Glory, and comes in almost every color that one can imagine, deep blues, purples, crimson, yellow, white, etc. Mixed pkt., 5c; 1/4 oz., 15c.

POPIES

● AMERICAN LEGION—FLANDERS POPPY

All of us have a greater affection for the poppy after reading Lieut.-Col. J. D. McCrae's "In Flanders Fields." This is the beautiful Single Red Flanders poppy that the boys who were over there saw in the fields. Plant a package of these for the boys who went across. Pkt., 5c; 1/2 oz., 15c; 1 oz., 25c.

● PEONY FLOWERED DOUBLE MIXED POPPY

These are immense balls as large as the ordinary peony. Colors: Very clear white to flaming scarlet. Stand about two and one-half feet high and bloom over a period of about four weeks. A bed of these is one of the most desirable in the annual garden. Pkt., 5c; 1 oz., 20c.

● RHOEAS SHIRLY SINGLE MIXED

A superb blend of this beautiful type of Poppy ranging in color from pure white through tones of salmon, pink, and rose to brightest carmine-red. Pkt., 5c; 1 oz., 20c.

YELLOW TULIP POPPY

Award of Merit Winner All America Selections

● Sunlite—The attractive semidouble form of the well known Mexican tulip poppy, has become one of the most popular garden flowers. The plants are about two feet in height, and like a sunny position. This is one of the flowers that will stand our hot Dakota summers without watering. The bright, lemon-yellow flowers are about two inches in diameter. Pkt., 8c; 2 for 15c.

● Single Yellow—Seed sown early in May will, by the middle of July, produce plants covered with their large buttercup-yellow poppylike blossoms and never out of flower until hard frost. The plants grow about 2 feet high, are quite bushy, with beautiful feathery foliage. Pkt., 5c; 1/4 oz., 15c.

SALVIA

SALVIA VOLCANO—Scarlet Sage

Of all varieties of Salvia cultivated this is undoubtedly the most satisfactory and finest of them all. It grows about 20 inches high, pyramidal form, and is a mass of extra long racemes of fiery red, trumpet-shaped flowers. The earliest Salvia of any. Seed planted in the open ground will bloom by July 1st and continue until frost. The plants may be taken up from the open ground before frost and will bloom continuously in the house through the winter. It is easily grown from seed and comes true to name. For earlier flowers should be planted in a hot-bed and given same care as cabbage or tomatoes. Do not plant outdoors until danger of frost is over. Pkt., 10c; 1/8 oz., 25c.

SWEET PEA

CUPID DWARF SPENCER

These form a bush of emerald-green foliage a little over a foot wide and six inches high, and from June until late summer are literally a sheet of bloom. Pkt., 7c; 1/2 oz., 15c; 1 oz., 25c.

VERBENAS

Not so many years ago we considered as almost perfect any strain of Verbenas, the flower of which could cover a 25-cent piece. By careful selection an individual flower of our strain now almost covers a 50-cent piece. The trusses are of the largest size; of brilliant colors, free-blooming and of vigorous habit. For best and quickest results seed should be sown early in the house or hotbed, and transplanted to flowering quarters in May. If sown outdoors in May, it blooms from the end of July on.

Gurney's Mammoth Flowering Mixed. Pkt., 5c; 1/4 oz., 20c.

VINCA

Ornamental free-blooming plants with bright green shiny foliage and one of the most satisfactory and long-flowering bedding plants we have. Seed can be sown out of doors as soon as the ground is warm; they may be potted and kept in bloom through the winter; a fine cut flower. 12 to 18 in.

Mixed—Pkt., 5c; 1/4 oz., 15c.

GURNEY'S SWEET PEAS FOR BEAUTY AND FRAGRANCE

If I were restricted to one flower, I believe I would choose Sweet Peas.

BEST GIANT FLOWERING SPENCER SWEET PEAS

Giant Flowering Mixed. For those who do not care for sweet peas in separate colors, Gurney's W. N. A. X. mixture of Spencers, will satisfy the most exacting flower lover. This mixture is made of the best of the old standard Spencers and a careful selection of the new creations with their heavier, longer stems, longer blooming period and larger flowers, some of them measuring two inches across. Four or five perfect flowers on a stem. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 50c; 1 lb., 90c.

The Eight Newest and Best Giant Flowered Spencer Sweet Peas

Crimson Ruffled	Bright Crimson
Powerscourt	Lavender
Captain Blood	Scarlet
Chinese Blue	Deep Blue
Rosie	Rose Pink
Pirate Gold	Golden Orange
Fluffy Ruffles	Salmon Pink
Avalanche	White

One pkt. each of the 8 Magnificent New Sweet Peas. Value 56c.
BARGAIN PRICE, Postpaid 50c

Prices for the Named Varieties of Giant Flowering Spencer Sweet Peas. Pkt., 7c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c.

Plant Sweet Peas Early. Late planting will not be satisfactory

BEST EARLY FLOWERING SPENCER SWEET PEAS

Early Flowering Mixed. These bloom two weeks before the standard Spencer varieties, but with the same large, waved flowers. They have replaced the standard Spencers in greenhouse planting and, though they do not grow quite as tall, their earliness and long season of bloom make them invaluable in outdoor planting, particularly in the short season north.

Pkt., 7c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.30.

The Eight Largest and Best Early Flowering Sweet Peas

Shirley Temple	Pink
Mother Machree	Golden Rose
Sunkist Maid	Bright Orange
Blue Bonnet	Deep Blue
Annie Laurie	Rose Pink
Red Bird	Crimson
Lavanda	Lavender
Early Pal	Rose Crimson

One pkt. each of the 8 lovely, Early Flowering Sweet Peas. Value 80c.
BARGAIN PRICE, Postpaid 60c

Prices for the Named Varieties of Early Flowering Spencer Sweet Peas. Pkt., 10c; $\frac{1}{2}$ oz., 20c; 1 oz., 35c.

GURNEY'S DAHLIA FLOWERED ZINNIAS

The large size, fullness of petals, extraordinary color range, and good keeping qualities of this flower have all contributed to its popularity. It is easily grown, and keeps well when cut. It has been truthfully called "A New Flower for the People."

DAHLIA FLOWERED MIXED ZINNIA

This is a most wonderful Zinnia, coming in practically all colors and measuring as much as nine inches across. All colors mixed. Pkt., 5c; $\frac{1}{4}$ oz., 15c; $\frac{1}{2}$ oz., 25c; 1 oz., 40c.

CRIMSON MONARCH

By far the largest and best of the red shades. Flowers often eight inches in diameter. Plants very vigorous. A marvelous production of extraordinary merit. Pkt., 8c; $\frac{1}{4}$ oz., 20c.

PICOTEE ZINNIAS

NEW GIANT MIXED

This novelty is the most attractive thing in all the race of Zinnias. The flowers are of the Giant type, each petal distinctly tipped with a darker shade. They come in a variety of colors: orange, flesh, lemon, pink and cerise. Picotee Mixed Pkt., 7c; $\frac{1}{4}$ oz., 20c.

DWARF LILLIPUT MIXED

Double Dahlia-like flowers about two inches across on dwarf compact plants about 16 inches tall. Our Dwarf Mixed Zinnias come in the brightest colors we have ever seen. Pkt., 5c; $\frac{1}{4}$ oz., 15c; $\frac{1}{2}$ oz., 25c; 1 oz., 40c.

ZINNIAS

Red Riding Hood

DWARF LILLIPUT ZINNIAS

RED RIDING HOOD GRACILLIMA

A beautiful fiery red Zinnia which grows to a height of one foot. A bed of these is the most intense dazzling scarlet you have ever seen or can imagine. Pkt., 7c; $\frac{1}{4}$ oz., 20c; $\frac{1}{2}$ oz., 35c; 1 oz., 60c.

CALIFORNIA GIANT DOUBLE ZINNIAS DOUBLE GIANT (2½ Ft.)

Here is the class to which the Zinnias are indebted for the favor they enjoy today. In habit the plants are tall, branching and vigorous. The flowers are usually brighter than the dahlia-flowered type and are nearly as large.

GIANT FLOWERED MIXED

A splendid mixture of all the brightest colors. These will produce flowers nearly six inches across. Pkt., 5c; $\frac{1}{4}$ oz., 15c; $\frac{1}{2}$ oz., 25c; 1 oz., 40c.

GOLDEN YELLOW DOUBLE GIANT

I saw a field of this variety of nearly ten acres, every plant producing a large number of brightest golden yellow flowers you can imagine, immense in size, and truly a wonderful sight. Excellent for cut flowers. Pkt., 7c; $\frac{1}{4}$ oz., 20c.

Dwarf Zinnias make good borders for walks

GURNEY'S HARDY PERENNIAL FLOWER SEEDS

Plant a Perennial Garden and have lovely flowers from April until frost.

AQUILEGIA—Columbine

Dobbies Long Spurred Hybrids—This is the finest strain of Columbine it is possible to buy. They come in every conceivable color, with spurs two to three inches long. Pkt., 10c; 3 for 25c.

Aquilegia—Mixed. These hardy perennials bloom freely during the spring and early summer, and you have undoubtedly seen them growing wild in a timbered country. They come in a great variety of colors and are one of the easiest to raise of any of the perennials. Height from 18 inches to 3 ft. Pkt., 5c; 1/4 oz., 15c; oz., 45c.

HARDY PERENNIAL ASTER

Mixed (Michaelmas Daisies). Single fall-flowering hardy herbaceous plants, thriving in any good garden soil. If sown early they will flower the first season; 3 feet. Pkt., 10c; 2 for 15c.

ACHILLEA

The Pearl—A hardy perennial; covered from spring until frost with many very double, pure white flowers. Grows two feet high. Blossoms the first year. Pkt., 10c.

ALYSSUM

(Basket of Gold)—A hardy perennial variety of dwarf habit, bearing a profusion of golden yellow flowers in April or May. Will resist the most extreme weather. Very showy. 9 inches. Pkt., 5c; 1/4 oz., 15c; 1/2 oz., 25c.

COREOPSIS

Single Grandiflora—One of the finest hardy perennial plants. Bright yellow flowers, which bloom from June until frost. Pkt., 5c; 1/2 oz., 15c.

New Double—Coreopsis Lanceolata has for a long time been a gem in the perennial border. This new double and semi-double form is just as easy to grow and the extra petalage adds a further charm to the flower. Will bloom first season if seed is sown early. Pkt., 5c; 1/4 oz., 15c.

CHINESE LANTERN

A showy variety of Winter Ground Cherry, 18 to 24 inches high and producing large, balloon-like fruits, changing from green to bright crimson as the season advances. Husk covering the fruit measures nearly 2 inches through. Pkt., 5c; 1/4 oz., 15c.

CANTERBURY BELL

Perennial Double Blue—Blue bell, handsome, easily grown plants of stately branching habit and profuse blooms for beds and backgrounds. Produce long racemes of strikingly effective bell-shaped or saucer-shaped flowers of rich color. Height, 3 ft. Pkt., 10c; 3 for 25c.

Biennial Double Mixed (Cup and Saucer)—A beautiful and distinctive type laden with flowers, each of which is a large cup-shaped bell surrounded by a calyx similar in color and resembling a saucer. Pkt., 5c; 1/4 oz., 20c.

Three of the best low growing perennial rock garden plants are—

Maiden Pinks *Dianthus deltoides*;
Snow in Summer *Cerastium tomentosum*;
Gypsophila *Repens*.

All three have beautiful foliage as well as flowers and are easily grown from seed.

We recommend sowing perennial seeds in spring. Seed germinates better in the cool weather than in the heat of midsummer. The majority of these perennials bloom the second year from seed although some like *Coreopsis* and *Gaillardia*, if sown early, bloom the first year. Plants can be raised in beds and transplanted or the seed may be planted directly in your perennial garden.

Plant Perennials and have an abundance of lovely flowers for Memorial Day

DIGITALIS OR FOXGLOVE

Foxgloves are stately and highly ornamental plants when well grown, with flower stems at least three feet in height. They are fine for the mixed border or planted singly in half-shady places near a walk or drive. Perfectly hardy. Sow seed in spring in the garden and transplant as desired. Perennial. **Mixed varieties.** Pkt., 5c; 1/4 oz., 15c.

GEUM—AVENS

Mrs. Bradshaw—Beautiful hardy perennial, bearing profusely large, showy double dark-crimson flowers all through the summer; an elegant flower for bouquets; 18 inches.

Large double brilliant orange scarlet; in flower the entire summer. Pkt., 10c; 2 Pkts., 15c.

GYPSOPHILA, OR BABY'S BREATH

Perennial Double—One of the most important hardy perennials of recent introduction. The plant grows from 3 to 3 1/2 feet high, bearing its pretty little double white flowers in much-branched panicles which, when cut, can be used to great advantage with other flowers or by themselves as they retain their beauty for months. Pkt., 15c; 2 Pkts., 25c.

Perennial Single—The flowers are small star-like and borne on feathery sprays. They are combined with other flowers for making bouquets. Bloom the first year; height 2 feet. Pkt., 5c; 1/2 oz., 15c; 1 oz., 25c.

GYPSOPHILA REPENS

A beautiful trailing plant not over 3 inches high, which sends out clouds of rose colored flowers on slender stems. A perfect rock garden plant. Pkt., 8c; 2 for 15c.

GAILLARDIA

The Bremen—A new Gaillardia that is sure to please. Twice as large as the common kind. The immense coppery-scarlet flowers with narrow golden edges completely cover the plants from early spring until fall. Pkt., 5c; 1/4 oz., 15c.

HIBISCUS OR MALLOW

Shrub-like plants growing from four to six feet high and bearing bright colored flowers varying from three to five inches in diameter. Perfectly hardy. A fine background for any garden. Pkt., 5c; 1/2 oz., 25c.

IRIS—Flowering Flag

Finest Mixed (Japanese Iris)—The seeds we offer have been saved from our own unrivalled collection, and should produce only varieties of the highest merit. Blooms the second year from seed. Pkt., 6c; 1/4 oz., 15c.

LINARIA

Gurney's Perennial Yellow—This is a very fine perennial, easily grown from seed, and is undoubtedly the best yellow perennial that can be grown for general use. It is hardy and can be used where medium height is needed in rock garden work. The flowers resemble golden yellow snapdragons, borne on stems averaging 2 feet. Pkt., 8c; 1/4 oz., 20c.

PERENNIAL FLOWER SEED

Continued on Page 35

Carnation—Double Red

CARNATION

The Carnation has always been one of the most esteemed of the florists' collection, and there is no flower more desirable for the garden. Half-hardy perennial, 1 1/2 feet.

Gurney's Ruby Red Giant Double Carnations—Raised by the famous French specialist, Chabaud. Blooms in five months after being sown and continues to produce its nicely fringed, intensely fragrant double flowers in the greatest profusion indefinitely. Pkt., 10c; 3 pkts., 25c.

Chabaud's Extra Choice Double Mixed—Seed saved from the choicest German and English stocks. A large portion of this seed will produce double flowers. Pkt., 8c; 1/4 oz., 20c.

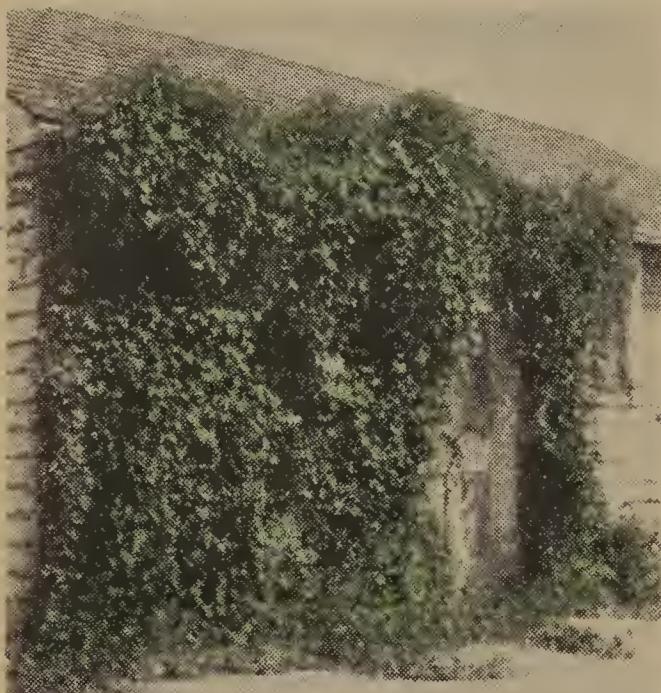

CHINESE BELL FLOWER

Platycodon—Perennial plants with showy flowers. Blooms from spring until early fall. Height, 1 to 2 feet.

Finest Mixed—Blue and white flowers. Pkt., 5c; 1/4 oz., 25c.

GURNEY'S CLIMBING VINES AND FLOWERS

There is a place in every yard for climbing vines.

Cardinal Climber. Picture taken August 1st.

CARDINAL CLIMBER

One of the finest annual climbers. Very graceful and beautiful, growing rapidly, it reaches a height of twenty feet; densely clothed with laciniate, rich green leaves. The numerous clusters of fiery scarlet, tubular spear-shaped flowers resemble the cypress vine, but are much larger, often measuring one and one-quarter inches across. Pkt., 7c; 1/2 oz., 20c; 1 oz., 35c.

● BLACK-EYED SUSAN

(*Thunbergia*)—Beautiful, rapid growing, annual climbers preferring a warm, sunny situation; used extensively in hanging baskets, vases, low fences, etc.; very pretty flowers in buff, white, orange, etc., with dark eyes; mixed colors; 4 feet. Pkt., 7c; 1/4 oz., 15c; 1/2 oz., 25c.

● BALSAM APPLE

A very beautiful, cut leaved, rapid growing, annual climbing vine, producing beautiful flowers, followed by seed pods bursting open and showing the interior, bright crimson. A very satisfactory climbing vine for hot, dry places where others will not do well. The seed grows readily and rapidly. Pkt., 5c; 1/2 oz., 15c.

● BEAN, SCARLET RUNNER

The well known rapid-growing annual climber, producing bright red flowers, from July to September. The foliage being dense, makes it splendid for porches or any location where shade is desired. Pkt., 5c; 1/4 lb., 15c; 1 lb., 45c.

● WILD CUCUMBER

The most rapid growing vine in existence. It will make a growth of 50 feet in a single season and will cover unsightly places quicker than anything else you can plant. It is an excellent shade for summer houses or to train over trellis or porches. Pkt., 5c; oz., 15c; 1/4 lb., 50c.

● CYPRESS VINE

A most beautiful vine, with delicate fern-like foliage and beautiful star-shaped rose, scarlet and white flowers. Pkt., 5c; 1/2 oz., 15c; oz., 25c.

The House of Gurney, Inc.
Yankton, S. D.

Gentlemen:

I wish you could have seen my Cardinal Climber last year. It entirely covered my porch and was just red with blooms. Everybody around here admired it so. I don't think I have ever seen a prettier climber.

Yours sincerely,
Mrs. Chris Eskov
Elk Horn, Iowa

● JAPANESE MORNING GLORY

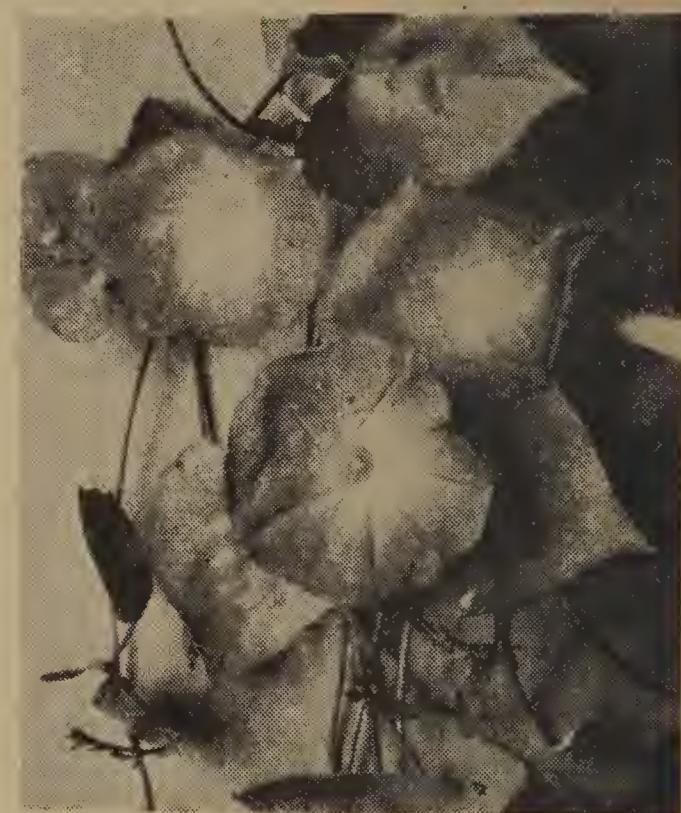

Imperial Fancy Fringed — Exceptionally large flowers, beautifully fringed and ruffled, contains all, and many more, colors than the ordinary Morning Glory. Pkt., 5c; 1/2 oz., 15c; 1 oz., 25c.

● COBAEA SCANDENS

Cup and Saucer Vine—A climber of rapid growth, attaining a height of as much as 30 feet in the season. Valuable for covering a trellis, arbors, trunks of trees and will cling to any rough place. It is covered with immense quantities of bell-shaped flowers set in a saucer which gives the name of "cup and saucer" plant. Its foliage is very beautiful and it is one of the annual climbing vines with which you will be well pleased.

Gurney's Purple flowered. Pkt., 7c; 1/4 oz., 15c; 1/2 oz., 25c.

Vines will change that fence or out-building into a spot of beauty.

Heavenly Blue Moon Flower

MOON FLOWERS—IPOMEA

Tender annuals of rapid growth, with beautiful and varied flowers; for covering old walls, trellises, arbors or stumps of trees they are invaluable; 15 to 20 feet.

● Heavenly Blue—Clark's Early Flowering. This new Moon Flower is much earlier than the old variety. The flowers are larger, coming into bloom about 60 days from the time seed is planted.

The flowers are an intense deep blue, shading lighter toward the center. The immense flowers, many of them 6 inches across, completely cover the vine. On cool, cloudy days, unlike the old Moon Flower, this new strain remains open all day. Pkt., 8c; 1/2 oz., 25c; 1 oz., 45c.

● White—Moon Flower—Satin white flowers, 5 to 6 inches in diameter, borne abundantly throughout a long season, opening at sundown, emitting a rich Jessamine odor at night, and closing about noon. Pkt., 7c; oz., 25c.

● JAPANESE KUDZU VINE PERENNIAL

The most remarkable climbing vine of the age and should be planted by everyone for dense shade of porches, arbors, or places where you wish to screen outbuildings. It comes from Japan, the land of the flowers and of the most curious vegetable productions.

The large purple blossoms are borne in clusters which completely cover the vine. It requires but little care and is perfectly hardy south of Yankton. North of there it should have some winter protection. Pkt., 5c; 1/2 oz., 15c; 1 oz., 25c.

● JAPANESE VARIEGATED HOP

Where an attractive climber is desired that will stand rough usage there is nothing better. The leaves are strikingly variegated; the first color is bright deep green, distinctly marked and blotched with silvery white. A strong grower—20 to 30 feet in a few weeks' time; not injured by heat or insects. Sow early in May. Pkt., 6c; 1/2 oz., 15c; oz., 25c.

GURNEY'S HARDY PERENNIAL FLOWER SEEDS

DELPHINIUM LARKSPUR

Perennial Blue—Blooms freely the first year from seed. The most showy of any of the perennials. We use only the famous florists strains which make stately plants 4 to 5 feet tall. The flowers vary in color from light lavender to deepest blue. One of the best cut flowers. Pkt., 7c; $\frac{1}{8}$ oz., 20c; $\frac{1}{4}$ oz., 35c.

Hollyhock Strain, Wrexham Type—These are the greatest advance in Delphiniums. Their graceful spire shaped spikes of enormous size and beauty of form are rapidly bringing them to the front as the most popular flower for cutting or the garden. This mixture contains all the colors in Delphiniums, many individual blooms measuring over two inches across. Pkt., 15c; 2 for 25c.

LYCHNIS

Chalcedonia, or Burning Star—One of the greatest hardy perennials, which grow and bloom year after year, requiring no protection and easily started. Color, brilliant scarlet. Height 2 feet. Pkt., 5c $\frac{1}{2}$ oz., 20c.

PERENNIAL PHLOX

Height, 2 feet. The immense flower heads often grow 6 inches across and 8 inches long. Bloom from early in the spring until frost. They come in a wide range of color from pure white to the deepest scarlet. The most continuous bloomer of any of the perennials. Pkt., 10c; 2 for 15c.

PEONY SEED

We gathered a quantity of these seeds, more than we shall need for our own use in the production of new varieties. Peony seeds, you understand, do not reproduce true to their parents, but produce different varieties of flowers single, semi-double and double. It is really worth while watching them from year to year, and as new varieties are produced in this way, you might secure something better than any of the varieties of today. They are very easily grown and bloom the second year after planting. Pkt., 10c; $\frac{1}{2}$ oz., 30c; 1 oz., 50c.

POPPIES—HARDY PERENNIAL

New Hardy Oriental Red Poppies—This new race of Oriental Poppies when once planted, continues blooming for several years without further trouble. The flowers often measure 6 inches across and are of the most intense brilliant red. Pkt., 5c; $\frac{1}{4}$ oz., 25c.

ICELAND POPPIES

Hardy perennials, flower the first year from seed, blooming almost as quickly as the annual sorts. Height 12 inches.

New Hybrid Iceland Single Mixed—The latest development in this lovely species, varying in color from sulphur yellow through different shades of orange to chamois and salmony-rose. Pkt., 5c; $\frac{1}{4}$ oz., 25c.

Iceland Double Mixed—This new perennial Iceland Poppy comes in all the beautiful colors of the single with the added beauty of perfect double and semidouble flowers. Pkt., 10c; 3 for 25c.

SHASTA DAISY (Alaska)

Hardy perennial. A bed of these giant white Daisies in full bloom is a sight worth seeing. Flowers measure 3 $\frac{1}{2}$ inches borne on stems 18 inches long. The numerous long, slender-stemmed white flowers rise most gracefully amid the bed of green, blooming all through the spring and summer months.

Of the many varieties the Alaska is the best bloomer and hardiest. Blooms first season. Pkt., 5c; $\frac{1}{4}$ oz., 20c.

ENGLISH DAISY DOUBLE

This hardy, early spring blooming plant is easily grown. Maximum height 6 inches, producing flowers in various shades of pink and white, double mixed, Chinese varieties. Pkt., 7c; $\frac{1}{4}$ oz., 25c.

PAINTED DAISY

Pyrethrum—Height 2 feet. This hardy Persian Daisy has long been a favorite in European gardens. The plants are erect growing, consisting of upright slender stalks adorned with fern-like leaves and carrying fine terminal blossoms.

Single Mixed. Radiating petals in many tones of rose and red about a golden center. Pkt., 7c; $\frac{1}{4}$ oz., 25c.

GOLDEN MARGUERITE DAISY

The golden yellow flowers are borne on long 2-foot stems from July until frost. The sweet scented flowers are about 2 inches across and will keep perfectly for over a week after being cut. Pkt., 5c; $\frac{1}{4}$ oz., 25c.

VIOLET

Sweet Violet—Well known, old fashioned hardy garden violet; prized for their fragrance and pretty blue and white flowers. Pkt., 10c.

HOLLYHOCK DOUBLE "IMPERATOR"

Double "Imperator" Hollyhock

Double Imperator—Rising to a stately height it bears flowers 5 $\frac{1}{2}$ to 6 $\frac{1}{2}$ inches across, consisting of wide outer petals elegantly frilled and deeply fringed, in the center of which appears a very double rosette about 2 inches across, the whole suggesting a crested Begonia on a giant scale. The plant branches from the base; forming a majestic clump. Pkt. 15c; 2 for 25c.

HOLLYHOCK

Double Mixed—We have improved this old garden favorite until it is the highest and best type yet developed. Colors ranging from white and apricot, rose, cerise and crimson, to the darker shades of wine, maroon, and black. Every garden should have some of these majestic flowers. Pkt., 7c; $\frac{1}{4}$ oz., 20c.

Mammoth Fringed Single Mixed—The flowers of this grand variety are from 4 to 6 inches across, single, finely fringed and curled. Pkt., 5c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c.

PERENNIAL FLAX

Linum Perenne Sibiricum—A rich blue-flowered Flax. The attractive flowers last only a day, but they are borne continuously from July on; 15 inches tall. Pkt., 5c; $\frac{1}{2}$ oz., 15c.

SWEET PEAS PERENNIAL

Hardy vines of robust growth resembling Sweet Peas but the flowers are not fragrant. Bloom through a long season and are excellent as cut flowers. Height, 4 feet. Colors: White, pink and rose. Pkt., 5c; $\frac{1}{2}$ oz., 15c; 1 oz., 25c.

SWEET WILLIAM

Red Sweet William—A beautiful hardy scarlet flower borne in large clusters on sturdy stems. A continuous bloomer. Height 1 ft. Pkt., 7c; $\frac{1}{4}$ oz., 15c.

Dwarf Double Mixed—These seldom grow over 6 to 8 inches high. Profuse bloomers; excellent for borders or edging. Pkt., 5c; $\frac{1}{4}$ oz., 15c.

SNOW IN SUMMER

Cerastium Tomentosum—A valuable spreading plant with attractive silvery white foliage and showy white, star-shaped blooms covering the plants during May and June. When in full bloom, the plants resemble a drift of snow. A wonderful low border plant and perfect for rock gardens. Will stand any amount of heat and sun. Pkt., 7c; 2 for 15c.

Prices of seed are constantly changing, and we are unable to guarantee the price of farm seed listed in this catalog for any definite length of time.

You can always be assured you will get full value for your money at Gurney's.

We guarantee that all seed ordered from this catalog will prove of satisfactory germinating test to you; that is, on arrival of the seed test it, and if it does not prove satisfactory you may return it to us within twenty days after receipt of the seed by you, returning at our expense and your money, together with the transportation charges which you have paid, will be refunded. It is so manifestly impossible for a seller of any perishable article to be responsible for what may happen to it after it leaves his hands, especially one like seeds, which are planted under varying conditions of soil and climate, that we and all other American seed houses disclaim responsibility as to the crop that may be raised from seed which we sell. At the same time, in case of failure to secure proper results caused from some inherent fault in the seeds themselves, The House of Gurney, Inc. accept responsibility, not for the crop, but to the extent of the amount of money paid for the seed if immediately advised; or, seeds may be returned.

NON-WARRANTY
—The House of Gurney, Inc., does not give any warranty, expressed or implied, as to description, quality, productiveness, or any other matter of seeds, bulbs or plants which it sends out, and will not be in any way held responsible for the crop.

PLANT GURNEY'S ALFALFA

GURNEY'S COSSACK ALFALFA

PURITY 99%, GERMINATION 90% OR BETTER

Cossack alfalfa is no longer an experiment. It is many years now since Prof. N. E. Hansen of Brookings brought the first seed over from the wilds of Siberia where it had been growing under much more rigid climatic conditions than we find in any part of the United States. Today it has proved itself of infinite value to the farms of the great Northwest, since it grows and thrives in spite of low temperatures and does unusually well even on dry, high land. It has proved to be the best alfalfa from the Gulf of Mexico well up into Canada, producing plants in the far north seven feet high, and producing more hay per acre than any other alfalfa.

A few thousand dollars invested in Prof. Hansen's search for alfalfa in Siberia have returned themselves to the people of the United States many thousand fold. Every farmer owning land that would not produce common alfalfa profitably and successfully is now assured of a hardy alfalfa that will produce paying crops on that ground.

Cossack Alfalfa is very frost resistant, in fact, almost frost-proof. In the fall it will be green and suitable for pasture, long after all other varieties are frozen and brown.

Cossack Alfalfa not only has a deep tap root like common alfalfa, but has in addition many branch roots, enabling it to utilize the surface moisture and fertility as well as sending tap roots deep into the subsoil. Cossack plants spread more than other alfalfas, often sending up over a hundred stems from one crown. Because of this spreading habit, it is unnecessary to plant more than 10 pounds of Cossack seed per acre.

Prices of Cossack seed in sealed bags.

1 lb.	\$0.50
5 lbs.	2.35
10 lbs.	4.55

60 lbs. (1 bu.)	25.50
100 lbs.	42.50

A field of Cossack Alfalfa

Cossack Alfalfa Plant

DAKOTA No. 12 ALFALFA

99% PURE, GERMINATION 90% OR BETTER

For more than forty years the state of South Dakota has been producing crops of alfalfa that are profitable. We do not know the source of the seed first planted but we do know that by process of elimination and the "survival of the fittest" that South Dakota is producing alfalfa seed that in turn produces the hardiest alfalfa plants, and those that will yield greater returns in hay than seed grown in any other part of the world. This seed is produced where the snow covering is very light or none at all, where the temperature drops from five to fifteen degrees lower than any other point in the state. These strenuous conditions have eliminated any plant that may have been tender, leaving nothing but the hardiest to produce seed, and in each successive generation any plant showing any inherent weakness has been destroyed by these conditions and the fittest has survived.

Its roots, often measuring thirty feet in length, force their way deep into the subsoil in search of moisture and plant foods that cannot be reached by other plants. It draws nitrogen from the air and stores it in the soil more than 100% faster than any other clover, excepting sweet clover. If your ground will grow alfalfa, you have "the world by the tail with a down hill pull."

The House of Gurney
Yankton, S. D.
Gentlemen:

I received the alfalfa seed yesterday and am taking this way to let you know how pleased I am with it. It surely is nice seed—looks better than the sample you sent me.

Yours very truly,
Claude Cox,
Clemons, Iowa

Dakota No. 12 Alfalfa Plant

GRIMM'S ALFALFA

PURITY 99% GERMINATION 90% OR BETTER

Grimm's alfalfa was introduced into Minnesota from Germany in 1857 by a German immigrant named Grimm. The seed was planted on his farm, and plants from the original seed are still growing from the original planting.

This alfalfa should give wonderful results anywhere in the Northwest, ranking just below Cossack in hardiness and resistance to drought. Grimm's Alfalfa hay is very fine and leafy. Yields of three tons per acre of dry hay are not unusual.

I would be glad to have you send for a sample of this seed before purchasing, so that you can see the wonderful quality and purity of our alfalfa seed.

Price of Grimm's in Sealed Bags:

1 lb.	.50c	25 lbs.	\$10.60
5 lbs.	\$2.30	60 lbs. (1 bu.)	24.60
10 lbs.	4.40	100 lbs.	41.00

State Sealed Blue Tag Cossack and Grimm's Alfalfa

WRITE FOR PRICES

Our regular stock of Cossack and Grimm's Alfalfa is just as good in every way as the State Sealed Blue Tag seed, and unless you wish to raise Registered Alfalfa seed for market, there is no reason for buying this higher priced seed. If you are going to raise Registered Alfalfa seed, you must plant State Sealed seed. We have it on hand in 30 lb. and 60 lb. State Sealed Bags. Write for prices.

FOR OUR SOUTHERN CUSTOMERS

We are offering alfalfa seed raised in Oklahoma. This seed is over 99% pure, of very high germination, and contains no noxious weed seed. Our customers in the South should get very good results from this seed, besides making a substantial saving in cost.

Prices:

1 lb.	.40c	25 lbs.	\$8.00
5 lbs.	\$1.75	60 lbs. (1 bu.)	18.45
10 lbs.	3.40	100 lbs.	30.75

PLANT ONLY AMERICAN GROWN CLOVER SEED

MEDIUM RED CLOVER

We must maintain the fertility of the soil. Medium Red Clover can be grown successfully on many fields where alfalfa fails. Sow Clover liberally. Your farm needs clover. Your soil loses rapidly in fertility if you stop growing it.

Medium Red Clover lives two years or more, grows about two feet high and makes two crops a year, yielding about three tons of cured hay per acre. Clover hay is very nutritious, stock fed on it requiring less grain. Does well on a great variety of soils, thriving luxuriantly on strong, well drained loams. It is the best for crop rotations and increases succeeding crops from 25 to 60%.

Our red clover seed is all northern grown. This seed will be much better for the northern planter and also for those south of us than southern grown or foreign seed. It complies with every State law. Sow about 12 to 15 lbs. to the acre.

1 lb., 55c; 5 lbs., \$2.60; 10 lbs., \$5.00; 25 lbs., \$12.00; 60 lbs. (1 bu.), \$27.90; 100 lbs., \$46.50.

Red Clover

House of Gurney, Yankton, S. Dak.
Gentlemen:

I must tell you that in spite of the hot, dry summer last year, I had a wonderful garden from seeds that I purchased from The House of Gurney. I had more than I could use of everything. Yours truly,

Mrs. Henry W. Weber, Minnesota, Minn.

MAMMOTH RED CLOVER

This grows much taller than Medium Red, with larger, leafier stalks. It will produce more hay on poor ground than any of the other clovers. (60 lbs. per bu.)

1 lb., 55c; 5 lbs., \$2.60; 10 lbs., \$5.00; 25 lbs., \$12.00; 60 lbs. (1 bu.), \$27.90; 100 lbs., \$46.50.

ALSIKE CLOVER

Alsike can be grown on soil that is slightly acid or sour, and where other clover or alfalfa will not grow. It can be grown on heavy, wet or low soil that sometimes becomes waterlogged, and it also endures drought well.

Alsike Clover is exceptionally leafy, frequently producing as much hay as Mammoth. Alsike is the hardiest of all clovers.

Withstands the severest cold and does not readily winter-kill or heave out of the ground with frost, and readily reseeds itself. Grows about two to three feet high.

This clover prefers damp, moist loamy soil, but it will also grow fairly well on stiff clays. Fine for pasture on low grounds. Sow either in spring or fall using about 8 lbs. of seed per acre.

1 lb., 45c; 5 lbs., \$2.10; 10 lbs., \$4.05; 25 lbs., \$9.75; 60 lbs. (1 bu.), \$22.50; 100 lbs., \$37.50.

WHITE DUTCH CLOVER

A low, close-growing clover; round, white heads; very fragrant; best adapted to moist soils, but does well on dry land.

Used extensively for lawns, either mixed with Kentucky Blue Grass or other lawn grasses, also an excellent pasture Clover, forming with Kentucky Blue Grass the finest and most nutritious food for sheep and cows. Sow 5 or 6 pounds to acre. Weight, 60 lbs. per bu.

1 lb., 45c; 5 lbs., \$2.00; 10 lbs., \$3.80; 25 lbs., \$9.00; 60 lbs. (1 bu.), \$20.75; 100 lbs., \$34.60.

NITRAGIN PRICES ARE LOWER

CULTURE A—For Alfalfa and Sweet Clover. 1/2 bu., 30c; 1 bu., 50c; 2 1/2 bu., \$1.00.

CULTURE B—For all Clovers except Sweet. 1/2 bu., 30c; 1 bu., 50c; 2 1/2 bu., \$1.00.

SCARIFIED SWEET CLOVER

Each year the American farmer must give more thought to the problem of maintaining the fertility of the soil on his farm. When his father or grandfather exhausted the soil on his Pennsylvania or Ohio farm, he could go west and start again on virgin soil. For the American farmer of today

there is no more west, you must keep your present farm.

By using soil building sweet clover for pasture and green manure, you can pass this farm on to your children, richer and more fertile than it was when the first plow broke the virgin sod.

SCARIFIED TALL
WHITE BLOSSOM
SWEET CLOVER

\$13.25
100 lbs.

Sweet clover is one of our most valuable pasture plants. It makes a good pasture two or three weeks earlier than almost any other grass or clover. It will stand close pasturing, in fact, if kept closely pastured it will continue to grow until freezing weather.

Sweet clover hay is nearly equal to alfalfa hay in feeding value. Stock like it just as well, and it will yield as many pounds of cured hay per acre as alfalfa.

Sweet Clover planted alone or with small grain and plowed under for green manure is the best and cheapest method of keeping your farm fertile. White Blossom Sweet Clover grows taller and faster than any other and is the best for this purpose.

Unless the seed is scarified you will have trouble with germination. Consequently, without one cent of extra charge to our customers, we are sending out only scarified seed. With scarified seed we often have 95 per cent germination in a seven day test. 1 lb., 25c; 5 lbs., 90c; 10 lbs., \$1.60; 25 lbs., \$3.60; 60 lbs. (1 bu.), \$7.95; 100 lbs., \$13.25; 500 lbs., \$65.00.

A section of our Seed Laboratory where all seed is tested for germination and purity.

SWEET CLOVER FOR SEED

Sweet clover for seed has been a very profitable crop, often paying \$25.00 or more per acre for the seed, besides lots of hay and pasture.

When raising seed the first crop is usually cut for hay. The second crop has plenty of time to mature, and being shorter and more branched will produce a larger crop of seed.

DWARF ESSEX RAPE

I want to impress it on you, that the Dwarf Essex Rape will grow and thrive, and be profitable in many places on your farm. In the spring when you are sowing small grains, sow it at the rate of 4 pounds per acre with your grain. This will furnish valuable pasture after harvest. Plant it with fall rye at the rate of about three pounds to the acre in the months of April or May, and it will make you a good pasture with the rye in summer. Plant it by itself at the rate of 5 lbs. per acre and see the immense yield of forage it will produce. Sow it at the rate of 3 lbs. per acre with your last cultivation of corn. This is the most profitable place to sow rape seed. If you are hogging the corn down, the hogs will clean the rape as well as the corn. Dwarf Essex Rape is the only variety that is

valuable. 1 lb., 25c; 5 lbs., 75c; 10 lbs., \$1.20; 25 lbs., \$2.50; 50 lbs., \$4.75; 100 lbs., \$9.25; 500 lbs., \$45.00.

DWARF BROOM CORN

Raising Broom Corn is one of the most profitable side-lines for the farmer or market gardener, as an acre of Broom Corn will pay you as many dollars as several acres of corn or small grain.

The Dwarf Broom Corn stands up better than the taller varieties, is practically free from crooked brush. The fiber is long and fine and always brings the highest market price. 1 lb., 25c; 5 lbs., 75c; 10 lbs., \$1.20; 25 lbs., \$2.40; 50 lbs., \$4.45; 100 lbs., \$8.25.

GRUNDY COUNTY
DWARF
SWEET CLOVER

\$13.75
100 lbs.

This is a special strain of dwarf white blossom sweet clover, originated in Grundy County, Ill. It is more valuable for pasture than the tall white blossom variety, as it is ready to use about two weeks earlier. Grundy County is the best sweet clover for hay. The fine, leafy stems are easily cured and the hay is nearly equal in feeding value of alfalfa. Yields of 2 or 3 tons of good hay per acre are very common. 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.70; 25 lbs., \$3.75; 60 lbs. (1 bu.), \$8.25; 100 lbs., \$13.75; 500 lbs., \$67.50.

YELLOW
BLOSSOM DWARF
SWEET CLOVER

\$13.75
100 lbs.

Yellow Blossom sweet clover is nearly as good as the tall White Blossom variety for soil building, and is better for hay and pasture. It grows to a height of from 3 to 5 feet, and under favorable conditions, will yield from 2 to 3 tons of fine, leafy hay per acre. This hay is easier to cure than the coarse, tall White Blossom variety. The greatest value of Yellow Blossom sweet clover is for pasture, as it starts very early in the spring and if not allowed to go to seed will last until late in the fall. 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.70; 25 lbs., \$3.75; 60 lbs. (1 bu.), \$8.25; 100 lbs., \$13.75; 500 lbs., \$67.50.

SAND OR WINTER VETCH

Sometimes called Hairy Vetch. Thrives surprisingly on poor, light land, and withstands extremes of drought, heat and cold. It may be sown either in the spring or fall, usually with Rye. In the North, it remains all winter under the snow and is invaluable for early pasturing or soiling. It is valuable as a fertilizer, being a nitrogen gatherer. For hay, cut when commencing to pod. 50 lbs. seed per acre. 1 lb., 25c; 10 lbs., \$1.60; 25 lbs., \$3.55; 50 lbs., \$6.60; 100 lbs., \$12.75.

GURNEY'S PEDIGREED SEED GRAIN

Many acres of land go to waste each year because seed grains are sown without much thought as to purity and quality. Fields infested with Mustard represent the result obtained from careless handling and purchase of poor quality seed. When uncleared or impure seed grain is used for seed, noxious weeds are planted in a few hours which it takes years of effort to get rid of. Assure yourself of greater production by buying Gurney's Pedigreed Seed.

BARLEY

• WISCONSIN PEDIGREE No. 38

The Best Malting Barley

This new malting barley was originated at the Wisconsin Experiment Station.

It is a smooth awned barley, will outyield any other barley grown, stands hot, dry weather very well, and will make a crop of nice, plump barley when other varieties may be a total failure.

Malting barley brings the highest prices and Wisconsin Pedigree No. 38 is the best malting barley on the market today. The straw is stiff and stands up very well. 1 bu., \$1.25; 2 bu., \$2.45; 5 bu., \$6.00; 10 bu., \$11.80; 50 bu., \$57.50.

• VELVET

High Quality smooth awned Malting Barley—A heavy yielder, with stiff straw, and more disease resistant than other varieties. Good Velvet Barley always brings the highest price for malting purposes. 1 bu., \$1.20; 2 bu., \$2.35; 5 bu., \$5.75; 10 bu., \$11.30; 50 bu., \$55.00.

SPELTZ OR EMMER

A draught resistant grain doing well under almost any conditions of soil or climate, which is neither rye, wheat, nor barley, but looks like a combination of them. It resembles wheat more closely than any. High in food value, it produces enormous crops on soil so poor that it will not produce a paying crop of wheat. Speltz should be planted early using about 40 or 50 pounds of seed per acre. 50 lbs., \$1.60; 100 lbs., \$2.90; 500 lbs., \$14.00; 1,000 lbs., \$27.50.

RYE (Fall or Winter) FOR PASTURE

If planted in the spring, Winter Rye will make very few if any heads, but will continue to produce leaves and make good pasture until late in the summer. Sweet clover can be planted with the rye at the rate of about 5 pounds per acre. This will make good pasture in the fall after the rye is gone. 14 lbs., 45c; 28 lbs., 75c; 1 bu., \$1.20; 2 bu., \$2.30; 5 bu., \$5.60; 10 bu., \$10.75.

FOR HAY

• JAPANESE MILLET

We recommend this millet for the following reasons: First—It makes more hay than any of the other millets. Second—The hay is of excellent quality and is superior to corn fodder even though it grows to a height of seven or eight feet. Third—It is superior to all other millets on low, wet land, often yielding 3 or 4 tons of hay per acre. Fourth—It is the only millet that will produce two crops in a season. Plant 20 pounds per acre. 1 lb., 20c; 10 lbs., 75c; 50 lbs., \$2.10; 100 lbs., \$3.45; 500 lbs., \$16.25.

• SIBERIAN MILLET

A wonderfully productive hay millet. It never grows as coarse as the German, making a better quality hay. It grows about 3 feet tall and is the earliest of the millets. Plant 30 pounds per acre. 1 lb., 20c; 10 lbs., 75c; 50 lbs., \$2.10; 100 lbs., \$3.45; 500 lbs., \$16.25.

• GERMAN MILLET

Few grasses or plants will ever make the enormous yields of hay and seed produced by the German Millet; 4 or 5 tons of hay and 60 or 70 bushels of seed per acre have been reported. It may be planted as late as July 1st and still mature. Plant 25 pounds per acre. 1 lb., 20c; 10 lbs., 75c; 50 lbs., \$2.10; 100 lbs., \$3.45; 500 lbs., \$16.25.

OATS

• IOGOLD OATS

This new, early yellow oat of the Kherson family was originated in 1927 at the Iowa Experiment Station. It combines the advantages of stiffness of straw, high yield per acre, and resistance to stem rust. Some wonderful yields have been reported by our customers; much better than other varieties in the same neighborhood.

1 bu., 70c; 3 bu., \$1.95; 10 bu., \$6.20; 50 bu., \$29.50.

• GOPHER OATS

An early maturing, open panicle, white grain, stiff-straw variety. It is an excellent yielder and does exceptionally well on peat lands. Yields of over 70 bu. per acre are not unusual. We have unusually fine seed this year. It pays to plant good seed.

1 bu., 70c; 3 bu., \$1.95; 10 bu., \$6.20; 50 bu., \$29.50.

FLAX

• BISON WILT RESISTANT

This Wilt Resistant Argentine type flax will outyield any other variety, and before many years, I believe most of the flax grown in the United States will be of this large seeded, vigorous type.

Plant from 2 to 3 pecks of flax per acre in a firm, well prepared seed bed that is reasonably free from weeds. Do not plant flax if grasshoppers are bad.

1 bu., \$2.85; 2 bu., \$5.65; 5 bu., \$14.00; 10 bu., \$27.75; 50 bu., \$137.50.

MILLET

WHEAT

Thatcher Wheat has again proved itself to be the most rust resistant spring wheat ever introduced. In the rust epidemics of 1935 and 1937, it has in many localities been the only wheat worth cutting.

• THATCHER

This new wheat from the Minnesota Experiment Station is the highest yielding and most rust resistant of any wheat ever put out.

In Yankton County the one small field of Thatcher wheat yielded 26 bushels per acre; other wheat made from nothing to 5 bushels of very poor quality wheat.

Thatcher is a good milling wheat, grows on strong, stiff straw, and will stand up very well.

Get started in this wonderful new wheat this year. Don't take chances on losing your entire wheat crop from rust. 1 bu., \$2.20; 2 bu., \$4.35; 5 bu., \$10.75; 10 bu., \$21.20; 50 bu., \$105.00.

• BURBANK QUALITY

Burbank is the earliest spring wheat, and on this account, will often escape damage by rust when other varieties are a total loss. A large seeded hard, white wheat suitable for bread making, and brings a good price on the market.

In Yankton County in a good season, yields of from 30 to 40 bushels per acre are very common. I believe Burbank wheat will make you more money than Ceres or Marquis. 1 bu., \$1.70; 2 bu., \$3.35; 5 bu., \$8.25; 10 bu., \$16.25; 50 bu., \$80.00.

BUCKWHEAT

• SILVER HULLED

A heavy yielding variety used extensively as a late crop. An excellent Bee food. It loosens up the hardest soil and is a good green fertilizer when plowed under. It is a marvelous feed for poultry which the chickens can harvest in the field. Sow 36 pounds per acre drilled; 48 pounds broadcast. 1 lb., 20c; 5 lbs., 50c; 10 lbs., 85c; 25 lbs., \$1.30; 50 lbs., \$2.10; 100 lbs., \$3.75.

FOR HAY AND GRAIN

• PROFESSOR HANSEN'S WHITE SIBERIAN PROSO

It will yield well on the driest upland in the driest years in all our western states. When it is hulled and cooked for the table the Russians call it Kasha, and it is very extensively used in European Russia, Siberia, and other parts of Asia, especially the driest regions.

For feeding stock, poultry, and everything of that kind Proso is equal to or better than wheat.

Proso is also specially valuable as a summer catch crop, something that can be planted very late. It can be planted as late as July 15th and still mature a crop of grain and hay.

Sow 20 pounds per acre. 1 lb., 20c; 10 lbs., 70c; 25 lbs., \$1.20; 50 lbs., \$1.95; 100 lbs., \$3.25; 500 lbs., \$15.50.

• EARLY FORTUNE—RED HOG OR RED PROSO MILLET

This is one of the most valuable crops that the farmer can raise, the seed being the richest and most valuable stock food that can be produced. A very much prized peculiarity of this millet is that the seed ripens while the hay is yet green, when, if cut properly, it can be thrashed for seed, while the hay makes excellent fodder. 1 lb., 20c; 10 lbs., 65c; 50 lbs., \$1.65; 100 lbs., \$2.90; 500 lbs., \$13.50.

D. B. Gurney says Plant Sorghums.
They are drought resistant

GURNEY'S GENUINE HYBRID SEED CORN

GOOD HYBRID SEED CORN

suitable for your locality. Will outyield the best open pollinated corn from 15% to 50%, depending on the season.

ALL HYBRIDS ARE NOT GOOD

in the 1935 and 1936 Iowa tests, conducted by the Iowa Agricultural College, the good common corn yielded decidedly more than the poor Hybrid strains.

THIS IS THE FIRST YEAR

we have listed Hybrid seed corn. We wanted to be sure it was better than open pollinated corn. We also thought the price was too high.

NOW After several years of careful tests by ourselves and by the Agricultural Departments of many states, we are satisfied that good Hybrid corn suitable for your locality, is vastly superior to good open pollinated corn.

Hybrid corn shows its greatest superiority in a dry, unfavorable year.

AT LAST

we are able to offer good Hybrid corn at a fair price.

IOWA HYBRID NUMBER 931 IS A GOOD HYBRID

suitable for the north one-third of Iowa, northeastern Nebraska, and southeastern South Dakota.

Iowa 931 has been tested for seven years in the Iowa corn trials, and has been well to the top of the Hybrid list every year, averaging 17% more than the open pollinated corn in the same tests.

In 1935, Iowa No. 931 yielded 81 bushels per acre. In 1936, in spite of the dry weather, it yielded 45 3/4 bushels per acre.

Iowa Hybrid 931 is a large, bright yellow corn which shells out very well. The stalks grow about 8 or 9 feet tall and are very sturdy, standing up through wind storms when other corn is blown flat.

I believe every farmer should plant at least one or two bushels of Hybrid corn for trial. If it is better, you want to know it and take advantage of it.

Hybrid seed corn costs much more than common seed corn to produce, and will always be fairly expensive. We are offering it as low as good Hybrid seed corn can be produced. 1 lb., 30c; 5 lbs., \$1.00; 14 lbs., \$2.20; 28 lbs., \$4.00; 1 bu., \$7.75; 2 bushels or more at \$7.50 per bushel.

Write for Prices We have limited amounts of other varieties of Hybrid seed corn suitable for planting in your locality. Write for prices and description.

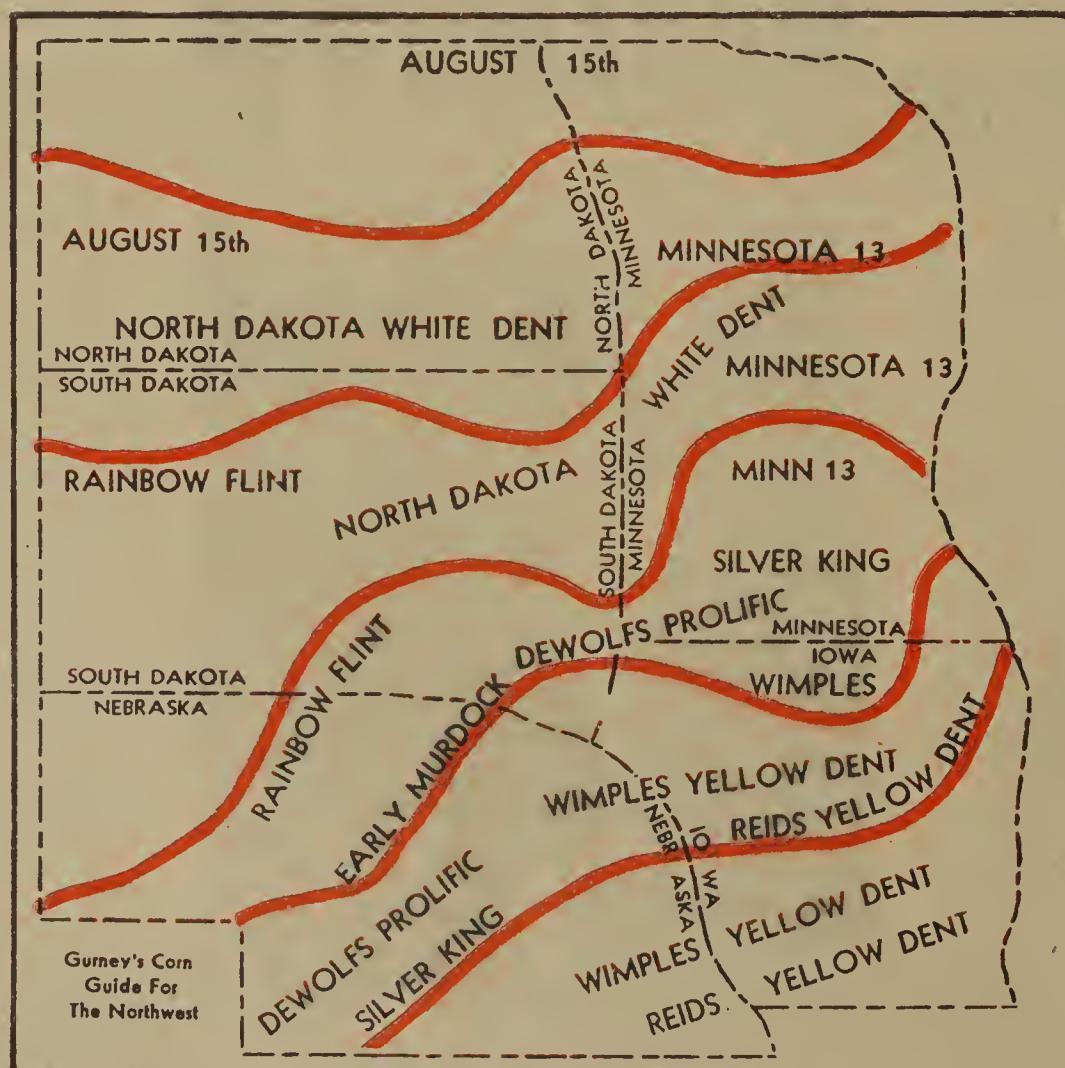

GURNEY'S AUGUST 15th

The Earliest Dent Corn Grown

This corn is of our own origination and is nearly identical with Minnesota No. 23. Produces a medium sized ear of light yellow corn with a white cap. It is extra early. The ears of August 15th are almost perfect in shape and it is a very desirable corn for early feeding for August, and especially valuable for the main crop variety for the extreme north. It has saved the pocketbook of the southern farmer by furnishing him feed long before any other varieties. Plant it for hogging off. Your hogs will enjoy a scrap with a good field of Aug. 15th. Plant it by mid-May and you can husk it on the 15th of August.

1 lb., 20c; 14 lbs., \$1.00; 28 lbs., \$1.60; 1 bu., \$2.90; 2 bushels or more at \$2.75 per bushel.

Gurney's August 15th and DeWolf's Prolific are both open pollinated

DEWOLF'S EXTRA PROLIFIC

This is another production of the late M. J. DeWolf. This corn matures well to the central part of South Dakota and can be grown in the same district as improved Minnesota No. 13, but will outyield it. This bright, yellow corn will outyield any other early corn and should be planted in the central half of South Dakota and southern Minnesota. We believe that if you will try this corn one year you will discard the corn you are now growing and plant DeWolf's Prolific exclusively.

1 lb., 20c; 14 lbs., 90c; 28 lbs., \$1.50; 1 bu., \$2.65; 2 bushels or more at \$2.50 per bushel.

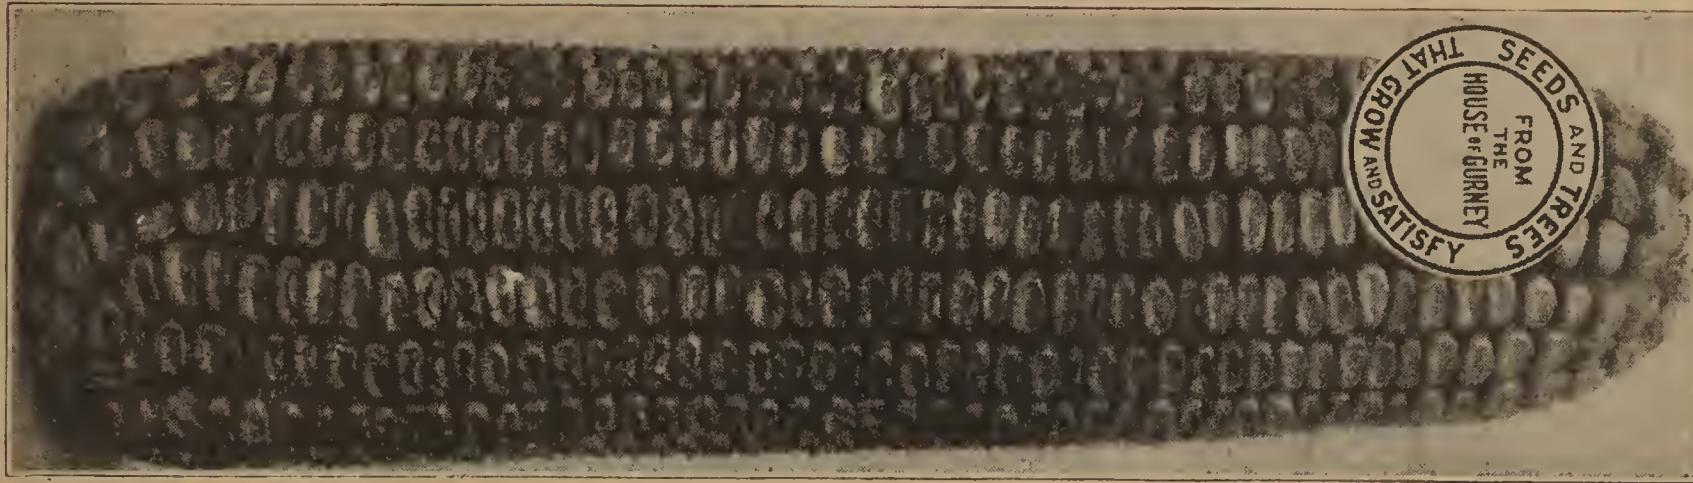

The House of Gurney,
Yankton, S. Dak.
Gentlemen:

We ordered 10 bushels Yellow Dent seed corn from you. After we had it, people started telling us South Dakota corn would not produce a crop here. I want to tell you we had a fine crop of corn—a lot better than most of our neighbors who had Iowa seed.

Respectfully,
Peter Lahr,
Manchester, Iowa

FEED
PLANT
MINN.
NO. 13

GURNEY'S MINNESOTA NO. 13

The Corn That Added Millions of Dollars to Farm Values and Crowded the Corn Belt 300 Miles Farther North

When the Minnesota Department of Agriculture originated and disseminated Minnesota No. 13 they could not realize the countless millions of dollars they were adding to the agricultural wealth of the Northwest. This was the forerunner of the early varieties that made corn-growing profitable much further north than it had been previously. They gave us a high yielding, high protein content corn that would grow several hundred miles north of the profitable corn-producing belt heretofore.

Minnesota No. 13 is a yellow variety and has been grown successfully as far north in North Dakota and Montana as the Canadian line. This variety

is outyielding many later varieties by actual weight per acre. We do not advise Minnesota No. 13 for the main crop further north than central North Dakota because unusual weather conditions might destroy the crop further north than that.

We can furnish two different types of Minnesota No. 13—the early type suitable for the North and the medium type, a larger corn, for southern Minnesota and central South Dakota.

Minn. No. 13—Early Type. 1 lb., 20c; 14 lbs., 80c; 28 lbs., \$1.35; 1 bu., \$2.40; 2 bushels or more at \$2.25 per bushel.

Minn. No. 13—Medium Type. 1 lb., 20c; 14 lbs., 80c; 28 lbs., \$1.35; 1 bu., \$2.40; 2 bushels or more at \$2.25 per bushel.

WIMPLE'S YELLOW DENT

A famous Dakota variety of corn. It originated with Mr. Wimple, a corn specialist of South Dakota, and is now largely planted over the corn belt throughout the northern states. This variety, which has had a lot of careful work put on it, is a bright yellow corn, producing kernels of unusual depth. It gives good results anywhere south of central South Dakota, southern counties in Minnesota and all points south. The ears grow well upon the stalk and the stalks are from 7 to 9 feet high.

Under favorable conditions, Wimple's will yield from 50 to 70 bushels per acre.

1 lb., 20c; 14 lbs., 80c; 28 lbs., \$1.35; 1 bu., \$2.40; 2 bushels or more at \$2.25 per bushel.

RED COB ENSILAGE CORN

Among all the varieties of Ensilage corn, this yellow corn gives the greatest amount of green forage per acre, amounting on rich land and proper cultivation to as much as 10 tons. The fodder is sweet, tender and juicy, growing to a height of 8 to 12 feet. It is easier, and the first cost is less, to sow the ordinary field corn for ensilage purposes, but the thoughtful farmer will consider quantity and quality of the products as of first importance.

1 lb., 20c; 14 lbs., 80c; 28 lbs., \$1.35; 1 bu., \$2.40; 2 bushels or more at \$2.25 per bushel.

NORTH DAKOTA WHITE DENT

This extremely early White Dent Corn has been thoroughly tried out in the extreme north and has made good, maturing in North Dakota in any ordinary season.

In size like Minnesota No. 13, and, like the No. 13, stands up well even in the extreme north. Stalks grow to a height of seven feet, ears are up three feet from the ground, making it easily harvested with the Corn Binder.

It has been bred for yield and earliness, and will withstand more extremes of weather than any other Corn grown.

1 lb., 20c; 14 lbs., 90c; 28 lbs., \$1.50; 1 bu., \$2.65; 2 bushels or more at \$2.50 per bushel.

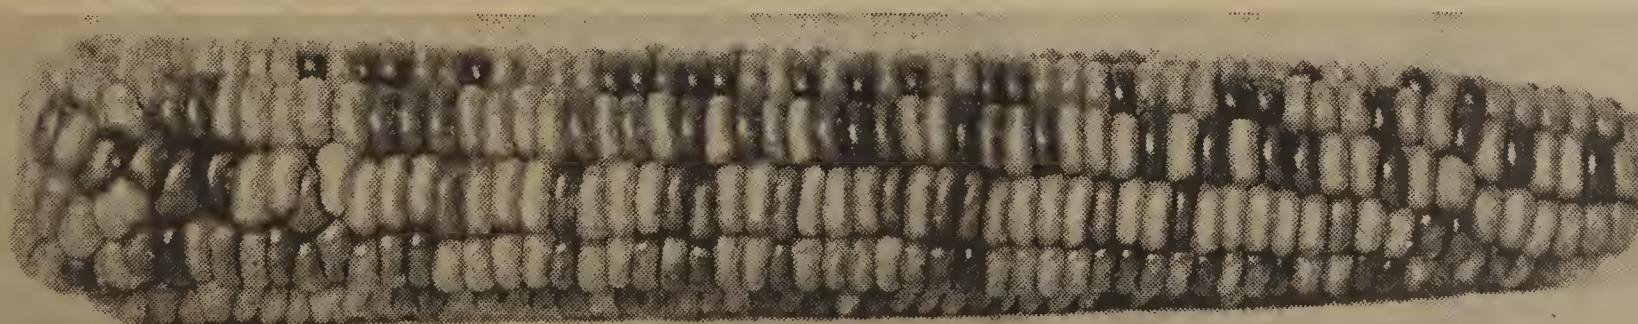

SILVER KING

This extremely valuable White Corn originated with the Wisconsin Agricultural College, and has been distributed by them over the whole Northwest.

It is large, medium early, and the most beautiful of any white corn. The stalks grow from 7 to 9 feet tall, ears 8 to 12 inches long, and yields of 65 bushels per acre are not uncommon.

It is suitable for northern Iowa and Nebraska, southern South Dakota and Minnesota.

1 lb., 20c; 14 lbs., 80c; 28 lbs., \$1.35; 1 bu., \$2.40; 2 bushels or more at \$2.25 per bushel.

A 15 Inch Ear of Rainbow Flint

GURNEY'S GENUINE RAINBOW FLINT—The Best Corn for Hogging-off

The largest eared, highest yielding, early flint corn, originated by us and cataloged for the first time in 1915.

This is a variety of corn that we are proud of.

Rainbow Flint is absolutely the best corn for hogging off. It is an immense yielder both of corn and fodder. Many of the ears are 12 to 15 inches long, and have from 12 to 14 rows of kernels to the ear. The stalks grow from 7 to 10 feet tall, produce two ears to the stalk, and are leafy clear

down to the ground. It is the largest eared, highest yielding early flint corn we have ever seen, and every one should have at least a few acres for hogging off, for ensilage, or for early feed.

Rainbow Flint should mature as far north as the north line of South Dakota, and is suitable for ensilage and fodder clear to the Canadian line.

1 lb., 20c; 14 lbs., 90c; 28 lbs., \$1.50; 1 bu., \$2.65; 2 bushels or more at \$2.50 per bushel.

PLANT THAT PASTURE AND LAWN THIS YEAR

Plant Pasture
Grasses Very

Planting Will
Not Be
Satisfactory

PERENNIAL PASTURE MIXTURES UPLAND AND LOWLAND

PLANT FROM 15 TO 20 LBS. PER ACRE

Most pastures in the Northwest are dead or else the grass is so thin that the weeds have taken possession. Why not replant at least part of your pasture with Gurney's Upland or Lowland Pasture Mixtures?

In ordering pasture mixture, state whether it is for high or low land. Each of these requires an entirely different mixture. By securing this best mixture, you can ordinarily pasture fifty per cent more stock per acre than you can with a single variety of grass.

Our Pasture Mixtures are made up principally of the hardy grasses which have withstood the last six years of drought—such as Bromus and Western Wheat Grass. We have added smaller amounts to Crested Wheat Grass, Domestic Rye Grass, Red Top, Timothy, Orchard Grass, Meadow Fescue, Blue Grass and Clovers. This makes a good pasture from early in the spring through the hot, dry summer and late in the fall until the pasture is covered with snow.

WESTERN WHEAT OR SALT GRASS

Bromus Inermis is a vigorous, hardy perennial grass with strong, creeping roots. It is especially valuable for poor, dry soil for hay and pasture as it withstands heat, drought, and cold. It is useful for sowing on steep hillsides, as it forms a very firm sod and keeps the soil from being washed away. It makes an early growth, two to three weeks before any other grass, and remains green approximately until November. This grass grows three to four feet high, yielding enormous crops of excellent hay, two to four tons per acre. Sow Bromus Inermis at the rate of twenty pounds per acre. 1 lb., 35c; 5 lbs., \$1.35; 10 lbs., \$2.55; 25 lbs., \$5.90; 50 lbs., \$11.50; 100 lbs., \$21.75; 500 lbs., \$105.00.

CRESTED WHEAT GRASS

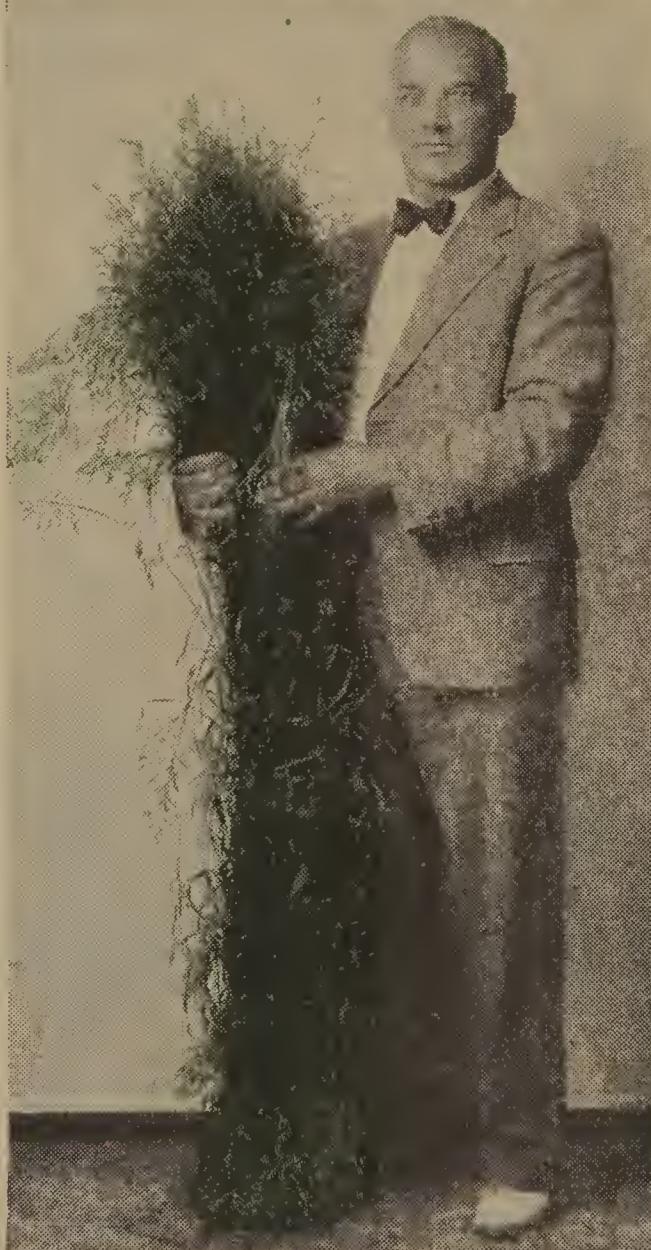

The hardest and most drought resistant grass yet discovered. Introduced by the Department of Agriculture from the Steppes region of Siberia, it is a slightly heavier yielder of hay than bromus, producing 1 1/2 tons per acre. It becomes green in spring even earlier than bromus and stays green later in the fall. The crested wheat will spread widely and completely cover the ground. Plant from 10 to 15 pounds per acre.

Where you are unable to water your lawn and can not use regular lawn grass, Crested Wheat Grass is a very good substitute, as it makes a firm, level sod and will stand close cutting. 1 lb., 60c; 5 lbs., \$2.80; 10 lbs., \$5.40; 25 lbs., \$12.90; 50 lbs., \$25.00; 100 lbs., \$49.50.

House of Gurney,
Dear Sirs:

I am enclosing order for garden seeds of \$1.85. Last year we got your seeds thru your contest and were very well pleased with our garden crops. You will be interested to learn that four kinds of vegetables from your seed brought us prizes at the Fargo Garden Show.

500 lbs.,	105.00

TIMOTHY

Timothy is the king of all grasses in our country; as a hay crop it has long been the standard and it is adapted to a wider range of conditions and is grown over a wider area than other grasses.

This is the year to increase your timothy acreage. Our seed is all northern grown; thoroughly recleaned, the best timothy seed on earth. You know what timothy is, and you can grow it. A few years ago it was almost unknown to the farmers and stock growers of South Dakota; today it is growing successfully in the eastern half of South Dakota, from the south to the north line. If sown alone, plant from 10 to 15 pounds per acre. (45 lbs. per bu.)

1 lb., 20c; 5 lbs., 50c; 10 lbs., 85c; 25 lbs., \$1.40; 50 lbs., \$2.50; 100 lbs., \$4.80.

ALSIKE AND TIMOTHY MIXTURE

20 Per Cent Alsike—80 Per Cent Timothy

In the Northwest there is a great demand for a mixture of Alsike and Timothy Seed mixed in the right proportion ready for sowing. This mixture is especially valuable for low, wet places, for permanent meadow or for pasture, and on account of the very low price at which we offer it, you can seed down more of your farm to grass.

1 lb., 25c; 5 lbs., 90c; 10 lbs., \$1.55; 25 lbs., \$3.40; 50 lbs., \$5.90; 100 lbs., \$11.50.

REED CANARY GRASS OR PHALARIS

A magnificent grass for wet, low-lying poorly drained soils—in fact, the only grass we know of for reclaiming waste, marshy lands. On many farms are to be found low wet situations where neither Red Top, Alsike, nor anything else will grow, and for these situations Phalaris or Reed Canary Grass is the thing to plant. The leaves are quite broad and the plant flourishes, often growing 5 to 7 feet high. Underground stems rapidly form a tough sod and hold hay machinery without difficulty. Yields of 4 to 5 tons of hay per acre from two cuttings, have been reported. One acre will pasture 3 or 4 cows and may be grazed closely except in the fall. If you have any wet or swampy land, Phalaris is the grass to plant. Plant 5 to 6 pounds per acre, drill 1/2-inch deep. As the seed shatters so easily and present acreage is limited, the seed is expensive but it is a real investment.

1 lb., 45c; 5 lbs., \$1.90; 10 lbs., \$3.50; 25 lbs., \$8.25; 50 lbs., \$15.75; 100 lbs., \$29.75.

GURNEY'S NORTHERN GROWN LAWN GRASS

IS BETTER

CITY LAWN MIXTURE

This mixture consists of Kentucky Blue Grass and White Dutch Clover mixed in the correct proportions to make a rich velvety lawn the first year. Use this mixture for lawns where you have a supply of water available. Plant as early in the spring as possible using 1 lb. of seed to each 200 sq. ft. of surface. Water liberally. By the first of July, your lawn will be green and beautiful and far enough advanced to withstand the hot weather of July and August. Prices: 1 lb., 30c; 5 lbs., \$1.40 Postpaid; Not Prepaid, 10 lbs., \$2.50; 25 lbs., \$5.85; 50 lbs., \$10.90; 100 lbs., \$21.50.

BENT GRASS

More people are using Bent Grass for lawns each year. The seed costs more than other grass seed but the results are well worth while. Plant Bent Grass and your new lawn will be the show place of the neighborhood.

ASTORIA BENT

Besides creeping on the surface of the soil Astoria Bent has jointed roots which creep under ground. It is the best bent grass for high, well drained soils and is very resistant to drought. It is often found growing in almost pure sand. It makes a thick, close turf, with fine leaf blades. We recommend it highly. 1/2 lb., 40c; 1 lb., 75c; 5 lbs., \$3.65 Postpaid. Not prepaid, 10 lbs., \$7.00; 25 lbs., \$16.50.

The House of Gurney, Inc.
Gentlemen:

Am writing to let you know how much we appreciated your wonderful seed collection. We have ordered our seed from you the past three years and are surely proud of the fine gardens we have had. My wife canned 700 qts. of vegetables two years ago from the seed we got from you, and over 400 qts. last year, even though the hoppers and drought were bad.

Yours respectfully,
Mr. & Mrs. B. O. Moler,
Griswold, Iowa

Capitol Lawn Grass at our Radio Station
Picture Taken 5 Months After Planting

CAPITOL LAWN MIXTURE

It is made up of the seed of several fine leaved grasses, selected and recommended by the experts of the Agricultural Department at Washington. We can conceive of no better authority on the subject than these painstaking investigators. It may be said here concerning all these special purpose grass mixtures that they are based mainly on the results of these field trials at the department and at various State Experimental Stations. The mixture offered here for lawn purposes has been tested thoroughly under the severe conditions of our climate.

1 lb., 27c; 5 lbs., \$1.25 Postpaid; Not Prepaid 10 lbs., \$2.10; 25 lbs., \$4.75; 50 lbs., \$9.00; 100 lbs., \$17.50.

KENTUCKY BLUE GRASS

This famous grass does well almost everywhere if the soil is fairly rich, moist, and moderately well-drained.

Kentucky Blue Grass will last for many years as the plants are fed from underground roots and rarely need reseeding. It withstands hard wear remarkably well, forming a firm, tough sod. Kentucky Blue Grass should be sown as early as possible to give it a good start before the weeds spring up.

It is the best of all grasses for lawns, golf courses and parks. When sown alone, use 35 to 40 pounds per acre. Fancy cleaned seed.

Per lb., 27c; 5 lbs., \$1.25 Postpaid.

Not Prepaid 10 lbs., \$2.10; 25 lbs., \$4.75; 50 lbs., \$9.00; 100 lbs., \$17.50.

CANADIAN BLUE GRASS

Very similar to Kentucky Blue but grows a little coarser. It can be grown on poor soil where Kentucky will not thrive. It grows about two feet high, makes exceptionally fine hay greatly relished by stock of all kinds. As a pasture for dairy cows, it is especially valuable. It is also a very popular lawn grass where Kentucky Blue will not thrive.

1 lb., 35c; 5 lbs., \$1.70 Postpaid.

Not Prepaid 10 lbs., \$3.00; 25 lbs., \$7.20; 50 lbs., \$13.60; 100 lbs., \$26.50.

SHADY LAWN MIXTURE

Certain fine grasses are used that show a particular aptitude for maintaining their growth in the shade of trees. These grasses are generally shy seeders and consequently the seed is high priced, but the results obtained will fully warrant the cost.

1 lb., 35c; 5 lbs., \$1.70 Postpaid.

Not Prepaid 10 lbs., \$2.80; 25 lbs., \$6.55; 50 lbs., \$12.60; 100 lbs., \$24.50.

Plant Red Top and Reed Canary Grass In Low Wet Places

RED TOP

Choice (Agrostis Vulgaris)—A permanent and very hardy, native perennial grass succeeding best on moist land, making a good pasture when fed close. It is also valuable for low, wet meadows producing large crops of good hay, often producing 2 to 3 tons per acre. It accommodates itself to a variety of soils, however, even to quite dry situations and stands a hot climate admirably. Grows two and one-half feet tall. One of the grasses that will stand a slightly sour soil.

Plant 8 to 12 pounds per acre.

1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.20; 25 lbs., \$4.90; 50 lbs., \$9.45; 100 lbs., \$18.50.

RYE GRASS

This is the grass to use if you want a lot of good pasture the first year you plant grass seed.

In some sections of the country, Rye Grass is partly perennial, but in the Middle West, it is best treated as an annual and allowed to reseed itself. It makes very good nutritious hay, and is probably the best grass for fall pasture. Rye Grass grows over 2 feet tall and is very leafy, making about 2 tons of good quality hay per acre. Does best in rich soils where the rainfall is ample. 1 lb., 25c; 5 lbs., 80c; 10 lbs., \$1.40; 25 lbs., \$3.00; 50 lbs., \$5.75; 100 lbs., \$10.75.

MEADOW FESCUE

Or English Blue Grass

This grass does well in all soils and will stand a reasonable amount of heat and drought, but its greatest value is for sections of the country where they ordinarily have ample rainfall. It is one of the good grasses for lowland in Iowa, eastern Nebraska, and southeastern South Dakota. It is valuable as a pasture grass being one of the earliest in the spring and latest in the fall. It is highly recommended as a large yielding, nutritious pasture and hay grass. Sow either in the spring or fall at the rate of twenty pounds per acre. 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75; 25 lbs., \$3.95; 50 lbs., \$6.95; 100 lbs., \$12.75.

ORCHARD GRASS

Orchard grass is of great value for permanent pastures and for hay. It is very early, coming ahead of most other grasses, recovers quickly after being cut, and endures close grazing. It is best for rich, moist clay soils, but it is very drought and heat resistant, and should be used in preference to Meadow Fescue or Rye Grass on high, dry land. 1 lb., 30c; 5 lbs., \$1.30; 10 lbs., \$2.45; 25 lbs., \$5.70; 50 lbs., \$10.50; 100 lbs., \$19.75.

Donald Klein of Bandle, S. Dak., with a wagon load of cucumbers. \$62.50 worth of cucumbers were sold from two packages received in our big contest collection.

Harvesting Western Wheat Grass at Carter, S. Dak.

SORGHUMS FOR GRAIN AND FODDER

ANOTHER DRY YEAR HAS JUST PASSED

Again we have seen the great value of Sudan Grass, Cane, and Grain Sorghums. The farmer who planted these crops has watched his corn wither and turn brown in the blistering July

and August winds, while his sorghums have stayed green and started growing again with the first rains. Every stock man I have talked to said he wished he had planted more Cane, Sorghums, or Sudan.

WE MAY HAVE ANOTHER DRY YEAR

Don't be Caught Again Without a Reasonable Acreage of Drouth Resistant Crops

● GROHOMA

Matures in about 105 days.

This new dry-weather forage plant of the Kaffir family has made a good crop of fodder and seed when Corn was a total failure and even Kaffir, Milo and Cane made only half a crop.

Grows from 6 to 10 feet high with leaves clear to the bottom of the stalks. The heavy heads are nearly a foot long and sometimes weigh 1 lb. each. There are record yields of over 100 bushels per acre. 1 lb., 20c; 5 lbs., 55c; 10 lbs., 75c; 25 lbs., \$1.45; 50 lbs., \$2.45; 100 lbs., \$4.25; 500 lbs., \$20.50.

● FETERITA

Matures in about 90 days.

This is the earliest of the grain sorghums and one of the best for the North. It grows about 6 feet tall. The stems are slender and very leafy, making it one of the best for fodder. The large heads are always well filled. The seed is white and somewhat larger and softer than other sorghums. Feterita has nearly the same feeding value as corn, and in a dry year will outyield corn both in grain and fodder. 1 lb., 20c; 5 lbs., 55c; 10 lbs., 75c; 25 lbs., \$1.25; 50 lbs., \$2.10; 100 lbs., \$3.50; 500 lbs., \$17.00.

● WHEATLAND MILO

It grows about 30 inches tall and can be harvested either with a binder, header, or combine. Medium early, it has made yields of nearly 100 bushels per acre; even in dry weather the yield is satisfactory.

Plant 5 pounds per acre in rows using a cane plate, and cultivate. Matures in about 105 days.

1 lb., 20c; 5 lbs., 55c; 10 lbs., 75c; 25 lbs., \$1.25; 50 lbs., \$2.10; 100 lbs., \$3.50; 500 lbs., \$17.00.

● MILO MAIZE

Grows from 5 to 7 feet high, stooling from the ground, sending out heads of great size, often weighing three-quarters of a pound. Excellent for hogs and cattle. Matures in about 115 days.

1 lb., 15c; 5 lbs., 55c; 10 lbs., 70c; 25 lbs., \$1.10; 50 lbs., \$1.75; 100 lbs., \$2.90; 500 lbs., \$13.75.

Atlas Sorgo—Orange Cane—Grohoma—Feterita—Bert Masker and Tip Seeley of Gurney's Seed Department with Sorghums from our Trial Grounds

Plants sorghums for grain in rows at the rate of 3 to 5 pounds per acre. For fodder, use 10 pounds per acre in rows, and from 50 to 75 lbs. broadcast.

● ATLAS SORGO (State Certified)

Combines the sweet stalk and high fodder yield of the Cane and the high grain yield of the Kaffir. Grows from 7 to 10 feet tall. Produces the most and best fodder of any of the sorghums. Seed has been very scarce and many other inferior sorghums have been substituted for it. For this reason, we are offering only State Certified seed. In this way, you may be sure of receiving genuine Atlas Sorgo and not some cheaper inferior substitute. This year we are offering Atlas Sorgo at about half the last year's price. Atlas Sorgo matures in about 120 days. 1 lb., 25c; 5 lbs., 75c; 10 lbs., \$1.20; 25 lbs., \$2.30; 50 lbs., \$3.95; 100 lbs., \$7.50; 500 lbs., \$35.00.

● DWARF HEGARI

The heads are shorter and more compact than Kaffir, suckers heavily, and makes high yields of both grain and forage. Grows 4 to 5 feet tall. Matures in about 110 days. 1 lb., 20c; 5 lbs., 55c; 10 lbs., 70c; 25 lbs., \$1.10; 50 lbs., \$1.75; 100 lbs., \$2.90; 500 lbs., \$13.75.

● EARLY KALO

Early Kalo has out-yielded all other grain sorghums as well as corn at the North Platte Experimental Station, over a period of several years. It grows about 4 feet tall. The slender leafy stalks support medium sized, very solid heads. The grain is about equal to corn in feeding value, and because of its resistance to drought, you are reasonably sure of getting a crop every year. I consider Early Kalo the best grain sorghum for the North. Matures a seed crop in about 95 days. 1 lb., 20c; 5 lbs., 60c; 10 lbs., 85c; 25 lbs., \$1.75; 50 lbs., \$3.25; 100 lbs., \$5.90.

● EARLY BLACK AMBER CANE

The earliest and best fodder Cane for the North. Grows from 5 to 7 feet tall and matures in 90 days.

The stalks are very leafy, slender and easily cured. They are so sweet that all livestock relishes cane more than most other rough feed, and will clean it up down to the last stem besides the fodder you will get a good grain crop, which can be ground and fed to any kind of livestock. 1 lb., 15c; 5 lbs., 55c; 10 lbs., 70c; 25 lbs., \$1.10; 50 lbs., \$1.75; 100 lbs., \$2.90; 500 lbs., \$13.75.

● EARLY ORANGE CANE

This sweet stalked cane is about two weeks later than Black Amber. Grows from 8 to 10 feet tall. The stalks are medium large and very leafy. Will produce more silage or fodder per acre than any crop except Atlas Sorgo, and is early enough to mature a seed crop except in the extreme North. Matures in about 100 days. 1 lb., 15c; 5 lbs., 55c; 10 lbs., 70c; 25 lbs., \$1.10; 50 lbs., \$1.75; 100 lbs., \$2.90; 500 lbs., \$13.75.

● KAFFIR CORN

Grows from 6 to 8 feet high, making a straight upright growth with enormous wide leaves. Excellent yielder. Matures in about 115 days. 1 lb., 15c; 5 lbs., 55c; 10 lbs., 70c; 25 lbs., \$1.10; 50 lbs., \$1.75; 100 lbs., \$2.90; 500 lbs., \$13.75.

Listing sorghums is not satisfactory. Use corn planter with Cane plates.

PURE SUDAN GRASS FROM GURNEY'S

HIGH QUALITY

OUR
SUDAN IS
NOT CROSSED
WITH CANE
OR SORG-
HUMS

\$ 4⁹⁰
100 LBS.

Don't Take Chances on Another Dry Year PLANT SUDAN GRASS

Another dry year has just passed, and again we have seen the great value of Sudan Grass. While driving through the country last fall, a field of green Sudan among the dry, dead fields of corn and

the burned up pastures was a sight that should make every stock raiser resolve to plant Sudan Grass every year as a safeguard against a feed shortage caused by hot, dry weather.

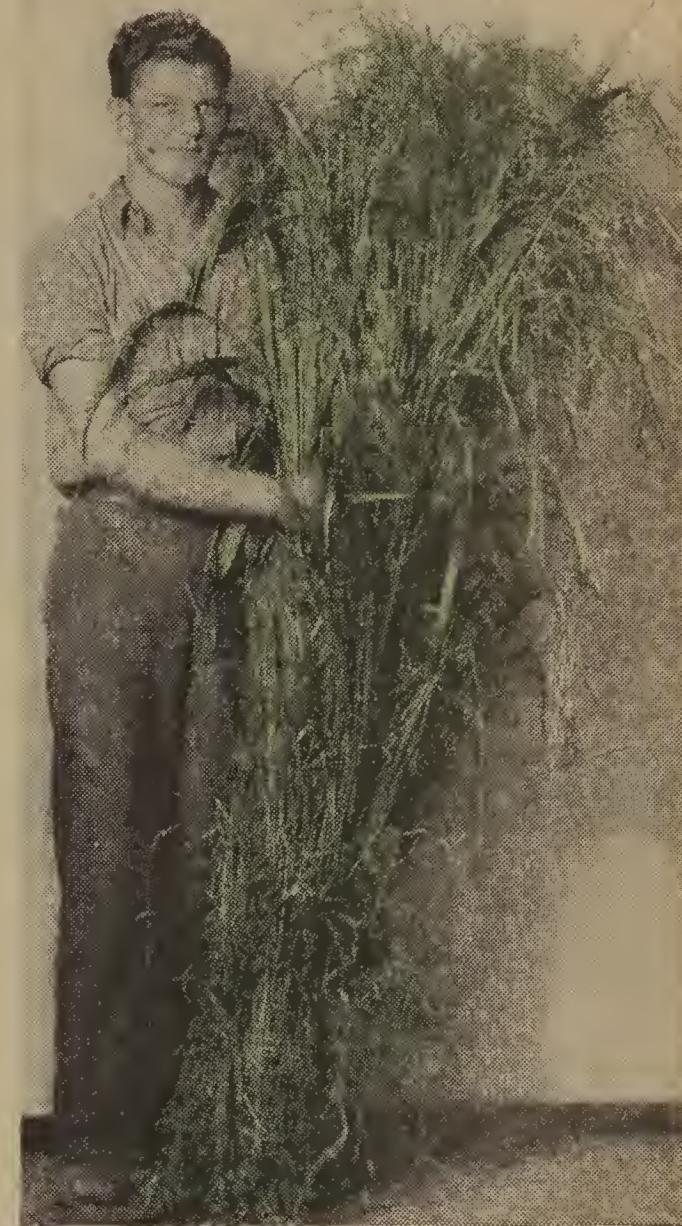

SUDAN GRASS

Sudan Grass is unquestionably the best forage crop that can be raised in the North. It should be cut when about 3 feet high. Handled this way you will always get two cuttings a year and generally three, yielding from 4 to 6 tons of dry hay per acre. Even if left to grow 8 or 9 feet high the stalks will seldom be any thicker than a lead pencil. The greatest value of Sudan is in green pas-

ture for the cows in the summer when pastures are poor and the milk flow is low.

Sudan Grass should not be planted until the ground has warmed up thoroughly after corn planting season. **Plant 25 pounds per acre.**

1 lb., 20c; 5 lbs., 50c; 10 lbs., 80c; 25 lbs., \$1.45; 50 lbs., \$2.55; 100 lbs., \$4.90; 500 lbs., \$24.00.

Sudan Grass will stand the drought

Be Sure to Inoculate All Soy Bean Seed
With Nitragin Before Planting.

SOY BEANS

Soy Beans Are the Only Legume Crop
That Will Thrive on Acid Soil.

Every year the farmers of the Northwest plant more Soy Beans. Some of these are planted for hay, some for a grain or seed crop, and the returns from the acreage planted to Soy Beans, have been equal to that from other farm crops. Besides this immediate cash return, you will receive dividends for several years in the form of better crops on the land that has been in Soy Beans. They are one of the best nitrogen gatherers of any of the Legumes, and being an annual work into any system of crop rotation.

• MUKDEN SOY BEANS

This variety is earlier than either Manchu or Illini, maturing seed in about 100 days. The stout, bushy plants grow about 36 inches tall and are literally covered with pods. It does not shatter as easily as other varieties and you do not lose so many beans when threshing. Yields about as much as the later varieties and on account of its short growing season should be planted in the Northern part of the Soy Bean territory. 1 lb., 15c; 10 lbs., 60c; 25 lbs., \$1.15; 60 lbs. (1 bu.), \$2.25; 100 lbs., \$3.60; 500 lbs., \$17.50.

• MANCHU SOY BEANS

Manchu is the best known and most popular variety of soy beans in the Northwest. It is medium early in season, early enough to fully mature dry beans under ordinary conditions and large enough to be of real value. The dry beans mature in about 105 days. Iowa farmers report as high as 38 bu. per acre yield. They can be cut with a grain binder and threshed with an ordinary threshing machine by reducing the speed of the cylinder to one-half and taking out part of the concave. Broadcast 80 to 90 pounds to the acre and drill 40 to 50 pounds. 1 lb., 15c; 10 lbs., 60c; 25 lbs., \$1.05; 60 lbs. (1 bu.), \$1.95; 100 lbs., \$3.25; 500 lbs., \$15.75.

Manchu and Illini Soy Beans in our trial
Grounds at Yankton

Soy Beans grown with corn make the finest quality ensilage.

We recommend planting Soy Beans in rows with a corn planter and cultivating. Plant seed about one and one-half inches deep, at the rate of 40 to 50 pounds per acre.

Soy Beans can be planted as late as June 15th, and even if they do not get ripe, you will get a good crop of hay, equal to alfalfa in feeding value.

• ILLINI SOY BEANS

This variety was developed at the Illinois Experiment Station. It grows a little taller than Manchu (about 40 inches) giving a heavier yield and is nearly as early, maturing a seed crop in about 110 days.

Soy beans as a hay crop are higher in protein content than alfalfa hay or field peas. An excellent hay for dairy cattle.

1 lb., 15c; 10 lbs., 60c; 25 lbs., \$1.05; 60 lbs., (1 bu.) \$1.95; 100 lbs., \$3.25; 500 lbs., \$15.75.

The House of Gurney, Inc.
Yankton, S. D.

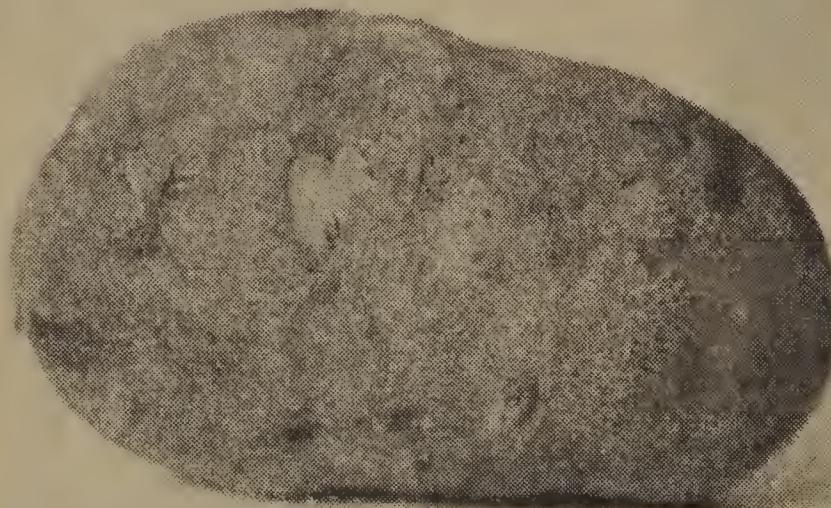

Gentlemen:

We got one bushel of Cossack Alfalfa last spring, and this was the hottest and driest summer Wisconsin has ever known, and our stand of alfalfa could not have been better than it was this fall—just a perfect field of alfalfa. Other kinds around here are patchy looking.

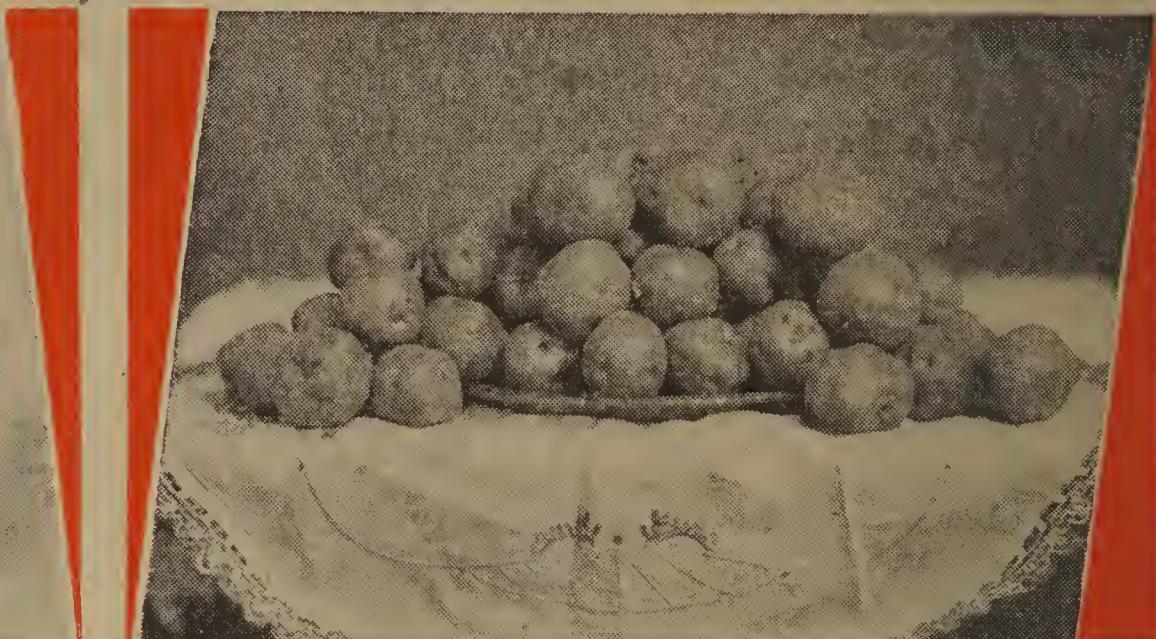

Very sincerely,
Mrs. Ellis Behling,
Lorraine, Wis.

GURNEY'S NORTHERN GROWN SEED POTATOES

Double Your Potato Yield By planting northern grown seed. All our potatoes are grown in North Dakota and Minnesota in the Red River Valley.

Gurney's Bugless Potato

Warba Potatoes Grown by Henry Lappe, Butte, Nebr.

GURNEY'S BUGLESS POTATOES.

Has absolutely proved that it is more immune from bugs than any other potato grown, that it is seldom damaged by bugs, and that happens only in bad seasons.

Test them for yourself. Plant a patch of Bugless and a patch of some other variety in the same field. In yield, quality and freedom from insect pests the Bugless will be the winner.

Why should we grow other varieties of late potatoes subject to damage by bugs, lower yields and of inferior quality.

Get in the Bugless game. Plant potatoes that will fill your cellars and your pocketbook.

15 lbs., 75c; 30 lbs., \$1.05; 60 lbs., \$1.75; 100 lbs. or more at \$2.50 per 100 lbs.

EARLY SIX WEEKS

This is a good potato for the early market because of its high quality and earliness.

The potatoes begin to form when the vines are only 5 to 6 inches high, and in 7 to 8 weeks from planting are of fine marketable size. The tubers are of a handsome, oval form, red color with shallow eyes. Splendid keepers and of the finest cooking quality.

For the home garden or for the early market, you can not beat Early Six Weeks. 15 lbs., 70c; 30 lbs., \$1.00; 60 lbs., \$1.65; 100 lbs. or more at \$2.35 per 100 lbs.

WARBA THE NEW MINNESOTA POTATO

As early as Red Bliss. It consistently out-yields Irish Cobbler. This attractive new potato looks like a pink eyed Irish Cobbler. The best potato introduced for many years. Warba is very resistant to mosaic disease and will produce a crop of potatoes in hot, dry weather when all others are a total failure. Eating quality is unusually good.

Our Warba potatoes were grown for us in Minnesota, and even though short of rain, yielded over 300 bushels per acre.

Don't wait, get started with this wonderful new potato now.

15 lbs., 75c; 30 lbs., \$1.05; 60 lbs., \$1.75; 100 lbs. or more at \$2.50 per 100 lbs.

EARLY OHIO

Early Ohio is the most popular early potato in this country, and the potato that always finds a market at a good price.

It is very early, nearly as early as Red Bliss or Warba and yields an enormous crop of smooth, shallow eyed, oval potatoes. Early Ohio is a high quality eating potato and an extra good keeper.

I have kept these potatoes in an ordinary cave until my new crop Early Ohios were ready to use. Our stock of Ohios is grown for us in the Red River Valley from the finest stock seed and are very choice.

15 lbs., 65c; 30 lbs., 95c; 60 lbs., \$1.60; 100 lbs. or more at \$2.25 per 100 lbs.

RED BLISS TRIUMPH

This is one of the earliest potatoes grown. It is the round, smooth, shallow eyed red potato you will find on the market in the early spring. On account of its earliness, it brings the highest prices, and thousands of acres of Triumphs are raised by the Southern growers for the early market.

It is a heavy yielder of fine quality potatoes, and every one should plant some Red Bliss for early potatoes.

15 lbs., 65c; 30 lbs., 95c; 60 lbs., \$1.60; 100 lbs. or more at \$2.25 per 100 lbs.

Howard Wherry—Nursery Production Manager With Red Bliss Triumph Potatoes—Picture Taken July 4th.

● IRISH COBBLER

Tests made at the State Agricultural College, Brookings, S. Dak. place Irish Cobbler as the best yielder over a three-year period.

It is second early, nearly round, pure white, a good keeper, and of very excellent quality, always cooking dry and mealy. On account of the short, stocky growth of the vine, this potato can be planted closer together than most varieties, ordinarily about one foot apart in the row.

15 lbs., 65c; 30 lbs., 95c; 60 lbs., \$1.60; 100 lbs. or more at \$2.25 per 100 lbs.

SWEET POTATOES

● EARLY JERSEY

This variety is the most satisfactory for northern planting. We can furnish these for shipment about April 1st. The potatoes should be planted by the 10th of April, the sprouts transplanted from the 15th of May to as late as July 1st. The potatoes must be planted immediately on their arrival as they decay rapidly at that time of the year. Will yield from 200 to 300 bu. per acre.

1 lb., 25c; 5 lbs., 80c; 10 lbs., \$1.45; 40 lbs., \$3.75; 80 lbs., \$7.25.

Plant from 8 to 15 bu. of potatoes per acre. Use more seed if soil is rich and rainfall heavy.

GURNEY'S NURSERY DEPARTMENT

NURSERYMEN for SEVENTY-TWO YEARS

GURNEY GROWN TREES—SHRUBS—FLOWERS

From the 480 acres of land operated by the Nursery Dept. of THE HOUSE OF GURNEY, comes the hardy plants that MAKE YOUR HOME. With apple trees on Baccata Roots for greater hardiness; and plants grown under the same conditions of climate as that found in most sections of the Middle Northwest, you are assured of

TREES THAT GROW

We are offering the finest stock ever produced including over SIX MILLION SIBERIAN ELM. We have over a Hundred Thousand Plum trees of the BEST Types for Your part of the country.

PLANT GURNEY'S HEAVY BACCATA ROOTED APPLE TREES

GURNEY'S FRUIT TREES are all Grown on the hardest roots. A good root system is more than half of a good tree. Play safe Buy Gurney Fruit Trees.

Our Guarantee

We guarantee our nursery stock to reach customer in good growing condition. If through delay in shipment or other causes, it does not, we are to be notified within 10 days and we will make a satisfactory adjustment by replacement or refund. Any other kind of a replacement is wrong as it makes the careful planter pay for the careless planter's trees.

NON-WARRANTY—The House of Gurney, Inc., does not give any warranty, expressed or implied, as to description, quality, productiveness, or any other matter of seeds, bulbs or plants which it sends out, and will not be in any way held responsible for the crop.

SHIPPING ORDERS

Parcel Post: If possible, under Postal regulations, we will ship by parcel post. All nursery orders (except Strawberries) are f.o.b. Yankton, so include postage when ordering.

FIGURE POSTAGE ON NURSERY ORDERS ONLY

On all nursery orders up to \$1.25 add 10c extra for postage.

Do not send less than 10c for Postage on any nursery order.

On all nursery orders from \$1.26 to \$3.00 add 8% extra, or 8c for each \$1.00. (If order comes to \$1.50 add 12c for postage—\$2.00 add 16c—\$2.25 add 18c extra for postage, etc.)

On all nursery orders over \$3.00 add 6% for postage, or 6c or each dollar on your order. (If your order comes to \$3.50 add 21c postage—\$4.00 add 24c—\$8.00 add 48c for postage, etc.)

If your nursery order can not be sent by parcel post, the amount sent will be applied on express or freight.

The above figures are estimated. If you send too much, we will refund the balance—if you send too little, we will send you a bill for amount due.

GURNEY'S

EARLY BEARING

Plant Your Orchard This Year

FRUITS

EARLY APPLES

DUCHESS OF OLDENBURG—Ripens in August when the demand for apples is at its peak. We have sold many carloads from our Elk Point, S. D. Orchard at Top Prices. Excellent for sauce, pies, canning or eating fresh. Color, pale greenish-yellow almost covered with red stripes. **Very Hardy.**

***GURNEY'S BRIGHT RED DUCHESS**—This New Duchess has all of the good qualities of the old Duchess and More. Its color is bright red. You will like it and it will sell on sight. Plant this improved Red Duchess in Larger Numbers for greater satisfaction and profits. **Hardy.**

EARLY HARVEST—This is the earliest ripening apple that is hardy in the Middle West. **Ripens in July.** It's a fine eating apple, medium in size and greenish-yellow in color. For early apples, plant Early Harvest. **Perfectly Hardy.**

ERICKSON—Extra large. Fine quality. Erickson is very hardy and bears big apples similar to Duchess. It is somewhat earlier and in our opinion it's better all around. Its good croching habit also makes it an interesting ornamental shade tree. **First Hardiness.**

YELLOW TRANSPARENT—This is one of the finest early apples you can grow. A little later than Early Harvest. Quality good; color yellow; flesh white. The trees bear young on Baccata Roots. Do not fail to have Yellow Transparent Apples in your orchard. **First Hardiness.**

June 10, 1937
On March 11 this spring, I ordered 20 Superior Plums, 10 Oka Cherries, 9 Kaga Plums, and 6 Anoka Apples. Every tree is alive and making a splendid growth.

I. W. G.

GURNEY'S FALL APPLES

ANOKA—The Surprise Apple. Two year old trees bear fruit in the Nursery. The size is good and the color attractive with rich, red stripes over a yellow base. **Your** orchard should have at Least Two. **Very Hardy.**

***CHARLAMOFF**—Russian type. Its large, handsome, red fruit ripens in September. Its excellent quality and early bearing makes Charlamoff one of the best in its season. **Do not overlook** Charlamoff. **First Hardiness.**

DUDLEY—A New Apple in Big Demand. Supply very limited. The Big fruit is attractive, with a greenish-yellow base splashed with red. The Dudley quality is excellent. It ripens in September or October. **First Hardiness.**

***HIBERNAL**—The hardiest of the Russian Apples. Very good quality. The fruit is yellowish-green with a beautiful red blush on the sunny side. Flesh, yellowish, juicy, tender. Season, September and October. **First Hardiness.**

***MCINTOSH RED**—This fruit is deep dark red in color and of good size. Its fragrance is that of the SNOW APPLE. It is one of the best commercial varieties; flesh white, tender, and snappy. It ripens early in October and we have seen McIntosh apples in good condition in April. You need McIntosh Red. **First Hardiness.**

***OKABENA**—This is a fine eating apple of high quality. The trees are vigorous and very productive. The fruit is yellow, heavily washed with carmine making it extra attractive. **Perfectly hardy** and keeps well to Christmas.

***PATTEN'S GREENING**—The hardest of the big Greening Apples. Grows as far north as Canada. Especially good in North Dakota. Its color is especially attractive for a Greening and its quality is good. **First Hardiness.** Offered in 2 year sizes only.

WEALTHY—The Leading Commercial Fall Apple. In any established orchard of this part of the country you will find Wealthy as the Main Crop. It's a great bearer. Excellent for eating fresh, or cooking. Fine grained and juicy. Ripens in September. **First Hardiness.**

PRICE'S SWEET—A fall Sweet Apple that has its place in **your** orchard. It is of medium size, excellent quality; color green striped with red and just "plenty" sweet. A vigorous upright tree that bears early and annually. Buy Price's Sweet. **Second Hardiness.**

TWO YEAR OLD EXTRA HEAVY APPLE TREES

We have a few apple trees that are extra fine quality. They are heavily branched and rooted and will come into bearing a year earlier than the regular run. These trees are budded on Baccata roots which brings them into bearing an average of three years sooner than on ordinary roots.

The prices are a little higher but

WINTER**EAT APPLES FOR HEALTH****WINTER****AN APPLE A DAY—KEEPS THE DOCTOR AWAY****ALL GOOD KEEPERS****WINTER APPLES**

***ANISIM**—(Early Winter). A fine apple in quality, color, and keeps well. One of the heaviest bearers of the hardy winter types. Its attractive color—yellow and almost entirely covered with bright red—makes it a good seller. **Hardy.**

***CARAMEL**—Early Winter. A Sweet Apple. A Prof. Hansen production that is **Hardy**. Above medium in size. Color, yellow, covered with red stripes. One of the best **Winter Apples**. Fragrant like the Snow Apple, juicy, sweet and of excellent quality. **First Hardiness**. Offered in 2 year sizes only.

***GURNEY'S IMPROVED RED DELICIOUS**—Well named for it really is **D-ee-licious**. The most popular table variety. Its size is large, flesh white and firm; keeps well and its quality is such that only the word **Delicious** describes it. On Baccata Roots it is of 2nd degree hardiness and bears earlier. Pick when **Hard Ripe** and it keeps a long time.

DARK RED STRAIN DELICIOUS—An improvement that is well worth-while. It is entirely overlaid with dark red and retains the **Delicious** flavor of the old **Delicious**. Plant Dark Red Delicious. **Second Hardiness**.

***YELLOW DELICIOUS**—There is something about a yellow apple that makes you want to set your teeth into it. The Golden Yellow of this **Delicious** apple will not disappoint you. It has somewhat the flavor of Pears. **First Hardiness**.

***DEE BEE**—A winter apple that we like well enough to name in honor of D. B. Gurney. It is hardy, of fine quality, attractive in its green base overlaid with dull red. It bears early and keeps well. A vigorous grower. **Very Hardy**.

***GANO or BLACK BEN DAVIS**—An improvement over the "Old Ben." Its color is much better and it has all of the good points of keeping and cooking. "Black Ben" keeps all winter. Color, red; size large. Fairly Hardy.

GRIMES GOLDEN—It has everything you want in an apple—quality, color, size, flavor, and keeping qualities. Its season is from September to April. For the more favored climates of the Middle Northwest **Grimes Golden** is best. **Third Hardiness**.

HARALSON—Like the Wealthy in size, quality, and color, but **Haralson keeps well into the winter**. It is fast becoming a leading commercial **Winter Apple**. Make **Haralson** the backbone of your **Hardy Apple Orchard**. **First Hardiness**.

JONATHIAN—A leading Commercial **Winter Apple**. Its brilliant red color and high flavor makes it a favorite for cooking or eating fresh. **Jonathan** is a wonderful apple for market or home use. **Third Hardiness**.

***MALINDA**—A beautiful apple and one of the hardiest, heaviest bearing, longest keeping winter apples that can be grown in this part of the country. The flesh is yellowish-white, firm, juicy, and with a sweet after-taste. **Malinda** bears early in life and has a full crop annually. **First Hardiness**.

WINTER APPLES

***NORTHWESTERN GREENING**—Winter apple, very attractive in color. The tree is hardy, vigorous, and comes into bearing early. As it grows older is an exceptionally heavy cropper. Skin smooth, somewhat waxy, clear pale yellow or greenish, sometimes faintly blushed. Flesh tinged with yellow, crisp and firm, mildly sub-acid. **Second Hardiness**.

PERKINS—A hardy winter apple that rates in color, quality, shape, and size with the best commercial varieties such as Baldwin, Spy, or Seek no Further. It keeps well till April 15. Large in size, red and round as a ball. The flesh is fine grained, juicy, and deliciously flavored. Be sure to have **Plenty of Perkins** in your **Winter Apple Orchard**. **First Hardiness**.

SALOME—One of the really good Winter Apples for the North. It bears early in life. Its color is attractive being pale yellow blushed with pinkish red and striped with carmine. The fruit hangs well to the tree, is firm, stands handling well and is a fairly good keeper to April. Flesh is tender and juicy. **First Hardiness**.

WOLF RIVER—Season, October to December. One of the largest apples grown. Tree grows to immense size, very productive, bright red, fair quality, splendid cooking apple. **Second Hardiness**.

***TOLMAN'S SWEET**—Fruit medium size, bright yellow, much esteemed for cooking. In ordinary storage its season is from November to January. This is an exceptionally sweet apple. **First Degree of Hardiness**.

Gurney's Guarantee

We guarantee all nursery stock to reach you in LIVE GROWING CONDITION. If everything is not all right—as you would like it—WRITE US IMMEDIATELY and we will make proper adjustment by replacing free, all items that are not satisfactory. (See Page 47 for details.)

*DOLGA—A Beauty. Dark red all over. Juicy and of a quality that is distinctly Dolga. You never tasted better jelly than that made from Dolga Crabs. Hardy, vigorous, with beautiful flowers; it is not only a fruit tree but a fine Ornamental. Perfectly Hardy.

FLORENCE—Yellowish-white overspread with brilliant pinkish-red. An excellent Crab in size, quality, and productiveness. Grows anywhere and "comes through" with a fine crop. Fruits early. Hardy in North Dakota and Canada.

*GURNEY'S SEEDLESS—Most of these trees produce fruits entirely without seed. The quality is good and the size better than average. Perfectly Hardy. Offered in 2 year sizes only.

HOPA CRAB—An ornamental. Hopa has no place in the fruits, but if you want a tree with red leaves in the spring, red buds, red flowers, and fruits that are red from the time they Set—Get Hopa Crab. First Hardiness. Prices: 4-5 ft., 65c Ea. For other Hopa Crab Prices, See page 68.

HYSLOP—Large, beautiful, dark red fruit overspread with purplish bloom. One of the best producers in the Crab Apple group. Hardy and bears every year.

*RED FLESH—An ornamental tree that also produces a big crop of good fruit. Red flowers, moderate growth, and a fruit that is red to the core. It is a beautiful tree and the fruit makes excellent clear, red jelly. Perfectly Hardy.

*SWEET RUSSET CRAB—This is the best of all the Sweet Crabs. Large, green, russet crabs, excellent for eating fresh, pickling or preserves Very Hardy and a regular cropper.

TRAIL CRAB—A good Crab from Western Canada. Round, large, yellow washed with red and crimson. The Trail is a valuable addition to the Hardy Crab list. Its flavor is sprightly and pleasant eating fresh. It ripens in late August. Limited number. Not more than five to a customer. Price 5c Per tree extra.

Whitney

*WHITNEY No. 20—A delicious Early Crab Apple when eaten fresh from the tree and, for Pickling—there is none to compare with Whitney. Large, sweet, juicy, colored yellow with lively red stripes. Hardy, vigorous and a heavy cropper. You must have Whitneys. Order Early. There are never Enough. First Hardiness.

VIRGINIA—Fruit medium to large, dark red and of good quality. A strong grower. It produces fruit under the most adverse conditions. Perfectly Hardy.

*BEAUTY CRAB—A Prof. Hansen production. The brightest in color of all crabs. It is a brilliant solid red cherry all over with orange-red underneath. The flesh is white, firm, very juicy, and makes a bright red sauce. You will like Beauty. First Hardiness. Price: 5c per tree extra.

These New Apples 5c Per tree Extra

*EARLHAM—A strong vigorous grower producing large high quality fruit. It was developed at Ames, Iowa where it showed a good record for hardiness. Its fruit is yellow with a pinkish blush. Mild in flavor, firm, and keeps well to April or May. Second Hardiness. Offered in 2 year sizes only.

GURNEY'S WHITE GREENING (MANITOBA) One of the finest Greening Type Apples we have ever seen growing in this part of the country. Quality excellent. Color light green turning to ivory-white. They have stood drouth and severe winters without injury. Vigorous upright grower. Excellent for canning. Pear flavor and cans like a pear. First Hardiness.

GURNEY'S "SUNNY SIDE"—This deep yellow apple with dark red stripes on the sunny side resembles the Wealthy in size and shape, but we would say is much hardier than the Wealthy. The quality is far better than any apple we have ever grown. The tree is a very hardy, upright grower. Fall variety. Season, September 1 until December 1. First Degree Hardiness.

LONGFIELD APPLE—Season, September and October. Fruit medium to small. Flesh, white, fine, crisp, very tender, juicy, sub-acid. Skin, thin, tender, smooth, pale waxy yellow with lively pinkish blush, not striped. Iowa introduction. Second Degree Hardiness.

*TURLEY—A beautiful apple of the Winesap type. In shape very similar to Stayman's Winesap, but much more highly colored; excellent quality, good keeper. Does not crack. The tree is thrifty and a consistent bearer. Second Degree of Hardiness.

*CANADA RED—(Sometimes called Steele's Red). A long keeping market apple with excellent color. The fruit is well formed, very fine grained and juicy. In color a beautiful deep red, striped with deeper red on the background of yellow. The quality is of the best. Third Degree of Hardiness.

HORACE—A medium sized, roundish apple, yellow with bright red cheeks, smooth texture and the flavor suggests Fameuse or Snow. First Hardiness.

PATRICIA—Much like the McIntosh in appearance, but is somewhat smaller and is a better keeper. Most people rate it of still higher quality than McIntosh. Its skin coloring is a bright red. First Hardiness.

EARLY

HARDY MENDEL PEAR—A pear of Excellent quality; so hardy that it has not frozen back an inch in twenty years. Mendel is Sweet, Juicy, and above medium in size. It is the only Pear we know of that can Fruit by itself. Very Blight Resistant.

MING PEAR—A beautiful tree bearing high quality fruit. Prof. Hansen brought it over from North China. It is hardy and so blight Resistant as to almost justify calling Ming a Blight Proof Pear. Of good size and quality, Ming should be planted wherever the hardiest apples will grow.

PATTEN PEAR—Fruit is medium to large, smooth and regular. Green in color, but as it ripens it turns a golden yellow with bronze cheek. The skin is thin and tender. Flesh tender, juicy, rich and refreshing. Very hardy and Blight Resistant.

GURNEY'S SUNSHINE—One of the finest Pears that grow in the Central N. W. It's quality compares favorably with the Bartlett, of which it is probably a seedling. It is a vigorous grower and Blight Resistant.

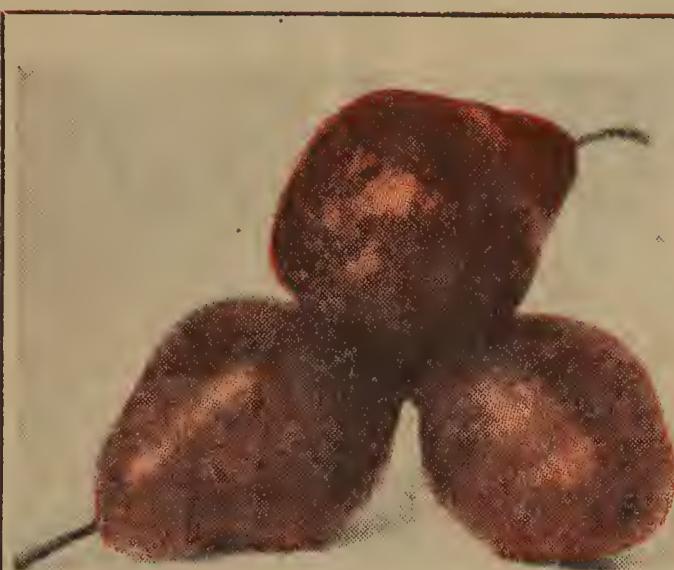

NEW PEAR

GOODING No. 2. (Seckel)—This Improved Blight Resistant Seckel is a Sugar Pear of exceptional quality. It is larger, very highly colored, juicy, very fine grained and delicately flavored. The tree is very productive, bears annually and begins to fruit when three years old. Plant this New Improved Sugar Pear this year. Price: Each, 65c; 3 for \$1.75; 5 for \$2.50.

PETER PIPER PEAR

If Peter Piper picked a peck of Pickling Pears, Where's the peck of Pickling Pears that Peter Piper Picked?

I'll tell you. They are in D. B. Gurney's Cellar—pickled and D. B. Says they are the finest Pickled Pears he ever ate. **BLIGHT PROOF** for the past 25 years in the Gurney Nursery. Round, good sized, yellow when ripe and excellent in quality. "Nuf Sed". First time ever offered. Price: 65c Ea. 3 for \$1.75; 5 for \$2.50.

DOUGLAS PEAR—One of the hardest, most blight resistant, and productive varieties now being grown which still has fair to good quality. A fall pear that is a heavy bearer, Fruit is large, yellow with blush. Usually starts bearing next year after planting.

TAIT PEAR No. 2—We got this Pear from the famous orchard of the late John Robertson of Hot Springs, S. D. Robertson said, "Tait No. 2 is of very good quality, very hardy and, We have never seen Blight on our Tait Pear Trees." That's high recommendations from a conservative Orchardist who never recommended fruit till he had Proved it. **Very Early**.

EDWARD C. PARKER—Minn. (No. 1) A Minnesota production that is hard to beat. Fruit medium to large, an appetizing yellow with a distinct blush. Its attractive color bears out the fine quality of tender flesh, sweet juice, and delightful flavor. Very small core and few seeds. **Blight Resistant**.

COMMERCIAL PEARS

FLEMISH BEAUTY—Large, juicy, rich; one of the hardest and most popular. September and October.

KEIFFER—Its large size, handsome appearance and remarkable keeping and shipping qualities make it exceedingly profitable for market.

DWARF PEARS

These Pears have proved to be just a little hardier than the larger growing type of Commercial or Standard Pears. They will often bear within two years after transplanting. Plant two or three of these along with the other Pears. We offer you these in the three best varieties.

CLAPP'S FAVORITE—Large, rich flavor.

DUCHESS—Heavy bearer, sweet, good variety.

FLEMISH BEAUTY—Large juicy fruit.

Prices Dwarf Pears—Two Year Old Trees: 60c each; 5 for \$2.75.

PLUMS

HARDY GROWN IN THE GREAT NORTHWEST

ONLY
THE
BEST
VARIETIES

An Acre of Plums Beats Four Acres of Wheat

**The Hardest and Heaviest
Bearing Plums You Can Grow—
BEST FOR THE NORTHWEST**

ASSINIBOIN—This red plum is probably the hardest and best producing of any that will stand the climates of the extreme North. The flesh is yellow and juicy. The skin is thin and light red in color. The size is large. We have never had enough Assiniboin to supply the demand. Order Early.

***CREE**—Heavy bearing, extra hardy plum of high quality. Fruit is large, red, very early bearer. Hardy as far north as you wish to plant.

CHERISOTA—A hardy Sandcherry Hybrid that bears abundantly of large, dark red plums of high quality. It fruits "in-between" seasons and fills a much needed place between the early and late plums. It is beautiful in bloom, hardy, and very productive.

***HANSKA**—A fragrant, tasty Apricot Plum. Excellent eaten fresh and in canning it retains that apricot flavor. A heavy bearer of quality fruit. Bright red with a heavy bloom. Bears the year after planting and ripens in August. We produce thousands of Hanska Plums and never have had enough. Order Early.

***KAGA**—A sister to Hanska and if that is possible—a better flavor. You can't go wrong with Kaga. Eat one, dead ripe, from the tree and you will pronounce it the best flavored plum you ever ate. It is a good bearer, hardy, and in big demand. Plant Kaga this year. You will be glad you did.

THE LAW of Supply and Demand has not yet been repealed. We have a HUNDRED THOUSAND PLUM TREES. Nature was kind to us in 1937. A good Supply means Lower Prices.

THE FAMOUS HANSEN HYBRID-CHERRY PLUMS

*WANETA PLUM

PROF. HANSEN'S MASTERPIECE

To my mind, this is unquestionably Prof. Hansen's masterpiece in production, and it combines hardiness, immense size, delicious quality, long keeping, beautiful color, small pit and early bearing, producing a good crop at two years of age and never missing a crop any year. At four years old it is not unusual for a Waneta to produce four bushels of plums. It is a rapid grower. We have shipped this plum across the United States and back, and it was returned to us in perfect condition.

Big Kahinta Plum

***KAHINTA**—A sister of Waneta—One of Prof. Hansen's very hardy free stone Plums. Fruit exceptionally large, dark red, round, flesh firm, yellow, very sweet. It ripens about the same time as Waneta.

***OPATA**—Earliest of All—This is the first plum of the Sand Cherry Cross to ripen. At blooming time it is a gigantic bouquet of white flowers of the most exquisite fragrance. The trees should be grown as bushes, because you can grow twice as much fruit and one or two years earlier. They are much longer lived in bush form. Color of the flesh green, flavor very pleasant, ripens about July 15th and will hang on the tree in good condition for about two weeks.

***SAPA**—The Black Plum—"As dark as the shadows of eve banked in the Western Heavens." Turning the branches of this tree back when the fruit is ripe exposing the long ropes of glossy black fruit to the rays of the sun, the background, the smooth bark and glossy dark green foliage are a pleasant sight. The flesh is a royal purple. The color of the skin and flesh gradually change until it is as black as the darkest night. (See front cover for colored picture.)

TOKA—The nicest looking tree, erect, strong, stocky growth, early, heavy bearer. Skin rich dark orange red, mottled with orange dots, covered with light lilac bloom. Flesh rich orange red, firm. Pit free. Sauce has the rich Chinese apricot flavor, which is superior to ordinary California plums.

YUTECA PLUM—Yuteca (Sioux Indian for "to refresh"). Size very large, quality good. A choice early and productive native plum.

***WASTESA**—(Sioux Indian name for "delicious"). Large, almost free stone, excellent. It is the best in quality of all the pure native seedlings. Wastesa is a seedling of Wyant, one of the best native plums of northern Iowa.

MINNESOTA'S BEST PLUMS AT POPULAR PRICES

GURNEY'S GOLD PLUM—A Luther Burbank introduction and the finest yellow plum ever grown. The fruit is very large, clear, semi-transparent, golden-yellow becoming gradually overspread with bright carmine blush when fully ripe. A healthy and hardy tree that succeeds wonderfully even in rather dry locations. In size, quality, color, and productiveness, Gurney's Gold Plum leads in its class. Grow Gold Plum this year.

EMBER—Named because of its glowing color like a glowing ember in the dark green foliage. It's beautiful, but its beauty goes lots farther than "skin deep." It's a top-notcher for size and quality. For central and southern Minnesota (and like Climates) Ember is an excellent eating or canning plum. The fruit is yellow blushed with glowing red. Tree is vigorous and productive. Flesh rich yellow, tender, juicy, sweet and pleasant. Ripens from early to Mid-September. Be sure to have Ember Plums. Supply limited. Prices: 10c per tree higher than regular plum prices.

***GOLDENROD**—Goldenrod is one of the very few clear yellow plums produced among thousands of hardy hybrids. It carries promise as a market variety because of its firm flesh, large size, attractive color, and excellent shipping quality. It exceeds all other varieties except Tonka in keeping quality after harvest. The tree is unusually vigorous and is hardy in all but the northernmost sections of Minnesota.

HENNEPIN—A dark reddish-purple plum covered with a dense bloom giving it distinctive and attractive appearance. It is good eaten fresh and especially good for canning and preserving because of its rich purplish-red flesh. Hennepin bears a heavy load of richly colored fruit in early August. For a reliable, hardy cropper, plant this Minnesota Plum—Hennepin.

***GOLDEN LA CRESCENT**—For delicate coloring and delicious flavor La Crescent leads all other plums. It is a clear yellow, faintly blushed, and lightly covered with a thin white bloom. It is unexcelled either to eat out of hand or for sauce. The tree is vigorous, tall, and spreading, and makes a handsome appearance. It is hardy in all but the most northern sections of Minnesota. The variety is especially recommended for home orchards.

***MONITOR**—A new annual heavy bearing variety. Fruit is large. Color, a dullish bronzed; yellow flesh, tender, very juicy but firm, sweet. One of the best quality plums. Very hardy. Late midseason bearer.

RED WING—Here is an unusually large Red Plum from Minnesota. The flesh is rich, yellow, and firm. It is juicy and sweet. The skin is easily removed and the pit so free that Red Wing can be sliced like a peach. As a dessert or canning plum you will look a long time to find a better fruit than Red Wing. Hardy and vigorous.

ABUNDANCE—One of the Best Japanese Plums. It is well named for it produces an abundance of rich, bright cherry-red, highly perfumed, juicy, tender fruit of excellent quality. The tree is a vigorous grower. It bears quite young, and is hardy in the southern sections of the Middle Northwest. Plant Abundance for quality, Size, and Abundance.

We have a few SIX to EIGHT FOOT Plum Trees in Varieties Marked with a star ().

***SUPERIOR PLUM**—The 1933 sensation of the plum world. Its very name is a challenge, for this new plum is conceded to be superior to any of the older varieties, as large as California Plums and surpasses them in quality. It has firm flesh and a beautiful red color. You can peel it as you would a peach. Don't fail to get at least two.

TONKA—The Tonka is without doubt one of the three best Plums in the Minnesota Group. Fruit is large, richly flavored, juicy, solid, and is an ideal plum for any purpose. Tree is very productive. When planning your orchard be sure to include the Tonka.

***UNDERWOOD**—One of the hardiest and most vigorous growers of all the Minnesota Hybrids. The fruit ripens early, making it exceptionally well adapted to northern latitudes. It has been grown successfully in several points of North Dakota and at Winnipeg in Manitoba.

TERRY—One of the largest of pure American

plums, is dark red and the tree is vigorous and healthy and very productive. A good variety and very hardy.

WYANT—Hardy, heavy producing, large Plum of good quality. Purplish-red in color; a good shipper.

SURPRISE PLUM—Extra large, red, high quality. Good for market. Makes an unusually large tree. Very productive.

*FIEBING PRIZE

This delicious plum was given the high award of the Fiebing Prize at the Minnesota State Fair in 1930. Since that time its popularity has grown immensely. It is a big red plum. The fruit ripens early, flesh is firm, and of excellent flavor, and a beautiful red color. Fiebing is equal to California Plums in size and quality. Another plum that you can peel like a peach. Do not overlook Fiebing Prize in your plum list. (See front cover for colored picture.)

Fiebing Prize—Hardy, Early, Quality Plus

Hybrid Cherries
Bear Fruit
The First Year
After Planting

PRICES—ALL HYBRID CHERRIES except
NEW MORDENA

Size	Each	Per 5	Per 10	Per 25
3-4 ft.....	30c	\$1.25	\$2.30	\$5.00
4-5 ft.....	35c	1.50	2.80	6.25
* 5-6 ft.....	40c	1.75	3.30	7.50

* Only Starred Varieties can be secured in 5 to 6 ft. Size.

* **COMPASS CHERRY**—The most productive of the hardy, annual bearing Hybrid Cherries. It bears quality fruit about an inch in diameter **the year after planting**. Compass Cherry trees bear heavily even in the dryer and more severe climates of the Prairie States. The fruit is good eaten fresh or canned. If you want to be sure of fruit—plant Several Compass Cherry Trees. Red, sweet, juicy, and a very fine flavor. A few 6-8 ft. Compass available at 45c ea.

NICOLLET CHERRY—A Pie or Sour Cherry for the North. Introduced from Minnesota in 1925, Nicollet has grown in favor as an excellent substitute for the standard sour cherries. A dark red cherry almost an inch in diameter, Nicollet is juicy, yellow flesh, and an early bearer. It is also a good pollinator for Zumbra, Compass and Morden.

NEW! NEW! NEW!

MORDENA PLUM-CHERRY—The fruit is dark purple and is large, meaty, sweet, dark in color. Its flavor is rich, pleasingly sweet carrying a touch of the cherry. **Free stone**. Morden is one of the **really good** fruits from the Morden, Manitoba, Canada Experiment Station. Buy at least **three** for \$1.25. Not more than **three** to a customer. **Prices: 50c each; 3 for \$1.25.**

"YOUR GARDEN" SPECIAL
One Each of Six Choice Cherries - 3 to 4 ft.
Including
New Morden **\$1.50**

Compass Cherry

**PROF. HANSEN'S
IMPROVED
SAND CHERRY**

Wonderful improvement over the common native sand cherry of western South Dakota. Something that is worth while in every garden. The fruit is larger and of excellent quality. Should be grown in bush form. Makes an excellent division hedge between the garden and yard. Produces fruit the first year after planting.

2 year, 18 to 24 in., 12c each; 5 for 55c;
10 for \$1.00; 50 for \$4.50. 2 to 3 ft., 20c each;
10 for \$1.50.

Sweet and Sour
Cherries
That Are Hardy
in the North

* **OKA—A Fine Black Sweet Cherry—OKA**

In my opinion, Oka does not need to "take its hat off" to any cherry, sweet, sour, or hybrid. Oka has a sweet flavor that's hard to beat. Its outside color is black and its flesh dark purplish-red. It is juicy and **free stone**. Oka is excellent as a canning fruit, but unless you have a lot of trees, the fruit will never see the inside of a can. It's too good eaten fresh from the tree. You can leave them to dry on the trees if you wish, and use them like prunes. Hardy well up into Manitoba, Canada. Oka is a good producer of quality fruit in the South, North, East, or West. Plant enough! **You can get Ten Oka Trees for only \$2.30.**

TOM THUMB—One of Professor Hansen's **BUSH CHERRIES**, and one of the best bearing hybrid Cherries. It covers its branches with lovely flowers in the spring and these are followed by enormous numbers of dark juicy fruits. It grows bushy and gets about two feet tall. Tom Thumb bears fruit a year after planting—in quantities. Its bluish-black skin and red juicy flesh makes Tom Thumb an attractive **Cherry**. Good eaten fresh or canned. It is one of the most dependable hardy cherries. Border your garden with a row of Tom Thumb. **You can get ten plants for \$2.30.**

* **ZUMBRA CHERRY**—A good late Hybrid Cherry introduced by the Minnesota Fruit Breeding Farm in 1920. It is a 3 way cross of a Black Sweet Cherry, Pie Cherry, and Sand Cherry, and produces a heavy annual crop of fruit about an inch in diameter. The plant is small and should be grown as a bush. Fruit, dark reddish-black with yellowish-green flesh. Zumbra is also a good pollinator for other Cherry Hybrids.

NEW VARIETIES OF BUSH CHERRIES

INTRODUCED BY PROF. N. E. HANSEN-BROOKINGS-S.D.

THESE VARIETIES NEVER OFFERED BEFORE

"GRAFTED" TREES—NOT SEEDLINGS

These **BUSH CHERRIES** are a valuable addition to the fruit list of the North. Perfectly hardy and beautiful in flower. They also produce great quantities of excellent fruit. They bear **the year after planting**. Buy early—Supply limited.

HANSEN NEW BUSH CHERRIES—Price—Each 85c; Per 3—\$2.40; Per 5—\$3.75. One Each of Nine Varieties—\$5.95.

KEYAPAH—Fruit very large, quality very good, sweet. Pit small. Fairly free-stone.

OAHE—Fruit good quality; very productive; low open habit. Pit oval, very small.

OKREEK—Fruit large, round with minute prickle, sweet, quality excellent. Equal to Sioux in quality and of better habit. Good bearer.

TEPEE—One of the Sioux seedlings. Heavy bearer. Very good quality. Medium large pit. Habit upright and spreading.

WAMPUM—Upright open habit, 4 feet. Excellent quality. Very heavy crop.

WASTA—Fruit medium sized, round; quality very good. Very heavy crop. Upright, Open, spreading habit. Pit small, round.

WATAUGA—Fruit large. Quality good. Pit small. Heavy bearer. Habit upright spreading.

WETA—Fruit large and round, quality very good. Pit small.

WEWELA—Fruit medium size, good quality, very heavy crop. Pit small. Habit low.

Early Richmond Cherry

Sweet Cherries Are Delicious
We Recommend Them for Climates
Like Yankton and South

BLACK TARTARIAN (Sweet)

Here is a Sweet Cherry that makes your mouth water when you see it. Fairly hardy, it produces large, black, sweet fruit in good quantities. Plant at least two this year. 3-4 ft., 55c each; 5 for \$2.60; 10 for \$5.00.

GOLD CHERRY (Sweet)

A great big yellow Sweet Cherry and the hardiest of all Sweet Varieties. We have grown the Gold for years and find it one of the most popular. 3-4 ft., 55c each; 5 for \$2.60; 10 for \$5.00 4-6 ft. 70c each; 5 for \$3.25; 10 for \$6.00.

ORNAMENTAL

"UNCLE PHIL'S"—BIG RED CHOKES CHERRY— Folks, it is a beautiful cherry, very much larger than the regular black Choke Cherry. The color is brilliant red, similar to the Perfection Currant. Bunches are very large. Quality, extra good.

GURNEY'S PIE CHERRIES BEAR LOTS OF FRUIT

Cherry Trees Are Scarce This Year and We Advise You
To Order Early . . . These Northern Grown Trees are
JUST WHAT YOU WANT

EARLY RICHMOND Hardest of All Pie Cherries

These fine red juicy cherries can be grown successfully at Mitchell, S. D. and south. You folks in Minnesota and Iowa have ideal conditions for Pie Cherries.

Wide spreading tree, fresh green foliage, and the hardest of all the Pie Cherries. Early Richmond should be planted in all home grounds. The fruit is Dark Red and delicious.

ENGLISH MORELLO The Black Pie Cherry

The fruit is large and so dark red as to be classed as a black cherry. It ripens much later than Early Richmond, Juicy, of good quality. This cherry should be in every garden.

LARGE MONTMORENCY

Large, red, rich, and containing very little acid. Very hardy and productive. Ripening about 10 days after Early Richmond; the two planted together make a Cherry season of almost a month, giving you the fruit fresh, besides plenty to can. Montmorency is the leader in the western parts of Nebraska and Kansas, and eastern Colorado. But wherever you live, if you buy a Montmorency Cherry tree from us, I know you are going to be pleased.

OTHER HARDY FRUITS

WINDBREAKS

BUFFALO BERRY—This is very useful as well as ornamental, and is planted as much for an ornament as for its fruit. The tree grows from 7 to 12 feet high, has silvery foliage. The fruit is much like that of the Red Currant, and is used for the same purposes. The Buffalo Berry makes an excellent hedge.

Size	Each	Per 10	Per 100
2-3 ft.	\$0.25	\$1.75	\$15.00
3-4 ft.30	2.20	19.00

MOTHER GURNEY'S EVERBEARING MULBERRY—The word "Everbearing" has been much used and much abused. It might mean "fall bearing"; spring and fall bearing; or EVER Bearing. This Mulberry is not always full of fruit, but it does have the longest bearing period of any mulberry we ever saw. Growing on Don Gurney's home grounds—which was Mother Gurney's—it starts producing Large, Juicy, Black Berries of Excellent Quality about June 20, and continues producing bushels of fruit well into August. For windbreak, grove, or ornament, or just fruit—Plant Mother Gurney's Everbearing Mulberry.

Size	Each	Per 10	Per 50	Per 100
1-2 ft. Sdgl.	\$1.50	\$2.50
2-4 ft. Trans.	20c \$1.50	3.00

CHOKE CHERRY—This is one of the best of our ornamental fruit trees. Absolutely hardy anywhere. Always symmetrical, and when in full bloom is a great bank of snow with the added beauty of its nutty woodland fragrance, and later its rich, purplish-black fruit. Especially fine for jelly and jam.

Size	Each	Per 5	Per 10	Per 50
2 to 3 ft.	25c	\$1.00	\$1.75	\$7.50
3 to 4 ft.	35c	1.50	2.75	13.00

PLANT
GURNEY'S
HEAVY

GRAPES THIS YEAR

GET FRUIT NEXT YEAR

FOR MORE AND BETTER FRUIT

Red Delaware

RED DELAWARE—One of the finest table grapes, bunches compact, berries rather small, juicy and sweet without any hard pulp. Spicy flavor, probably the best American grape. Ripens medium early. Each, 20c; 6 for \$1.00; 10 for \$1.65; 25 for \$3.95.

FREDONIA (Early)—The new, outstanding early black Grape. Fredonia is the earliest good black Grape. The vine is vigorous and productive and ripens its fruit 3 weeks earlier than Concord. The clusters are very compact; berries large, round, and hang well to the bunch; the flesh is juicy, solid, but tender, and the quality is very good. Fredonia stands alone as an early heavy fruiting black Grape. Plant Fredonia this year and grow your own table grapes. We have never seen its equal. **Heavy Vines—25c each, 5 for \$1.15; 10 for \$2.00.**

LUTIE GRAPE (Red)—An old standard variety. Out of twenty-five varieties of grapes that we are growing in our trial grounds the Lutie Grape has led for years. The Lutie is very vigorous and produces more fruit than any other variety in the trial grounds. It is a red grape, earlier than the Concord and probably more hardy. There is no reason why you cannot grow large quantities of these grapes, as there are but few fruits, if any, that will produce more fruit per square foot than grapes. Buy ten of these. **Each, 20c; 5 for 85c; 10 for \$1.65.**

MOORE EARLY—Similar to Concord, equally as hardy and at least ten days earlier. Very productive in rich soil. **Each, 20c; 10 for \$1.50; 50 for \$5.00.**

WORDEN—Larger than Concord and ten days earlier. Hardy, healthy, vigorous and productive. Large bunches, dark purplish-black. Especially good on account of its earliness. **Each 20c; 10 for \$1.50; 50 for \$5.00; 100 for \$8.75.**

for only 25c

BETA—A quality Grape for the North. Fast in growth and hardy. I have found Beta growing and producing heavily in **North Dakota** and over the line in **Canada**. The exact parentage of Beta is not known, but its quality and ability to bear under the most severe conditions, is **well known everywhere**. Pruned annually, like all commercial grapes, produces enormous quantities of fruit of very good quality—almost black, juicy, and good sized bunches. Grown as a vine over arbors or fences Beta often **makes a growth of 15 to 20 feet** in a single year. It is also productive as an Arbor (Grape) Vine. **Prices: Each 25c; 5 for \$1.00; 10 for \$1.75; 25 for \$3.95; 50 for \$7.25; 100 for \$13.00.**

NIAGARA White Grape

NIAGARA—A large juicy, yellow grape completely covered with a white bloom. Niagara is as hardy as Concord and a little earlier. The quality is excellent. The bunches are large and compact. Vines are vigorous, hardy and very productive. It is the only white grape for the North. If you want a good, high quality White Grape, plant Niagara this year. **Prices: Each, 20c; 5 for 85c; 10 for \$1.10; 25 for \$2.25; 50 for \$4.25; 100 for \$8.00.**

CONCORD GRAPE THE OLD STANDARD

CONCORD is a large, purplish-black grape of excellent quality and produces heavy annual crops. It is the standard market grape and has led **all** others for many years. Look in the fruit baskets in any fruit store of the country and in grape season, you will find Concords in more than half of them. In the vineyards of Michigan, New York, Ohio, Iowa, and Minnesota, Concord grapes have been producing profitable crops for over half a century. One of the hardest of the commercial grapes, Concords should thrive and produce for you. Plant at least **10**. If you want to get the greatest possible profit from the least possible land—Plant an Acre to Concord Grapes.

• HANSEN'S HARDY APRICOTS

12 NEW KINDS •

You like Apricots—just as you like Oranges—but you never expected to grow them north of Central Iowa. These Manchu Apricots were brought over by Prof. Hansen in 1924 from N. China where minimum temperature gets 50° F. below zero. They have fruited to his satisfaction and we are now offering You these NEW Prof. Hansen Manchu Apricots. There are

1. **MANCHU**—Large yellow fruit; heavy crop. Fresh fruit No. 1 in size and quality. Cooks up into pale yellow good quality sauce. Apparently the largest fruit in this lot of seedlings.
2. **MANDARIN**—Fruit large, rich yellow color; one of the best in quality, fresh or when cooked.
3. **CHOW**—Tree productive; fruit large, good eating. Sauce pale yellow of good quality.
4. **SING**—Tree productive, fruit large. Sauce good rich orange-yellow, flavor stronger than some of the others.
5. **NINGUTA**—Fruit large yellow with red blush. Crop very heavy. Season first week in August. Fresh fruit very mild, one of the mildest and best.
6. **TOLA**—Large, freestone. Makes excellent quality sauce. 1935 crop very heavy. One of the best. Season early.

Hansen's New Hardy Apricots

Twelve varieties—all good. While they last we offer them in good sized trees, running from 2 to 5 feet. First Come First Served.

PRICES

Each, 85c; 3 for \$2.40; 6 for \$4.50; 10 for \$7.00; One Each of the Twelve Varieties, \$7.80.

7. **ANDA**—Tree productive, freestone of good size. Season late. Stays firm in cooking, does not cook up. One of the very best in quality.
8. **ZUN**—Quality of fruit, nearly excellent. Pit small, round, freestone.
9. **SINO**—Heavy crop, fruit small. Excellent flavored sauce.
10. **LALIN**—Fruit large, yellow with red flush. Fresh fruit good quality. Tree, a heavy cropper. Season early.
11. **HULAN**—Very heavy crop of large fruit. Season early. Makes good flavored sauce.
12. **SANSIN**—Heavy crop of large fruit. Fresh fruit of excellent quality, making a rich orange-yellow sauce.

GURNEY'S NEW HARDY APRICOT—Originated in S. E. Minnesota. It is excellent in quality, of good size and hardy. 3-5 ft., 60c Ea.; 3 for \$1.70; 5 for \$2.50.

GOOSEBERRIES AND CURRANTS

GURNEY'S PIE AND JELLY SPECIAL

3 Carrie Gooseberry
1 Big Houghton Gooseberry
1 Oregon Champion Gooseberry
3 Perfection Currant
1 Cherry Currant
1 Red Lake Currant

TEN FOR ONLY \$1.95 POSTPAID

CARRIE GOOSEBERRY—A variety that should be included in every Gooseberry patch. At Yankton it has proved to be one of the very best varieties that we can grow. In size, quality, and productiveness it is unsurpassed.

Heavy plants.

Price: Each 25c; 5 for \$1.10; 10 for \$2.00; 50 for \$8.00; and 100 for \$15.00.

DOWNING GOOSEBERRY—Larger than the Carrie. Will not stand quite as much grief but is an excellent berry for Iowa, South Dakota, Nebraska and Minnesota or in localities where conditions are equally favorable. Very productive and profitable. 2 yr. 25c each; 10, \$2.00; 100, \$15.50.

OREGON CHAMPION GOOSEBERRY—Berries very large brownish-red color, very sweet and fine for table use and pies. Bush a strong grower, healthy, not very thorny and a very prolific bearer. One of the best berries for the market. Prices: 2 yr. Each, 25c; 10, \$2.25; 100, \$17.00.

HOUGHTON GOOSEBERRY—The Houghton is without doubt one of the best varieties of Gooseberries that we are growing for planting in the Northwest Section. A berry of medium size, pale red in color, sweet when thoroughly ripe. Heavy 2-year bushes, each, 20c; 5 for 90c; 10 for \$1.65; 50 for \$6.25; 100 for \$11.00.

Currants and Gooseberry plants may not be shipped into the following states because of Federal Quarantine: Maine, Rhode Island, New Hampshire, Michigan, Idaho, New York, Vermont, Massachusetts, Connecticut and Arkansas.

Minnesota Customers in Blister Rust Control Area Please Furnish Legal Description of land to be planted.

CURRENT PRICES

All but Perfection and Red Lake. Each 20c; 5 for 90c; 10 for \$1.60; 25 for \$3.50.

CHERRY—Very large; deep red; rather acid; bushes short, erect; stout, vigorous, productive.

FAY'S PROLIFIC—Leading market currant—large, beautiful red berries of superior flavor.

LONDON MARKET—Plant is extremely vigorous, with perfect foliage which it retains through the season; an enormous cropper. One of the best.

VICTORIA—Large; bright red; bunches extremely long; berries medium size, of excellent quality. Ripens late, making it one of the most valuable sorts. Hardy.

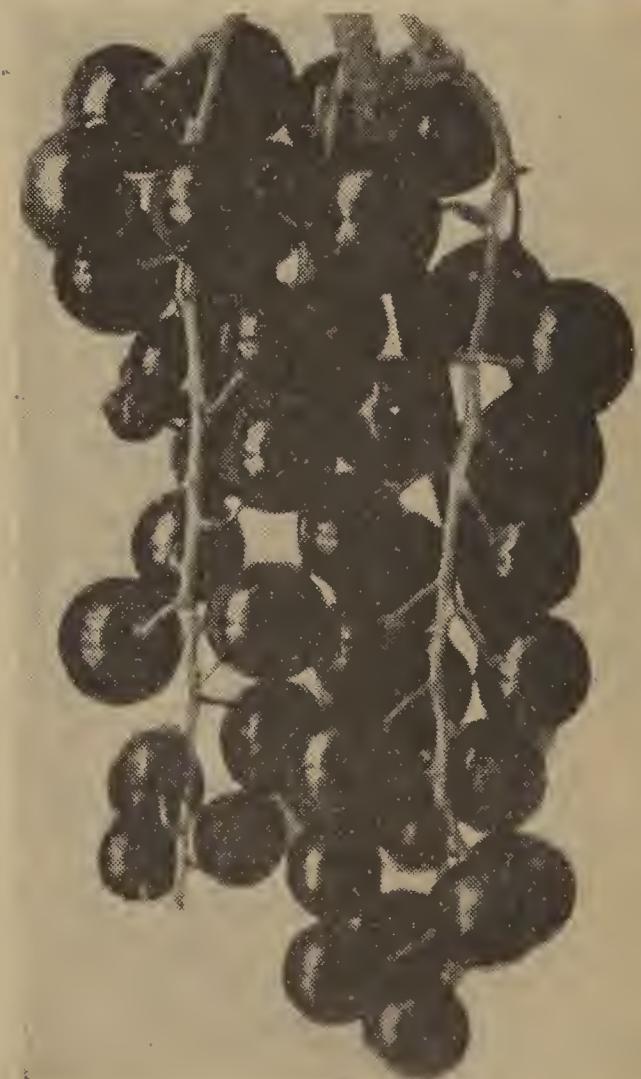

NEW RED LAKE CURRANT

A new and better Currant from Minnesota. The Currant you've been looking for. Large, a heavy producer. Long clusters of juicy berries that make up into beautiful sparkling, bright red jelly. Get in on the ground floor. Supply very limited so order early. Price Ea., 35c, 5 for \$1.50

5 Oregon Champion Gooseberry	ALL FOR
5 Cherry Currant	ONLY
1 Red Lake Currant	
10 Chief Red Raspberry	\$2.65
10 Cumberland Black	

FOR JAMS—JELLIES PIES AND SAUCE

PERFECTION CURRANT—The Perfection Currant gives you a berry that is probably twice the size of the other Currants and in most years will produce twice the crop. We have picked berries in our nursery here that were nearly as large as the Early Richmond Cherry, and in very large clusters.

Price: Each, 25c; 5 for \$1.00; 10 for \$1.75; 25 for \$4.00; 50 for \$7.50.

GURNEY'S STRAWBERRIES GROW

EVERBEARING STRAWBERRIES
BIG SCARLET GEM

PICKED SEPT. 9th

GURNEY'S
EVERBEARING
STRAWBERRIES

BEAR FRUIT
THE FIRST YEAR

THE NEW SCARLET GEM
Has Everything

SIZE—

Gem berries average above the ordinary in size and don't "run small and buttony." Even during an unfavorable summer, Gem berries continued large and fresh—a remarkable important characteristic for an everbearing strawberry and the berries continue to form large up to cold, freezing weather in the fall.

FLAVOR—

No one can find fault with a Gem flavor. They are as sweet and highly flavored as berries of the mother variety, the Progressive. They are just chock full of strawberry sweetness. You don't need much sugar when you eat Gem berries.

FIRMNESS—

Gem is the firmest everbearer grown. This is evidently due to the tough skin of the berry, as well as its extra firm flesh. The originator states that Gem "could be rolled to market and back and still be sold." Even during the hot summer Gem Berries "hold up" in color and firmness. A quart or crate of Gem berries never "leaks" no matter how far it is hauled.

THE FAIRFAX

This new variety had its origin about 1930 and has been growing in popularity ever since. It is a heavy producer of excellent quality berries. The flower stalks are strong and upstanding. It probably produces more fruit per plant than any other of the June-bearing varieties. Its bright red color and uniform shape makes it a mighty good commercial variety. It has a handsome appearance and stands long distance shipments. You should try out at least a hundred of the Fairfax and the Dorsett.

THE DORSETT

This is a new June-bearing variety introduced in 1932. It has the unusual characteristic of holding most of its fruit off the ground. The color of the fruit is a very bright red and it does not become dark when overripe. The flesh is pinkish-red and quite firm.

The Dorsett Strawberry is described as to flavor as "mildly subacid." It is in other words, of excellent quality and we recommend the Dorsett to you as one of the best of the June-bearing varieties.

EVERYBODY LIKES RED RASPBERRIES

You can always find room for at least 10. Many of you can use 1000 plants and show a real profit from them.

The Famous Chief

CHIEF RASPBERRY

A Minnesota introduction that is very popular among the fruit growers due to the fact that it ripens its fruit a week earlier than the Latham. Is unusually hardy. Plants free from disease. Of high quality.

On account of this being an early bearer it usually produces a good crop before dry weather sets in and on that account is one of the best raspberries for planting in practically all sections.

The Chief is well named. It may have started out as just another red Raspberry, but it was not long before commercial growers found it to be a real Chief among raspberries.

You should plant at least 100 **Strong No. 1 Plants.**

CUMBERLAND—The Cumberland is the leading Black Raspberry in the U. S. It is true that it is one of the older varieties, but one that produces a very good crop and one that has proved itself to be really good. The finest in flavor and shipping qualities and makes an ideal market variety. (See inside back cover for colored picture.)

Price: Per 10, 60c; 25, \$1.00; 100, \$3.00; 500, \$13.00; 1,000, \$25.00.

Gurney's FLAMING GIANT Raspberry

Hardy anywhere—Excellent in quality—Bright Red—Flaming Giant is THE RED RASPBERRY for the Central Northwest.

This wonderful Raspberry was produced by Prof. N. E. Hansen of Brookings, S. D., and has the hardiness of the Wild Raspberry of N. E. No. Dakota. He called it "Ohta" meaning "Much" in the Sioux Language, but that does not tell half the story. It lives through winters that

kill others. It holds up under hot winds. It bears large bright red berries, firm and of excellent quality.

Prof. Hansen says "The berries run about 16 to the ounce with only fair cultivation on open exposed upland prairie. **The plants are hardy without winter protection."

For Profits from your land—Plant An Acre to Flaming Giant Red Raspberries

ALFRED BLACKBERRY

Big Juicy Early Berry

Alfred produces big, beautiful, glistening-black berries, measuring 1 1/2 inches long and an inch in diameter. Almost free from seeds and core. The flavor is wild and rich. The fanciest dessert Blackberries to serve fresh, canned or in pies. Make snappy juices and jam.

Plants are healthy, fast-growers, young-bearers, and heavy-yielders. Succeed on all soils and withstand winter temperature of 30 degrees below zero. You'll never know how good blackberries can be until you grow Alfred yourself!

Per 10, 65c; 25, \$1.25; 100, \$4.50; 500, \$17.00.

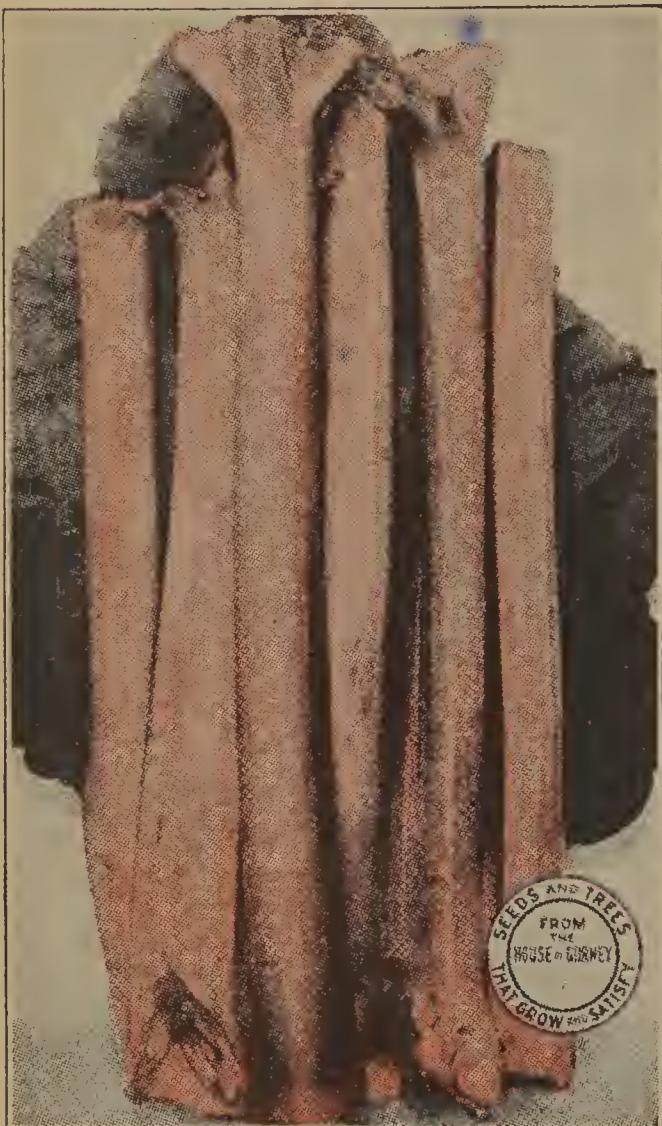

LUCRETIA DEWBERRY

This is a creeping plant and will often grow as much as fifteen feet in one season. The vines should be trimmed back to about three feet for best results. The fruit is about three times the size of the Blackberry, very sweet. Prices: 5 for 40c; 10, 60c; 25, \$1.00; 100, \$3.00.

PLANT A PERENNIAL VEGETABLE GARDEN

THE FINEST PLANTS WE HAVE EVER GROWN RHUBARB—ASPARAGUS—HORSERADISH

THE NEW FLARE Redder—Juicier—Tender

Flare Rhubarb

FLARE RHUBARB

Red from top to bottom—Juicy all the way through—Crisp and tender—Flare Rhubarb is beyond question the best we have found so far. It grows vigorously, sending out husky, big, red stalks in large numbers. The flavor and quality will make the best Pies and Sauce you ever ate. Don't miss getting a good start with this finest of all Pie Plants.

Special Low Prices on NEW FLARE RHUBARB—10 for \$1.10; 25 for \$2.50; 50 for \$4.75; 100 for \$8.75.

GIANT VICTORIAN RHUBARB

We have grown Giant Victorian Rhubarb for many years. It is undoubtedly one of the best for it produces large stalks and plenty of them. We have eaten lots of juicy sauce and delicious Rhubarb Pies made from the Victorian and consider it "Hard to Beat." A heavy Producer of a quality product—Giant Victorian Rhubarb—You should plant plenty. PRICES: 10 for \$1.00; 25 for \$2.20; 50 for \$4.20; 100 for \$7.00.

ASPARAGUS THE MARKET GARDENERS CHOICE

MARY WASHINGTON RUST PROOF

Bigger and better each year, Mary Washington is the Market Gardener's Choice. Its comparative freedom from rust is a decided advantage. You get lots of good clean stalks, tender and attractive. You can sell all you can raise. Order a thousand roots.

A HEALTHFUL AND DELICIOUS VEGETABLE

"There is nothing new under the Sun" so far as we have been able to find, that can take Mary Washington Asparagus out of its **First Place**, as the best in production and quality and at the same time—best in **Rust Resistance**. Whether you plant a small garden of 50 or 100, or a **Market Garden** of thousands, **Mary Washington** is **Your Choice**. Plant them deep. Plant them well. Fertilize, and harvest quantities of tender quality Asparagus from Gurney's "Mary Washington" Asparagus.

HORSE RADISH

NEW BOHEMIAN

This horseradish is perfectly hardy anywhere. Is a very desirable article as a relish. Its roots are dug in early spring, grated fine, vinegar added, and it is ready for use. For planting and care, first plant the roots about two inches deep in a desirable location where they can be left permanently. Give them good cultivation. They are much earlier, and produce better than the ordi-

nary sort. Roots grow larger, are whiter, and quality is far superior. All who grow horseradish should use this variety; we have discarded the old standard kind, as New Bohemian will outyield and is much more satisfactory in every way. **HEAVY CROWNS 5 for 60c; per 10, \$1.00; 25, \$2.25.**

Cuttings, \$1.00 per 50.

BASSWOOD or LINDEN—I have seen Basswood growing in Manitoba, Canada, perfectly hardy and in full, healthy foliage. In my opinion, there is not a more beautiful shade tree. Fairly fast in growth, it's perfectly rounded form and dense foliage makes it Extra desirable for shade and street planting. Heavy Transplanted Trees. Size 4-5 ft. Each \$1.00; 5-6 ft. Each \$1.25.

BOX ELDER—The Ash-Leaved Maple. Rapid in growth, heavy foliage, it makes a good QUICK Shade Tree. For windbreak, Box Elder has its place and gives results about as quickly as a Cottonwood. For the Grove, it provides firewood as quickly as any tree that grows. Put at least two rows in your windbreak.

BIRCH—Cut-Leaf Weeping—One of America's most beautiful trees and one that is most planted of all Weeping Trees. A tall, fairly slender grower, with an erect slender trunk, somewhat pyramidal in shape with graceful, drooping branches and glistening silvery-white bark. The foliage is deeply and delicately cut, thin, and of a beautiful shade of green. The whole tree, itself, is a wonderful sight and if you have room for one Weeping Tree, this is the one that you should plant. Give it plenty of cultivation and it should do fine for you.

RUSSIAN OLIVE TREE

WINDBREAK—HEDGE—ORNAMENTAL

The Russian Olive grows to a height of 30 feet branching close to the ground with a very full foliage. Spaced three feet apart in the row, this tree spreads to make a solid wall of *silvery-green foliage*. It is a native of the Prairies of Northern Siberia and Manchuria. Drouth is common in the land of the Russian Olive, but under the most adverse conditions of soil and climate, it continues to thrive and serve.

Cut back after five years, it grows so thick that a jack rabbit cannot get through.

AS A HEDGE, Russian Olive has everything, compact growth, beauty of foliage, and is perfectly hardy.

AS A SPECIMEN TREE, Russian Olive can be trained to any form desired, reaches a height of 30 feet and has striking silvery foliage.

When in Doubt—Plant Russian Olive

GURNEY'S WEEPING TREES

WEEPING MULBERRY is a most beautiful tree with its long, lithe pendants sweeping the ground. This is especially valuable to plant on lawns where you do not wish to obstruct the view from the windows to the streets or roads. It produces an umbrella-shaped head, never growing above eight or ten feet high. Beautiful glossy, dark green leaves. \$2.50 Each; \$4.75 per pair; headed, about 6 ft. high.

THURLOW'S GOLDEN WEEPING WILLOW—A Fountain of green leaves and yellow branches. A tree for joy—not sorrow. A vigorous, hardy, fast growing tree with graceful, drooping branches. Beautiful, wide spreading, long lived.

Size	Each	Per 10	Per 100	Per 1000
3-4 ft.		.45c	\$2.00	
4-6 ft.		.65c	3.00	

GURNEY'S GOLDEN WILLOW—Very beautiful golden branches. Does well in low locations. Half an acre of these trees cut to the ground every few years will keep an ordinary family in fuel.

Size	Each	Per 10	Per 100	Per 1000
1 1/2-3 ft.	12c	\$0.65	\$3.00	\$25.00

Gurney's Trappers Guide. Send for your Copy. It's FREE.

NIOBE WEEPING WILLOW. This is the grandest of all of the weeping trees. It is a rapid grower and will grow on almost any quality of ground. With the lightest breeze the whole tree is in motion. The bark of the tree is golden yellow, the underside of the leaves silver, and the top of the leaves a glossy dark green. This is an especially valuable tree for hedges, single specimen and cemeteries.

WILLOWS

LAUREL LEAF. This is a beautiful medium height tree with glossy, leathery foliage. They do well on high dry ground, and will stand drought.

IDAHO BLACK LOCUST

Fragrant Flowers and Vigorous Growth

The seed was gathered in the mountainous regions of Northern Idaho. They are remarkably fast in growth and much hardier than ordinary Black Locust. Many of our one year seedlings are over four feet high. For fence posts, the Black Locust leads everywhere. For holding the soil on a hillside it's one of the best. For vigorous growth in the Windbreak you will want **Gurney's Idaho Black Locust Seedlings**.

GURNEY'S TREES

POPLARS

CAROLINA AND NORWAY POPLAR. We grow thousands of these each year, and they are known as the "Sudden Saw Log." A one-year-old tree, grown from a cutting, has been known to grow 12 feet high in one season. No other tree will produce this growth. Very hardy and, unlike the cottonwood, never bears cottonlike seed. Either variety.

Size	Per 10	Per 100	Per 500	Per 1000
2-4 ft.	\$0.75	\$4.00	\$13.00	\$20.00

THE

"WONDER TREE"

LOWEST PRICES

SIBERIAN ELM

PROTECT YOUR LIVESTOCK AND YOUR HOME

It took us some years to find out that "Pigs are not always Pigs." I refer, of course, to the Chinese Elm. When we first started to grow them, the seed came from the Orient. The trees grew well, but only a part of them "Wintered." Why? Why were some hardy and others **not?** The answer was that the seed was not All Northern Grown.

NOW—ALL OF GURNEY'S SIBERIAN TYPE CHINESE ELM are grown from trees that have **lived through** the most severe winters the Middle Northwest has ever experienced, **and survived** the Hot, Dry Years. We now **KNOW!**

Gurney's Siberian Elm Are Hardy and Drouth Resistant.
Plant That Shelterbelt Now—Get a Thousand Siberian Type Chinese Elm

You plant 1000 Chinese Elm 18 to 24 inch costing \$9.85. In our nurseries these trees would grow into 4 to 5 foot transplants with a Value of \$240.00. THAT IS A REAL INVESTMENT.

A HEDGE PLANT

Siberian Elm make a really wonderful Hedge. It has everything you desire—Compact growth—Heavy foliage—Stands clipping well—Branches from the ground—And **makes a Good Hedge the First Year.** Plant them one foot apart.

Get a hundred foot Hedge started this spring by ordering 100 Siberian Elm, 2 to 3 foot Seedlings at \$2.50.

GURNEY'S HYBRID SIBERIAN ELM GRAFTED SPECIMENS

In these trees it seems that Nature has accomplished what is practically impossible to science. From the seed of the Siberian Elm, in 1934, we grew a tree that has all the appearance of the American Elm. Its leaves are four times as large as the Chinese Elm; they are rough where the Siberian is smooth. The form of growth is like the American Elm, **BUT**—Its **Speed of Growth** is distinctly **Siberian.**

A Large Colorado Blue Spruce
Balled and Burlapped—Ready for Shipment

GURNEY'S SELECTED SHINERS

COLORADO BLUE SPRUCE—The more I see the Colorado Blue Spruce, the better I think of it. I see them glistening in the sunlight like jewels among the green evergreens of our nursery, and throughout the dry, hot years, they have grown and survived without injury. These Selected Shiners will add much to the beauty of your home.

GURNEY'S COLORADO GREEN SPRUCE
We accumulate, here in our large nurseries, over a series of propagations, a lot of the "Green Type" Colorado Spruce. These trees have the same formality, same symmetrical growth, and are identical to the "Colorado Blue Spruce" and "Shiner" in every way, except in color. These are a beautiful green color, but they are not worth quite as much as the Blue Type. We are offering these trees to you, this year, as long as they last, at a very low price. We feel that you should have some of these and, therefore, are putting them in at a price that will permit their being used for windbreak planting.

Size	Each	Per 10

EVERGREENS
*have withstood
the drought*

ALL PRICES ARE QUOTED

B. B. or P. I. P.

The B. B. stands for "Balled and Burlapped." The tree is dug and the soil around the roots confined in burlap. It insures live delivery but transportation is high because Soil is heavy.

"P.I.P." means "Packed In Peat." We have a new machine that packs Peat Soil Tightly around the Muddled Roots. Peat holds **seven times** its bulk in moisture and weighs about **HALF** as much as soil. We have had trees "Packed in Peat" standing for **two months** without injury.

Save Half your Transportation by Ordering **PACKED IN PEAT** Evergreens.

For Evergreens with **Muddled Roots** deduct **15%** from regular prices.

BLACK HILLS SPRUCE

What made the Indians call the mountains of South Dakota "Paha Sapa" or Black Hills? It was none other than this beautiful Spruce tree that imprisons the shadows and from a distance, gives the Hills a black shade. But the Black Hills Spruce is not black as an individual. Its new growth is **Silvery** and is therefore also called the **White Spruce**, variety Albertiana. Don't forget that last name. It speaks for hardiness, and compact growth that makes this Spruce one of the **most Beautiful** for Landscape Planting.

The Black Hills Spruce

PINES

Black Hills (Bull) Pine

BULL or PONDEROSA—Native of Black Hills. Heavy, massive needles from 6 to 10 inches long of deep green color on the surface and bluish-white underneath. It is an extremely handsome ornamental tree, very drought-resistant, and hardy. Grows tall and upright, of well rounded pyramidal shape. A very desirable evergreen for western planting.

SCOTCH PINE—The Scotch Pine is a very satisfactory tree for groves and windbreaks. Also, has its place in landscaping as it makes a fine ornamental tree, very rapid in growth, perfectly hardy, and does exceptionally well in South Dakota and also points south and southeast. Transplants more readily than other Pine. (Sizes **3 to 4 ft. and up.**)

JACK PINE—Grows nearly as fast as the cottonwood, and gives you better service. This, in my opinion, is the most desirable of all evergreens for quick windbreaks; easily transplanted, growing in any kind of soil; holds its color and foliage all winter, making an excellent windbreak or shelterbelt almost from the first year.

Write for prices on larger sized Pines from 6 to 10 feet tall.

GURNEY'S JUNIPERS

GURNEY'S SILVER JUNIPER

I have tried almost every kind of tree and shrub in front of my house. Today you will find the foundation planted with Silver Cedar. I'm satisfied that I have the most attractive planting I have ever had, and at the same time, one that will last. These Silver Cedars have proved they can stand up under the blasting heat of summer and the most severe cold of winter.

The Silver Cedar is really an Aristocrat among evergreens. One on each side of the entrance of your home will add greatly to its value and beauty. They are compact in growth and can be had either Natural or Sheared. Get a Pair for your Home this spring.

BROAD or NARROW

RED CEDAR

This tree is so well known that it needs no description. It is attractive either natural or sheared. It is used for hedge, windbreak, or grove, grows easily and is absolutely Iron Clad in hardiness. It is a native of the driest parts of the Middle Northwest and has survived where all other trees have died. Plant them extensively.

SEEDLING EVERGREENS

We are again offering Seedling Evergreens due to the splendid results that many of our customers in the past have had in starting these little trees. Plant these where they can have good care, shading them with lath frame or brush so that they get about half of the sunlight. Keep well cultivated. Grow them in a frame or bed for one or two years then plant in their permanent location.

CHOICE ORNAMENTAL SHADE TREES

THE MAPLES

NORWAY MAPLE—One of the most beautiful and desirable trees known. Of large size, perfect outline, with deep green foliage, which turns to a pale yellow in autumn. Desirable trees for street, park and garden. They grow faster than Hard Maple and do better here in Yankton. The leaves in the spring first appear red, later turning green.

Each Per 2 Per 5
5-6 ft. 85c \$1.60 \$3.75

COLOR COLLECTION

1 Mountain Ash, 5-6 ft.
1 Schwedleri's Maple, 5-6 ft.
1 Ginnala Maple, 2-3 ft.
1 Norway Maple, 5-6 ft.
1 Chinese Tree of Heaven, 4-5 ft.

ALL FOR \$3.50

FREE: 1 Spirea Van Houttei,
18-24 in.

PURPLE LEAF NORWAY (Schwedleri)—The Purple Norway Maple's beautiful leaves are attractive at all seasons but are especially fine in spring when the gleaming purple and red leaves contrast brightly with the green of other trees. They turn purplish-green in midsummer and golden yellow in the fall.

Each Per 2 Per 5
5-6 ft. \$1.10 \$2.00 \$4.50

SILVER-LEAF SOFT MAPLE (Acer Dasypodum)—This is one of the rapid growing street trees. In towns it is one of the good shade trees and good street trees. If planted in groves in the country it does remarkably well and should be on every farm. Do not confuse this with the Silver Leaved Poplar.

RED BERRIED MOUNTAIN ASH

Hardy tree; head dense and regular, beautiful fern-like green foliage; covered from July till winter with clusters of bright red berries. The combination of foliage and clustered fruits makes this one of the most striking and beautiful trees that grow.

Each Per 2 Per 5
5-6 ft. \$1.15 \$2.25 \$5.25

Berries of Mountain Ash

UMBRELLA CATALPA—*Catalpa Bungei*—Makes a perfect umbrella shaped head without pruning. This is a perfectly hardy variety and is suitable for any section of the country south of Sioux Falls, South Dakota.

Plant a pair of them, one on either side of the steps or front walk.

6-7 ft., 3 yr. head, \$1.20 Ea.; \$2.25 Per Pair.

KENTUCKY COFFEE TREE—A perfectly hardy tree, medium rapid in growth, attaining a height up to 100 feet. Pods often ten inches long cling to trees throughout the winter. Leaves similar to the Black Walnut. Easily transplanted.

Size	Each	Per 5	Per 10
18-24 in.	20c	\$0.75	\$1.25
2-3 ft.	25c	1.00	1.75

TREE OF HEAVEN—*Chinese (Ailanthus)*—A beautiful tree that is a very rapid grower. The foliage is a rich green, very much resembling the leaf arrangement of the Black Walnut. It is used very extensively in some cities because it resists smoke better than many other trees and is not attacked by insects. If plants are cut back to the ground after they have become established they will throw up strong shoots and make an excellent screen.

Cut Leaf Wpg. Birch—Page 61

GURNEY'S ARISTOCRATS • LAWN FLOWERING TREES

HOPA BRIGHT RED CRAB—This aristocrat of the Crab family has rare beauty as an ornamental lawn tree. The wood is red, the inner bark brighter red, the new leaves red, and the flowers—which appear in immense clusters and mass over the entire tree—are a bright red, followed by the little crab apples—red from the time they start. The matured fruit is red to the core.

Size	Each	Per 5	Per 10
3-4 ft.	60c	\$2.75	\$5.00
4-5 ft.	65c	3.00	5.75
5-6 ft.	75c	3.50	6.50

FLOWERING CHERRY—*Nanking (Prunus Tomentosa)*. The fruit is edible, but **you** will get more joy from its flowers. Bushy in growth, it opens its pure white flowers with the leaves and scatters them like snowflakes along the branches. It is extremely hardy. Add to that, the ruby-like fruits and you have a plant of rare beauty. Plant this **Nanking Cherry** this year.

CLIMBING VINES

TRUMPET VINE

A Hardy Vigorous fast growing Flowering Vine. Its Orange Red Clusters of Trumpet shaped Flowers give a glow of color that is hard to get with any other Vine. Remember—Trumpet Vine is Hardy, Woody, Permanent, fast growing and "A THING OF BEAUTY". Plant several.

Prices Ea. 30c, 5 for \$1.45, 10 for \$2.70.

KUDZU VINE—(*Pueraria Thunbergiana*.) Large foliage and dense shade, growing 50 feet in one season. Flowers plentiful in August; rosy-purple, pea-shaped. Ea., 30c; 5 for \$1.25.

ENGELMAN'S IVY—*Ampelopsis Engelmani*—A type of the Virginia Creeper, but different in growth as well as foliage. It has much shorter joints, and very much smaller and thicker foliage. This is the only hardy Ampelopsis that will cling to brick, stone or plaster. It is a fast grower. Each, 25c; 5, \$1.00.

VIRGINIA CREEPER—*Ampelopsis Quinquefolia*—Deeply cut leaves which turn to a beautiful crimson in fall; fine for covering trees, rocky slopes, etc. Very hardy. Each, 25c; 5 for \$1.00.

SILVER LACE VINE—*Polygonum Auberti*. This is the finest addition to our list of practical hardy vines, a quick-growing type of twining habit averaging 25 feet in a season. The small, cordate foliage is fresh and shiny, although the base of stalk becomes somewhat woody. Produces an extravagance of large, foamy flower sprays in silvery white, from late summer into the fall.

45c each; 3 for \$1.25. 5 for \$1.95

SEE PICTURE BELOW

Silver Lace Vine

A Vine Covered Arbor, leading to a Perennial Garden—That's Home

HONEYSUCKLE VINES

HONEYSUCKLE (*Hallicana*)—Color, an intermingling of white and yellow, extremely fragrant and most satisfactory. Each, 25c; 5, \$1.00.

HONEYSUCKLE (Scarlet and Yellow Climbing)—Very hardy producing large quantities of long, trumpet-shaped flowers; heavy, glossy leaves. Each, 30c; 5, \$1.25.

WILD GRAPE—The best Grape for covering porches, summer houses, and arbors. Each, 25c; 10, \$2.00.

BETA GRAPE—A rapid grower, is very popular for covering walls, summer houses and porches; hardy. Each, 25c; 5, \$1.00.

WISTERIA

WISTERIA, PURPLE—This variety bears in great profusion large clusters of pea-shaped flowers, blooms in May and June. Hardy in sheltered locations. Each, 40c; 5, \$1.75.

New Magnifica Honeysuckle

LONICERA SEMPERVIRENS MAGNIFICA

—We are offering you another New Honeysuckle this year—a Variety that we believe has almost reached perfection.

EVERBLOOMING, starting early in the summer and continues blooming until late fall; large flowers in long spikes.

The color, a beautiful coral-orange; a color that we believe has never been produced before in a Hardy, Everblooming Vine. **Heavy field grown vines at only 40c Each; 2 for 75c; 5 for \$1.50.**

SUNSET HONEYSUCKLE—The best everblooming vine. In bloom constantly from early summer until killing frost; showy flowers, 1½ to 2 inches long in spikes. Before opening, they appear to be somewhat purple, but gradually change to bright red outside and the outward curving petals show the bright yellow of the inside. Delightfully fragrant. Can be trimmed to make a compact shrub; also useful as a ground cover and for covering trellises, arbors, etc. Each 40c; 5 for \$1.50.

GURNEY'S COLLECTION OF HARDY CLIMBERS

- 2 Trumpet Vine

GURNEY'S FLOWERING SHRUBS

GURNEY'S LARGE DOUBLE FLOWERING

PINK ALMOND—A very beautiful and graceful shrub of medium height. It is covered with very double pink flowers in early Spring before other shrubs have budded and is exceedingly attractive. It is hardy, and is becoming more popular each year.

2-3 ft., 45c Ea.; 3 for \$1.20; 5 for \$1.75
3-4 ft., 50c Ea.; 3 for \$1.40; 5 for \$2.25

BARBERRY

THUNBERGI—GREEN LEAF—Handsome foliage of bright green oval shaped leaves which turn to the most brilliant shades of coppery red and orange in autumn. The slender, graceful little branches are lined with small scarlet berries which hang on well into winter.

6-12 in., 18c Ea.; 5 for 75c; 10 for \$1.25;
50 for \$5.00.
12-18 in., 25c Ea.; 5 for \$1.00; 10 for \$1.75;
50 for \$8.00.

NEW RED LEAVED BARBERRY—An exact reproduction of Thunbergi in every way—habit, leaf-formation and fruiting, but—whereas the original is a deep green from spring until fall, this variety starts off in its first foliage a warm bronzy red; the heat of summer intensifying its red brilliancy; autumn adding other tints to its richness. The abundant scarlet berries persist throughout winter along the spiny twigs. A sunny exposure is necessary to bring out and retain its full red color.

12-18 in., 30c Ea.; 5 for \$1.40; 10 for \$2.65;
50 for \$12.50.
18-24 in., 40c Ea.; 5 for \$1.90; 10 for \$3.65;
50 for \$17.50.

BUCKTHORN—Perfectly hardy and very ornamental. Makes fine ornamental hedges. Can be trimmed to any desired shape. Plant 9 inches apart.

CARAGANA OR SIBERIAN PEA TREE is one of the most attractive tall shrubs. Its leaves are pea-green and when they come out in the spring, look as though they were in bloom. Very upright in growth, bearing yellow flowers.

The Caragana should be in every shrub planting. Perfectly hardy. As a hedge it may be clipped and kept as low as two feet.

Japanese Barberry (See Red Leaved Barberry)

BUTTERFLY BUSH "Summer Lilac"—This shrub will mature to full size the first summer. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently 10 inches long. A single plant the first season throws out as many as 50 flower spikes. 35c Ea.; 3 for \$1.00; 5 for \$1.50; 10 for \$2.75.

CURRENT—ROCKY MOUNTAIN ALPINE—This shrub is nearly evergreen, of fine form and does well in any location. We recommend it especially for those shady places where ordinary shrubs do not thrive. The foliage is glossy, fine cut and very dense. White flowers are followed by crimson berries. An exceptionally fine hedge plant for the North. Extremely hardy.
12-18 in., 35c Ea.; 5 for \$1.50; 10 for \$2.75

DOGWOOD

BRIGHT RED—SIBERIAN—A beauty for color in summer and winter.

RED OSIER—Dark Red—6 to 10 ft. tall. Early white flowers followed by blue berries in the fall. Bright golden bark in fall and winter—Wonderful contrasts.

PRICE OF DOGWOOD

12-18 in.,	20c Ea.; 5 for \$0.90; 10 for \$1.75
18-24 in.,	25c Ea.; 5 for \$1.10; 10 for \$2.00

Golden Elder

BRIGHT GOLDEN BELL (Forsythia Fortunei)—Few, if any, of the spring flowering hardy shrubs can surpass this slender and brilliant flowering shrub. It is upright in growth; foliage rich, dark green; flowers brilliant golden yellow which open in very early spring before the shrub leafs out. Heavy Bushes.

1-2 ft., 25c Ea.; 3 for 70c; 5 for \$1.00
2-3 ft., 30c Ea.; 3 for 80c; 5 for \$1.25

Golden Bell

ELDER (Sambucus)

AMERICAN COMMON—Makes a bush six feet high, foliage bright green, blossoms in June and July with delicate white fragrant flowers in dense masses, followed by black edible berries much prized for wine and pastry. An ornamental plant throughout the season. They may be used as a hedge. Should be planted two to three feet apart. Heavy.

CUT LEAF ELDER—Like American elder. Fernlike leaves.

GOLDEN ELDER—Like American with Golden Yellow Leaves.

RED-BERRIED ELDER—Same as Common Elder except the berries are red.

ELDER PRICES
2-4 ft., 35c Ea.; 5 for \$1.35; 10 for \$2.50

A Hedge of Siberian Elm clipped to 3 feet gives quick beauty and privacy. 100 seedlings, 18-24 in., 1 yr. Only \$1.75.

HEDGES - SHRUB GROUPS

WAFFER ASH or HOP TREE—Small trees 15 to 20 feet high, with glossy trifoliate leaves that exhale a hop-like odor when bruised. This odor is more noticeable in the seeds, which hang in hop-like light green clusters far into autumn. Very hardy.

Size	Each	Per 5	Per 10
18-24 in.	20c	\$0.90	\$1.50
2-3 ft.	25c	1.00	1.75
3-5 ft.	35c	1.50	2.75

BUSH HONEYSUCKLE—Tartarian or Upright—Its glossy, leathery foliage comes very early in the spring ahead of other hedge plants and lasts well into the fall. Its grayish-white wood is beautiful at all seasons of the year. Its ability to stand heavy trimming makes it one of the most beautiful specimen plants. Its fragrance fills the air for long distances when in bloom. A Fine Hedge Plant.

Size	Each	Per 5	Per 50	Per 100
18-24 in.	20c	\$0.90	\$7.50	\$13.75
2-3 ft.	25c	1.00	8.75	16.75
3-4 ft.	35c	1.60	11.25	20.75
4-5 ft.	40c	1.85	16.25	30.75

MORROW'S DWARF HONEYSUCKLE—A medium sized honeysuckle, wide-spread branches; leaves a downy gray underneath; flowers white, changing to yellow; red berries.

Size	Each	Per 5	Per 10
18-24 in.	25c	\$1.00	\$1.85
2-3 ft.	30c	1.35	2.50
3-5 ft.	35c	1.65	3.00

HYDRANGEA (Paniculata Grandiflora)—Your home grounds can hardly do without a group of these plants. The flowers open up on the first of August and last well into the winter. We have flowers in our nurseries measuring better than 12 inches long and $9\frac{1}{2}$ inches through. They are hardy here at Yankton.

Size	Each	Per 5	Per 10
12-24 in.	40c	\$1.75	\$3.25

SNOWBALL HYDRANGEA (Hydrangea Arborescens)—This magnificent perfectly hardy shrub has snow-white blossoms. One of its most valuable characteristics is its coming into bloom just after the passing of all early spring-blooming shrubs. This does better planted in partially shady places.

Size	Each	Per 5	Per 10
18-24 in.	40c	\$1.75	\$3.25

GURNEY'S LARGE SCARLET FLOWERING JAPAN QUINCE—One of the best flowering shrubs; flowers a bright scarlet crimson borne in great profusion in early spring; foliage retains its color of bright glossy green the entire summer; hardy; make good hedge plants.

12-18 inch, 25c each; 3 for 70c; 5 for \$1.10.

PURPLE LEAF PLUM

(Cistena)—One of Prof. Hansen's hardy shrubs that has the bright colored leaves the entire season. They are used extensively in landscape planting and will lend color to any grouping. The leaves are a bright purplish red.

Size	Each	Per 5	Per 10
2-3 ft.	45c	\$2.10	\$4.00
3-4 ft.	55c	2.60	5.00
4-6 ft.	65c	3.10	6.00

FRENCH LILACS

These Lilacs are perfectly hardy and do not sucker or throw sprouts from the roots.

MARIE LeGRAYE—Single, pure creamy white.

PRESIDENT GREVY—Double, light blue.

SOUVENIR DeLUDWIG SPAETH—This is one of the prettiest Lilacs that grows. Flowers dark purplish-red. Extra large.

YOUR CHOICE: Heavy 2 yr. old, 1 $\frac{1}{2}$ -2 ft. Ea. 50c; 5 for \$2.00.

GURNEY'S LILACS

"IT'S LILAC TIME" AGAIN—THE LOVELIEST TIME OF ALL THE YEAR

COMMON PURPLE OR COMMON WHITE LILAC

Is perfectly hardy, makes a dense growth from 6 to 10 feet high, flowers fragrant; often used for hedge purposes.

Size	Each	Per 5	Per 10	Per 50
12-18 in.	15c	\$0.65	\$1.10	\$5.00
18-24 in.	20c	.90	1.70	7.50
2-3 ft.	25c	1.15	2.00	9.00
3-4 ft.	30c	1.35	2.50	11.00

PERSIAN PURPLE—6 to 8 ft. high, with slender upright branches, foliage rich green; blossoms in late spring with pale lilac colored flowers. Very fragrant.

Size	Each	Per 5	Per 10
18-24 in.	25c	\$1.05	\$2.00
2-3 ft.	35c	1.50	2.75
3-4 ft.	40c	1.85	3.50
4-5 ft.	45c	2.15	4.00

JOSIKEA (Hungarian Lilac)—A fine, distinct species of tree-like growth with dark shining leaves. Purple flowers in June after other lilacs have ceased flowering.

Size	Each	Per 5	Per 10
18-24 in.	45c	\$2.00	\$3.50
2-3 ft.	50c	2.25	4.00

VILLOSA LILAC—A late lilac of compact growth, pale rosy lilac flowers in June. Loose panicles of light lavender. Very prolific. Blooms second year after planting—Unusual for a lilac.

Size	Each	Per 5	Per 10
3-4 ft.	30c	1.25	2.25

PRIVET (Amur River North)—Foliage glossy green, holds its color well into late fall. Will stand shearing to any extent. A strictly first class ornamental hedge plant. Plant, 10 inches apart.

Size	Each	Per 5	Per 10
12-18 inch	10 for 90c; 25 for \$2.00; 50 for \$3.50; 100 for \$6.00.		

SNOWBALLS

COMMON SNOWBALL (Viburnum Sterilis)—Hardy, attains a height of 3 to 10 feet. Is filled with white balls of bloom in the last part of May.

Size	Each	Per 5	Per 10
18-24 in.	40c	\$1.90	\$3.50
2-3 ft.	55c	2.65	5.00

Highbush Cranberry (Viburnum Opulus)—8 to 10 feet. Handsome, dense, brilliant, green foliage, a rich setting of large bunches of crimson berries which enliven the late summer and remain on bare branches into winter.

Size	Each	Per 5	Per 10
18-24 in.	35c	\$1.70	\$3.00

WEIGELA ROSEA—Inch-wide rose-colored bells cluster thickly along stems in May and June. Very graceful shrub, with lovely green leaves. Grows 5 ft. tall.

Size	Each	Per 5	Per 10
12-18 in.	30c	\$1.35	\$2.50
18-24 in.	35c	1.65	3.00

EUONYMUS ATROPURPUREUS (Wahoo)—Shrub or small tree to 20 feet. Purple flowers in June. Leaves have splendid fall coloring.

Size	Each	Per 5	Per 10
18-24 in.	30c	1.25	2.25

TAMARIX

ODESSA—A Russian variety, much superior to the African Tamarix. The foliage is bluish green, similar to the Colorado Blue Spruce. The flowers are of delicate pink color. Blooms in July, and often again in August and September. The branches are very graceful. Very hardy. Superb foliage, very delicate, beautiful flowers.

Size	Each	Per 5	Per 10
2-3 ft.	25c	\$1.05	\$1.85
3-4 ft.	30c	1.35	2.50
4-5 ft.	35c	1.65	3.00
5-6 ft.	40c	1.90	3.50

DOUBLE MOCK ORANGE

BRIDAL WREATH

Spirea Van Houttei (Bridal Wreath)

SPIREA VAN HOUTTEI—Commonly known as the Bridal Wreath, the most desirable and popular of shrubs especially for the cold Northwest. They are rapid growers producing flowers the next year after planting and continuing each spring, being a mass of white, borne on long, drooping stems. After the flowers are gone, they are followed by very attractive foliage remaining throughout the season. Blooming period about Memorial Day.

The Spirea Van Houttei is used as specimen shrubs, hedges or to cover objectionable spots in the ground. Can be trimmed or sheared to any height or desirable shape wanted. For hedge work they should be planted about 18 inches apart in the row. It is a veritable snow bank on each Memorial Day. Remember, this is absolutely hardy anywhere in the Northwest.

Heavy 2 and 3-year old.

Size	Each	Per 5	Per 10	Per 50
12-18 in.	15c	\$0.70	\$1.25	\$5.00
18-24 in.	20c	.90	1.50	6.50
2-3 ft.	25c	1.10	1.75	7.50
3-4 ft.	30c	1.25	2.10	9.50

ANTHONY WATERER SPIREA—A very popular low growing bush, becoming 2 feet high and constantly in bloom all summer. Flower clusters large, flat topped and of deep rose color. Heavy. 12-18 in., 25c Ea.; 3 for 65c; 5 for \$1.00; 10 for \$1.75. 18-24 in., 30c Ea.; 3 for 85c; 5 for \$1.25; 10 for \$2.00.

BILLARDI SPIREA—Tall, erect shrub with canes terminated by feathery plumes 5 to 8 inches long, of dainty pink color. A very hardy variety for the Northern Country.

1-2 ft., 25c Ea.; 3 for 65c; 5 for \$1.00; 10 for \$1.75. 2-3 ft., 30c Ea.; 3 for 85c; 5 for \$1.25; 10 for \$2.00.

DWARF FLOWERING SPIREAS—Dwarf, free-blooming, producing large panicles of blooms nearly all summer. Very attractive, has beautiful green foliage, and should be included in your foundation or shrub collection plantings. Height, 24 inches.

We have these Pretty Dwarf Spirea in Red or White—Prices: 6-12 in., 20c Ea.; 3 for 55c; 5 for 85c; 10 for \$1.50. 12-18 in., 25c Ea.; 3 for 65c; 5 for \$1.00; 10 for \$1.75.

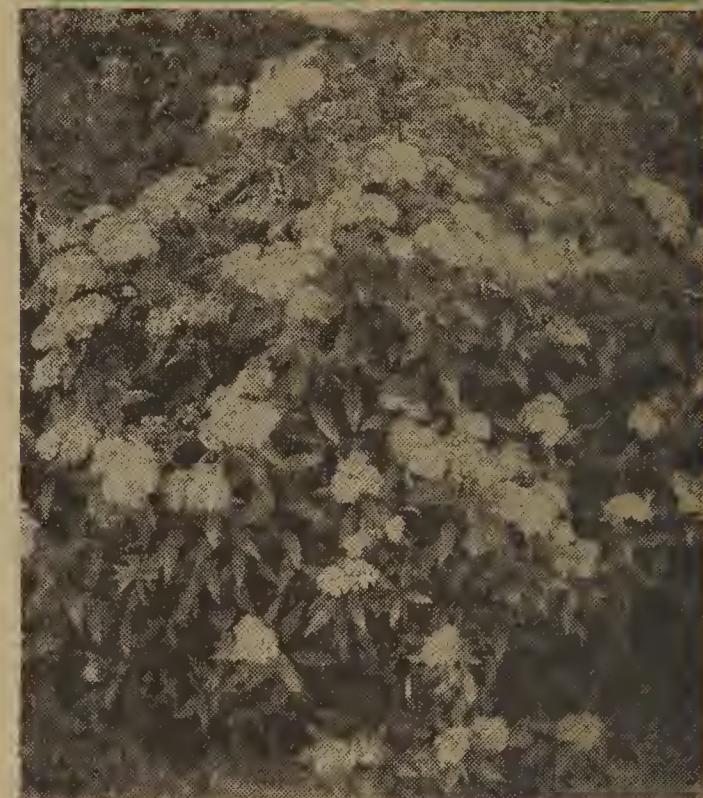

SNOW GARLAND SPIREA (Arguta)—The earliest blooming Spirea, growing 5 ft. tall. Slender and graceful form with delicate leaves. Pure white flowers are produced in great profusion. Prices: 2-3 ft., 45c Ea.; 3 for \$1.25; 5 for \$1.75.

GURNEY'S CHOICE FERNLEAF SPIREA

SPIREA (Thunbergia)—Covered in the early part of the season with clusters of feather white blossoms. This is one of the most ornamental of the Spirea. A valuable hardy plant.

12-18 in., 25c Ea.; 3 for 65c; 5 for \$1.00; 10 for \$1.75. 18-24 in., 30c Ea.; 3 for 85c; 5 for \$1.25; 10 for \$2.25.

GURNEY'S EVERBLOOMING PINK SPIREA

SPIREA FROEBELI—A strong growing everblooming shrub, somewhat similar to Anthony Waterer, but grows a trifle taller, with broader leaves. The flowers are more rose pink. Blooms from June till fall. The tips of the leaves are reddish-purple, making the bush much more attractive than the Anthony. Hardier than the Anthony Waterer. 1-2 ft., 25c Ea.; 3 for 65c; 5 for \$1.00; 10 for \$1.75. 2-3 ft., 35c Ea.; 3 for \$1.00; 5 for \$1.50; 10 for \$2.75.

★**ACHILLEA MILLEFOLIUM**—A cut-leaf Achillea with pink flowers. Beautiful in mass or border.

ACIILLEA THE PEARL—Beautiful pure white button-like flowers, borne profusely from early summer till fall. Height 1 foot. No garden is complete without it.

AQUILEGIA OR COLUMBINE—A dainty flower perched on long thin stems. A lovely garden or cut-flower, hardy. (See Picture.) We have them in the CRIMSON STAR, a beautiful red; CHRYSANTHA, bright yellow; the ROCKY MOUNTAIN, a blue dwarf, excellent for Rock Gardens; and also in MIXED HYBRIDS. Do not overlook the NEW CRIMSON STAR.

★ASTER CLIMAX—The true Aster. Bears beautiful daisy-like flowers in either white or blue. The DARK BEAUTY is all it implies and you may have them in MIXED VARIETIES that will do wonderful things to your fall garden.

★BABY'S BREATH—Every garden lover needs the Baby's Breath. Its small innumerable flowers borne on stiff stems are indispensable in gardens and cut-flower bouquets. We have them in WHITE, PINK, and the REPENS DWARF for borders and rock gardens.

BLEEDING HEART (Dicentra Spectabilis)—Its foliage, beautiful and graceful and the drooping racemes of flowers in the fern-like foliage make a beautiful garden bouquet. They attain a height of 2 feet. 30c ea., 5 for \$1.30.

★CACTI—For rock gardens or beds, the Cacti are indispensable. We have the PIN CUSHION small, round, with red rosettes of flowers.

★CARNATIONS—There are many members of this family and ALL are lovely and hardy. The real garden Carnation with its double flowers comes in RED, PINK, and WHITE. The spicy fragrant PINKS are excellent for borders or rock gardens.

CHINESE LANTERN—A very hardy perennial producing enormous orange colored fruit. Very attractive in beds, and excellent for winter decoration.

COREOPSIS—Here we have a flower that blooms from early summer until frost. It is never without a profusion of deep golden yellow flowers, daisy-like in shape, and excellent for cut flowers. They succeed well in any sunny location.

CUP AND SAUCER—Tall, erect growing plants completely covered with large cup-and-saucer-shaped flowers during late May and June. A perfect plant for the old-fashioned flower garden.

HARDY FERN—A shade and moisture loving plant with long, graceful leaves making a beautiful, bushy border on the north or east side of the house.

GRAND TORCHLIGHT GAILLARDI—Extra large flowers, golden yellow with maroon red center. A wonderful garden or cut-flower.

Also the BREMEN which is almost all red with just a thin border of yellow. The COMMON Gaillardia or BLANKET FLOWER is a profuse bloomer bearing flowers all summer.

HOLLYHOCKS—This old-fashioned flower needs no description. In PINK, RED, WHITE and YELLOW they make a showing along the border or garden line that can't be beat.

LARKSPUR (Delphinium)—These are the most faithful flowers of the Old Fashioned Garden. Tall stately spikes in shades of blue. Hardy and profuse in blossoming. We have the LIGHT BLUE BELLADONNA; DARK BLUE FORMOSUM; GOLD MEDAL HYBRIDS MIXED; and the BLUE GROTTO—The finest of them all.

GURNEY'S HARDY PERENNIAL PLANTS ARE ALL HEAVY ROOTED OUT-DOOR NURSERY GROWN

★BLUE FLOWERING FLAX (Linum)—All summer long, the plants reflect the sky in their multitude of lovely little flowers. Your garden is not complete without Linum.

ORIENTAL POPPY—Enormous flowers of a brilliant orange color, with black centers. These flame colored flowers catch the eye quicker than any other plant and are easily grown. 25c ea., 10 for \$2.00.

★JAPANESE BALLOON FLOWER (Platycodon)—Form neat branched bushes of upright habit, 2 to 2½ feet high, producing their attractive blue or white flowers from July to October.

ALASKA SHASTA DAISY—They range from the fully double to the single, and in color from pure white to pale lemon-yellow.

★SEDUMS—These plants are ideal for the rock garden. The GOLDMOSS covers the rocks with green and gold; The ANGLICUM does the same in pink; and SPECTABILE raises its stems with pink flowers, a foot above the ground.

SWEET WILLIAM MIXED—Charming, hardy plants, great favorites in the old-fashioned garden. Stems 12 to 18 inches high, flowers in greatest profusion in large round clusters at the top of the stems. Keep them cut and they will blossom all summer.

★YUCCA (Adam's Needle)—This is a hardy evergreen plant with long leaves; a tall stalk producing sometimes as high as 200 flowers of pure white; blooming period about June and July. The leaves remain green the entire year. A fine plant for sunny, exposed places and for the lawn.

We have many other Varieties of Perennial Flowers. Tell us what you want. The prices are the same.

Aquilegia or Columbine

Perennial Flowers are more beautiful and productive with each passing year

ROSES

GURNEY'S HEAVY HARDY ROOTED

Gruss an Teplitz

Summer Flowers from Early June
Till After the First Frost of Fall

RED HYBRID TEA ROSES

GRUSS AN TEPLITZ—Fiery red producing hundreds of flowers. Vigorous in growth, it often grows to four or five feet in height. It is the hardiest of the Hybrid Tea Roses and I hope you will have them in your garden this year.

E. G. HILL—Producing beautifully formed flowers on long stems. The flowers are dazzling scarlet as they open, shading to deep, pure red as they develop. Very fragrant.

RED RADIANCE—Bright scarlet, large, full, and very free. Erect branching habit and very perpetual. One of the finest and most fragrant Roses.

PINK HYBRID TEAS

PINK RADIANCE—A brilliant rosy-carmine, displaying beautiful rich and opaline-pink tints in the open flower.

YELLOW HYBRID TEAS

JOANNA HILL—A NEW rose with long handsome buds opening into a deep, very double bloom of deep yellow flushed with coppery-orange at the base. A magnificent everblooming rose.

WHITE HYBRID TEAS

K. AUGUSTA VICTORIA—A beautiful pure white rose, doubtless the finest White Hybrid Tea in existence. Vigorous grower, strong and free flowering. Produces from June till fall.

F. J. Grootendorst

EACH 35c

3 FOR \$1.00 10 FOR \$2.90

SHADINGS—HYBRID TEAS

BETTY UPRICHARD—A real beauty. Brilliant copper-red buds opening to brilliant orange carmine flowers showing light salmon reflex.

MARGARET McGREDY—A vivid scarlet-orange that stands out in the garden like a torch. Blooms cup shaped and double, produced very freely throughout the summer months. Delightfully fragrant.

TALISMAN—A remarkably colored rose. A combination of shadings of gold, apricot-yellow, and deep pink. The outside of the petals is yellow, gold, and pink. Don't miss Talisman.

HYBRID PERPETUAL ROSES

AMERICAN BEAUTY—Generally conceded to be the most grandly beautiful Rose in size, form, and color. Rich, red, passing to crimson, very delicately veined and shaded, and surpassingly fragrant.

FRAU KARL DRUSCHKI—This brilliant white type Rose has become renowned as the best snow-white Rose ever introduced. It is an extraordinarily strong grower, branching freely, and has the vigor and hardiness of an oak. Large, heavy foliage and magnificent flowers that are produced with great freedom on long, stiff stems. Hardy everywhere.

GENERAL JACQUEMINOT—A rich, velvety crimson, changing to a dark scarlet crimson, sometimes called the Black Rose. Is without rival in fragrance and richness of color. An old favorite.

GURNEY'S PINK NEYRON—One of the finest hardy Roses ever grown. It blooms unceasingly from June to November, on uniformly long, stiff, thornless stems, cup-shaped flowers 4 to 6 inches across. Color is a bright ruddy pink.

BUSH ROSES

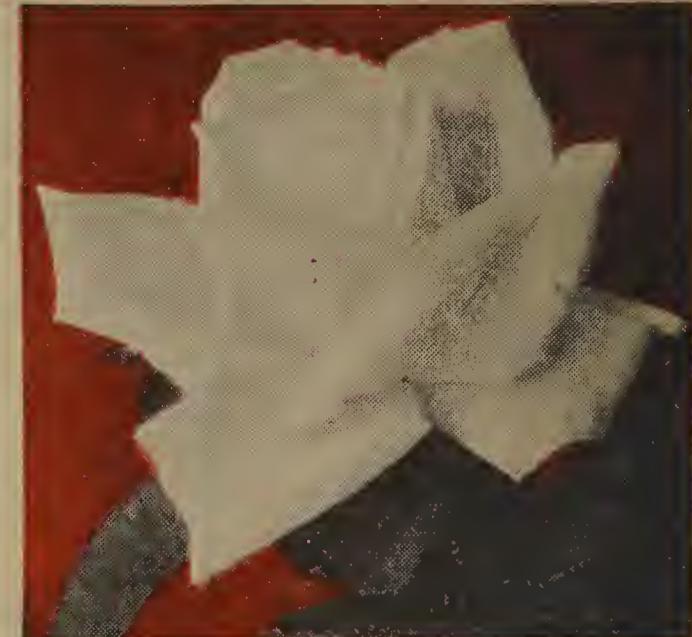

ENGLISH SWEETBRIER—This is the true Eglantine and highly valued for the spicy fragrance of the young foliage. The pink flowers come only in June but the fragrance of the foliage is with the plant always. Used in quantity for hedge planting, and equally good for single specimens.

RED JAPANESE ROSE (Rugosa Rubra)—Flowers beautiful, bright rosy-crimson and single, succeeded by large berries of rich rosy-red, which last on bushes until well into winter. Noted for its delightful pungent fragrance.

R. HUGONIS—This Rose gives us the only dependable yellow shrub rose. The long arching branches are closely set with lovely single flowers very early in the season, sometimes before June 1st in this latitude. The blooms are approximately 1 1/2 inches across and of clear bright yellow which does not fade to white. The foliage is finely divided, persistent, and on curiously thorned red stems. The plant is dependably hardy.

HANSA RUGOSA—Early flowering hybrid combining the ornamental qualities of its Rugosa foliage with the blossoms, beauty, and perfume of the Hybrid Perpetuals. Flowers large, cup-shaped, double crimson. Blooms throughout season.

ROSES

Frau Karl Druschki

BABY RAMBLERS

The Baby Rambler Roses are dwarf or semi-dwarf Rose bushes producing immense quantities of flowers from June until frost.

GOLDEN SALMON—Bright orange-salmon flowers in huge clusters. Growth is vigorous and bushy. First really orange Polyantha.

IDEAL—Dark velvety crimson outdoors. Compact and bushy with glossy leathery leaves and shapely trusses.

WHITE BABY RAMBLER—Pure snow-white double blooms in profuse clusters, making a sheet of white color, with a fragrance similar to Hyacinths. A compact, bushy grower of dwarf habit; foliage dark, glossy and finely cut; everblooming and hardy.

F. J. GROOTENDORST—This hybrid has the beauty and freedom of bloom of the Baby Ramblers, but with the rugged foliage and hardiness of the Rugosa. It is the grandest of the red flowered Baby Ramblers, and blooms continuously all summer. Splendid for low hedges or edgings.

CLIMBING OR PILLAR ROSES

CRIMSON RAMBLER—The famous crimson-cluster climber, so extremely effective when grown on pillars and trellises. Makes shoots 8 to 10 feet long in a season. Flowers are produced, from ground to tip, in large pyramidal clusters of thirty to forty.

PAUL'S SCARLET CLIMBER—The flowers, a vivid scarlet are of good size semi-double, very freely produced in clusters of from 3 to 20 flowers each on much branched canes, the plants being literally covered from top to bottom with bloom.

PINK DOROTHY PERKINS—Clear shell pink with flowers borne in clusters; full and double. This is without question one of the very finest of all climbing roses.

MME. GREGOIRE STAECHELIN—(Spanish Beauty). A plant in full bloom is one of the most beautiful sights we have ever seen. Long-pointed buds of crimson open to great, urn-shaped flowers of iridescent pearl-pink, with splashes of ruby-carmine. Deliciously fragrant.

GURNEY'S HARDY PHLOX

PHLOX PRICES 3 for 55c; 6 for \$1.00
10 for \$1.25 All Varieties except Africa

AFRICA—Brilliant carmine-red with blood-red eye. Well-shaped flower heads composed of large florets. Good strong stems. 25c each; 3 for 65c; 6 for \$1.10.

ENCHANTRESS—Bright salmon-pink with dark eye, strong grower, rich green, glossy foliage.

INDEPENDENCE—Pure white. Large clusters. Vigorous grower. Long season of bloom. 24 inches high.

JULES SANDEAU—Large, fine, very free flowering; pure watermelon-pink; rapid grower, one of the best varieties in cultivation. July-August. 20 inches.

LA VAGUE—An improvement over older varieties of similar color with immense conical heads. Produces in great profusion. Lavender-pink.

Trial Ground Mixture of Phlox
Each 15c; 10 for \$1.20

HARDY MOUNTAIN PINK

PHLOX SUBULATA—Light or Dark Pink—An early spring-flowering type, with pretty moss-like evergreen foliage, which, during the flowering season, is hidden under the masses of bloom. An excellent plant for the rockery, the border, and invaluable for carpeting the ground for covering graves. Each, 20c; per 12, \$1.70.

GURNEY'S BARGAIN COLLECTION

10 FOR \$1.25 POSTPAID

1 Phlox Subulata FREE

PROSPERO—46 inches tall. A gorgeous flower of large size. Color soft violet with falls of velvety pansy-violet. A magnificent Iris.

***QUEEN CATARINA**—36 inches tall. FRA-GRANT. A delightfully fascinating flower of pale lavender-violet, almost orchid. In brilliant contrast is the orange-red beard.

***SEMINOLE**—LATE, a Farr Masterpiece. No other compares in BRILLIANCE of color. A Rich Velvety Crimson.

***SHIKINAK**—36 inches tall—FRAGRANT. A handsome clear yellow and handsome golden beard.

***SUSAN BLISS**—40 inches. A Sensation. A most EXQUISITE Iris—Orchid-pink in color.

***L. A. WILLIAMSON**—42 inches tall. "The World's Best Iris." Standards soft violet, falls pansy-violet with a golden throat. One of the BEST GARDEN IRIS.

IRIS—Germanica

PRIZE WINNING IRIS

AT POPULAR PRICES: 30c ea.; 4 for \$1.00;
7 for \$1.50; 13 for \$2.50.

"Beside these Iris, ordinary varieties become Pygmies." They are among the most Gorgeous Colors of the Hardy Flowers—many are fragrant with the odor of delicious spices. Many grow forty inches tall . . . and more.

DO NOT FAIL TO INCLUDE SOME
OF THESE IN YOUR EARLY ORDER

Prize Winners are Marked with a (*).

DOROTHEA—Large blue-white flowers faintly blushed lilac.

***GOLD IMPERIAL**—33 inches tall, the finest deep yellow with a brilliant orange beard. Perfect form.

IMPERATOR—A fine large red toned Iris that gives a striking garden effect.

LAFAVORITA—38 inches tall. A rugged hardy variety with fine large flowers of a uniform blue-purple shade.

***LORD OF JUNE**—40 inches tall, FRA-GRANT, gigantic in size, standards soft lavender-blue; the falls violet-blue.

***MORNING SPLENDOR**—36 inches tall, FRA-GRANT. LATE. "The finest American Iris." Has won a flock of National Medals. Large, rich, red toned flowers of fine form borne on tall stout stems.

***OPERA**—This is one of the richest violet-RED Iris. Even the beard is RED. The falls are like a piece of velvet. Blooms profusely.

Hardy—CHrysanthemums—Hardy

KOREAN—They Blossom in September—Before Frost

BLAZ-O-MUM—A hardy early blooming "Mum" that literally bears hundreds of bright pink flowers. The second year it has borne over a thousand!! Bushy—it makes an excellent mass flower or for borders. 40c each; 5 for \$1.75.

CLIO—Dwarf compact plant of pleasing habit producing masses of deep carmine rose duplex flowers.

PRICES OF KOREAN MUMS
(All except Blaz-O-Mum)
30c ea.; 5 for \$1.25; 10 for \$2.25

HESTIA—Bushy plants of medium height. The color is a very delicate rose pink with a white halo around the small yellow disc.

JUNO—Very dwarf, producing an abundance of single flowers opening a coppery red.

NIOBE—Flowers over 2½ inches in diameter of a clear glistening white with yellow disk are freely produced fully covering the plant.

PSYCHE—Wonderfully dainty 4 to 5 inch single blooms. Color, a clean, lively shell pink.

SAPPHO—Compact dwarf plant covered with good sized pure yellow single flowers.

THALIA—A compact bushy plant. The flowers are of a lively orange shade and excellent form.

VESTA—A plant of great vigor literally covered with flowers over 2½ inches in diameter of a deep golden orange shade, almost a duplex.

The Lily—Queen of The Garden

MADONNA LILY "The Hardy Easter Lily"

3 to 4 feet. Probably the hardiest and one of the loveliest. Flowers pure white. Their delicious fragrance is not equalled by any other Lily. Price 30c each; 6 for \$1.50.

RED RUSSIAN

LILY ELEGANS—This is one of the best of the hardy Lilies—thrives in almost any soil. Is highly recommended for general planting. Each bulb produces many Lilies on a stem—color deep brick red, slightly spotted. We recommend this Lily to all Northern planters. Each 25c; 5 for 90c.

THE DAY LILIES

ORANGE DAY LILY

KWANSO DAY LILY—Orange with darker shadings. Each, 20c; per 12, \$1.00.

YELLOW DAY LILY

FLAVA DAY LILY (Yellow)—Has long, narrow leaves, produces many tall stems of fragrant waxen pure yellow flowers in June and July. Thrives in any good soil. Fine for borders. Each, 15c; 5 for 50c; 12 for \$1.00.

REGAL

THE REGAL LILY—A novelty of rare production and wondrous beauty. Experiments prove this new Lily to be hardier than most kinds. The flowers are white, slightly diffused with pink, with a beautiful glow of canary yellow at center, which continues part way up to the trumpet. Its perfume is exquisite, not oppressively heavy like some types, but the sweet refreshment of Jasmine. In the garden

it should bloom early in July. Can be raised in pots. We furnish large bulbs that bloom first season. Price: 20c each; 8 for \$1.00.

This well-known, old-fashioned flower has become very popular the last several years, and is now planted extensively in all gardens. On account of its extreme hardiness, it is one of the most valuable of all Lilies. Grows three feet tall with several flowers on each stem. Flowers orange with black spots. Price: 15c ea.; 10 for \$1.25.

DOUBLE TIGER LILY

Same as the Tiger Lily but has very attractive double flowers. 15c ea.; 10 for \$1.25.

LILY OF THE VALLEY

The Lily of the Valley thrives and throws up its beautiful, modest, fragrant white bells in any kind of soil. Will also adapt itself to pot culture in winter. Its delicate, permeating fragrance makes it especially desirable. Per 6, 50c; per doz., 85c; 50 for \$2.75; 100 for \$4.75.

Water Lilies GIVE LIFE TO THE GARDEN

SUNSET

PAUL HARIOT—This variety gives variation of color throughout the season. Flowers opening in the spring a clear yellow suffused with rose changing to a deep peach on the second and third day and to an orange on the fourth day. 85c ea.

YELLOW

CHROMATELLA (Marliac Yellow)—Bright yellow with broad curving petals. It blooms over the entire spring and summer months producing an endless succession of blossoms. Thrives under all conditions. 65c ea.

PINK

PINK OPAL—An attractive deep pink of medium size, gracefully cup-shaped and quite fragrant. Especially adapted as cut flowers. Flower stands well above the water. 65c ea.

WHITE

MARLIAC WHITE—Snowy white petals with bright yellow stamens. The fragrant blossoms are five to six inches in diameter. Sepals are tinted with pink. It is a continuous bloomer. 65c ea.

RED

CONQUEROR—Flowers cherry red deepening with age. Stamens orange yellow, sepals almost white; flowers eight inches across borne continually during the entire spring and summer months. One of the showiest of reds. \$1.25 ea.

James Brydon

WATER POPPY—The blossoms resemble the California Poppy. Each plant throws out many floating runners bearing large blossoms all summer long. 15c ea.; 5 for 50c.

WATER HYACINTH—Shiny dark green leaves, orchid-like flowers. The plants float on the water but will produce more flowers when not allowed to drift about. 10c ea.; 5 for 35c; 10 for 50c.

WATER IRIS—We have the yellow and the light blue varieties. They bloom the entire season. Thrive in water up to twelve inches and also in a moist border. 20c ea., 5 for 85c.

5 "Glad" Bulbs FREE

DECORATIVE DAHLIAS

AIDA—A beautiful deep velvety crimson blending to dark maroon at the center, often with 2 to 4 large blooms to a stem.

BONNIE BRAE—This is one of the largest Dahlias in existence, often producing flowers 8 and 9 inches across of true Decorative type. Soft rose-pink blending to cream and pale yellow at the center.

BASHFUL GIANT—One of the largest flowering Decorative Dahlias in existence. Its gigantic blooms are excellent for exhibition, growing under ordinary conditions 6 to 9 inches in diameter and 3 to 5 inches thick. An exquisite apricot with buff or gold tint.

BOB PLEUSE—A novelty with deep crimson flowers striped, splashed and blotched with reddish-white. Long curved waxy petals.

CHARLOTTE ALEXANDER—A white blended with light purple. A dwarf for borders, bushy and a heavy producer.

ELLINOR VANDERVEER—Clear, glistening, pure pink flower. One of the best all round Dahlias.

JANE COWL—Fairly tall with vigorous dark green leathery foliage; straight, strong stems holding monster blooms of glistening bronzy buff and salmon shades proudly aloft with a beauty that stops you and makes you look again.

JERSEY'S BEAUTY—Undoubtedly the finest pink Dahlia in existence. Hubbard wrote: "When a man builds a better house or makes a better mouse trap than his neighbor the world will make a beaten path to his door." Jersey Beauty has a beaten path to its door. It needs no further introduction.

PRIDE OF CALIFORNIA (Decorative)—Mammoth rich American beauty red. Very tall, vigorous grower, flowering continuously from early summer until late fall. Its perfectly formed flowers are produced on strong stems well above the foliage. An exceptionally large decorative flower.

CACTUS DAHLIAS

DADDY BUTLER—American Beauty rose color. The petals are so rolled that the reverse side shows with a lighter color. An extremely good cut-flower.

CITY OF NEW YORK—Pale golden amber with salmon blushes and tints. Extra large flowers on long strong stems.

LAWINE—An old time favorite white and a mighty good Dahlia for bouquets.

CHEMAR'S MASTERPIECE—A huge flower of orchid-pink. Petals long and narrow. Stems long, holding the flowers at a graceful angle.

CHOICE MIXED DAHLIAS

A "Trial Ground" Mixture of many different colors, types, and varieties. These are ideal for the general garden and a bargain. **Mixed Dahlias**—5 for 60c; 12 for \$1.00; 25 for \$2.00.

FULL SIZE FLOWERS — THE FIRST YEAR

from Gurney's
BIG BULBS

LOS ANGELES—The "cut and come again" glad. Large, perfectly formed, beautiful shrimp pink flowers with a glowing orange-carmine blotch in the throat. It is remarkable for its ability to withstand cutting and constantly throw forth new blooms.

Los Angeles
(Dark Pink)

GURNEY'S CHOICE GLADIOLI

We are offering the finest varieties chosen by
The Gladiolus Society of America
You will find none finer and
THEY ARE PRICED TO SELL
to every lover of Flowers

Prices—10 for 55c; 25 for 85c; 50 for \$1.55;
100, \$2.95. Unless otherwise priced.

ALBANIA—Glistening pure white without noticeable throat or other markings, clearest white yet produced, with wide fringy petals and long, full spikes.

ALICE TIPLADY—The Queen of the Primulinus type. Large, open flowers gracefully placed on very long stems. A soft coppery bronze shaded buff. In color, texture, and beauty it is unsurpassed. Plant medium tall with long slender flower spike.

APRICOT GLOW—This variety is one of our few beautiful apricot color. A choice shade and a Gladioli that is among the best varieties. Early, tall and straight.

AVE MARIA—Large flowering. Light blue with small purple blotches. Seven or eight blooms open at one time. Excellent facing and remarkably good spike. Ea. 10c; 6 for 40c; 20 for \$1.00.

BAGDAD—Very vigorous plant. Tall spike with 6 or 7 very large blooms open. We believe this the best smoky variety ever originated. Ea. 15c; 6 for 50c; 20 for \$1.00.

BERTY SNOW—Pinkish lavender often flecked darker; 7 to 10 large well placed flowers on a long spike. Considered one of the finest lavenders. Ea. 10c; 6 for 40c; 20 for \$1.00.

BREAK OF DAY—Large flowers of a very fine shape and color. A most brilliant La France pink. Ea. 8c; 5 for 25c; 25 for \$1.00.

DR. F. E. BENNETT—Fiery scarlet with fine white lines in the throat. Very large blooms with many open at once. A real red and one of the best "Glads" grown.

DR. NELSON SHOOK—A beautiful ruffled deep tyran rose of dark shade, strong grower, large strong spikes.

EMILE AUBURN—Smoky bronze. Large cherry red blotch. Large flowers, very prolific.

JOE COLEMAN—A sturdy standard red, strongly ruffled. Cherry crimson with rosy white throat and midribs, lower petals blotched orange with a mahogany center and overbloom.

KUNDERD'S YELLOW WONDER—Clear medium yellow, darker throat. Tall spikes, large blooms.

MME. MOUNET SULLY—Milk white of waxy texture with brilliant scarlet blotch in throat. Very attractive.

MAIDEN'S BLUSH—Delicate shell-pink. An extra good cut flower.

MING TOY—Very large flower of finest form. Tall plant. Showy deep buff-yellow throat. A sensation.

MRS. C. F. PETERS—Late. Beautiful rose-lilac, with purplish blotch in throat. Resembles an orchid in color. Many large flowers are open at once on a long, erect stem. A grand variety.

MRS. VAN KONYNENBURG—Best light blue we have grown. Tall, erect spikes, strong grower.

PELEGRIINA—Early. Large deep blue. Six or more well placed blooms open with all the rest of the buds on the spike showing color which gives the appearance of a very large spike of bloom. Ea. 15c; 5 for 55c; 10 for \$1.00.

PICARDY—First Prize Winner, 1933 Century of Progress! A ravishing apricot pink overlaid with a silvery mist, feathering of slightly deeper color in the throat. The florets are extremely large, slightly ruffled and of a heavy waxlike substance. There are 6 to 10 of these magnificent blooms open at one time, which are well placed on a graceful spike. Ea. 10c; 6 for 40c; 20 for \$1.00.

OUR "BANNER RAINBOW" COLLECTION

Large Blooming Size Gladioli Bulbs

Assorted colors, selected from varieties offered on this page, and other varieties that we are growing.

50 FOR ONLY.....\$1.19 100 at....\$2.00

TUBEROSES

EXCELSIOR PEARL—This variety is characterized by its short, robust stem and long spikes of flowers, perfectly double and twice the size of the common Tuberose. Spikes frequently bear 30 to 50 flowers. Always wax-like and pure white. Large bulbs. 5 for 25c; 12 for 50c; 50 for \$1.90.

LARGE-FLOWERING CANNAS—Strong Divisions

10c each; 6 for 55c; 12 for \$1.00; 25 for \$2.00.

GLADIATOR—Yellow spotted red. Excellent growth. Light green, silver edged foliage, of robust habit. Heavy bloomer. 4½ feet.

GOLDEN GATE—Large flowers of pure gold richly rayed with orange-crimson. Of sturdy growth, with bright green leaves. 4 feet.

KING HUMBERT—Large heart-shaped leaves of bronze. Color, velvety orange-scarlet flecked carmine; rose tinted. 4 to 4½ feet.

YELLOW KING HUMBERT—Sturdy grower; floriferous. Immense flowers rich golden yellow spotted heavily with vermillion. Bronze leaves. 3 to 5 feet.

STATUE OF LIBERTY—Bronze foliage. Flowers blazing flame red. Height 6 to 7 feet.

WYOMING—Purple foliage. Blossoms orange colored, true orchid shape, with large rounded petals. 7 feet.

DWARF CANNAS

12c Each; 5 for 50c; 12 for \$1.00; 25 for \$2.00.

AMBASSADOR—Fine large red flower. Bronze foliage. 5 feet.

CITY OF PORTLAND—Green foliage. Very good growth; beautiful bloom. Color light salmon or rose-pink. Profuse bloomer. 4 feet.

DWARF HUNGARIA—Extra fine pink. Green foliage. 4 feet.
